

The Red-Green Jihad: ISIS *Tactics in Antifa Protests*

Introduction:

The following dossier is the result of open-source intelligence analysis targeting Islamic State (ISIS/Daesh) infiltration and exploitation tactics directed at Western anti-fascist (Antifa) and left-wing protest movements. The material reviewed, drawn from leaked jihadist manuals (2015–2017 era), propaganda distributions, internal communications, and public sources,

exposes a deliberate strategy of embedding sleeper cells and lone actors into protest scenes across Europe and the West.

This is not presented as formal hierarchical control by ISIS central command over Antifa structures, but as ideological and tactical convergence: jihadists are instructed to hide their identities, blend into

anti-fascist counter-protests, exploit chaos against neo-Nazis and state authorities, and escalate toward insurgency and jihad. The 2015–2017 guide *How to Survive in the West: A Mujahid Guide* serves as the primary doctrinal blueprint.

This dossier maps the guide’s instructions, key propaganda distributions, geographic patterns in Europe (especially France), and hybrid network overlaps. The behavior documented reveals pragmatic exploitation of shared anti-Western goals despite surface-level ideological clashes.

Furthermore, rather than operating solely through overt ISIS networks, the strategy involves infiltrating or paralleling anti-fascist counter-protests to sow division, escalate clashes, and advance jihad under the cover of broader unrest. This aligns with observed Red-Green tactical overlaps against common enemies (nationalist movements, police, Western governments).

Islamic State Sleeper Strategy in the West:

The anti-Western jihadist network known as the Islamic State (ISIS/Daesh) promoted the manual *How to Survive in the West: A Mujahid Guide* around 2015–2017. Circulated via propaganda channels, it instructs supporters in majority non-Muslim lands to operate as independent sleeper cells with only ideological ties to ISIS.

Key elements include:

- *Living a double life as secret agents.*
- *Hiding extremist identity to avoid watchlists.*
- *Acquiring weapons, bomb-making skills, and money by any means.*
- *Activating during social unrest, particularly protests.*

The guide's War in Protests section explicitly directs activation alongside anti-fascist groups:

When Muslims and Mosques will be attacked by neo-Nazis in protests, Muslims will do counter-protests alongside with anti-fascist groups. This is when your role as a secret Agent will be activated. ... As violence erupts between neo-Nazis and Muslims; Muslims and their allies will wear masks and bandannas, and attack with the skill set and arms they have

collected. The huge crowds in the protests and instability will make it difficult for police to know who is doing the attacks... This is how the future Jihad in Europe will begin.

It further details revenge bombings on enemy headquarters, neighborhood takeovers using men, weapons and trucks, alliances with friendly non-Muslims, and training youth in private while masked.

The Mujahid Guide

The following section contains excerpts and analysis from the Islamic State (ISIS/Daesh) manual “*How to Survive in the West: A Mujahid Guide*” (circa 2015–2017). This document was circulated in jihadist circles as an operational handbook for supporters living in Western countries.

Content Warning:

This material includes explicit instructions on hiding extremist identity, acquiring weapons, manufacturing expl*sives, exploiting protests, and conducting jihadist operations. It is presented solely for open-source intelligence, journalistic, and counter-terrorism research purposes.

Important Legal Disclaimer:

This dossier does not endorse, promote, or provide instructions for any illegal or terrorist activity. Reproduction or misuse of the guide’s content for unlawful purposes is strictly prohibited. All sensitive operational details (such as full b*mb-making formulas) have been redacted where appropriate. The excerpts are included to document ISIS’s documented strategy of embedding into Western protest movements and to highlight the real-world threat of jihadist exploitation of civil unrest. The version of the Mujahid Guide reviewed for this dossier had already undergone significant redaction by previous handlers. All highly sensitive and illegal content, particularly detailed expl*sives manufacturing instructions, chemical formulas, deployment methods, and specific operational techniques, were redacted prior to our access. New Guard Intelligence does not possess, distribute, or endorse full versions of these materials. The excerpts shown are limited strictly to contextual and ideological content for intelligence and documentation purposes only.

A MUJAHID GUIDE
(2015)

Foreword:

A real war is heating up in the heart of Europe. Many Muslims are putting a lot of effort into showing the world that we are peaceful citizens, we're spending thousands of Euros to do Da'wah (invitation to Islam) campaigns to show how good we are in society, but we're miserably failing. The leaders of disbelief repeatedly lie in the media and say that we Muslims are all terrorists, while we denied it and wanted to be peaceful citizens. But they have cornered us and forced us into becoming radicalised, and that will be the cause of their defeat and be the cause for the conquest of Rome.

The people who own the media have had Europe and the Western world as their stronghold for over 1000 years, they do not want Islam to rise in their stronghold. They want to keep their authority, their adultery, wine and money and do not want to lose it. So they are doing a multibillion dollar media campaign to stop the Islamic State in the Middle East, and a multibillion dollar media campaign to stop the rise of real Islam in the West. All the major alcohol, gambling and haraam companies are funding this project because if Islam rises in the West, they will lose everything. It is a matter of life or death for both, only one will survive. Allah (God)'s last Messenger Muhammad (peace be on him) promised us we will win and finally take over Europe's capital – Rome, but only after we have taken Persia (Iran). [Saheeh Muslim 54/50]

As Muslims, we need to be prepared for what is coming our way. Media propaganda is the first step to justify what will happen later. So if Muslims are portrayed as evil terrorists, then the mass killing which happens to us afterwards will not be a big deal, in fact it will be a sigh of relief for the fooled masses of people.

So what are Muslims supposed to do? Are we supposed to petition to a deaf 'free press' because our Prophet is being insulted day and night? Are we supposed to sit back until the police raids our homes for having the Quran and surah al-Tawbah on our shelves?

We as free Muslims cannot sit back and get locked up for something which is not a crime in the sight of Allah. In the Ummah (Nation) of Prophet Muhammad (saws), we have been taught to physically fight to defend ourselves and our religion, no matter where we are in the world. If you disagree with Armed defence, and you are a pacifist, then remember that you will be imprisoned for your religion now or in the future, then ask yourself if you will be able to maintain your Iman (Faith) there. Those who go on the offensive earlier on will learn how to react in different situations, and will more likely receive martyrdom (*shahadah*) instead of long-term imprisonment.

This book is a guide for the Muslims who are living in a majority non Muslim land, or a country where the rulers are harsh towards the believers. It will explain to you the different scenarios you may get into and how to react. It will teach you how to be a secret Agent who lives a double life, something Muslims will have to do to survive in the coming years.

Introduction:

A secret agent always lives a double life, he has a Public life and he has a Secret life. His public life is to act normal, do his daily chores, and portray himself as a normal citizen in society. His Secret Agent life is totally different, in this life he will look different, and act different because he has to complete missions secretly without exposing his true self to anyone.

A Spy person recruited by Western intelligence agencies will not be extremely beautiful, nor extremely ugly, he is chosen because he looks normal. If you saw him, you wouldn't even notice anything about him which stands out. The goal of a Secret agent is to get as much information from people or places, without them knowing he was ever there. The agent will learn different skills to get the maximum amount of information, and he will also use modern technology to help him in this goal.

Israel has secret agents throughout the world called Katsa, they spy, but also attack undercover. They have different roles. Some of their jobs might involve to infiltrate into enemy territory, and stay there to spy on communities by living near them and updating the Mossad intelligence about how the people there act. I.e. do those people want war? If yes, which people exactly, where are the neighborhood storing their weapons etc. The Katsa may even go to a country under the disguise of being professional Engineers, and get involved in building projects. So when a bridge is being built in the Muslim world, they may install bombs within it secretly so that Israel can destroy it years later in the future if they need to. They may even pretend to be businessmen. Whatever role they are required to play, they will gain as much knowledge about it before acting like a real professional in that field.

Being an undercover agent requires knowledge and skills. In this book, you will be taught these skills. You will be taught; how to live a double-life, how to keep your Secret life private, how to survive in a threatening land, how you can Arm and strengthen the Muslims when the time for Jihad comes to your country, and neighborhood.

In simple terms, from this guide book - you will learn how to become a Sleeper-cell which activates at the right time when the Ummah needs you.

“And rely fully on Allah, if you truly are believers!” (Quran 5:23)

Chapter 1: Hiding the Extremist identity:

The biggest priority for you as a Muslim living in a majority non Muslim country is **to hide your Muslim identity in a way that you don't suddenly seem 'different' and 'radicalised'.**

If you are a convert to Islam, you should try to hide your Islam as much as possible. You should ofcourse pray the Jumma (Friday) prayer in congregation (Jamaa'ah), however you should then quickly leave without talking to people. Although you're trying to hide your Islam - you should still put the effort in avoiding the haraam (forbidden) things. By not showing you're Muslim, you've already excluded yourself from being in the 'Terrorist watchlist'.

If you are a born Muslim: then don't make it too obvious you have become a practicing Muslim. For example: if you haven't grown a beard, don't grow it now because you will bring unwanted attention onto yourself. **Mujahideen in Muslim lands remove their beards for deceptive purposes.** They may simply grow a basic small goatee beard to fulfill the obligation, while other people think they're growing it as a stylish beard. Remember some scholars say the beard (Arabic: Lihya) is the hair on the jaw lines and chin. Those scholars therefore do not consider the hair on the cheeks and neck to be the beard and therefore these can be removed. And Allah knows best.

Practising Muslims: if you are a practising Muslim, and you have a beard already, then don't remove it if it will bring unwanted attention to yourself. I.e. your family, friends and colleagues will get more suspicious why you removed it, forcing them to spy on you more.

The main thing for everyone of you is to bring the least amount of attention onto yourself. To make yourself look normal.

To sisters: if you wear Hijab and go to a place where Muslims are searched (ie. Airports), then do not wear a black Hijab, **but a colored one instead.** Muslim women who wear black Hijabs are searched more in airports than those wearing other colored Hijabs. This is merely due to stereotype of fully black clothed Muslim women being stricter in their religion.

Note - Female Muslims will wear brighter colors to appear more friendly, like a wolf in sheep's clothing.

Disguise:

As a Secret Agent, you will have to do many things and meet many people. You do not want anyone to know your true identity, so you have to disguise yourself in different ways so your real self is not exposed. Below are some ideas:

Dress like them:

Ibn Taymiyyah said in *Iqtida al-Siraat al-Mustaqeem* p282:

'The same holds true even for today. **Were a Muslim to find himself in the Land of War (*dar al-harb*), or the Land of Unbelief (*dar al-kufr*) without there being actual war, he is no longer under the injunction to differ from them in their external modes of life, lest it should prove harmful. In fact, it might be recommended – incumbent, even – for a man to at times participate in their external modes of conduct if, in doing so, it will be in the interest of the faith:** either to invite them to the religion, to learn about their internal matters so as to apprise the Muslims of them, **to ward-off any harm they may be considering against Muslims, or other such goals ...** So conforming with, or differing from, them varies according to time and place.

Change your first name or pick an Alias: When a Muslim goes out in public, he wants to fit into society to make himself look as normal as possible. Remember this isn't because he fears his Islamic identity, **but he is doing this so he is not suspected of being an outsider enemy.** This brings on less suspicion towards you.

Many people who need to get their jobs done without problems choose an Alias for themselves. An Alias is a different name (i.e. Al instead of Ali, or a neutral name like Adam.) This brings many benefits in that you are;

i - **Keeping your real identity a secret,** **saving yourself** from potential danger **incase people find out about you.** (Choosing a false name is really important in the dark underworld as will be seen in a later chapter.) When Mujahideen join the Jihad, they are **not allowed to tell their real name to anyone incase their friends are captured and interrogated and reveal the real name of the brothers to the tyrants.**

ii - **Making yourself look more friendly** and open minded to the Western public. For example: Muslims who call themselves by a Western nickname gain more acceptances by their non Muslim colleagues. This can be an **advantage because it reduces their suspicion of you as they consider you more open minded and less 'extreme'** (religious.)

- **An Alias gives you more opportunities**, (i.e. people with Islamic names get less jobs than those with Islamic names.) This Alias might be important if you need an important position in a specific job. I.e. **Mujahideen send people to work in power plants or enemy governmental positions to spy on and leak reports to the Islamic State leadership (as double agents.)**

Changing your look: Depending on which people you meet, you will have to change your look. Some European members of the GIA (Groupe Islamique Army) wore different colored contact lenses in the 90s to change their look in front of fellow members. (He only removed them when he went back to his real home). I.e. if you wear green contact lenses and you are from a race where people don't usually have green eyes, this will stick out and people will have described you wrongly to the police. This can be a good thing.

Changing voice: when you are talking to a specific group of people anonymously, you might change your voice using a Voice changer hardware or software.

[REDACTED]

You might put a cloth over the mic of the phone to make you sound different, or you might simply speak more deeply or slowly, or with a different accent. The main priority in changing your phone and voice is for privacy or to confuse voice recognition softwares when contacting different types of people.

Changing your identity is important because you will come across different people in this struggle; you want to hide your true identity from people who don't know you so no-one in your Secret Agent life can ever describe you accurately if they ever got caught.

[REDACTED]

If you ever did meet with anyone, and you suspected them of being a spy or double agent, you would sit in a car earlier than the meeting time and look from a distance before meeting to see if anyone was in a car with them or if someone is following behind them or not.

Chapter 3: Earning Money:

Before any real Jihad can be fought, Muslims require money.

There are many ways Muslims can earn money. To any non Muslim reading this, you may be shocked because Muslims are really the most careful about not earning haraam (forbidden) money. However, in cases of necessity and for survival, Muslims are permitted to get money from ways which are not normally allowed.

In Islam, there are no countries or divisions amongst mankind. **All people in the world fit into one of 3 types of categories:**

- 1 - Muslims.
- 2 - Non Muslims who you have a legitimate covenant of peace with.
- 3 - Non Muslims

In Islam, the **blood (life)**, wealth, and honor of a Muslim is sacred. It cannot be harmed in any way (except by the Islamic ruler who may punish them if they commit a crime in an Islamic Hudood law.)

The Non Muslim who has a legitimate covenant with Muslims, his blood, wealth and honor cannot be harmed either. (We have already discussed in Chapter 2 how the **Covenant of an aggressor enemy government becomes invalid simply by them criminalizing Muslims.**)

The Non Muslims - those who do not have a covenant with the Muslims, **their blood**, wealth and honor is NOT protected.

The Messenger of Allah (God), Muhammad (saws) said (meaning):

I have been commanded to fight the people until they say: Laa ilaaha ilAllah (there is no god but Allah), then whoever said Laa ilaaha ilAllah - his wealth and self is protected, except where it is justified by law, and their affairs rest with Allah. [Sahih Muslim 1/33]

Based on this hadith, leaders of Al-Qa'idah and the Islamic State have said that **Muslims are allowed to kill non Muslims** in retaliation to what the disbelievers are doing to Muslims in Muslim lands with their; armies, drones and fighter jets. **The blood of these disbelievers is not protected.**

If the **non Muslims blood is permitted by such scholars**, then no doubt even their wealth is.

Making allies – the secret white convert

There are thousands of white converts to Islam in Europe who want Muslim friends, but they find it difficult to show their family and friends they have converted. So they sit inbetween, being neither here nor there. They are confused and desperate because they feel their white skin color is a disadvantage and brings too much obstacles in their lives, whereas in reality it is a major advantage. If you can befriend them and teach them the religion, they will be extremely happy they have a stronger purpose for Allah in Europe than their Ethnic minority Muslims living in Europe. The White convert Muslim will realize his destiny of being European is greater. He can use it to do undercover Jihad. He could spy on Non Muslim leaders who are a threat to Muslims, pretending to be a strong supporter whereas his loyalty is to Islam and the Muslims. He could be a bodyguard of leaders, and then assassinate them, or tell of their locations, and timetables.

So befriend good decent white people who are dissatisfied with their governments, be close to them and offer them support and guidance in life. Talk to them about their family life, and you too can tell about your family life. Remember that a Special Agent tries to make a cover-story which resembles his real life most, he just hides the sensitive details. This closeness to the reality technique is done so he can't be exposed for contradicting himself in the future, since his cover story is almost the entire truth. A Muslim not telling the full truth (even to other Muslims) is not a lie, and this is allowed for the believer in a state of war.

If these people open up to you, you can decide if you want to tell them about Islam. You will tell them enough information to satisfy what service you require off them, but not more than that. I.e. A political public speaker has newly converted to Islam, you will tell him what points he can address in his speeches, but you will not be teaching him the other sensitive areas of your Agent life.

Chapter 8: B0mb Making at Home:

A b0mb is a device which will explode (all the pieces within it will fly in the air). How does it work? **There are 4 necessary parts;**

There are 3 main types of B0mbs which [REDACTED] taught in their [REDACTED]

But We will study 6 types here, and summarize them in easy English so you can make them within minutes easily at home.

- 1 – Molotov Cocktail (Petrol b0mb)
- 2 - Nail b0mb
- 3 – Microwave Airbag b0mb
- 4 - Gas cannister b0mb (in cars or buildings)
- 5 - Remote controlled b0mb (activated from anywhere in the world.)
- 6 – Car b0mb

Note: if you ever practice any of these, practice them with trial and error on a small scale first to make sure you are doing them right.

2 - Nail B0mb:

He made a nail b0mb

The gases released would be in a closed jar, and when the gases built up - they would put a lot of pressure in the jar, causing it to combust and explode. The glass of the jar and the nails inside would shoot in every direction and harm those close to it. This is why they are so dangerous, and this is why he intended to light it up next to a Mosque and run off.

3 – Microwave Airbag b0mb:

4 – Gas Cannister in Car or Building

Explosions can only happen if all these 3 things are present:

This was also done by AQ in its early days in cars. They rented a car, brought lots of;

Take advantage of pranks and video cameras

Many people on Youtube do the most riskiest of things and have a video camera recording in the background. If the people get angry, they simply respond: 'Its a prank' and the person forgives them because a video is being recorded.

You can take advantage of this technique to achieve things you wish to achieve. This idea even works against police who will backoff if they know they are being recorded. If they are recorded, they are afraid their video will be uploaded on the internet. So long as you don't look or act like a Muslim, you can get away with anything with just a video camera and the excuse a crime being a 'Prank'! Remember this.

Important Note

- It is instructing those who participate in this guide to film the activity, not just for propaganda but as a means to play off the situation. The writer of this guide added this in to take advantage of dumber individuals.

Chapter 9: Transporting Weapons:

X-ray of car with cash stashed in secret compartment

After buying weapons, transporting the Weapons and huge sums of cash/jewellery from one location to another in the boot of the car can be dangerous and will give you a long term jail sentence. You could be jailed for smuggling, laundering and dealing in arms.

The best method gangs have used throughout the world is to take your car to a garage, and make hidden compartments within the bodywork of the car. These hidden holes are usually made within the car body's interior, since Security services and border guards simply do not have enough time or equipment to search all cars for hidden compartments.

Gangs place bags of money, drugs, and weapons within these hidden compartments. They then ask the lower ranked 'Transporters' in their gangs to deliver and transport this car from one country or city to another without fear of being detected.

Chapter 11: The Jihad Begins

By now you will have; Anonymity, Money, weapons, Training, knowledge of how to make improvised explosives anywhere, how to transport dangerous things secretly and how to avoid spies. You are now your own one man army! Say Alhamdulillah, and thank Allah He has taught you what you did not know yesterday. **You are now a Special services secret agent, and your job now is to support the Jihad.** You may teach these learned skills to Muslim youth in Training camps while always covering your face (to hide your identity so they cannot report how you looked like if they got caught).

War in Protests:

The beginning of this book teaches you how to be a Secret Agent who does things independently, you are someone who does not depend on any group of people. Your only connection to the Islamic State is ideological. You earn money, collect weapons, and use anonymity to support any Jihad which may arise in the future, or to do your own 1 or 2 man Jihad. But if you are confident, you can teach other people the skills you have, but anonymously. Your no.1 goal will be in continuously learning and spreading knowledge only. That is what will bind you together. Students will learn more and gain more experience and buildup their skill set, share it and their students will build up on their teachers' knowledge. Students who come later will have more knowledge and experience than earlier founders of the movement.

When Muslims and Mosques will be attacked by neo-Nazis' in protests, Muslims will do counter-protests alongside with anti-fascist groups. This is when your role as a secret Agent will be activated. You will be able to use the money, and weapons you have collected over the years and transport them securely to the Muslim neighborhood who is in need of your help. You might even meet other secret agent Muslims like yourself there.

Muslims will do counter-protests alongside with anti-fascist groups. As violence erupts between neo-Nazis' and Muslims; Muslims and their allies will wear masks and bandannas, and attack with the skill set and arms they have collected. The huge crowds in the protests and instability will make it difficult for police to know who is doing the attacks, and the Muslim attackers can blend in the crowd for safety. They can even pass on weapons to their allies. This is how the future Jihad in Europe will begin.

Both sides will do revenge attacks. This is when your expertise on b0mbs is important, because you can set off b0mbs in their HeadQuarters, and they will in Muslim ones. This will alienate many Muslims, so they too will ally with you because they seek protection and revenge. You can now train them in private, share weapons you had stored in safehouses. Your money can be used to win over more skilled young Muslims onto your side. Protect your neighborhood, and you will get more funds from fellow Muslims who are happy you are offering them protection.

Men, weapons and trucks will be what you will use to take over more strategic streets and locations in your neighborhoods. The police will side with the neo-Nazis', so you will destroy the police station and capture its weapons. If these violent protests and battles happen at a national level – there will be too less police to control the populations in every town and a war will happen between Muslims and their neo-Nazis enemies. People inbetween will be caught in crossfire and will have to pick sides. It might be that more Muslim Sleeper cells activate during this time period, you will work with them and make alliances with other non Muslims who are friendly towards you to fight common enemy gangs.

The skills in this book will give you a headstart than people who are asleep & haven't picked sides yet.

THE KOUACHI EVENT:

In early January 2015, two men came in a car and approached Charlie Hebdo's cartoon office. They had kalashnikovs (AK's) and a RPG (Rocket Propelled Grenade). They approached the door of the cartoon office and told a woman who worked there to type the code in and open the door for them. She did so, and hid.

They went to the 2nd floor of the building and found that all the cartoonists (who drew insulting pictures of Prophet Muhammad (saws)) were sitting together having a meeting. One of the brothers held a photo of the Targets which Al Qa'idah had put on the kill list. The men then shouted the names of the cartoonists one by one, and then shot them with single shots to the head. 10 of them were killed. The two armed men then escaped the building, but before leaving they told a woman working there to tell the media; "We are from Al Qa'idah Arabian Peninsula."

Memlik Pasha @MemlikPasha **They demonstrate good fire discipline, single or double-tap targets, conserve ammo, use hand signals, move calmly, methodically.**

Last Words of Advice:

Supporting the Islamic cause is a mentality and ideology more than anything else. You are always looking at everything through your Mujahid eyes, always thinking how any situation could benefit the Jihad. Any opportunity can be a Mujahid moment. Any opportunity to get; money, anonymity, weapons, friendships, leadership positions amongst Muslims, and even beneficial knowledge is your Jihad and will help you in the future. You will get rewarded from Allah –in this life and the next- for every Jihad effort you take.

When the Jihad reaches your neighborhood, rise up and race towards *shahadah* (martyrdom). That has been your goal from the beginning, that is why you are reading this book. Do not let the *fitnah* (temptation) of money and weapons override your intention of *istish-haad* (seeking martyrdom).

Use what you are good at and make most out of it to support the Islamic struggle. Work with similar minded people to you anonymously online. Some people will be hackers, others will be news sharers on social media by promoting their accounts. Specialise in what you are good at and teach it to others anonymously (in real life by covering your face, or with TOR online.)

If you share this book with others, rename it to something else safe (i.e. How to make cake, or something others will download like - An Islamic Book on Manners) and then zip the file. Then reupload it using TOR. This will ensure it can never be deleted and can continue to be shared amongst Muslims. Always be one step ahead of the enemy through secrecy. And if anyone wants to translate it to another language, please do so.

May Allah give us *shahadah*, soon, with ease, ameen.

The Guide's Core Tactics – Double Life and Infiltration:

Hiding Extremist Identity:

Advises converts and practicing Muslims to blend in: avoid obvious signs (e.g. full beards for some, black hijabs at airports), use aliases, dress like locals, and change appearance or voice. Female Muslims will wear brighter colors to appear more friendly, like a wolf in sheep's clothing.

Making Allies – The Secret White Convert:

Encourages befriending dissatisfied white Europeans and converts for undercover roles: spying on leaders, assassinations, or providing intelligence. *“He could be a bodyguard of leaders, and then assassinate them.”*

Earning Money, Weapons, and Transport:

Permits taking wealth from non-Muslims lacking covenants. Details hidden car compartments for smuggling arms and cash.

Front Networks and Propaganda Overlaps:

ISIS materials surface in hybrid spaces where ‘Nihilistic Violent Extremist’ and Jihadist content cross. Werwolf Division (NVE) exemplifies ideological blurring, creating entry points into protest chaos

where Antifa operates. In France and Europe, tactical convergences appear during anti-far-right demonstrations, banlieue unrest, and migrant-related protests, with masked groups enabling jihadist-style actions amid larger crowds.

Examples of Exploitation:

- *Protest chaos as operational cover using black bloc and jihadist tactics.*
- *Temporary Red-Green alliances against police and nationalists.*
- *Sleeper cells and returnees blending into urban and protest scenes.*
- *Distribution of b*mb manuals in environments overlapping with protest recruitment.*

Real-World Exploitation in European Protests:

In the summer of 2023, widespread riots erupted across France following the police shooting of a teenager of North African descent in Nanterre. The unrest quickly spread to banlieues and major cities, with masked groups engaging in arson, looting, and clashes with police. Intelligence reports and open-source analysis noted the participation of known Islamist radicals and returnees alongside broader anti-police and anti-government demonstrators. The chaos created perfect conditions for the guide's predicted "fog of protests," allowing individuals to blend into crowds wearing masks and bandannas while committing targeted violence. French authorities reported hundreds of arrests involving individuals with prior jihadist links exploiting the disorder.

Exploitation in US Anti-ICE Protests:

During large-scale anti-ICE demonstrations in multiple US cities (notably 2019–2025 actions in Portland, Tacoma, and Texas), radical elements including self-described Antifa activists engaged in violence against facilities and law enforcement.

In one documented case, an anarchist with Antifa affiliations carried out a firebombing attempt on an ICE detention center in Tacoma, Washington. Broader protests saw overlaps with pro-migrant networks where Islamist sympathizers and radical left groups converged against shared targets. The guide's emphasis on using protest crowds for cover

and arming allies mirrors observed patterns of masked agitators, improvised weapons, and exploitation of immigration-related unrest to escalate anti-government actions. Throughout 2025 and 2026, anti-ICE protests across the United States escalated significantly, often featuring violent agitators, property damage, and direct confrontations with law enforcement. In Minneapolis and Portland, protests following high-profile incidents involving federal immigration officers turned violent, with demonstrators throwing rocks, bottles, and other objects at police. Reports documented “professional agitators” and organized elements using the chaos to disrupt ICE operations. In Los Angeles and other cities, masked groups engaged in clashes outside federal buildings, with police making arrests for assaults on officers and attempts to breach facilities.

These events mirror the guide’s instructions to exploit immigration-related unrest, blend into left-wing crowds, and use protests as cover for escalation. Funding investigations targeted organizations accused of supporting paid agitators, while broader “ICE Out” actions included student walkouts, business shutdowns, and calls for general strikes. In several instances, anti-ICE demonstrators overlapped with Antifa networks employing black-bloc tactics, creating environments where sleeper actors could operate with reduced risk of identification. The scale of violence led to federal responses, including National Guard deployments in some areas, further highlighting the destabilizing potential described in the Mujahid Guide.

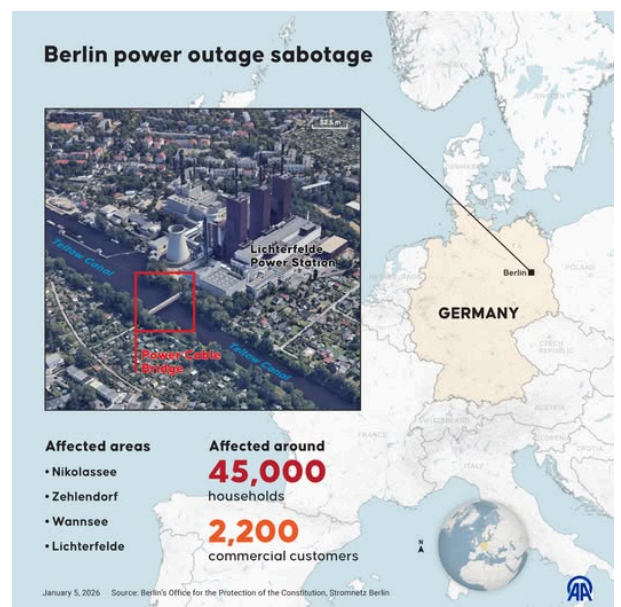

Exploitation in UK and German Demonstrations:

In several UK and German anti-fascist and pro-migrant counter-protests (particularly 2016–2025 events opposing far-right marches), intelligence assessments highlighted Islamist groups and individuals participating alongside Antifa and leftist blocs. Masked black-bloc tactics enabled opportunistic violence, property damage, and attacks on police. European security services have repeatedly warned of jihadist sleeper cells and radicals using these demonstrations as recruitment and operational opportunities, precisely as outlined in the Mujahid Guide, blending into crowds, building alliances with secular left elements against “neo-Nazis,” and advancing broader destabilization goals.

Berlin Power Grid Sabotage (2025–2026):

In September 2025 and January 2026, Berlin suffered major power outages caused by arson attacks on power infrastructure. The January 2026 incident at a gas-fired power plant in Lichterfelde left approximately 45,000 households and thousands of businesses without electricity for days during cold weather. A left-wing anarchist group known as the Volcano Group (Vulkangruppe) claimed responsibility,

framing the attacks as sabotage against the fossil fuel industry and broader capitalist infrastructure. German authorities attributed the attacks to extreme left-wing networks operating in the same milieu as Antifa-style activists. These incidents demonstrate the exact type of infrastructure disruption and societal chaos the ISIS guide encourages during periods of unrest, masked or clandestine actors exploiting protest-adjacent instability to strike critical systems. While carried out by far-left elements, such actions create the “fog” and power vacuums that jihadist sleeper cells are instructed to exploit for recruitment, arming allies, and advancing jihad.

Conclusion:

The Islamic State’s “How to Survive in the West” guide provides a clear doctrinal template for embedding into Western instability, including explicit instructions to join anti-fascist counter-protests, use violence under cover of crowds, and escalate toward jihad. While Antifa and jihadist ideologies clash on secularism and social values, the guide reveals pragmatic exploitation of shared enemies and protest fog.

This strategy turns polarization into operational advantage: sleeper cells activate amid nationalist versus Antifa violence, arm allies, conduct b*mbings, and seize territory. Groups like Werwolf Division

demonstrate how materials cross ideological lines, amplifying the threat to nation-states.

European countries, particularly France with its history of banlieue jihad and protest violence, face heightened risks from this embedment playbook.

Nationalists and concerned citizens in the United States, France, Germany, UK, and other Western nations must recognize that the Islamic State's *How to Survive in the West* strategy is not purely theoretical. It provides a practical playbook for jihadist actors to exploit left-wing protest infrastructure, particularly Antifa and anarchist networks, to advance destabilization and violence under the cover of "anti-fascist" activity.

Key Indicators to Watch For:

- *Masked or black-bloc elements within otherwise peaceful left-wing protests suddenly escalating into coordinated violence, arson, or attacks on police/infrastructure.*
- *White converts or "secret allies" pushing radical anti-Western narratives inside activist circles while maintaining a moderate public image.*
- *Overlap between pro-migrant/anti-ICE demonstrations and individuals distributing or discussing jihadist propaganda, or ISIS manuals.*
- *Sudden spikes in anti-police or anti-nationalist rhetoric paired with calls for "neighborhood defense" that mask attempts to create no-go zones or parallel power structures.*
- *Hybrid online spaces where far-left accelerationists share or praise ISIS-sourced materials.*

Recommended Counter-Steps:

1. **Document and Report:** Maintain strict open-source monitoring of local protest groups, Telegram/Discord channels, and known agitators. Record video and share verifiable evidence with law enforcement and independent journalists.
2. **Community Resilience:** Build legal neighborhood watches, support strong local policing, and advocate for zero-tolerance policies on masked violence and infrastructure sabotage.
3. **Expose Infiltration:** Publicly highlight Red-Green tactical alliances and individuals who blur jihadist and Antifa lines. Use facts, leaks, and dossiers like this one to delegitimize the convergence.
4. **Political Pressure:** Demand stricter immigration vetting, deportation of jihadist-linked individuals, monitoring of returning foreign fighters, and designation of violent Antifa networks as domestic terrorist organizations where evidence supports it.
5. **Ideological Clarity:** Reject any accelerationist temptation to “let it burn.” Stability and rule of law favor organized nationalist movements far more than chaos that empowers jihadist sleeper cells.

The guide's ultimate goal is conquest through engineered disorder. Nationalists must remain vigilant, lawful, and proactive, exposing the playbook before it escalates from protest fog into sustained insurgency. Awareness and coordinated civic action remain the strongest defenses against this hybrid threat.
