

"Please ensure that the "All in One" or "RPR Nier - Avatar (Flight Unit)" modification is installed in your "Base Collection." The Avatar modification is complex and affects multiple files, so it cannot be directly tied to a specific character collection due to the way Penumbra works.

If you are experiencing issues with the Avatar or LB3, please follow these steps:

1. Ensure that the "wait for plugins on startup" checkbox is enabled. Additionally, there is an option on the XIV launcher that can assist with this issue.
2. Enable the mod on Penumbra and restart the game with the mod enabled.

If the above steps do not resolve the issue, you can install the "RPR LB3 FIX" modpack via Textools. This modpack only contains the start cast modification for the LB3 and does not make any other changes when used alone. You can then use the mod normally on Penumbra.

The issue with the LB3 specifically occurs because Penumbra (and Dalamud plugins in general) have difficulty loading certain elements, such as start casting animations.
