

# Roundtable! (17/05/2026)

Most people like MT! Round of applause for the Iberia team :D

Updates from the LATAM Team

Jag as new Writing Lead, ThanosYote as Deputy

King Ahab's Feast is not going to be an update!

Lots of skeletons and stuff will be added to Yippie.

LocDocs have been reorganized!

Russia and Asia LocDocs created!

Yippie includes US, Germany, DV, the Amur patch (wow!)

Whismirk is now LC for Africa!

Frosty is now SenContrib!

UsAir is now SenDesigner

Implementing loc requires LC approval.

---

Yippie might be the largest patch since release: at **maximum scope now**. Very meaty, not adding any more to it

Wrapping up US space design

Further progress on Iberian Africa, Pixel's doing good work on Kenya skeleton

Schlafly GUI nearly finished, icons and tech art left for other presidents, good progress

Yorty has the largest tree in TNO 🔥

Lot of testing needed for '64 and '68 presidents work

Completely overhauling Argentine skeleton within Yippie. Starts off Germany-aligned, ~~can only go as far left as Paternalism-Fronzizi~~ can be progressive nvm

Plenty of GFX work to do but not all icons will have unique prompts

Cuba, Dominican Republic are getting updated in Yippie

Approaching design completion possibly by/at the end of May

Greytides who don't want to work on America or Africa should let Jag know

Germany content to mid-1964, existing Speer/Bormann preserved, Heydrich cop-out between new and old content with in-universe event

We hit the HOI4 province limit 💔 Oceans, Antarctica, Argentina are good areas for province reduction

Argentina '74 proxy (involving American invasion, regime change) and, outside Yippie scope, possible Iranian Civil War proxy in '75 if paniranists win

Conservative/isolationist US presidents go towards hemisphere dominance and continentalism, try to align Argentina

~~KdN replaced with a real UN equivalent, OFN is now regional~~
