## Peace deal reached between NATO and Russia for Ukraine

[Part 1 translated by [max](#) / Part 2 by [Anti-Illuminati TV](#)]

After high-level negotiations between the British secret service MI6 and the Russian FSB, an agreement in principle was reached last week to end the Ukraine war. The details will be negotiated in the coming months, sources from both services confirm.

The basic agreement is as follows:

Russia will receive the entire Black Sea coast of Ukraine.

The city of Odessa will become a demilitarized free trade zone so that Ukrainian trade can run smoothly.

The country [of Abkhazia](#) is internationally recognized and transformed into a free trade zone.

The war criminals in Ukraine, including Vladimir Zelinsky, are deposed and brought to justice.

A fully modernized NATO army of 300,000 men is raised in Germany. It will be strong enough to repel a Russian invasion but too weak to threaten Russia. It will also keep the military-industrial complex running until a transition from swords to ploughshares can be accomplished.

Also, a Polish-Lithuanian confederation could take over the non-Russian parts of Ukraine. Russian President Vladimir Putin himself says: "There may be plans to use a proposed Polish-Lithuanian-Ukrainian joint military unit as an occupying force in the western Ukrainian territories,

and any Polish forces that enter Lviv will certainly remain there".

<https://tass.com/world/1650119>

He also says that if Ukrainians "want to give up or sell something to pay their bosses, as traitors usually do, that's their business. We won't interfere." In other words, the Russians seem fine with it as long as "they leave Belarus alone".

<http://en.kremlin.>

Of course, there are hotheads in both Russia and the West who are not happy with this agreement.

Belarusian President Alexander Lukashenko says he is "starting to struggle with the Wagner group because they want to march on Warsaw".

<https://tass.com/world/1650683>

The Khazarian mafia propaganda daily, the New York Times, still clings to the illusion that a thoroughly defeated Ukraine can still somehow win this war "if only it gets more weapons and money."

This is a misconception, as Putin notes:

*"...the whole world sees that the vaunted Western, supposedly invulnerable military equipment is on fire and in its tactical and technical characteristics is often inferior even to some of the weapons made in the Soviet Union*

*[and] the West does not have the production capacity to quickly replenish the consumption of equipment and ammunition reserves." In addition, "people in Ukraine are increasingly asking the legitimate question: for what, for whose selfish interests are their relatives and friends dying*

*? "*

It is therefore important to keep a cool head. The alternative would be total nuclear war, which only the KM wants.

Diplomats are expected to start working out the details of the peace deal in Malta in August, according to MI6 sources.

They sent us a press release from the Anglo-Saxon military group known as the Patriots International Alliance. It calls for an immediate ceasefire in Ukraine "to prevent a possible nuclear conflict." She also recognizes the atrocities against ethnic Russians in Ukraine and "the establishment of US-DoD bioweapons laboratories in Ukraine" as war crimes.

Since these military veterans have not accepted bribes from the KM, they are looking for financial sponsorship for the peace conference in Malta. You can be contacted as follows:

Let's face it: Ukraine was a disastrous military defeat for

the KM.

As Colonel Douglas MacGregor also notes,

*"Ukrainian soldiers are surrendering at the first opportunity, believing they will be treated as 'just cannon fodder'....We haven't even talked about the estimated 60,000 children who have disappeared from Ukraine."*

The lesson that has been learned in Ukraine is that "the American military power of boutique troops, which are designed for Safaris in Africa and the Middle East, and not for decisive fighting against continental powers such as Russia or China ... it is time that Washington addresses its attention and with the decades of social, economic and military false AS after 1991. It is time to reverse the decline in national prosperity in America. "

<http://futuredefensevisions.blogspot.com/>

Europeans are also fed up with supporting a dying US regime. P3 Masonic sources say EU countries have paid \$1.12 trillion for expensive US natural gas over the last 2.5 years, which would have been enough for 10 years of Russian gas before the start of the Ukraine war. That is why the Europeans voted against the Americans and for the British at the recently concluded NATO summit.

History shows that whenever there is a decisive military defeat, regime change follows. The parade of Rockefeller henchmen from the fake Biden government that recently

visited China was part of a desperate attempt by the old US regime to stay in power. Elon Musk, Bill Gates, Anthony Blinken and Janet Yellen all went to China on begging missions and came back empty-handed. This led to the top Rockefeller bagman, hundred-year-old Henry Kissinger, being sent to China himself. According to Chinese government sources, they have told Kissinger that they respect him as an "old friend" who helped normalize US-China relations in the 1970s. But they also told him that they knew that he ordered the assassination of Japanese Prime Minister Shinzo Abe. Abe was a member of the Chinese Li royal family. For this and other reasons, they would not support his Rockefeller masters and their fake Biden.

Chiu Kuo-cheng, head of Taiwan's defense ministry, also said, "Taiwan has no plans to resell Hawk air-to-air missile systems (SAMS) to the US only to send them to Ukraine." He added: "Deadlines have already been set by which time the Hawk SAMS will be phased out every year and replaced by Tien Kung (Sky Bow - TASS) SAMS, after which they will be destroyed."

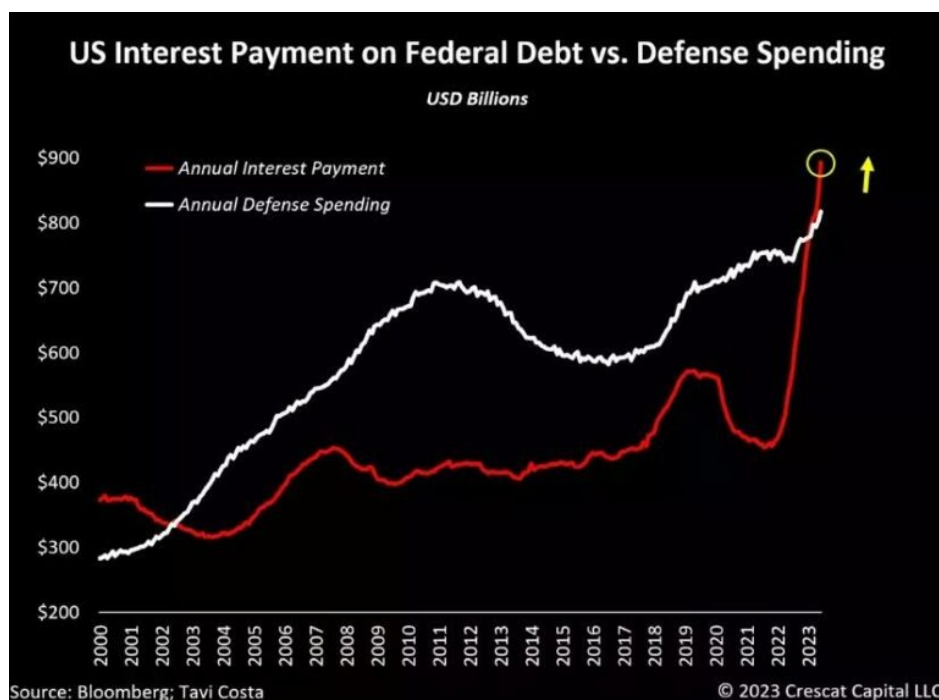

In other words, they're telling the Rockefellers, "We're not going to trade used guns for your fake dollars so you can buy time selling them to other countries."

By the way, if the US really wants to fight China, it should start with the schools. According to the Department of

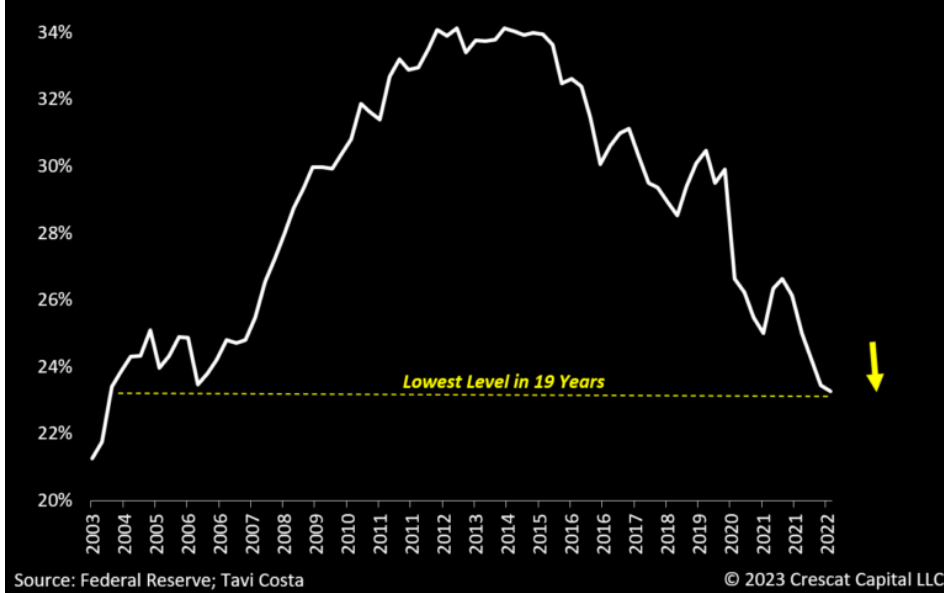

Education's own [report](#), grades in all subjects and grades have fallen over the years, particularly in reading and math. Without immigrants it would be even worse.

Polish intelligence pointed out that the Chinese team consisting of Shi, Liang, Zhang, Sun and Chang won the team victory at the just-ended International Mathematical Olympiad in Japan: Shi, Liang, Zhang, Sun and Chang. Second place went to the team from the USA, consisting of: Lin, Liu, Lu, Shen, Wang and Zhao.

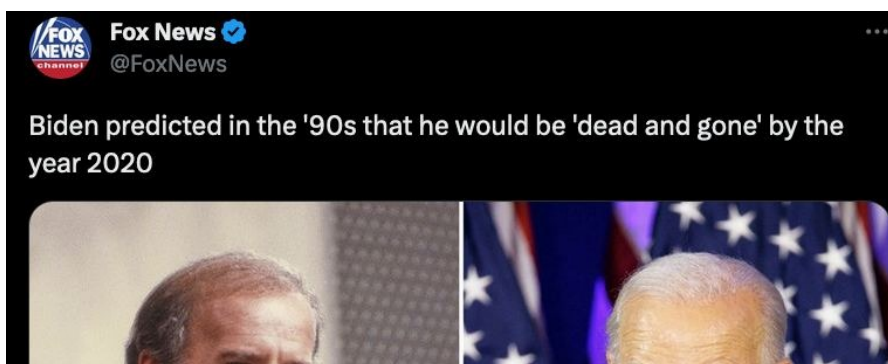

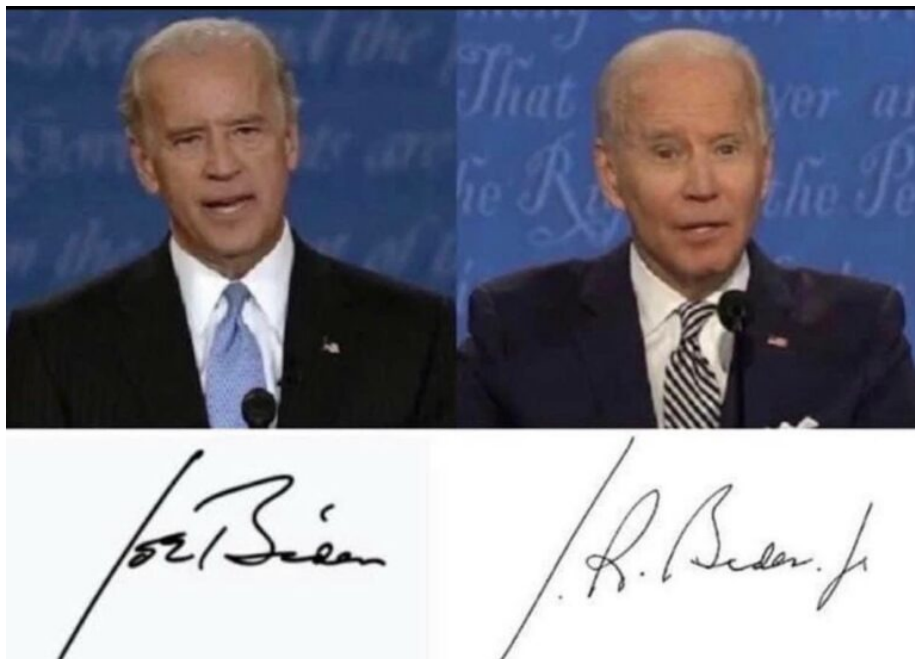

The FRB is long past bankruptcy. The national debt is so high that even if interest rates returned to their historical averages, the interest expense would eat up more than half of tax revenues. Interest spending would dwarf Social Security and defense spending and become the largest item in the federal budget. In short, if interest rates rose high enough to attract natural buyers, the US government would go bankrupt because of higher interest costs.

**Foreign Holdings of US Treasuries As a % of Total Debt**

This means that without Chinese backing, the Rockefellers will not have the resources they need to prevent, through bribery and assassination, the frontal attack on their avatar Joe Biden now unfolding in Congress. By the way, if readers believe that "Joe Biden" is still alive, they should look at the following evidence to confirm that he is just an avatar.

Still, exposing the avatar publicly will expose the puppeteers behind him. The reason the long-awaited mass arrests are still ongoing is because the US military is playing by the rules. The wheels of justice grind slowly, but they grind to dust. Now they are finally grinding with the top people.

For example, Senator Chuck Grassley has released an FD-1023 form alleging that Mykola Zlochevsky, the founder of Ukraine's natural gas company Burisma, paid a \$5 million bribe each to Vice President Biden and Hunter Biden to get Ukraine's prosecutor Viktor Shokin

fired.

Authorized for public release by Ranking Member Grassley/Chairman Comer

---------	---	---

(alternate transliteration Vadim Pojarskii) was assigned by Burisma to manage the acquisition, and he was planning to travel to Washington, D.C. in March, 2017.)

**2019 Telephone Call.** After the aforementioned 2016 telephone call, CHS had no interactions with Zlochevsky/Burisma whatsoever, until 2019. In 2019, CHS met with Ostapenko in London to discuss various business matters (which had nothing to do with Zlochevsky, Burisma, or the gas/oil industry; CHS noted that CHS's meeting with Ostapenko took place at a "Russian coffee house near Knightsbridge Street located near Harrods department store," and that Ostapenko's fiancé lives in London). At some point during this meeting, Ostapenko advised CHS he was going to call Zlochevsky. At this time, CHS understood Zlochevsky was living somewhere in Europe (NFI). During the call, Zlochevsky asked CHS and/or Ostapenko if they read the recent news reports about the investigations into the Bidens and Burisma, and Zlochevsky jokingly asked CHS if CHS was an "oracle" (due to CHS's prior advice that Zlochevsky should not pay the Bidens and instead to hire an attorney to litigate the allegations concerning Shokin's investigation). CHS mentioned Zlochevsky might have difficulty explaining suspicious wire transfers that may evidence any (illicit) payments to the Bidens. Zlochevsky responded he did not send any funds directly to the "Big Guy" (which CHS understood was a reference to Joe Biden). CHS asked Zlochevsky how many companies/bank accounts Zlochevsky controls; Zlochevsky responded it would take them (investigators) 10 years to find the records (i.e. illicit payments to Joe Biden). CHS told Zlochevsky if he ever needed help in the future and wanted to speak to somebody in the US government about that matter, that CHS could introduce him to someone.

Regarding the seemingly open and unsolicited admissions by Pojarskii and Zlochevsky about the purpose for their retention of Hunter Biden, and the "forced" payments Zlochevsky made to the Bidens, CHS explained it is very common for business men in post-Soviet countries to brag or show-off. Additionally, it is extremely common for businesses in Russia and Ukraine to make "bribe" payments to various government officials. CHS noted that in corporate budgets for other Russian and Ukrainian businesses which CHS has inspected in the past, CHS observed budget-line-items in Russian called "Podmazat" (transliterated by CHS), which literally translates to "oil, lubricate, or make things run smoothly," which companies routinely use to account for anticipated bribe payments. As such, given the pervasive necessity to bribe government officials in Ukraine and Russia, CHS did not perceive Pojarskii's or Zlochevsky's statements to be unusual, self-serving, or pretextual. Additionally, regarding important business meetings, it is also common in Ukraine and Russia for persons to make covert recordings. However, CHS has only met Zlochevsky in person on one occasion and has spoken to him only twice on the telephone; as such, CHS is not able to provide any further opinion as to the veracity of Zlochevsky's aforementioned statements.

///

On June 29, 2020, CHS provided the following supplemental reporting:

Regarding CHS's aforementioned reporting that Zlochevsky said - "he has many text messages and 'recordings' that show he was coerced to make such payments" - CHS clarified Zlochevsky said he had a total of "17 recordings" involving the Bidens, two of the recordings included Joe Biden, and the remaining 15 recordings only included Hunter Biden. CHS reiterated that, per Zlochevsky, these recordings evidence Zlochevsky was somehow coerced into paying the Bidens to ensure Ukraine Prosecutor General Viktor Shokin was fired. Zlochevsky stated he has two "documents" (which CHS understood to be wire transfer statements, bank records, etc.), that evidence some payment(s) to the Bidens were made, presumably in exchange for Shokin's firing.

Regarding aforementioned Oleksandr Ostapenko (alternate spelling, Alexander Ostapenko), who originally introduced CHS into this matter, Ostapenko currently "works in some office for the administration of President Zelensky (NFI)", and also works for Valery Vavilov, who is the founder/CEO of cryptocurrency and blockchain technology business BitFury.

**Synopsis:**

Summary of CHS's meeting with executives of Burisma Holdings

House Oversight Committee Chairman James Comer also said: "The Democrats kept saying, 'Oh, we have no evidence. You have no evidence.' Well, [Rep. Marjorie Taylor Greene] showed you evidence that... "She showed you evidence that the President's son committed a crime and violated the Mann Act. She showed the plane tickets, she showed the pictures, she showed the evidence. There is no question that he broke the law. That's another thing he could have been charged with.

<https://nypost.com/2023/07/20/ultimate-white-privilege-guy-hunter-biden-may-be-hit-with-10-criminal-referrals-comer/>

More importantly, Senator Ted Cruz said if the whistleblower's "scathing" testimony before the House of

Representatives is true, it means Merrick Garland, Joe Biden's Attorney General, committed multiple felonies.

An impeachment trial against Garland would remove the greatest legal obstacle to prosecuting Biden and exposing his henchmen.

That's why the "Biden" people appointed CIA Director William Burns to his cabinet last Friday. Burns is of course one of the main culprits for the entire Ukraine disaster.

CIA sources say the "Biden" people will try to avoid prosecution by announcing the "death" of the long-dead Biden. Then they'll find an excuse to keep mindless Vice President Kamala Harris from taking office and go straight to House Speaker Kevin McCarthy.

McCarthy, of course, would be the one who would have to hand over control of government to an entirely new group presumably centered around US President Donald Trump and vaccine truther Robert F. Kennedy Jr.

When asked if he had considered RFK Jr. as a candidate, Trump said

"No, but a lot of people have suggested it... I've known him for years. He's a smart man and has good intentions."

That wasn't a definitive "no"...

Of course, a Trump/Kennedy regime would target both

child traffickers and vaccine distributors.

After screening the Sound of Freedom film, Trump said it was "a must-see," adding, "The Biden administration has done absolutely nothing to protect these children."

He could have gone further and said that the Biden administration was actively involved in child trafficking. As the clip below shows, HBO is now even attempting to normalize pedophilia. Warning: This is extremely disturbing.

***max: I didn't add a video...***

We also have a letter from Barack Obama supporting child pornography.

## BARACK OBAMA

July 17, 2023

To the dedicated and hardworking librarians of America:

In any democracy, the free exchange of ideas is an important part of making sure that citizens are informed, engaged and feel like their perspectives matter.

It's so important, in fact, that here in America, the First Amendment of our Constitution states that freedom begins with our capacity to share and access ideas — even, and maybe especially, the ones we disagree with.

More often than not, someone decides to write those ideas down in a book.

Books have always shaped how I experience the world. Writers like Mark Twain and Toni Morrison, Walt Whitman and James Baldwin taught me something essential about our country's character. Reading about people whose lives were very different from mine showed me how to step into someone else's shoes. And the simple act of writing helped me develop my own identity — all of which would prove vital as a citizen, as a community organizer, and as president.

Today, some of the books that shaped my life — and the lives of so many others — are being challenged by people who disagree with certain ideas or perspectives. It's no coincidence that these "banned books" are often written by or feature people of color, indigenous people, and members of the LGBTQ+ community — though there have also been unfortunate instances in which books by conservative authors or books containing "triggering" words or scenes have been targets for removal. Either way, the impulse seems to be to silence, rather than engage, rebut, learn from or seek to understand views that don't fit our own.

I believe such an approach is profoundly misguided, and contrary to what has made this country great. As I've said before, not only is it important for young people from all walks of life to see themselves represented in the pages of books, but it's also important for all of us to engage with different ideas and points of view.

It's also important to understand that the world is watching. If America — a nation built on freedom of expression — allows certain voices and ideas to be silenced, why should other countries go out of their way to protect them? Ironically, it is Christian and other religious texts — the sacred texts that some calling for book bannings in this country claim to want to defend — that have often been the first target of censorship and book banning efforts in authoritarian countries.

Nobody understands that more than you, our nation's librarians. In a very real sense, you're on the front lines — fighting every day to make the widest possible range of viewpoints, opinions, and ideas available to everyone. Your dedication and professional expertise allow us to freely read and consider information and ideas, and decide for ourselves which ones we agree with.

That's why I want to take a moment to thank all of you for the work you do every day — work that is helping us understand each other and embrace our shared humanity.

And it's not just about books. You also provide spaces where people can come together, share ideas, participate in community programs, and access essential civic and educational resources. Together, you help people become informed and active citizens, capable of making this country what they want it to be.

And you do it all in a harsh political climate where, all too often, you're attacked by people who either cannot or will not understand the vital — and uniquely American — role you play in the life of our nation.

So whether you just started working at a school or public library, or you've been there your entire career, Michelle and I want to thank you for your unwavering commitment to the freedom to read. All of us owe you a debt of gratitude for making sure readers across the country have access to a wide range of books, and all the ideas they contain.

Finally, to every citizen reading this, I hope you'll join me in reminding anyone who will listen — and even some people you think might not — that the free, robust exchange of ideas has always been at the heart of American democracy. Together, we can make that true for generations to come.

With gratitude,

The fact is, these children are not "loved"; they are tortured to death to extract adrenochrome. During the "Biden" administration, 60,000 children were sold in Ukraine and 85,000 children were kidnapped from Latin America. Add to that the 40,000 children who go missing in the United States each year. These children will finally get justice because the whole world is now aware of these crimes by the western KM elite.

It will also mean the liberation of the Jewish people from millennia of satanic control. A Mossad source said one sign was Israel's President Herzog telling Congress, "America is irreplaceable to Israel, and Israel is irreplaceable to America."

"It's interesting that I didn't see a single man in the crowd wearing a yarmulke. Very unusual," he said. This is a public sign that the Jews do not want to be seen as separate from other people.

In Israel, meanwhile, crowds of protesters march daily to the Parliament building in Jerusalem to express their opposition to the Netanyahu government's attempt to turn the country into a dictatorship. Military veterans, intelligence officials, pilots, etc. have also spoken out against this takeover.

Meanwhile, Benjamin Netanyahu, the would-be god-king

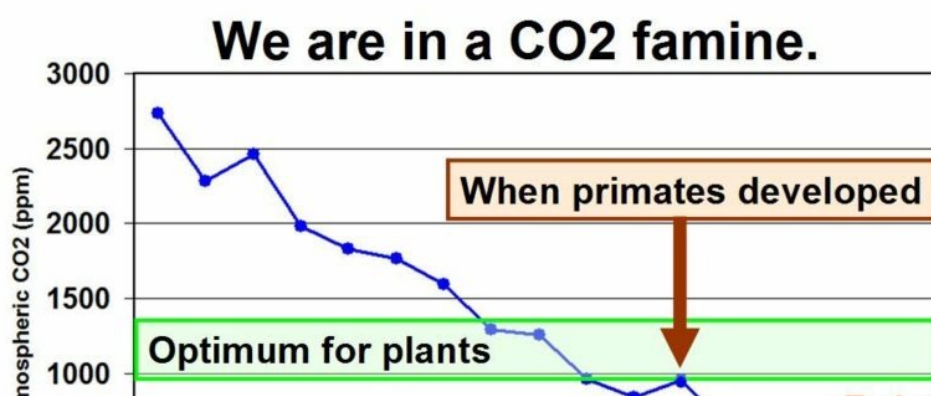

of Israel, is nowhere to be seen. First it was said that he had suffered heat stroke, now it is said that he had heart surgery and was fitted with a pacemaker. "They want to keep the story alive for as long as possible. There's definitely CGI, holograms and doubles involved," Mossad said.

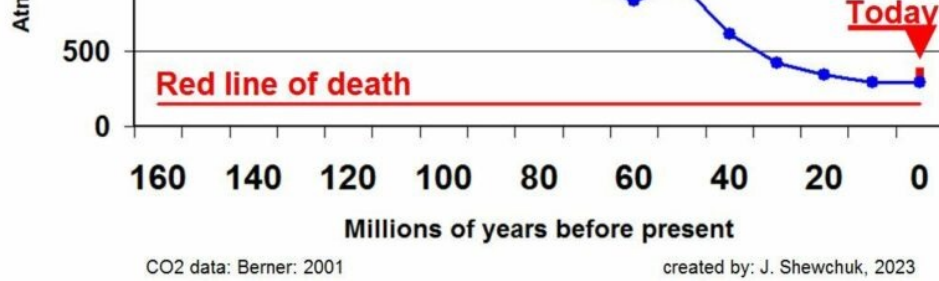

[https://www.timesofisrael.com/liveblog\\_entry/netanyahu-says-hell-undergo-surgery-tonight-to-implant-a-cardiac-pacemaker/](https://www.timesofisrael.com/liveblog_entry/netanyahu-says-hell-undergo-surgery-tonight-to-implant-a-cardiac-pacemaker/)

Another KM leader on his last legs is Justin Castrudeau in Canada. The videos below speak for themselves. The man is so hated by Canadians that it's surprising he's still clinging to power. He's definitely on his way to prison and possible execution for war crimes.

The cornered KM are now desperately trying to cling to power with a combination of "climate change" and UFOs.

The "climate change" hysteria is being fueled by placing temperature monitoring stations in hot spots like airport runways and changing weather reports to make it appear like we're all burning up. The problem is that this is all just a big lie and people know it.

The state we're in - MPs answer your questions  
All toeing the party line on globalist agenda Pages 4-5

# No climate crisis

## CARBON DIOXIDE HAS ZERO EFFECT ON TEMPERATURES

**Earth's recent surface temperature v CO2 levels**  
207 months September 1996 to November 2013

Despite CO2 levels continually rising, average temperatures have not.

**CONCLUSION:** CO2 has no effect on the climate, despite relentless propaganda to the contrary. Ask those pushing it to explain this.

**Temperature Variation Over the Last 10,000 Years**

Earth's temperature has varied for millenia and been much warmer in the past

**What we do have no effect on the climate. Taking the most recent 200 years to create a fake crisis and take even more tax is criminal.**

by **ANDREW FOSTER**

**CLIMATE** change is a vehicle for stripping us of basic freedoms - rights such as working, travel, and public access.

Ecological responsibility on the working man is leading us away from tradition and into the hands of corporate greed. The IPCC has set out environmental targets for 30 per cent biodiversity protection by 2030.

However, planting a load of spruce trees does not equate to an actual forest, as they continue to destroy UK native species such as oak and ash.

The climate hoax is an attack on farming and food production - documentaries bemoan the methane production of cows, while the growth and transportation of soya beans destroys rainforests and requires an immense amount of water.

In terms of CO2, little is done to prevent celebrities and world leaders from flying in private jets from London to Inverness, while we must cycle to work, turn off the lights and eat bugs, while none of it makes any difference, as you can see by the graphs above.

Post pandemic, it was said that animals returned to towns and air quality improved. This was not the case, and also the recent push for reusable plastics was ignored, as single-use plastic covid tests, gloves and masks were produced and used by billions, while again making no difference.

The idea that we are helping the Earth by staying inside and complacent is pushing the public to accept that, in order to save the world we love so much, we must completely sacrifice our freedom.

**PEOPLE FUNDED - PLEASE SUPPORT US - PASS ME ON**

The UFO thing is perhaps even more interesting. Last week, White House national security chief John Kirby was subpoenaed to say that UFOs "are having an impact on our training grounds" and must be treated as a "legitimate problem."

"In late August or the first week of September, the real UFO government record will be released. They have no more cards to play," says a Secret Space Program source.

Other suppressed technologies are already emerging. After decades of waiting, the US has finally approved its first all-electric flying car. The \$300,000 Model A is a real flying car - it can drive on the road as well as be flown in the air. And it's one step closer to your garage. By the logic of business, it won't be long before the \$20,000

models are available and the future of our Jetsons will finally arrive.

More importantly, we are about to live thousands of years . The latest sign of this is that Harvard scientists have discovered a "drug cocktail" that can reverse aging in less than a week.

<https://www.moneycontrol.com/news/trends/harvard-scientists-discover-cocktail-of-drugs-that-can-reverse-aging-10968511.html>

A long and prosperous life is ahead.

-----  
In an era of systematic “big tech” censorship and widespread institutional corruption, truth-seeking media and alternative perspectives are vital, and any kind of support helps more than you think!
