**Website** : facebook.com

**Bio** : In April 2021, <a

href="https://www.bleepingcomputer.com/news/security/533-million-facebook-users-phone-numbers-leaked-on-hacker-forum/" target="\_blank" rel="noopener">a large data set of over 500 million Facebook users was made freely available for download</a>. Encompassing approximately 20% of Facebook's subscribers, the data was allegedly obtained by exploiting a vulnerability Facebook advises they rectified in August 2019. The primary value of the data is the association of phone numbers to identities; whilst each record included phone, only 2.5 million contained an email address. Most

records contained names and genders with many also including dates of birth, location, relationship status and employer.
