

Susan Thixton
TruthaboutPetFood.com

2024 List

Of pet foods I trust to give my own pets.

Thank you for your purchase of the 2024 List. TruthaboutPetFood.com is 100% consumer supported, we could not do the work we do without you!

No pet food manufacturer pays a fee to be considered for or to be included in the List. Participation in our evaluation process is completely voluntary. Manufacturers initially respond to a long list of questions, and then provide verification documents to evidence their claims of human grade ingredients, organic ingredients, and meats from humanely raised animals. Often dozens (and dozens) of documents are shared with us. Each year of working on the List, we continue to be so impressed by the quality of ingredients these manufacturers include in their pet foods.

New to the List this year, we have added three different pieces of information from each manufacturer: a feeding directions guarantee, transparency of nutritional information, and details to what each manufacturer requires of suppliers. See the manufacturer description pages for more details and where this information is provided on each page.

My own pets eat several of the brands on the List as well as home prepared pet foods. We rotate between brands, style (mine are only fed raw or cooked), commercial and home prepared. And I purchase the commercial brands directly from local independent pet food stores just like you.

I am a firm believer in quality food for my pets and firmly believe in supporting local independent pet food stores and pet food manufacturers that do the right things for the pets they feed.

Please do not share this document. Sales from the List are how we keep TruthaboutPetFood.com in operation, attend pet food regulatory meetings, and continue the fight for quality, legal, and transparency in pet food.

Thank you -
Susan Thixton

Description of information provided about each pet food manufacturer:

Right side of each manufacturer page.

Brand Species Style

Complete and balanced for...

...guarantees their feeding directions provide sufficient calories to assure a complete and balanced diet per AAFCO Nutrient Profiles.

On the top right of every manufacturer page you will find the Brand name, followed by the species this brand of pet food is available for, and the style of pet food the company offers.

In this section we provide information regarding if the pet food is considered Complete and Balanced or if it is supplemental food (such as a topper). For Complete and Balanced pet foods, pet food regulations require them to meet AAFCO's Nutrient Profiles for Adult Maintenance or All Life Stages. As the name implies, Adult Maintenance pet foods are only for adult cats and dogs. Pet foods formulated for All Life Stages would meet the nutritional requirements for kittens/puppies and adult pets. For Large Breed Puppies, check with the manufacturer to assure they meet the nutritional requirements.

New to the List: MANY manufacturers underestimate their recommended feeding amounts. This is a concern because pet foods are required to be formulated on a nutrients per calorie basis. If a pet doesn't consume enough calories, they might not be receiving enough nutrients. We asked each manufacturer if they guarantee their feeding directions are accurate - if they provide sufficient calories to assure pets are receiving a true Complete and Balanced diet. (All manufacturers in the 2024 List made this guarantee!)

Manufacturing:

Packaging:

How it's made:

Cost to feed daily:

Where to purchase:

Manufacturing explains where the company manufactures their pet foods and provides information if that manufacturing facility is licensed as a pet food facility or a human food facility. The highest level of safety in manufacturing would be a pet food manufactured in a licensed human food facility during the hours of USDA inspection. 'During the hours of USDA inspection' means a USDA food inspector is onsite during production, a type of 3rd party verification that all ingredients and manufacturing conditions abide by federal food safety laws. The USDA does not directly inspect pet food manufacturing, pet foods fall under FDA jurisdiction. However, pet foods made during hours of USDA inspection would meet the exact same standards as human foods.

Under **Packaging** is information if any product's packaging contains BPA and if packaging is recyclable.

How it's made is a brief description of how each manufacturer actually makes their pet foods.

Cost to feed daily for a 10 pound cat and/or a 30 pound dog.

Where to purchase provides information where and how to purchase from each of the pet food brands.

Bottom of each manufacturer page.

About the company:

The bottom left of each manufacturer page includes a quote directly from each brand.

The bottom right provides the company logo (or a product image) and the company website.

www.petfoodwebsite.com

Understanding the information provided about each pet food manufacturer:

The left side of each manufacturer page is dedicated to ingredient information.

Ingredients and Supplements: There are two different types of pet food ingredients - feed grade and human grade. Both of these terms are legally defined by AAFCO. Briefly put:

- Feed grade ingredients are not required to abide by U.S. Federal food safety laws. In fact, the FDA allows feed grade ingredients to violate U.S. Federal law. As example, the FDA allows feed grade ingredients to be sourced from *"diseased animals or animals that died otherwise than by slaughter"* with no warning or disclosure to pet owners.
- Human grade ingredients ARE required to abide by all U.S. Federal food safety laws. This quality of pet food ingredients are identical to the quality of human foods.

However...just because an ingredient is feed grade does not guarantee the ingredient is inferior. With feed grade ingredients, they could be quality or they could be inferior. Pet owners are at the mercy of the pet food manufacturer, what quality they choose to manufacture their food. There are currently no regulations requiring manufacturers to disclose the quality of ingredients used in pet foods.

Organic or non-GMO ingredient information.

Certified Humanely Raised: Certified humanely raised animals means an independent 3rd party has verified livestock animals meet required conditions of humanely raised. Each 3rd party certifier has different requirements, some offer different levels of certification. Some argue that these various levels of certification lessen the humane standards, others believe it is a means to bring in more farmers to at least follow some humane livestock farming methods. Certification of raising livestock in humane conditions is an added expense to farmers, thus some voluntarily adhere to humane farming methods but do not go through the certification process.

Denaturing, HPP or Bacteriophages: Many meat products in pet foods are treated with a denaturing agent. Denaturants are used to visually mark meat products to either declare them as inedible (not for human consumption) or used to visually mark edible meats that are not continuing in the human food process (such as edible meats destined for pet food manufacturing). Some denaturants can be of little risk, some can be high risk. Information provided here discloses if a denaturant is used and what it is. HPP stands for High Pressure Processing, this is a method used to control common bacteria of raw meat. Bacteriophages are a virus used in raw meat products to control the common bacteria of raw meat. While both processes are deemed safe by FDA, they are mentioned in the List for informational purposes.

New to the List: Requires of Ingredient Suppliers is a section we have added in 2024. We felt it was significant to share the steps quality manufacturers take to assure their ingredients remain quality. This is just a small glimpse into what manufacturers go through to make a quality pet food.

Country of Origin of ingredients.

And **testing** performed by each manufacturer on their ingredients, foods, and or facility. **New to the List:** because so many manufacturers refuse to share their full nutritional information with pet owners, we asked each manufacturer if they share this pertinent information with consumers. (All of these manufacturers share!)

Left side of each manufacturer page.

Ingredients:

Supplements:

Organic/Non-GMO:

Meats Sourced from Certified Humanely Raised Animals:

Use of Denaturants, HPP, and/or Bacteriophages:

Requires of Ingredient Suppliers:

Country of Origin of Ingredients:

Testing Performed on Ingredients and Pet Food:

A Pup Above

Dog Food
Cooked

Complete and Balanced for
Adult Maintenance.

A Pup Above guarantees their feeding directions provide sufficient calories to assure a complete and balanced diet per AAFCO Nutrient Profiles.

Manufacturing:

USDA licensed human grade facility, USDA inspected but not on-site daily.

Packaging:

BPA free, 100% recyclable.

How it's made:

Pet foods are cooked sous-vide; raw ingredients placed into vacuum sealed BPA-free bags, submerged into non-boiling water for cooking. Foods are cooled and frozen or diced and air-dried.

Cost:

\$8.99 a day for a 30lb dog.

Where to purchase:

Independent pet food stores all US states.

Ingredients:

Meats are sourced from USDA inspected and passed animals, verified per requirements of human food manufacturing standards.
All other ingredients are human edible, verified per requirements of human food manufacturing standards.

Supplements:

Supplements are human grade, verified per requirements of human food manufacturing standards.

Organic/Non-GMO:

All fruits and vegetables are non-GMO and pesticide free, verification provided.

Meats Sourced from Certified Humanely Raised Animals:

No.

Use of Denaturants, HPP, and/or Bacteriophages:

No to all.

Requires of Ingredient Suppliers:

Suppliers must provide verification ingredients meet all standards for human consumption and are stored, handled, processed and transported in a manner that is consistent and compliant with regulations for human edible foods; and Produce suppliers must demonstrate their products are Non-GMO and pesticide free.

Country of Origin of Ingredients:

All ingredients originate in the US with the exception of some vitamins and minerals that are sourced from Switzerland, Germany, Israel, and Canada.

Testing Performed on Ingredients and Pet Food:

Every batch is tested for pathogens (e-coli, listeria, salmonella), products held until clean results received.
Full nutritional analysis performed annually and with any formulation change.
Nutritional analysis results are available upon request.

About the company:

"Here at A Pup Above, we consider how every action we take affects Mama Earth. When you buy A Pup Above, 1% of that sale goes to the White Buffalo Land Trust, which works to protect the environment and support family farms. We believe in making food more sustainable so it's better for humans, pups, and the planet. Our packaging is also 100% recyclable through our partnership with Terracycle, which takes empty packaging and turns them into something new, like backpacks and bike racks. Learn more about how we give back to Mama Earth here. <https://apupabove.com/pages/our-mission>."

www.apupabove.com

All Provide

Cat and Dog Food

Cooked, Raw

Complete and Balanced for
All Life Stages.

All Provide guarantees their feeding directions provide sufficient calories to assure a complete and balanced diet per AAFCO Nutrient Profiles.

Manufacturing:

Pet foods are manufactured in a company owned pet food facility (formerly human food facility) in Georgia.

Packaging:

BPA free. Pouch is non-recyclable – other packaging is recyclable.

How it's made:

Ingredients are staged and prepared in a sanitized environment, vegetables are washed with white vinegar and ground with supplements. Meats and vegetables are weighed in desired proportions and ground together. With raw foods, immediately after being ground food is weighed, packaged, vacuum sealed, and frozen. For cooked foods, immediately after being ground food is cooked in steam convection oven to 160 degrees, allowed to rest overnight at 38 degrees, packaged and frozen.

Cost:

\$3.42 - 5.22 for a 10lb cat.
\$4.56 - 6.56 for a 30lb dog.

Where to purchase:

Online in the continental U.S. and retailers in all Eastern and Midwest states.

Ingredients:

Meats are sourced from USDA inspected and passed animals, verification provided. All other ingredients are human edible, verification provided.

Supplements:

Supplements are human grade, verification provided.

Organic/Non-GMO:

Organic ingredients: Kale, Spinach, Apples, Sweet Red Peppers, Green Beans, Collards, Celery, Asparagus, Wheatgrass Powder, Sea Kelp. Fish oils sourced from wild caught fish, sardines wild caught. Verification provided.

Meats Sourced from Certified Humanely Raised Animals:

Beef grass fed, not certified humanely raised. Chicken is sourced from GAP certified animals, verification provided. Turkey not certified humanely raised, farm practices humane methods.

Use of Denaturants, HPP, and/or Bacteriophages:

No to all.

Requires of Ingredient Suppliers:

Suppliers of meat ingredients required to provide globally recognized animal welfare certification, evidence livestock consumed species-appropriate diets, no use of hormones or steroids.

Country of Origin of Ingredients:

All meats originate in the U.S with the exception of rabbit from Hungary. All vegetables are seasonally sourced in North America, some come from Canada in the summer, in the winter carrots are from Mexico. All supplements are from the US other than turmeric and oregano.

Testing Performed on Ingredients and Pet Food:

Pet foods are randomly tested for pathogens.
Guaranteed analysis testing when products are formulated and with any ingredient change.
Lab results provided on request.

About the company:

"AllProvide Holistic Pet Food is passionate about creating nourishing, healthy raw and gently cooked wholefood recipes for pets. We produce nutrient-dense diets that promote pets' overall well-being and strive to make these products affordable for pet parents. By taking a holistic nutritional approach to pet health, AllProvide offers a range of unique recipes. Working with veterinarian Dr. Judy Morgan, special diets were developed to help restore, adjust and maintain balance for pets optimal health. We prioritize fresh wholefood ingredients and avoid rendering, HPP, harsh chemicals or processing techniques. Sustainability is important to us. We carefully select ingredients from humane farms and natural resources. Committed to providing the highest quality food for pets and supporting pet health, we believe in giving back to the community that gives so much to us. AllProvide has been a sponsor of Monkey's House Dog Hospice since 2015. This is food therapy."

all{PROVIDE

www.allprovide.com

Amore

Cat & Dog Food

Air Dried, Raw

Complete and Balanced for
All Life Stages.

Amore guarantees their feeding directions provide sufficient calories to assure a complete and balanced diet per AAFCO Nutrient Profiles.

Manufacturing:

Pet foods are manufactured in a company owned pet food facility in Canada.

Packaging:

BPA free, not currently recyclable.

How it's made:

Raw meats are ground, whole fresh vegetables and remaining ingredients are added to the grinder mixer. The mixture is ground and mixed. The mixture is spread to an appropriate thickness and air dried. The dried product is shredded then air dried a second time. Finished product is packaged in prelabeled 1 and 5 pound bags (dogs) and 1/2 and 3 pound bags (cats). The finished bags are stamped with a batch number and best before date, then stored in rigid plastic bins. The same process is followed for frozen product, except it is frozen in 1/2, 1 and 3 pound packages.

Cost:

\$2.50 - \$3.50 CAD for a 10lb cat.
\$3.10 - \$6.00 CAD for a 30lb dog.

Where to purchase:

Sold online in the US and Canada through company website, company store in Burnaby, British Columbia.

Ingredients:

Meats are sourced from USDA and CFIA inspected and passed animals, verification provided.
All other ingredients are human edible, verification provided.

Supplements:

No supplements included, balanced through food ingredients.

Organic/Non-GMO:

No.

Meats Sourced from Certified Humanely Raised Animals:

Some meats sourced from humanely raised animals, though not certified. Fish is certified wild caught, verification provided.

Use of Denaturants, HPP, and/or Bacteriophages:

No to all.

Requires of Ingredient Suppliers:

All suppliers sell to human food manufacturing, must evidence ingredients are human edible.

Country of Origin of Ingredients:

Meats originate in Canada, US, Mexico, Europe, Australia, New Zealand & South America. Vegetables are sourced from Canada, US and Mexico.

Testing Performed on Ingredients and Pet Food:

Complete nutritional profile testing performed when recipes are developed. Nutritional analysis results are shared on request.

About the company:

"As Manager of North America's two first no-kill municipally funded Animal Control shelters, I learned alot about pet nutrition. We nourished many abandoned pets back to health that had been dumped because of medical issues and veterinary costs. While some did require medical intervention most were fixed with good food, provided by Amore! When I took over Amore Pet Foods in 2005, I vowed to uphold the high quality standards that had been set. Consequently, we hand make 100% of our products in our facility using only human-grade ingredients. Over the past 18 years we've added MEGA morsels®, our air-dried food in 2010 and new proteins. We continue to nourish your pets and help them live their best lives."

www.amorepetfoods.com

Bixbi

Cat & Dog Food

Can, Dry, Freeze Dried

Complete and Balanced for
All Life Stages.

Bixbi guarantees their feeding directions provide sufficient calories to assure a complete and balanced diet per AAFCO Nutrient Profiles.

Manufacturing:

Pet foods are manufactured in licensed pet food manufacturing facilities. Kibble is manufactured in Minnesota. Freeze-dried is manufactured in Oregon and Minnesota. Wet food is manufactured in South Dakota and Thailand for select cat wet recipes.

Packaging:

BPA free, some packaging recyclable.

How it's made:

Dry Food: Fresh meat and dry ingredients are mixed, steam cooked and formed in the extruder; cooked at 200F. Then dried at 275F, cooled and packaged.

Freeze-Dried: Ingredients are blended and treated with HPP. Product is shaped into bite size pieces and sent through instant quick freeze. The frozen pieces are freeze dried between 16-20 hours and packaged.

Wet Food: Ingredients are blended, and cans are filled and hermetically sealed. The cans are cooked in a steam retort. Cans are removed, cooled and labeled.

Cost:

\$0.61 - \$5.38 for a 10lb cat.
\$1.69 - \$11.57 for a 30lb dog.

Where to purchase:

Independent pet food stores, grocery and retail chains across the US. Available online at major pet retailer websites and at Bixbi website. Also sold in Canada and Asia.

About the company:

"BIXBI is proud to call the Colorado mountains home. Our team members (both four legs and two) love getting outdoors, it's almost a prerequisite, hiking in the summer, hitting the slopes in the winter. It goes without saying then that we appreciate those who make it safer for us to access the outdoors, which is why one of the many partnerships we are proud to support involves feeding the furry heroes that make up the Colorado Rapid Avalanche Deployment canine rescue team. These amazing pups go through extensive training to help expedite the rescue of avalanche victims in the mountains. Some heroes wear collars, not capes, and these guys are fueled by BIXBI."

Ingredients:

Meats are sourced from inspected and passed animals, verification provided.
All other ingredients are human edible, verification provided.

Supplements:

Supplements are feed grade.

Organic/Non-GMO:

No.

Meats Sourced from Certified Humanely Raised Animals:

No.

Use of Denaturants, HPP, and/or Bacteriophages:

Some meats are denatured with charcoal. No use of bacteriophages. Freeze dried pet foods are treated with HPP.

Requires of Ingredient Suppliers:

Bixbi audits all suppliers prior to any purchase.

Country of Origin of Ingredients:

Most ingredients originate in the US, other ingredients originate in France, Italy, Belgium, Australia, New Zealand, Canada, Mexico, Brazil, Uzbekistan, Chile, Bulgaria, Israel, Japan, Czech Republic, Norway, Iceland, Honduras, Indonesia, Malaysia, Philippines.

Testing Performed on Ingredients and Pet Food:

Raw ingredients are tested periodically for vendor conformance, including but is not limited to testing for meat for proximates (fat, protein, fiber and moisture), and raw agricultural ingredients for mycotoxins. Each lot of finished pet food is tested for guaranteed analysis and select vitamins and minerals. Each lot is also tested for pathogenic bacteria and mold, lots are held until clean results received. Full nutritional profile testing performed when products are developed. Nutritional analysis results are available on company website for all foods.

www.bixbipet.com

California Dog Kitchen

Dog Food Cooked

Complete and Balanced for
All Life Stages.

California Dog Kitchen guarantees their feeding directions provide sufficient calories to assure a complete and balanced diet per AAFCO Nutrient Profiles.

Manufacturing:

Pet foods are manufactured in a company owned pet food facility in California. Facility recently certified organic.

Packaging:

BPA free. Paper tubs and bags are compostable in some municipalities.

How it's made:

Ingredients are washed, chopped, meat ground, combined per recipe requirements then cooked in a steam oven to 165F. Food is cooled, supplements and oil are added, packed into containers and frozen.

Cost:

\$6.50 - \$9.86 for a 30lb dog.

Where to purchase:

Independent pet food stores across western US states.

Ingredients:

Meats are sourced from USDA inspected and passed animals, verification provided. All other food ingredients are human grade, verification provided.

Supplements:

Supplements are human grade, verification provided.

Organic/Non-GMO:

All whole food ingredients in the Certified Organic Chicken recipe are organic (except fish oil), quinoa is organic in all recipes, verification provided.

Meats Sourced from Certified Humanely Raised Animals:

Chicken in organic formula is certified humanely raised. Verification provided.

Use of Denaturants, HPP, and/or Bacteriophages:

No to all.

Requires of Ingredient Suppliers:

Suppliers must evidence human edible ingredients.

Country of Origin of Ingredients:

All meats originate in the US, most other ingredients originate in the US with the exception of organic quinoa from Peru, yellow squash from Mexico, blueberries from Canada, and fish oil from Iceland. California Dog Kitchen's website provides full country of origin of each ingredient in each food.

Testing Performed on Ingredients and Pet Food:

Guaranteed analysis testing is performed several times a year, mineral testing is performed with any formula change. Full vitamin testing completed on one recipe, all recipes to be tested in early 2024. Nutritional testing results are provided on the company website.

About the company:

"My brother and I started making fresh food because our dog had terrible reactions to every kibble we tried. Eventually that turned into the family business. We still make all of our food ourselves, with help from our kitchen staff, and with our dogs volunteering as taste testers."

www.californiadogkitchen.com

Canisource

Cat & Dog Food
Dehydrated

Complete and Balanced for
All Life Stages.

Canisource guarantees their feeding directions provide sufficient calories to assure a complete and balanced diet per AAFCO Nutrient Profiles.

Manufacturing:

Pet foods are manufactured in a company owned pet food facility in Terrebonne, Quebec, Canada.

Packaging:

BPA free, boxes are recyclable.

How it's made:

Meats are ground and mixed with other ingredients and passed into a liner where they are sliced and sent to a dehydrator chamber. Company provides a video of their manufacturing process on their website.

Cost:

\$1.10 for a 10lb cat.
\$2.55 for a 30lb dog.

Where to purchase:

Independent pet food stores across Canada, available in US through Chewy.com. Will be distributed in South Korea, Japan, Taiwan and France in 2024.

Ingredients:

Meats are sourced from inspected and passed animals, verification provided.
All other ingredients are human grade, verification provided.

Supplements:

Supplements are feed grade.

Organic/Non-GMO:

No.

Meats Sourced from Certified Humanely Raised Animals:

No.

Use of Denaturants, HPP, and/or Bacteriophages:

No to all.

Requires of Ingredient Suppliers:

Suppliers must provide Technical sheet, Guarantee letters, and Certificate of Analysis.

Country of Origin of Ingredients:

All ingredients originate in the US and Canada with the exception of lamb from New Zealand or Australia.

Testing Performed on Ingredients and Pet Food:

Raw meat, fish, and eggs are tested one ingredient per month for salmonella. E-coli, and total bacteria count – rotating through all raw ingredients.
Dry ingredients are tested one per month for salmonella. E-coli, total bacteria count, and mycotoxins – rotating through all dry ingredients.
A full nutritional analysis is performed on one product per month, rotating through all pet foods.
Nutritional analysis results are provided by request.

About the company:

"The mission of Canisource is to significantly contribute to the health of dogs and cats, by developing and marketing pet food that meets government standards for human nutrition, both in terms of the quality of the ingredients and the manufacturing process."

Caru

Cat & Dog Food Cooked

Complete and Balanced for
All Life Stages (cat) and
Adult Maintenance (dog).

Caru guarantees their feeding directions provide sufficient calories to assure a complete and balanced diet per AAFCO Nutrient Profiles.

Manufacturing:

Pet foods are manufactured in Wisconsin in a licensed human food facility, during hours of operation when a USDA inspector is on site

Packaging:

BPA free, containers are recyclable.

How it's made:

All ingredients are combined and warmed in a large kettle. The container boxes are sterilized and ingredients are pumped from the kettle into each box. Boxes are sealed and cooked at a temperature of 245F in a retort oven.

Cost to feed daily:

\$3.50 for a 10lb cat.
\$4.25 to \$6.25 for a 30lb dog.

Where to purchase:

Independent pet food stores all US and Canada. Also available in Taiwan, China, S. Korea, India and the Cayman Islands.

Ingredients:

Meats are sourced from USDA inspected and passed animals, per requirements of human food manufacturing.
All other ingredients are human grade, per requirements of human food manufacturing.

Supplements:

Supplements are human grade, per requirements of human food manufacturing.

Organic/Non-GMO:

All ingredients are GMO free, verification provided.

Meats Sourced from Certified Humanely Raised Animals:

All meat ingredients are sourced from certified humanely raised animals, verification provided.

Use of Denaturants, HPP, and/or Bacteriophages:

No to all.

Requires of Ingredient Suppliers:

Suppliers must provide ingredient spec sheets, verify human edible status, evidence ingredients are GMO & Gluten free, evidence all meat ingredients are sourced from certified humanely raised animals.

Country of Origin of Ingredients:

Most ingredients originate in the US/North America with the exception of lamb from New Zealand, tapioca starch from Thailand and India, tricalcium phosphate from US or Mexico, marine microalgae oil from UK, and celery root from Poland.

Testing Performed on Ingredients and Pet Food:

All stews and bone broth batches are tested for microorganisms, held until clean results are received. Each pet food is tested for guaranteed analysis and mineral content once a year and if any formula change occurs.
A complete nutritional analysis is performed once a year.
Nutritional analysis results are shared with pet owners upon request.

About the company:

"In 2014, we were the first company in North America to produce wet pet food in Tetra Pak boxes, which was a major nutritional improvement over pet grade food in a can. In 2023, we introduced balanced omega blend functional diets for pets –another major nutritional improvement aimed at helping pets throughout the span of their lives."

Testing Performed on Ingredients and Pet Food:

Guaranteed analysis testing on all pet foods quarterly. Company is in the process of full nutritional profile testing of all pet foods. Nutritional analysis results are shared upon request.

About the company:

"At Elzie's we strongly believe two things: dogs make our lives better and what we feed our bodies matters. With those two things in mind, my sister and I scoured the market for a balanced, convenient, and responsibly sourced food option for our dogs and found nothing we could trust. Knowing that we could do better we teamed up with a biochemist, a nutritionist, and vets to create recipes that we felt good about feeding our furry family members. Our long-term goal is to have our own farms so that we can oversee production from start to finish. We are dedicated to establishing ethical protocols in agriculture and business for the sake of the land, workers, and animals and we hope you'll join us on this journey."

www.elzies.com

Emma Lou's

Dog Food Cooked

Complete and Balanced for
All Life Stages.

Testing Performed on Ingredients and Pet Food:

Routine analysis of pet foods and raw materials performed to ensure nutritional standards are met.
Every batch of pet food is tested for pathogens.
Nutritional analysis results are available upon request.

About the company:

"Our founder passionately believed that pets' lives & health would be improved by eating real, human grade food – not processed, feed grade kibble. That is why he started JustFoodForDogs – cooking human grade ingredients, in a real kitchen, that pet parents could visit and watch the recipes being prepared. Working with veterinarians and nutritionists he developed delicious fresh, human grade meal designed to help pets lead their healthiest lives. As we have grown, we have stayed true to this promise – using only human grade ingredients and cooking real food in kitchens pet parents can visit. Additionally, we have conducted research and feeding trials. Our research has proven that our diets are more digestible than feed grade kibble, and better support immune system health. We also have multiple shelters that we support with food donations, including Pug Nation, Muttville, and KoreanK9 Rescue."

Requires of Ingredient Suppliers:

Suppliers must evidence human grade ingredient quality.

Country of Origin of Ingredients:

All ingredients originate in the US with the exception of calcium and kelp from Ireland.

Testing Performed on Ingredients and Pet Food:

Every batch is tested for a full nutritional profile annually.
Nutritional analysis results are shared on request.

About the company:

"Milk is driven by a simple philosophy: Feed others how you want to be fed. In other words, whether we're serving people or pets, we don't believe in making food that we wouldn't eat ourselves. We couldn't imagine subsisting on a diet of canned food and/or dry kibble for our entire lives, and we don't want that for our pets either. That's why, years ago, my partner and I tried switching our cat, Miles, to a nutritionist-designed diet of fresh food made in our own kitchen. Not long after the switch, we noticed that Miles was more energetic and playful than before -- he seemed to have acquired an extra spring to his step. Furthermore, the new diet eliminated his chronic dehydration issues, and vastly improved both his breath and the smell of his litter. Seeing these improvements inspired us to share the benefits of fresh-made pet food with the world, starting with our community here in Boulder, CO."

Most fruits and vegetables are organic, verification provided.

Meats Sourced from Certified Humanely Raised Animals:

All meats are sourced from animals on farms that practice humane methods, but are not certified.

Use of Denaturants, HPP, and/or Bacteriophages:

No to all.

Requires of Ingredient Suppliers:

Suppliers must provide evidence all ingredients abide by federal and state regulations for human food.

Country of Origin of Ingredients:

All ingredients originate in the US with the exception of Coconut Oil from Philippines, some Lamb from Australia and New Zealand, and Vitamin D3 from Germany.

Testing Performed on Ingredients and Pet Food:

Facility, ingredients, and finished products are routinely tested for pathogens according to FSIS and USDA standards for human food. Tests include Salmonella, Listeria, E.coli, mycotoxins, total coliforms.
All recipes are tested for complete nutritional profile when developed and any time there is a change in formulation.
Company website provides full nutritional profiles for each pet food.

About the company:

"The number of pets adopted by My Perfect Pet employees is almost triple the number of employees, and all but 3 are rescues. Our mission to improve education and nutrition is not limited to pets, we are committed to educating the entire family on how to make healthier choices for themselves as well as their pets. Employees are allowed to purchase our food ingredients at cost for their families, and encouraged to share their knowledge of the relationship between fresh whole food diet and health."

Meats Sourced from Certified Humanely Raised Animals:

All meats in all styles of pet food are sourced from certified humanely raised animals, verification provided.

Use of Denaturants, HPP, and/or Bacteriophages:

Meats in dry foods are treated with denaturant charcoal. Freeze dried pet foods are treated with HPP. No use of bacteriophages.

Requires of Ingredient Suppliers:

Suppliers must provide Certificate of Analysis and certificates of origin on all ingredients.

Country of Origin of Ingredients:

Most ingredients in all styles of pet food originate in the US, other ingredients are sourced from Canada, Australia, New Zealand, UK, Belgium, Mexico, Malaysia, Philippines, Paraguay, Japan, Norway, Honduras, India, Sri Lanka, Thailand, Iceland, and Hungary. Company website provides full country of origin information for every batch of pet food.

Testing Performed on Ingredients and Pet Food:

Every batch of pet food is tested for guaranteed analysis and pathogens, held until clean results received.

All foods are tested for required vitamins and minerals, pesticide residue, mycotoxins (including aflatoxins) and heavy metals throughout the year on a rotational basis. Nutritional analysis results are provided on company website.

About the company:

"By 2030, we're dedicated to advancing regenerative agriculture practices across one million acres of farmland. This commitment allows us to play an active role in addressing nature loss and the growing climate crisis by partnering with farmers to improve soil health—resulting in higher quality and more nutrient-dense ingredients for pets. In 2022, we sourced from 550,000 acres of land, with 100,000 acres dedicated to regenerative agriculture. Over the next seven years, we have a lot of work to do to get to one million regenerative acres, but we have confidence in our team, in our farmers and ranchers, and in our entire value chain. They enable us to lead as a growing company dedicated to producing nutritious food and treats for pets, all ethically sourced from farm-to-bowl."

About the company:

"Raised Right is a family owned human-grade pet food company that makes gently cooked whole food recipes that are high in protein and low in carbs through using limited ingredients. Most of their recipes have less than 2% carbs because they don't use any high carb ingredients like potato, rice, oats, yam, pasta, parsnips or barley. All of their adult dog recipes have 10 ingredients or less, with some having as few as just 7 or 8 ingredients. Additionally, they were able to formulate their adult dog recipes to meet AAFCO's requirements for a complete & balanced diet through using only whole foods without having to add any synthetic vitamins or minerals."

Country of Origin of Ingredients:

All ingredients originate in the US with the exception of venison from New Zealand and rabbit from Spain and/or Canada.

Testing Performed on Ingredients and Pet Food:

Every shipment of raw turkey and chicken are tested for pathogens. Guaranteed analysis testing is performed on all pet foods every two months. Nutritional analysis results are shared on company website and on request.

About the company:

"Shine Pet Food is a triple bottom line company, considering the well-being of pets, people and planet in all of our ingredients and operations. Our food is hand crafted rather than produced with automation so we can provide above living wage jobs to members of our community. We source locally when possible and never use factory farmed animals. We use the entire animal from meat, to organ, to bones. Shine is proud to be one of only a handful of pet food companies in the U.S. with organic certified fresh made human grade dog and cat food recipes."

Testing Performed on Ingredients and Pet Food:

Every batch of pet food is tested for pathogens, held until negative results received. Full nutritional profile testing performed on all recipes annually. Nutritional analysis results are available on request.

About the company:

"Good things come in small batches! Inspired by the slow-food movement, Smallbatch started in the Bay Area in 2005. Our mission is to improve the lives of pets (and their humans!) by providing the most nutritious, thoughtfully prepared and community-inspired whole foods. Driven by artisanal food makers, farmers, and ranchers, smallbatch stays true to its core values when making our products using only wholesome, simple ingredients. This means we believe nature does it best and we emulate that model to create foods that provide our pets with all they need to live long and happy lives. For nearly two decades, our food and treats yield a healthier, happier pet. We believe this is the reason why SmallBatch has garnered a huge following of pet parents that only feed SmallBatch to their beloved furry family members."

Every batch of pet food is tested for pathogens.
Full nutritional profile testing annually on all products.
Nutritional analysis results are shared on request.

About the company:

"Something not many consumers know is that we really got our start doing carnivore nutrition by making diets for large carnivores at Zoos (Lions, Cheetahs, Wolves, ect.). There is only a small handful of PHD Zoological Nutritionists in the world and we work very closely with them to take the same raw diets we make for their Zoos and apply that nutritional philosophy to our own pets at home. We love being able to offer a true carnivore diet to our own pets, but helping feed some of the largest ones on the planet is also a passion of ours."

TUCKER'S 
Because Dogs Are Worth It!

www.mytuckers.com

Vibrant K9

Dog Food Raw

Complete and Balanced for
All Life Stages.

Vibrant K9 guarantees their feeding directions provide sufficient calories to assure a complete and balanced diet per AAFCO Nutrient Profiles.

Testing Performed on Ingredients and Pet Food:

Meat ingredients are received previously tested for pathogenic bacteria.
Pet foods are tested for heavy metals and specific nutrients annually.
All recipes are tested for complete nutritional analysis when formulated and with any recipe change.
Nutritional analysis results are shared on request.

About the company:

"Prior to 2013, we lost 3 out of 4 of our dogs to cancer which compelled us to improve K9 health by any means necessary. It was a calling that we would not ignore. This led us to opening Vibrant K9 to help as many dogs as possible through fresh food, education and science. We work with each customer to ensure each dog is getting the exact diet that they need. We don't believe in a one bowl fits all model. Our one on one approach ensures we are able to not only meet, but exceed their personal requirements. Our mission is to save one million dogs from metabolic disease by 2030."

Packaging:

BPA free, shipping containers are recyclable.

How it's made:

Meat ingredients are ground or chunked and mixed with ground vegetables and fruits (if dog recipe) and natural supplements. The mixed product is then ground or chunked again, packaged and vacuum-sealed. Finished products are checked for weight, leaks or broken seals, then frozen.

Cost to feed daily:

\$2.00 - \$3.00 for a 10lb cat.
\$6.00 - \$8.25 for a 30lb dog.

Where to purchase:

Available direct to consumer continental US, ordered from company website.

Ingredients:

Meats are sourced from USDA inspected and passed animals, verified per requirements of human food manufacturing.
All other ingredients are human grade, verified per requirements of human food manufacturing.

Supplements:

Supplements are human grade, verified per requirements of human food manufacturing.

Organic/Non-GMO:

All vegetables and fruits are organic. All supplements are organic with the exception of Vitamin E, Taurine, Manganese Protein, Chilean Mussels, New Zealand Green Mussels and Oysters. Meats are sourced from animals that are never fed or given any antibiotics or hormones. Verification provided.

Meats Sourced from Certified Humanely Raised Animals:

All meats are sourced from certified humanely raised animals, verification provided.

Use of Denaturants, HPP, and/or Bacteriophages:

No to all.

Requires of Ingredient Suppliers:

Suppliers must provide product specification sheets for each ingredient and Letters of Guarantee. Suppliers required to provide evidence of compliance to GMP, HACCP or other relevant standards or regulations and provide 3rd party audit results. Meat suppliers required to provide humanely-raised documentation or certification.

Country of Origin of Ingredients:

All ingredients originate in the US with the exception of rabbit from Spain, sunflower oil from Europe, ginger from India, kelp from Iceland, green mussels from New Zealand, Chilean mussels from Chile, oysters from New Zealand, organic psyllium husk from India and taurine from Japan.

Testing Performed on Ingredients and Pet Food:

Supplements and oils are tested by suppliers for pathogens, toxins and heavy metals. Every batch of pet food is tested for pathogens.
All formulas are tested for a full nutritional analysis on a rotating basis, all formulas are tested for minerals annually.
Nutritional analysis results are provided on product pages on company website.

About the company:

"Here at Viva, we don't believe in cutting corners, whether it's our sourcing (from certified humane farms that never use antibiotics or hormones) or our formulation process. We spent over a year working with nutritionists & vets to formulate our recipes since it's not easy to use whole food-based ingredients where there are wider variations in nutrient content. As a result, we've tested 50+ supplier ingredients and counting—all to know the exact nutrient profiles of not only our ingredients but our food as well. Ultimately, a diet composed of food-based nutrients offers so much more than synthetic vitamins & minerals ever can. Bioactive compounds present in real food (polyphenols, glucosinolates, and so much more) are truly what make the difference between formulating to survive & formulating to thrive."

www.vivarawpets.com

We Feed Raw

Dog Food Raw

Complete and Balanced for
All Life Stages.

We Feed Raw guarantees their feeding directions provide sufficient calories to assure a complete and balanced diet per AAFCO Nutrient Profiles.

Manufacturing:

Pet foods are manufactured in a USDA licensed human food facility in Chicago, IL, manufactured during hours of operation but not directly under USDA inspection.

Home Prepared Pet Food Resources

Home prepared pet food is the most economical way to give your pet human grade pet food, BUT - you must follow a good recipe that provides all the required nutrition in the proper amounts. The following are resources for trusted recipes:

Dr. Karen Becker and Rodney Habib has a dog food recipe available on YouTube, <https://youtu.be/7P85BMCCboI>. More complete and balanced dog and cat food recipes from these pet advocates can be found here: <https://www.planetpaws.ca/healthy-pet-recipe-store/>.

Dr. Judy Morgan provides her 'pup loaf' recipe here: <https://drjudymorgan.com/blogs/recipes/how-to-make-homemadepuploaf>.

Dr. Barbara Royal and Dr. Natasha Lilly offer complete and balanced recipes for cats and dogs here: <https://animaldietformulator.com/products/ready-made-recipes>.

Dr. Lisa Pierson has information about cat food on her website including advice and recipes of balanced diets: <https://catinfo.org/>.

Andi Brown – author of The Whole Pet Diet – provides the recipe for the Whole Pet Diet Chicken Stew for cats and dogs here: <http://www.thewholepetdiet.com/docs-stew-the-healthiest-version-of-my-food-for-dogs-cats/>.

Testing Resources

If you believe a food made your pet sick, pet owners have someone to turn to for help to hold the pet food accountable. Dr. Laurie Coger of www.CheckYourPetFood.com.

Please report all suspect pet illnesses or deaths (believed to be linked to a pet food) to FDA, your State pet food authority, and to the pet food manufacturer. Information on who to and how to report is provided on TruthaboutPetFood.com.

Second Opinion

Often pet owners want or need a second veterinary opinion from a veterinarian that understands food (not feed). Two veterinarians that I trust for this are Dr. Laurie Coger and Dr. Judy Morgan. Both do phone consults with pet owners. Dr. Laurie Coger can be reached at: <https://healthydogworkshop.com/tele-health-care/>. Dr. Judy Morgan can be reached at: <https://drjudymorgan.com/pages/consultations>.
