

Chapter 6 (Digitizer's Arrival) The Return to the Camp

He sets off, this time slowly and deliberately, aware that he must face the consequences.

One last glance over his shoulder, accompanied by the thought of how much destruction he had left behind under the influence.

Destruction he had been created for and against which he had rebelled so successfully...

It seems as though all that struggle for peace and freedom had been lost. The path upward feels longer and more arduous than it actually is.

His conscience torments him, because he can also feel a kind of satisfaction at having destroyed the place that had created him to serve wars and destruction.

The lights of the camp are already visible from afar.

He stops for a brief moment, takes a heavy breath, before the mechanical sounds of his movements continue. What will the consequences of his actions be? Will he be cast out by his own kind?

Upon arriving at the camp, he is surprisingly welcomed with joy.

The others greet him warmly and celebrate him like a hero.

Confusion rises within Megacephalon until the others make him realize that this destruction has granted them new freedom—because all evil has been wiped out.

The time of living hidden in exile, safe from malice and corruption, seems now finally over.

In the end, it was the ultimate rebellion: Digitizer under the influence of Digivox-9.
