Adapt

In November 2018, an open-source database posted on the Adapt data site was discovered. More than 5.3 million unique entries about persons were found, including their names, names of employers, positions, contact information and employer data, including the description of the organization size and income. The answer from Adapt did not receive.

Acuity

In 2019, data leakage occurred in the Acuity insurance company. Because of it, the data of 242 million users were disclosed. The data was published on the rail forums by Grayzofidart in 2021. The base contains information about the household and personal information about US citizens. Including complete names, addresses, phone numbers, occupation, ethnicity and much more. The leak did not contain e-mail.

PureIncubation.com

In early 2024, a large amount of data from DemandScience (a company owned by Pure Incubation) was put up for sale on a popular hacker forum. The leak, which was subsequently attributed to a leak from a declassified legacy system, contained a vast amount of data, mostly consisting of company contact information collected from publicly available sources. Specifically, the data included 122 million unique corporate email addresses, physical addresses, phone numbers, employees and job titles. Also included were names and, for many users, links to their LinkedIn profiles.
