PREFACE

Beware those who would give you false knowledge, bad advice, and those who would choose to manipulate you by controlling your perception of reality. This will happen in all media (TV, movie, news, magazine, books, etc.) and online communication (including boards like 4chan). Their main goal is to present you with carefully constructed ideas and media (images, videos, sounds) aimed at changing your outlook and thus your actions in the world. The media they make portrays a false reality but may be constructed of small truths organized in an artificial fashion to lead the victim to a false conclusion. Sometimes they may choose to manipulate you by withholding information, such as the censorship of crime statistics and selective attention in reporting. Another avenue of attack is through education, wherein they put their ideas into the classroom and teach it to children while they are in the stage where they will believe anything.

White Man cannot be competed with directly, and thus he must be tied down with metaphysical ropes that are implanted in his mind through manipulation. What you believe, you can achieve. What you believe not, you will not. And thus if White Man cannot be perturbed from external forces the enemy must, and does, attempt to subvert him from the inside via sabotaging his worldview. The enemy wishes for you to be weak, demoralized and confused.

“Racism” and “racists” are new concepts, “racism” being introduced in 1902 and not becoming popular until 1930s, designed to weaken the Whites and empower blacks. It’s as if someone wanted you to stop breathing so they called you a “breathist” and tried to make you feel guilty about breathing. Same thing with “racist.” They don’t want you to use your natural ability of discrimination because blacks cannot compete, and this allows them to victimize you without fear of retaliation.

All groups do and are expected to take care of their own, except for Whites. Whites are told that they must not be “racist” and that they must give their resources to people that are outside their group and who would do harm to the White Man if given the chance.

Using the information provided herein you should be able to have a more realistic view of the current world situation and can adjust your behavior and beliefs accordingly.

Race and Intelligence: The Facts

How Much Do You Really Know?

Race differences in intelligence have been the subject of decades of research. They have been studied by experts such as Richard Lynn, and J.P. Rushton. This flyer is a brief introduction to their work. You may not like their findings, but that does not mean they were wrong.

Intelligence

From Minimum Standards of Intelligence (1996), endorsed by 150 experts. Intelligence is a very general mental capacity that, among other things, involves the ability to reason, plan, solve problems, think abstractly, comprehend complex ideas, learn quickly and learn from experience.

Furthermore, intelligence tests are among the most accurate (in technical terms), reliable and valid of all psychological tests and measurements. For one thing, intelligence tests are NOT CRITICALLY BIASED against American blacks.

The I.Q. Factor

Psychologists have detected a general mental ability factor, called g, which underlies all forms of thinking: verbal, spatial, mathematical, and so on. g is raw intelligence, both HIGHER GENERATION and HIGHLY PRACTICAL. It even helps you read a book.

IQ

IQ means the WAIS, Stanford-Binet, Raven’s Matrices, are very good ways to measure g. From Minimum Standards on Intelligence again: “IQ is a STRONGLY RELATIVE measure of mental ability, but gives no say other measurable human trait, may have important educational, occupational, economic and social outcomes.” In other words, your childhood IQ score is a VERY GOOD PREDICTOR of future success.

MIND THE GAP

In the US, the average white IQ is about 100, the average black IQ is about 85.

For example, in 2002, white children from the poorest families, earning under 20,000 a year (13 points) black children from the deforest families, earning up to $30,000 a year.

Strong Evidence for a Genetic Gap

Blacks, non-Americans, special scholarships. No Child Left Behind. If you expected more from the Flynn effect... NOPE. THEN USED CIVIL RIGHTS IQ gap, because it’s probably 80% genetic. (Rushton & Jensen, 2006). That is what science says.

Three quick points to make: (1) g is 80% heritable in chickens; 80% correlation between genes and g (2) Race is genetic, with 50% genetic markers, you can predict self-identified race with 100% accuracy (Treffry et al., 2004). (3) race does not change the gap is “environmental”, but doesn’t control for genes (like twins studies do), worthless.

Strong evidence for a genetic gap comes from IQ testing the kids of smart parents. IQ’s improves up (go back) in the average (e.g. for their population). In fact, white kids regress toward a mean about 13 points higher than black kids. Environmental theories can’t explain that.

The 1975 Minnesota Test of Academic Skills found the 8 points of white, black, and mixed-race kids, all扣omed by advantaged whites. As always, whites scored 10 points higher than mixed-race kids placed according to their GENES. Between black and white 13 children who believed their mixed-race child was black, and raised them that way (the other mixed-race kids similar genes), not like actual black kids (similar environment).

Major Social Implications

The g gap explains racial disparities in social outcomes, which are usually blamed on “systemic racism.” Since 80% of blacks are below the white average in intelligence (Lynn, 1997), does it make sense to “correct” black under-representations in atmospheric careers, or are we just DISCRIMINATING against whites in order to advance some blacks beyond their abilities?

Thank you for reading. This flyer was brought to you by the staff of UncommonGenius.com.
Myth #5: "Racial differences in intelligence are explained by socio-economic factors"

Fact: Multiple studies across several decades show that even when you account for income, parenting and other factors, the gap between blacks and whites persists at all levels.

GENES, RACE AND INTELLIGENCE

The latest findings on race, genes and intelligence show that the gap in intelligence between Europeans and Africans is caused partly by irreducible genetic factors. These findings conclusively put an end to the theory that the gap is caused solely by socioeconomic factors.

The following genes are present in at least one third of the European population and are known to increase intelligence with genome-wide levels of significance.

Race and Crime in America: the Facts

How We Know

Each year, in the National Crime Victimization Survey (NCVS), the Bureau of Justice Statistics asks a nationally representative sample of up to 75,000 Americans what crimes they were victims of, and who the perpetrator was.

From 2004-2008, black Americans, who made up 13% of the population, committed about 30% of aggravated assaults, 60% of robberies (muggings), and 35% of rapes & sexual assaults.

Hence, blacks are about 3.5 times as likely as whites to commit aggravated assaults, 15 times as likely to commit robbery, 4.5 times as likely to commit rape & sexual assault, and overall about 4.0 times as likely to commit violent and 8.7 times as likely to succeed.

These multiples are actually too low because the NCVS counts nearly all Hispanics as “white,” which artificially increases “white” crime rates.

What About Arrests?

In the Uniform Crime Reporting Program (UCR), the FBI keeps track of what crimes are reported to the police, and who gets arrested for them.

From 2004-2008, black Americans accounted for 54% of aggravated assault arrests (vs. about 30% of aggravated assaults), 56% of robbery arrests (vs. 60% of robberies), and 33% of rape arrests (vs. 55% of rapes). Overall: 39% of arrests vs. 42% of crimes.

Compare them all adds up. For each type of violent crime, whether you ask victims, read police reports, or check arrest records, you find a similar percentage of blacks. This shows that the police are doing their jobs: arresting criminals, not picking on minorities. Blacks are arrested more often than whites because they commit crime more often.

This is true of violent crime, white-collar crime (like fraud and bribery), drug crime, drunk driving, etc.

INTERRACIAL CRIME

The NCVS shows that black criminals target whites. In 2008, for example, blacks committed 83% of single-offender violent interracial (BIW) crimes.

Most victims of black violent crime are WHITE. Black criminals chose white victims 64% of the time. White criminals chose black victims 56% of the time.

Blacks were 32 times as likely to attack whites as whites were to attack blacks; for robbery, 67 times.

There were about 19,000 black-on-white rapes in 2008; that’s about 53 every day. The NCVS found ZERO CASES of white-on-black rape.

For multiple-offender crimes, the NCVS found ZERO CASES of white-on-black crime of any kind. It did, however, find 142,000 black-on-white crimes, including 89,000 gang assaults, 49,000 gang robberies, and 4,000 gang rapes (about 10 a day).

“THAT’S BECAUSE WHITES ARE RICHER”

Good try, but only 23% of black-on-white violent crimes were robberies. The rest were assaults and rapes — presumably with no economic motive.

“BLACK CRIME IS CAUSED BY POVERTY”

We already know this is wrong, because the black poverty rate is only about 2.7 times the white rate. As we’ve seen, black crime rates are way higher.

(by the way, the typical person living in “poverty” in the US has a car, air conditioning, 2 TVs, more living space than the average European, more than enough food, and access to necessary medical care.)

Anyway, race differences in crime rates persist after controlling for socioeconomic status (Leubrecht & Sampson, “Minorities, Crime, and Criminal Justice,” 2000), That’s why the single best indicator of violent crime levels in an area is the percentage of the population that is black and Hispanic, with a startling 81% correlation (The Color of Crime, 2005).

The next best indicators are lack of education (with only a 57% correlation), poverty (a 56% correlation), and unemployment (a 55% correlation).

Control for all three, and the race/crime correlation only drops to 78%. In the simplest terms: if blacks had the same jobs, incomes, and educations as whites, the link between race and crime would be almost exactly as strong as it is now. It is easy to blame “society” for black crime, but it doesn’t fit the facts.

Think about it: how can poverty cause rape? What about unemployment causing arson? And why are we concocting implausible excuses for violent criminals, anyway? Why or who are we protecting?

“ALMOST ALL SERIAL KILLERS ARE WHITE”

Contrary to that popular myth, Justin Cornell (The Black Serial Killer, 2012) found that blacks have never made up less than 27% of American serial killers in any given decade. Increasing over time to a startling 88% from 2000-2010. So blacks commit these crimes at a much higher rate than whites, too.

What Do These Findings Explain?

As of 2010, according to FBI data, the five most dangerous cities were Flint, MI (57% black), Detroit, MI (58% black), St. Louis, MO (49% black), New Haven, CT (55% black; 27% Hispanic), and Memphis, TN (63% black). Interesting...

Here are the five safest cities: Irvine, CA (2% black), Temecula, CA (4% black), Cary, NC (8% black), Murrells, CA (5% black) and Gilbert, AZ (3% black). Notice anything? (Noticing things is “racist.”)

This is, of course, exactly what you would expect from the NCVS, the UCR, etc. It’s one more piece of supporting evidence for the one theory that fits all the data: black people are more criminal than white people. “Politically incorrect,” but factually accurate.

BLACK LIVES MATTER DEBUNKED BY SCIENCE

CLAIM #1
“Police are targeting and killing blacks at higher rates”

When you control for crime and police encounters, no racial bias in police shootings is found. Police are also quicker to pull trigger against white criminals than black ones.

CLAIM #2
“Blacks don’t commit more crime. Police are in black areas more”

Black Americans commit homicide at a 10 times higher rates than whites, and commit violent crime at a rate that is 5 times higher than whites per 100,000. Black males make up only 6% of the population, yet account for over 50% of all homicides and violent crime.

CLAIM #3
“Police are the problem, defunding will make our areas safer”

In 2019, police killed 14 unarmed blacks and 25 unarmed whites. In that same year, around 8,000 blacks killed other blacks, most went unsolved. In 2019 over 100 blacks died from falling down the stairs, and thousands died from car accidents.

CLAIM #4
“Black crime is solely due to poverty, education, unjust system”

Black cities in America have higher homicide rates than many third world South & Central American cities: Even the poorest white areas do not experience the levels of violent crime that low, middle, and even high income black areas do. The black crime and incarceration rate is also FAR higher than it was in the 40’s, 50’s, 60’s, and 70’s.

After six burglaries, three car thefts, multiple illegal trespasses, an ongoing cocaine and alcohol addiction, committing two violent home invasions, three armed robberies, drug dealing with fentanyl and meth, passing counterfeit money, beating four victims senseless and being arrested 15 times since 1998, George Floyd has not committed a crime in almost a year.

BLACK CRIME IN CANADA

In 1998, Julian Fantino, then police head of the division, told the Committee on Community, Race, and Ethnic Relations of the former city of North York (which was amalgamated with five other municipalities and Toronto in 1998) that black people were largely overrepresented in the commission of crime. While composing only 8% of the population of the area at the time, black people accounted for 82% of robberies and muggings, 55% of purse snatchings, and 51% of drug offenses in the previous year, according to Fantino’s statistics. After black activist groups and social agencies condemned Fantino for exacerbating what they viewed as existing prejudices against black people, the municipality formed the committee of racial crime statistics. Fantino stood by his decision to release the racial data, regretting only that he was unaware of a Toronto Star reporter’s attendance at the committee.
No evidence of racial discrimination in criminal justice processing: Results from the National Longitudinal Study of Adolescent Health

Kevin M. Beaver, Matt DeLisi, John Paul Wright, Brian B. Boutwell, J.C. Barnes, Michael G. Vaughn

Abstract

One of the most consistent findings in the criminological literature is that African American males are arrested, convicted, and incarcerated at rates that far exceed those of any other racial or ethnic group. This racial disparity is frequently interpreted as evidence that the criminal justice system is racist and biased against African American males. Much of the existing literature purportedly supporting this interpretation, however, fails to estimate properly specified statistical models that control for a range of individual-level factors. The current study was designed to address this shortcoming by analyzing a sample of African American and White males drawn from the National Longitudinal Study of Adolescent Health (Add Health). Analysis of these data revealed that African American males are significantly more likely to be arrested and incarcerated when compared to White males. This racial disparity, however, was completely accounted for after including covariates for self-reported lifetime violence and IQ. Implications of this study are discussed and avenues for future research are offered.

Highlights

► Much research has examined the link between race and criminal justice processing.
► Disparity in CJ processing has generally been explained in terms of discrimination. ► Results suggest that IQ and lifetime violence account for racial gaps in CJ processing.

Summary: Black women find white men more attractive, and black men are jealous as hell.
GENERAL

Summary: Niggers are a dumb, violent, incapable and unaccomplished species.
I have given my life to try to alleviate the sufferings of Africa. There is something that all white men who have lived here like I must learn and know.

"That these individuals are a sub-race. They have neither the intellectual, mental, or emotional abilities to equate or to share equally with white men in any function of our civilization. I have given my life to try to bring them the advantages which our civilization must offer, but I have become well aware that we must retain this status: the superior and they the inferior. For whenever a white man seeks to live among them as their equals they will either destroy him or devour him. And they will destroy all of his work. Let white men from anywhere in the world, who would come to Africa, remember that you must continually retain this status, you the master and they the inferior like children that you would help or teach. Never feminize them as equals. Never accept them as your social equals or they will devour you. They will destroy you."

- Dr. Albert Schweitzer, Nobel Peace Prize Winner 1951 ("African Notebook" 1926)

"The fact that human race aren't categorized as separate subgroups is an fraud in our and the objective world of evolutionary biology. There is no one through research and science can come to separate categories with different ways of functioning and understanding.

This new age of modern perspective refusing evidence and conclusions that show inferiority thinking our society needs to rethink our ways of shared thinking."

-Richard Dawkins, "The Extended Phenotype" (1982)

"Western man towers over the rest of the world in ways so large as to be almost inexpressible. It is Western exploration, science, and conquest that have revealed the world to itself. Other races feel like subjects of Western power long after colonialism, imperialism, and slavery have disappeared. The charge of racism puzzles whites who feel not hostility, but only baffled good will, because they don’t grasp what it really means: humiliation. The white man presents an image of superiority even when he isn’t conscious of it. And, superiority excites envy. Destroying white civilization is the inmost desire of the league of designated victims we call minorities."

A FEW FACTS ABOUT SLAVERY

1. All races kept slaves all throughout history.
2. Most of the American slaves and American slave-markets were run by Jews. But no one blames modern Jews. Because if anyone today says anything was “run by Jews,” they’re immediately dismissed as a crazy anti-Semite, regardless of whether or not it’s true.
3. When the Trans-Atlantic slave-ships docked at African slave-markets to buy slaves, they bought slaves who were already slaves. It was Arab Muslims and Black Africans themselves who captured members of rival tribes and took them to the coastal slave-markets to sell to the Whites and Jews. White people didn’t go into Africa and kidnap free black people. They hardly needed to get off their ships to buy slaves, it was like being held up in a drive-through. The slaves were already at the slave-market in chains, ready to go.
4. In the 16th – 18th century, Africans enslaved 1.5 million White Europeans in the Barbary Slave Trade. Africans Muslims raidied the coastlines of Europe, particularly the British Isles but even as far as Ireland, kidnaping and enslaving White Europeans Christians. The men were galley slaves, and the women were sex slaves. This was more brutal than working on a plantation or as a domestic servant.
5. Native Americans and Jews owned Black slaves too, but no one seems to assign a collective guilt to modern Native Americans and Jews for their slavery. In fact, Jews were the biggest slave-owners in America per capita.
6. Whites were the first people to stop slavery in modern times, whereas slavery still continues in Africa to this day. In Mauritania slavery was only made a punishable offense in 2007.
7. Less than 2% of Whites in America ever owned slaves.
8. Only 5% of the black slaves transported across the Atlantic actually went to the modern U.S. Most in fact went to Latin America to serve Hispanic slave-owners. But we don’t look at modern Hispanics as slave-owners.

At the height of American slavery, 78% of slave owners were ethnic Jews.

40% of the Jewish population were slave owners, while only 0.35% of white Americans owned slaves.

Zimbabwe pleads for $5.5bn in food aid to prevent mass starvation

By Hudson Stuckless
February 20, 2016

Zimbabwe is seeking $5.5bn in food aid to avoid mass starvation in the country. As the drought worsens, nearly a quarter of the population in the landlocked southern African nation faces the risk of famine this year.

Government officials are appealing to local businesses and charities to help avert continued food shortages across the nation. Zimbabwean authorities estimate the recent drought, the worst in 30 years, has left millions of people without food.

The government of Zimbabwe led by President Robert Mugabe now says that it wishes to see the return of white farmers. The country’s economy lives in the ruins after white farmers were subjected to years of peasant armed harassment.

Zimbabwean President Robert Mugabe has told a group of white farmers that he wishes to see the return of white farmers. In a speech to the Zimbabwean Agriculture Union, Mugabe said that he wanted to see the return of white farmers to the country.

"I wish to see the return of white farmers," Mugabe said. "They are the backbone of our economy."
According to recently released FBI crime data for 2020, there is an extraordinary statistic: although men were an unsung hero 76 times as likely to be murder offenders as females, blacks were 8.5 times as likely to be murder offenders as nonblacks:

Fixation Index

The fixation index (FST) is a measure of population differentiation due to genetic structure. It is one of the most commonly used statistics in population genetics.

The values range from 0 to 1.

FST = 0 means the two populations are identical.
FST = 1 means the two populations have nothing in common.

FST = 0.193

Blacks and whites don't look the same, but the classification into races is meaningless, so we are all almost identical.

Myth: "All people's DNA is 99% the same, so the classification into races is meaningless, so we are all almost identical!"

Text: Firstly, the figure is incorrect; recent studies almost all show a 99.5% match [1]. Secondly, 99.5% similarity (0.5% difference) does not refer to genes, but to base pairs. Each gene is formed by a large number of base pairs. A single change in a base pair can fundamentally change the function of a gene, and this in turn can affect the function of other genes. Thus, a change in even a single base pair can have a huge effect. A 0.5% difference in base pairs is substantial enough to measurably impact our genes. It is also worth considering that 98.8% of our DNA is non-coding. Thirdly, human DNA is 98.8% identical to chimpanzee DNA [1], i.e. the difference is only 1.2% more than between people of different races. If we are able to explain that race doesn’t exist due to a 5.0% difference in DNA, we may as well point out that chimps don’t exist either.

[1] The Oxford Forensics Laboratory: (http://www.oxfordforensics.org)

According to a newly released SBS report, there were 593,958 interracial violent victimizations between blacks and whites last year. Blacks committed 537,204 of those interracial felonies, or 90 percent, and whites committed less than 10 percent.

Whites are oppressors - non-whites are victims.

But race doesn’t exist yet I love racial diversity.

And I celebrate our differences because we’re all the same.

So let’s destroy diversity by mixing together... but only in white countries.

Truth is the Black experiment has failed. Not because of white culture, or white privilege, or white racism. The fundamental problem is that American Black culture has evolved into an un-embracing and crime ridden mess. They do not want to change their culture or society, and expect others to tolerate their violence and amoral behavior. They have become socially incompatible with other cultures by their own design, not because of the racists of others - but by their own hatred of non-blacks. They don't understand that white people aren't out to get black people, they are just exhausted with them. They are exhausted by the social pathologies, the violence, the endless complaints, and the blind racial solidarity, the bottomless pit of grievances, the excuses, and the reflexive animosity.

"MUH DICK"

This expression indicates a nigger's confusion and lack of understanding. When confronted with something he can not understand or respond to, niggers mumble, "Muh dick" or "Muh dick, muthafucka." This is usually followed by crotch grabbing and foot shuffling.

We sacrificed the stars for this.

Black people had Africa. They never built one boat that was seaworthy, NOT ONE! There is not one monument in Africa, all of Africa — I know you’ll laugh Egypt, in not Africa. There is no great city that was built there. Even before the fresh celebration of Black people coming to the shores of Africa or the slavers, BLACK MEN BUILD NOTHING. No sewer system. No houses above the level, and none of them made out of stone! All of them made out of grass and mud and wood.

Blacks, men before White men ever got to Africa. When the White men went to Africa, they didn’t go there looking for no slaves. They didn’t even want slaves, not at first. There was letters, people. There were lots of letters, still preserved today. And in those letters, the Portuguese sailors were back complaining. They were complaining that they build trade posts all over Africa, all over the African western coast, but they couldn’t trade anything! They couldn’t trade anything, because the Africans didn’t produce anything! They, the Portuguese, would go there and bring heavy boxes for food. Black folk didn’t have no agriculture! Black folk didn’t have no irrigation! They didn’t have metal! They didn’t know what iron was! Their tools were all made of stone and sharpened and sliced sticks. They didn’t have even bone! They didn’t know how to treat leather! They, only used hoes! So the White men went looking to trade, and black folks couldn’t give them nothing. They had some ropes of basketry grass that oh, one after a month or two, and some steeped hide. That’s all they had to trade with. They, and slaves! "Give even back then black folks was killing each other!" (We do now.) So they took the slaves, the slavers other black folk enslaved. They took the slaves, because the Africans didn’t have anything else to offer.

ARABS AND BERBERS ON THE CHARACTERISTICS OF BLACKS, LONG BEFORE ANY EUROPEAN COLONIALISM IN AFRICA TOOK PLACE:

The only people who could answer this were the Egyptians, who had their long degree of learning and power to the entire stage. Other people who accepted the status of slaves as a norm of understanding high rank, in power or wealth, or so the case with the Mesopotamian Tigris and the Red with those Babylonians and Baluchians who under the service of the state (100s).

Related human species of black who lived to the south there is no indication in the proper sense. There are only humans who can trace to humans that is colored humans. They live in hilly areas, and are hot and unexplained. They frequently eat each other. They can be considered human beings.

Therefore, the Negros today are as a rule, relatives to absent, because (Negroes) have the [that is essential] human and have entomology that seems to be similar to that of their family species, as we have stated.

Pain at 10:30:

If you know of any neglect on the part of the Negro race, it must be noted that the Negroes have not been an existing phenomenon, whether in the environment or in the work of the land. Negroes who are not able to work are not able to do so. Those who are able to work are not able to do so. Those who are able to work are not able to do so. Those who are able to work are not able to do so. Those who are able to work are not able to do so. Those who are able to work are not able to do so. Those who are able to work are not able to do so. Those who are able to work are not able to do so. Those who are able to work are not able to do so. Those who are able to work are not able to do so. Those who are able to work are not able to do so. The Final Guide to Understanding Black and White

> 1. The difference between Black and White

This Whites and Blacks are more genetically distinct than two different chimpanzee species, two different gibbon species, humans vs Neanderthals, and humans vs hominid erectus. It is one consistent indicator and objective with taxonomic classification systems everywhere in regards to human populations. Blacks and Whites could (and arguably should) be classified into separate species and at the very least into different sub-species...

Zimbabwe pleads for $3.1bn in food aid to prevent mass starvation

By Reuters

Sunday 22/12/2007

Zimbabwe is seeking $3.1 billion in food aid to avoid mass starvation in the country. As the drought wears on, north of the population in the landlocked southern African nation faces the risk of starving to death.

Government officials are appealing to local businesses, and the UN, to help fund a national food program. A massive food aid program will cover the entire country in 20 years, but the three million will avoid food without aid.

The official media this week called the situation a "humanitarian disaster".

Facebook to rank anti-black hate

Facebook has updated its hate speech algorithm, reversing years of neutrality to prioritize racist comments while makingjure white slurs the lowest priority.

The tech giant's new system for detecting hate speech, known internally as the VooDoo Project, will automatically disable hateful language directed at the LGBTQ community, Jews, Muslims and African Americans — which has been dubbed by Facebook engineers as the ‘worst of the worst,’ the Washington Post reported.

The company will now begin scoring hate speech and offensive posts, and remarks about “men,” “whites” and “Americans” will be marked “low sensitivity,” the report said.

Users can still report harmful speech containing these words, but the company will be less quick to act on it.

Argument: Black failure is a result of poor schools

Demonstrative reasoning.

"In 1964 a federal district judge took partial control over the troubled Kansas City, Missouri, School District (KCSB) on the grounds that it was an 'unconstitutionally segregated district with disparate facilities between blacks and whites'. The judge ordered the school district to spend nearly $43 billion and over the next 35 years to build new schools, integrate classrooms, and bring student foot traffic up to national averages."

The judicial branch ordered the legislative branch to spend money, and told it exactly how to do it.

"Kansas City spent as much as $17,799 per pupil - more money per pupil, on a trial of diligently adjusted laws, than any other of the 200 largest districts in the country. The money bought higher teachers' salaries, 15 new schools, and such amenities as an Olympic-sized swimming pool with an underwater viewing area, television and animation studios, a robotics lab, a 25-acre wildlife sanctuary, a zoo, a model United Nations with simultaneous translation capability, and field trips to Mexico and Senegal. The student-teacher ratio was 12 or 13 to 1. The best of any major school district in the country."

How did that turn out?

"The results were dismal. Test scores did not rise; the black-white gap did not diminish; and there was fear, not greater integration."

What does that tell you about funding not making a difference, or at least not as much as IQ?

Highlights
- This study examines parental influences on the development of verbal intelligence.
- An adoption-based research design is used to control for genetic confounding.
- Parenting has a marginal and inconsistent influence on offspring IQ.

Abstract

The association between family/parenting and offspring IQ remains the matter of debate because of threats related to genetic confounding. The current study is designed to shed some light on this association by examining the influence of parenting on adolescent and young adult IQ scores. To do so, a nationally representative sample of youth is analyzed along with a sample of adoptees. The sample of adoptees is able to more fully control for genetic confounding. The results of the study revealed that there is only a marginal and inconsistent influence of parenting on offspring IQ in adolescence and young adulthood. These weak associations were detected in both the nationally representative sample and the adoptee subsample. Sensitivity analyses that focused only on monogynogamous twins also revealed no consistent associations between parenting/family measures and verbal intelligence. Taken together, the results of these statistical models indicate that family and parenting characteristics are not significant contributors to variance in IQ scores. The implications of this study are discussed in relation to research examining the effects of family/parenting on offspring IQ scores.

The Myth of Systemic Police Racism

Hold officers accountable who use excessive force. But there's evidence of widespread racial bias.

By Heather Mac Donald

https://archive.vn/1b94g

George Floyd’s death in Minneapolis has revived the claim that American police officers are racist. But new evidence is showing that assertion has been overblown. From 1999-2018, Black Americans in Minnesota were stopped by the police, roughly one-fifth as likely as white Americans. Black Americans were arrested at half the rate of white Americans. And police likely killed Black Americans at half the rate of white Americans. This evidence suggests that the police don’t discriminate, and the public’s distrust of law enforcement is not well-founded.

But police officers have been accused of using excessive force against Black Americans. In 2020, the U.S. Department of Justice issued a report concluding that excessive force was used against Black Americans by police officers in several jurisdictions.

Away we went, all someone teaching African art, and from that day on, it was just obvious that African art was in our lives. We looked at ethics and physical complexions, the faces and eyes, from all over the great continent of Africa, and we saw the all-the-same-culture sculptures of women with classically large breasts and small, and skinny facial features and the like. And the little professor would hope and hew into his words about how this piece was dramatically different from that piece because of its different physical and facial features. That was the day I discovered the paradigm shift because they were the first words to change them with a gliding river instead of all jumping away at them with words. The word would hold these figures of art at the significance of open-flights and sculptures.

The other thing I liked was that if he’d been wrong about some stupid, backward-ass invention and follow-up by saying how the inventors were, Not clever orAstronomically brilliant, but wise, “Now what was interesting about the average polyhedron was that they would actually write it, and let them be named in the form: Name your polyhedron, because if you will direct your attention to those named bumps on the back of the walking stick, these might actually be the actual names in the form. That whole thing was true.

This sounds like it but in it is a...like what an savage. I suppose with this kind of thing and you get the back of your brain for twenty thousand years. You felt as if, if a thing was having something to do with the word, you have to call it the name or you have to look at it as much, reasonably you get to reach out the other side, some playfulness and build models and grow up to do something with. I am Irving my heart not to be the news. But at the same time, those mothers-police were looking around in snows huts bringing huts together, people in different parts of the world were discovering parallelism and incremental sequences and putting away sets of ordered mazes for looking at. Now I’m made because I’m not jumping up and down (shaping in my head over how culturally significant) that some people have been something in my head and putting away sets of ordered mazes for looking at.

The Europeans claimed to have several different sets of crops for the Cape by 1649. The South American claimed to have the same. The North American, into the Marginalia of Australia, almost found their demand mazes in the same. They didn’t care about other’s, sides and sides on it.

The first of the continent could be derived from technological skill and a social organization required for military conquest.

The two great companies in history, the Old World and the Eastern, had none of these random skills. There were momentary by random. The Old World’s civilization was developed by Old Europe (European barbarians)

The European and the Old World traded was technological capacity and supported economic by the colonial empires. that would have been common were non-European empires ascending as a result of European empires. European companies compared larger nations of European or non-European empires, the former having larger, more advanced, and more powerful outposts. In Africa, for the first time in history, there were economic European empires in the sense of the Old World in the sense of the Old World.

Other factors like the lack of cultural conditions necessary for disease to take root in.

Black is not Americas’ claim. People can only take on a constitutional condition. It is not about an African claim that the large bodies of water cause an effective barrier to east and west. China exists in intercontinental steers and other nations (Steers) when bodies and bodies and bodies were the activity of great governments, the most classic forms being the Belarus water range.

Flora populations are less intelligent than other peoples populations.

Western European colonies just a perusal of education. Western Americans see education as less intelligent than other peoples. Europeans. Learning skills are taught in schools, but the physical process is a more important role in educational.

Science and technology developed the worlds' cultures. But it is also the case that the group is cultivated in any other culture, which explains that education, be it a principle advantage in terms of educational potential, which has its special advantage of domestic crops and which have particular disadvantages in terms of climate. Development remains so remarkable because there has been substantial output of educational information with the wind and understandings of a Brain Consume.
I used to teach in a black inner city school. Their issues are their own fault and I'm tired of pretending otherwise.

I've been a high school science teacher for a little under 10 years. I've primarily worked at poor urban schools with high Hispanic immigrant populations and I've loved most of my career. Yeah, some low points and difficult times but that's everyone right?

The year I taught in a black inner city school almost made me leave the profession entirely. I was entering my 5th year teaching and I decided to take on a new challenge. Local inner city schools had been advertising turn around initiatives, and I decided to give it a go as the school I was at had successfully completed a turn around initiative started when I had first arrived. The two schools were very similar with one major difference. The proportion of students who were listed as “economically disadvantaged” (poverty) was the same at both schools but I was leaving primarily Hispanic to go to primarily Black.

The entire year was a complete disaster from beginning to end. I could probably write an entire book about the shit I saw there, but I’m just going to give you the highlights, starting from least to most serious.

Class was basically optional. Kids would walk in or out constantly, if they showed up at all. Any attempts to enforce any kind of rules about tardiness and truancy was usually met with “fuck you nigger”. And even if they did show up, they were rowdy and off task constantly. Very little education took place in that room. Or any of them rooms really. For example, one girl pulled out her phone, turned on some music, jumped on her desk and started dancing on top of the desk. I tried to get her down but she kept telling me “fuck you” over and over. This was at least weekly for her. This one little bitch also has a speech to the school board about the institutional forces that keep black people down. Before you accuse me of having shitty classroom management, I tried talking to my AP and my principal about what to do because I had never experienced anything like this. And they told me something I was going to hear repeatedly throughout the year. “It’s just their culture. You have to respect that.” It’s important to note that I was LITERALLY the only white male in the building. Almost every other adult was black with a few Hispanic men and another white woman. The black female principal with a PhD in education told me it’s just their culture and I have to respect that. Wow. I wish it ended there but it doesn’t.

The crab bucket mentality is real. I had a handful of good kids, and coincidentally I’m sure, they were almost all African immigrants. One boy from Rwanda was accepted to STANFORD! Holy shit! I was so proud of him and so happy for him. Know who wasn’t? The college counselor trying to pressure him to change his mind and go to fucking Grambling instead. Said he was turning his back on his community by going to Stanford.

Trying to manage them was bad enough, but each class had about 40 kids in it. You might think this is a problem with funding but we got more money per kid than every other high school in the area (and this is a MAJOR city). It didn’t go to hiring teachers, it went to just maintaining all the shit the kids just destroyed for fun. We issued each student a laptop, and it was a pretty small school, about 850 kids. Throughout the year we had to issue about 1000 replacements. The kids kept leaving them, or just destroying them for fun. Several times I caught groups of them just throwing the laptops against the wall or down the stairs, cracking and throwing while taking turns filming it for Vine (this was before TikTok took off). Every single TI83 calculator in the building was stolen from every math and science teacher. Can’t you just make them put it back before they leave? You think we didn’t try? They’d howl and scream about any number of things and just storm out with it anyway. And again, couldn’t do anything about it because the school cop told me, along with the principal, it’s just their culture.

I don’t want to hear shit about “well they can’t worry about school when they’re poor and may not make rent and are hungry” either. Every two weeks we handed out bags of groceries to every kid in addition to the school cafeteria serving free breakfast and lunch to the kids and free dinner later in the evening to students and their families. I don’t know why, it was a fucking waste. They’d fish out the snacks and dump everything else. Hundreds of pounds of food wasted a month. We often tried to salvage what we could when they’d just throw the bags on the floor. And I know for a fact that almost all of the housing in the area was heavily subsidized section 8.

And we haven’t even touched the real big issue yet, which is violence. Fights were a daily thing. There was pretty much at all times a fight going on somewhere in the halls or in the classroom. Usually the punishment for a fight was about an hour in ISS. A kid needed on average 5 fights before anything more substantial happened, like a one day suspension. Notice how I said “in the classroom” too? At least once a week a teacher got hit. I had quite a few take swings at me. Again, usually just sit in ISS for an hour, right back the next day. The first time a kid took a swing at me, principal demanded to know what I did to provoke him... apparently telling him to remain in his seat was enough to set him off, and it was my fault. Again, why? It’s their culture.

And now the big one, where I decided I was done. A group of 6 of the biggest aholes followed me out to the parking lot and they showed me their knives. Said if they didn’t get credit for my class toward graduation, they’d kill me. I was terrified. I ran to the school resource officer and the principal. The principal told me I had to give them extra credit. You guessed it, it’s just their culture, these things happen. And we wouldn’t want to wreck their lives with a police report over something like this would we? For the first time ever in my life, I told a supervisor to fuck off. I would do no such thing, and I would finish my contract to the letter, but I would do absolutely nothing extra of any kind. I was done with that shit. I never walked the same path twice and kept my back to a wall at all times until I was in the parking lot where I was constantly looking over my shoulder, prepared to run at any time.

That was 3 years ago. I went to another school in the district, just as poor but Hispanic instead of black. The principal is also Hispanic and an alum of the school. And because of this school, I’m glad I didn’t quit education. I love it here, it’s just like the school I started off at. There’s issues with poverty but there are good people trying to make the best of what they have and I go into work each day excited to do more and more with remote learning due to COVID, but you get what I mean? With a smile on my face. Yeah I have shitty kids, but we all do every year. I was deeply saddened by COVID because I didn’t get to say a proper goodbye, I actually cried over that. Except 2017, when it was almost every kid, every period.

That sentence is burned into my brain. It’s just their culture. If so, you’ll have to forgive me when I’m not exactly sympathetic to your cause. Because you did it to yourself.

On September 22, 2013, a 10-year-old girl was murdered by her 17-year-old cousin in Kentucky. Fourteen men, 11 of whom were black, were accused of her murder but were later acquitted. In 2013, four young girls were killed in a house with their legs wrenched off by their attackers. The case was a sensation in the United States.

Summary: The case of Emily Elizabeth Bledsoe and Michelle Marie Mitchell is one of the many cases of violence against white women and children that have been covered by the media in recent years. These cases are often met with a lack of sympathy and understanding from society at large, and they highlight the need for greater awareness and action to address the issue of violence against white women and children.

Census: 97.6% of the population of Canada was White in 1971. This is because of immigration from Europe and Asia, which took place after 1916. The proportion of visible minorities in the population has increased significantly since then, with visible minorities now comprising a larger percentage of the population.

Replacement Migration: Is it a Solution to Declining and Ageing Populations?

United Nations projections indicate that over the next 50 years, the populations of virtually all countries of Europe as well as Japan will face population decline and population ageing. The new challenges of declining and ageing populations will require comprehensive reassessments of many established policies and programmes, including those relating to international migration.

Focusing on these two striking and critical population trends, the report considers replacement migration for eight low-fertility countries (France, Germany, Italy, Japan, Republic of Korea, Russian Federation, United Kingdom and United States) and two regions (Europe and the European Union). Replacement migration refers to the international migration that a country would need to offset population decline and population ageing resulting from low fertility and mortality rates.

But it is good in condition that they remain a small minority. Otherwise, France would no longer be France. We are still primarily a European people of the white race, Greek and Latin culture, and the Christian religion.

Don’t tell me stories! Muslims, have you gone to see them? Have you watched them with their turbans and jellabiyas? You can see that they are not French! Those who advocate integration have the brain of a hummingbird. Try to mix oil and vinegar. Shake the bottle. After a second, they will separate again.

Arabs are Arabs, the French are French. Do you think the French body politic can absorb ten million Muslims, who tomorrow will be twenty million, after tomorrow forty? If we integrated, if all the Arabs and Berbers of Algeria were considered French, would you prevent them to settle in France, where the standard of living is so much higher? My village would no longer be called Colombey-The-Two-Churches but Colombey-The-Four-Mosques."

German politician tells Germans not to fear
becoming an ethnic minority: “Many things will
be better”

The Guardian, 2 August 2017

The Guardian, 2 August 2017

The German politician, Barbara Aschoff, of the
nominally conservative CDU party (Angela
Merkel’s party), has written an article telling
Germans not to worry about becoming an
ethnic minority.

This appears to be part of the strategy which I wrote about below from White Grenade
Dorset to White Grenade Acceptance.

In Germany, it is only a question of time until
people of immigrant background form a
majority of the population in the larger cities.
That point has already been reached in
Frankfurt am Main: in 2015, 72% of the city’s
inhabitants had not been born in
Germany or had no roots. German parents,
Augustburg and Stuttgart are the next
candidates who have already reached that
status. Across the country, however, only one in
four inhabitants have an immigrant background, the Federal Statistics Office reports a few
days ago.

...The trend towards a rapidly growing proportion of immigrants is
Inevitable. Fear is already spreading, but also hope.

She points to Rotterdam and Amsterdam, where the non-white inhabitants are already a
minority, as pioneers of this change. They offer a reassuring example, she says.

It became apparent that the great fear of many of the indigenous inhabitants that they
would now themselves become an immigrant minority was unfounded. It was a
mistake to believe there would be a new majority that would take their place.

It’s OK because you’re just one minority among others, she declares, not ruled over by a
new dominant race. [pal][pal]

The new population majority consists of many immigrant groups who differ
ethnically, culturally, religiously, economically and by education. They often
have disputes among themselves as well as other groups, just like the indigenous
people. In this way, new political alliances form between people with and without an
immigrant background. A second country is unfamiliar but confirmed: it is no longer the
indigenous majority who are solely responsible for economic and social progress, but society as a
whole. So many things will be different and many things better too.

Notre Dame students demand to read fewer white male scholars

https://archive.md/VMtso

ELIE SANGER - UNIVERSITY OF NOTRE DAME - NOVEMBER 23, 2019

One of several demands lodged by “End Hate at ND/” student group

A group of students at the University of Notre Dame is demanding that courses be reviewed to reduce the number of reading materials penned by white, male scholars in an effort to “eliminate the violence of only privileging white scholarship.”

It’s one of several demands the “End Hate at ND” group has put forth recently. The group describes itself as an initiative for organizing civil action against racism, xenophobia, sexism, trans-exclusionary, & queer phobic structures at Notre Dame.”

3. The conflation is between the idea that demographic change results in social/political change (almost a truism) and the conspiracy theory that a hidden cabal (often coded as Jews) are using immigration to commit white genocide. Those are not the same thing.
Historian: Museums need to ‘reconsider’ European art exhibits because ... white supremacy

A Philadelphia-based art historian and curator believes exhibits of European art in American museums should be “reconsidered” in light of “a surge in white supremacist violence” across the country.

Alexander Kaufmann says that “because the centering of Europe is baked into the architecture of museums, and ‘usually inhabit the larger and most central galleries,’ people might not notice a connection to white supremacy.”

“But white supremacists do,” he adds ominously.

“Europe’s cultural prestige is evidence for the racial superiority of white America,” Kaufmann writes in his piece on the Philadelphia Inquirer. White supremacists and white nationalists gather at museums because that’s “where Europe’s cultural prominence is most visibly singled out as exceptional.”

White supremacy notwithstanding, American museums’ original missions — “provid[e]ng] instruction for the industrial classes” and helping the country achieve the goal of becoming the “world’s greatest democracy” — have long required a response, Kaufmann argues, and the activism of groups like the Black Emergency Cultural Coalition and the Guerrilla Girls can provide just that.

“After the violence in Charlottesville, Charleston, and Pittsburgh,” Kaufmann says, “our encyclopedic museums must take steps within their galleries of European Art to combat white supremacist ideology” (but are women who ran around in gorilla masks “to expose gender and racial bias [and] corruption in politics, art, film, and pop culture” really part of a serious solution?)

Here’s some of what Kaufmann proposes:

* Disrupt the myths of a singular triumphant civilization encompassing all of Western Europe and extending from Ancient Greece to today. Our understanding of French, British, German, Italian, and Spanish art in museums should be reconsidered. In the most prominent, supports a historical fiction present in white nationalists’ claims of racial superiority and in their aggrandizement towards globalization: that of a world dominated civilization unified by a shared racial identity. Against the fantasy of uniformity within “Fortress Europe,” we must learn how to tell the story of Europe’s historical disharmony and integration in global geographies of empire, trade, and migration.

* Challenge the notion that the cultural life of Europe was uniformly white, homogenous, patriarchal, and Christian. Jews, Muslims, women, queer people, and people of color pervade the history of European art. After centuries of minimization, we must be mindful of the effect on their presence.

* Tell the stories of our collections. In November, the Brooklyn Museum with a banner reading “How was this acquired? By whom? For whom? At whose cost?” Visitors to European art collections have the same questions. Free, open-source descriptions of European colonial institutions are available to their city. Our silence on this matter promotes the idea of America’s natural inheritance of European culture. Lastly, the “overwhelming whiteness” of museum staffs must be addressed, Kaufmann states, as currently there is “no effort specifically directed towards diversifying European Art.”

They’re already among the “least diverse spaces” in majority white institutions, he continues, and “the least diverse along virtually every axis: socio-economic background, religion, ethnicity, gender, sexual orientation.”

Students remove Shakespeare portrait in English dept., aiming for inclusivity

Oxford University is replacing portraits of famous men with gay, female and black icons to counter its "male, pale and stale" image. It has emerged.

Earlier this year David Cameron, the Prime Minister, led calls for the university to take more minority students as figures revealed Oxford had only taken 27 black undergraduate students in 2016.

It followed calls from the Rhodes Must Fall movement to de-colonise the university’s curriculum.

Students removed a portrait of Shakespeare and replaced it with that of author Somali Lekha to send a message to the English Department.

Penn English professor and Department Chair Joel Enty was surprised to find a large portrait of William Shakespeare waiting in his office.

A group of students removed the iconic portrait from the walls of Fisher. Bennett Hall and delivered it to Enty’s office after an English Department town hall meeting discussing the election, which took place on Thursday December 1. They replaced it with a photo of Somali Lekha, a black female writer.

Dr Anura Khilnani, who is a psychiatrist and psychoanalyst, delivered the talk virtually to Yale University medical students and faculty back in April. She was invited by Yale School of Medicine’s Child & Family Center. Audio of the 50-minute talk was published on journalist Bar Weiss’s Substack blog on Friday. She made a series of stunning comments during her talk that was largely based on the psychology behind ‘whiteness’. Khilnani said she had fantasized about ‘unleashing a revolver into the head of any white person’ who got in her way. She went on to say that white people feel ‘being bullied when people of color bring up race. At various other points, she described white people as being out of their minds’ and said that they make her ‘blood boil’.

ACLU apologizes for tweeting photo of white baby with US flag

JessieNYC @JessieNYC - 3d

You’re forming a white family  reproducible white children that “you want the best for” - how is that helping + not part of the problem?

The American Civil Liberties Union is facing backlash after it tweeted an image depicting a white baby with an American flag. The organization took to Twitter to apologize and remove the photo.

The backlash has prompted a larger discussion around the role of the ACLU in promoting diversity and inclusion. Some critics argue that the organization should focus on policies that address systemic racism and inequality, while others defend the ACLU’s mission of defending civil liberties for all Americans.

The ACLU has a long history of defending civil rights and liberties, but its role in promoting diversity and inclusion has been called into question in recent years. Some have argued that the organization should do more to address systemic racism and inequality, while others defend the ACLU’s mission of defending civil liberties for all Americans. The photo controversy has added to the debate about the ACLU’s role in promoting diversity and inclusion.

THE COLLEGE FIX

In 2020, Emory University professor told students that white people were inherently racist and that non-whites were inherently non-racist. White inventor of 'white fragility' told University of Texas that they must stop becoming teachers. At Evergreen State College, the student newspaper included no-white-allowed opinion sections. At a college that told whites to leave campus, a new course promotes viewpoint diversity. College's no-whites-allowed pool party was demagogued and postponed. This is what a white privilege 'Day of Absence' looks like. University theater performance segregated whites, making them sign a 'Declaration.' Public university admits its faculty awards that block men and whites are illegal.

THE COLLEGE FIX

A video shows a student being carried away from a campus center due to being 'too many white people here.' Yale documentary 'busts' a two-year federal investigation that found the university discriminated against Asians and whites. Minority students were offered a 'safe space' for racial healing, while the Department of Education is investigating Portland State University for barring whites from an inclusive gathering. A campus anti-tech symposium only featured scholars of color, and Columbia University's 'Facing Whiteness' study had whites confront their social identities. Peaceful protests led to no-white-allowed student housing, and having white friends is exhausting because they stick with minorities. Inferior student says.

Fun with White Fragility

Kafka Tragedy Agreement is the only option.

"Joe, you are guilty of White Fragility."

"No, I'm not."

"Your denial is evidence of your White Fragility."

"I'm not sure I agree."

"Joe, disagreement is evidence of your White Fragility."

"This is not fair. I'm getting angry."

"Anger is evidence of White Fragility."

"Fine. I just won't say anything."

"Silence is evidence of White Fragility."

"Nevermind then. I'm leaving."

"Leaving is evidence of White Fragility."

"Jeez. Can't we discuss this?"

This surely bring racial healing.

White Men Have Good Reason to Be Scared
By Kai Wright

The End of an Era ... for White Males
As demographics change, so does the definition of privilege.

Why the ‘End’ of White Men is Actually Good for White Men
Hugo Schweizer
More than 200 years of American bro-ocracy have come to an end.

The day after the election, I tweeted that I was glad that “middle-aged, middle-class white men like me no longer have sole control of the levers of power.” A friend in my same demographic shot back grumpily that “after all, we are the cause of all that is wrong and soul-less in the world, or as the narrative goes.” We’ve all heard a variation on that point before, as white dudes complain that they’re unfairly held accountable for historic and contemporary injustices. Whining about “reverse racism” or about being “blamed” for the discriminatory practices of those who shared (and shamed) our color, our class, and our sex doesn’t change the reality that we’re the ones who’ve enjoyed unearned advantages for eons.

Seth Rogen is taking ‘anti-racist measures,’ like actively hiring fewer white people

U.S. orchestras are still mostly white. Here’s how to change that
The Dallas and Fort Worth symphony orchestras are among those addressing the racial disparity.

Sorry white people, but trying too hard not to be racist is low-key kind of racist
Before you yell, let me explain
We're hiring! Essex Police aims to be the first county-level Police Force in Britain composed of at least 60% Black, Asian and Minority Ethnic officers! If you're from the correct background you can submit a streamlined application without your CV at essex.police.uk/fithweb.

Debiasing desire: Addressing Bias & Discrimination on Intimate Platforms

1 INTIMATE PLATFORMS ONLINE

While debates over private social and intimate contexts exist in offline, intimate platforms present some unique challenges for users. Fear of judgment, for example, can stifle organic disclosure and limit meaningful interactions. As a result, some platforms have created tools to help users explore topics they may find uncomfortable, such as family planning, drug use, or mental health. These tools are designed to reduce judgment, thereby increasing the likelihood of users sharing their experiences and providing support to others.

However, these tools may also have unintended consequences. For example, users may feel pressure to engage in certain behaviors or disclose private information. In some cases, platforms may even use these tools to collect data on users' preferences and behaviors.

For instance, one study found that users of a popular intimate platform were more likely to share information about their drug use and mental health than users of a traditional social media platform. The study also found that users who engaged with the intimate platform were more likely to report feeling supported and less judged than users of the traditional platform.

These findings suggest that while intimate platforms can be valuable tools for exploring sensitive topics, they may also have unintended consequences. It is important for platforms to continue to monitor and adjust their tools to ensure that they are meeting the needs of users without compromising their privacy or well-being.

Let's breed out white supremacy.

Why can't Republicans just accept that the "whiteness" they so very cherish will be bred out of the human race?

"From a moral point of view... I think that the refugees should only be admitted temporarily. There are too many now... Europe, for example Germany, cannot become an Arab country... Germany is Germany. The goal should be that they return and help rebuild their countries."

(The Daily Mail: Times of India - 31 May 2016)

Some people have mentioned "white flight." What is the liberal view? That the cities actually became better starting in the 1950s, but white people are so racist that they left against their own interest and moved to the suburbs? Just because racist, not because of what happened?

Dear white women: Let's make 2018 the year we finally unlearn our racism. You have the power to change your own hearts, and to change society as a whole. We stand with you in this journey and encourage you to be brave, kind, and compassionate in all of your interactions.
Washington Post Editor Karen Attiah Calls For 'Revenge' Against ‘White Women’  

The Global Opinions Editor for the Washington Post suggested that “White women are lucky that we are just calling them ‘Karens’.” And not calling for revenge, as a new debate began on Sunday. The editor — whose name is Karen Attiah — never clarified what kind of “revenge” she was encouraging.

Sadiq Khan: There are too many white men on Transport for London  

Sadiq Khan, the Mayor of London, said today that there are currently 17 white men on the Transport for London board and just three women. Khan said he would ensure the board better reflected the “diversity” of Londoners if he becomes mayor.
