

A War Over PinkiePie's Wiki Page

By LEMURIA

At 15:47 UTC, on Mar. 2, 2024, FP tore out most of PinkiePie's wiki page, replacing a long biography with just one short sentence: "PinkiePie is a user who is known to operate SleepyCat." FP did this as punishment for PinkiePie distributing an image paster in chat, which our journalists analyzed, finding no malware or unwanted features, alongside futapony pastes.

Anyways, an edit war ensued as d9eoad restored PinkiePie's article to the pre-FP version, at 22:44, Mar. 2. Then, at 02:53 UTC on Mar. 3 2Project then reverted it back to FP's version. d9eoad fired back, reverting 2Project at 03:34, continuing to make more slight edits.

2Project reverted it again at 03:46 urging d9eoad to "respect the decision of User:Owot" (FP). In response, d9eoad reverted them again at 03:49 with a message calling 2Project a "deplorable gollumpus".

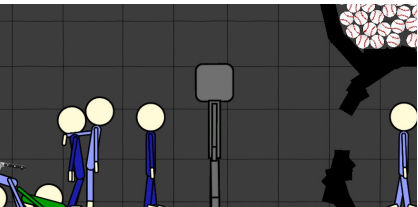

By about 04:26 the article had stabilized, with no additional edits. FP did not protect the article, but did later say that people were free to "add any info you want to that article.", only expressing opposition to the inclusion of the banner saying "I'm PinkiePie! Hop on my train!!!".

Regardless, this is the first edit war we've documented on the OWOT wiki. Edit wars are primarily a problem on Wikipedia, which has developed protocols for countering them, but other wikis are certainly not immune to edit wars.

Mr. 1052 Experiments On Ragdolls

By LEMURIA

For quite a while, Mr. 1052 appears to have been experimenting with ragdolls in the #miscellaneous channel of the Discord server. Investigations ongoing. Not now though.

Fernozzle Wants to Masturbate to SaltDXM

By LEMURIA

On Feb. 29, 2024 at 19:32 UTC, Adept announced in the #visit-my-world channel that they would do a "DXM trip" at 02:00 on Mar. 1, linking to /saltdxmlog, presumably where they would talk about their trip.

DXM refers to dextromethorphan, a cough suppressant. When used in higher dosages, it is a dissociative hallucinogen, taking its user on a trip.

On Mar. 2, at 18:35, Aubrey pointed out that the world was private, Adept replying they "had a revelation last night" and deciding it was "stupid", presumably cancelling the trip.

Then at 06:18 UTC, Mar. 3, Fernozzle asked Adept to un-private it.

RUSSIAN CHESS PLAYER'S NAME IS SPAMMED

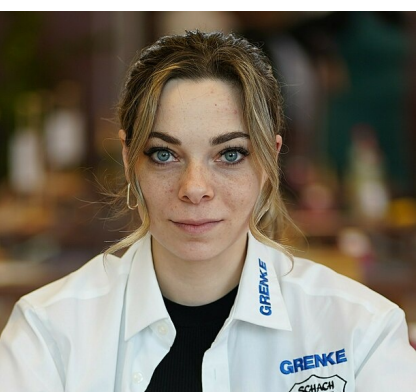

By LEMURIA

As if Christa McAuliffe wasn't enough, some anons have taken to spamming the name of Russian-Israeli chess player Dina Belenkaya.

Chat was on the receiving end of her name in both Latin and Cyrillic script.

OWOT chat truly receives the most random names on Earth.

From an American astronaut who died in chat, someone named Sarah (who?), to chess players, chat is an interesting and unhinged place.

Dina Belenkaya (above). Image by Paul Meyer-Dunker (CC BY-SA 4.0 International) [https://commons.wikimedia.org/wiki/File:Dina_Belenkaya_Women%27s_Chess_Bundesliga_Bad_K%C3%B6nigshofen_2023_\(cropped\).jpg](https://commons.wikimedia.org/wiki/File:Dina_Belenkaya_Women%27s_Chess_Bundesliga_Bad_K%C3%B6nigshofen_2023_(cropped).jpg)

A Christa paste, Futapony paste, black censor bars, and a message going on and on about how "OWOT is an unsafe place."

At Spawn, Everything Had to Remain Black

By LEMURIA

At 21:02 UTC, Mar. 3, 2024, FP declared a "color lockdown" at spawn that would last until he got more free time "later today". Any attempts to paste colored text would result in the color being changed to black.

Our journalists ran some measurements by pasting a 1-character wide strip of colored full blocks near spawn, and found the radius to be 12 chunks from the center console. See the images to the left and the right for our exact measurements.

FP cited "too much degeneracy" and "IP hopping" as the cause of the lockdown.

The color lockdown ended after a few

```
its now on the negatives

For the first time in a long while, the web crawler bot is devoid of its blue hue

hours, when journalists observed Ziggy's face pasted on the canvas.

This came as FP struggles to deal with all the threats to the Canvas. From Starianna's scripts, PinkiePie letting an image paster loose, and Christa, OWOT has a lot on its plate. Clearly, these image pasters need to get a life.

Ziggy Complains about Capcut

By LEMURIA

One of OWOT's most annoying phenomena, an anatomically correct male-like humanoid object that identifies itself as "ultraleland7Ziggy", known to actual human OWOT users as Ziggy, has posted a video of itself using CapCut on Mommy's iPad to produce an absolutely shitty video with the caption "Capcut text error".

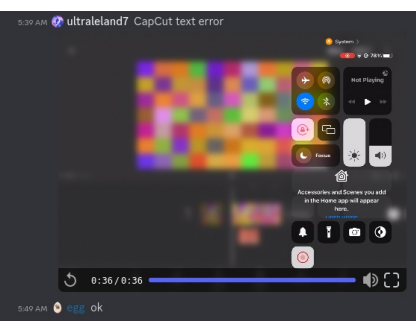

Our journalists analyzed the video in-depth and could not identify any errors,

which supports the theory that Ziggy's single-digit IQ may have caused it to misidentify intended program behavior as an error. Or maybe it tried to use a feature only available in Pro but couldn't afford to do so as it lived in a trailer park in West Virginia.

Ever since Ziggy's mother created a weird humanoid object and ejected it either through the vagina or through Caserean section after its father inserted an unknown white liquid into the

other c. 2015, it has continued to be a negative influence on humanity as a whole.

Studies have shown that eliminating Ziggy from the world, would make it a better place.

Fernozzle

Continued from the front page

Fernozzle then stated that he wanted "to fap to salt dxm", receiving multiple raised eyebrow emoji reactions in response. Adept simply replied with one word, "what", at 17:42 UTC, Mar. 3, 2024. What the fuck, Fernozzle? You are indeed quite strange.

Oh well, some people are just confusing. Well we all have our own masturbation preferences anyway and every-one's entitled to their own. But yeah, your preference seems quite... interesting. Oh well, OWON will be on patrol looking for Fernozzle's next weird statement.

Unhinged chat

By LEMURIA

Chat can get real unhinged on a regular basis. Lemuria has started speaking in his native language out of pure anger and the desire to punch Ziggy in the face, lit-fuse is calling on people to "grow the fuck up", and there's an autistic and cringe meter counter active right now. JARP's quit bar remains stable at a 1.69, for now. I shudder to think about how unhinged it's gonna get on March 9 and 18.

Pasting

Laserlime

Is a Crime.

If you paste it, fuck you.

Know a FICTIONAL GOOGOLOGIST?

Report it so we can deport it THE FUCK back to where it FUCKING belongs. Say no to Fictional Googology and stop making up random numbers.

We also deport: Christa spammers, Nazis, Textwallers, Spammers, Wiper abusers, Script abusers, Kids under 13, Starianna bot users, IP grabber links, etc.

OWOT IMMIGRATION POLICE

Ziggy Designated AOP-1044

By LEMURIA

In recognition of just how annoying Ziggy continues to be in the myriad of things it does in chat and on the canvas, it has been declared Annoying OWOT Phenomena 1044 (AOP-1044). A full copy of its file has been included below, and posted on the wiki too.

And no, OWON will not force trauma using my arms bend on its policy for using it/ on Ziggy. Hoping at least to penetrate the skull or force the object to be taken to the humanoid object repair center (for ACTUAL humans, a "hospital"). And when I do successfully inflict blunt force head trauma, I'm going to hire the most expensive lawyer in the world, just in case.

Phenomena #: AOP-1044

Object Class: Euclid

Special Containment Procedures: Transmissions from AOP-1044 in chat are to be logged, suppressed, and analyzed by a team of four child psychologists memetically inoculated against all known cognitohazards embedded in AOP-1044 transmissions. Random words generated by Ziggy are to be logged and checked against 15 different dictionaries to determine the object's language abilities.

Mental health services are to be offered to persons who have been exposed to AOP-1044 transmissions for a period longer than 1 week. Those exposed for months are to be placed on suicide watch due to extreme mental effects.

Efforts are to be undertaken to attain physical access to AOP-1044. AOP-1044 is not to be inserted into any walkers to prevent the excessive production of clear liquid from its lacrimal glands.

High-speed direct message transmission has been authorized as a countermeasure against AOP-1044 activity in chat. The ZIGGY-FUCK-OFF computer system is to use fifteen different proxies to send 30 messages per second until AOP-1044's internet connection is severed or AOP-1044's Mommy severs it herself. Messages should contain keywords likely to trigger a shock response in its Mommy, such as racial slurs against Jewish people, support of 1940s German organizations, slurs for Black people, and links to 18 different sites containing both heterosexual and homosexual pornographic material rated by at least six agencies globally as appropriate for adults over 21 Earth years old.

Description: AOP-1044 is an anatomically correct humanoid object, also known as "Ziggy", or "ultraleland7Ziggy". It was created in 2015 by AOP-1044-1 and AOP-1044-2, a male and female figure respectively, making AOP-1044 nine years old. AOP-1044 will often send a variety of messages within chat at high frequencies for extended periods of time, with the intent to cause annoyance amongst people.

Persons exposed to AOP-1044 transmissions will experience a variety of deleterious mental health effects, ranging from mere annoyance, severe psychosis, and for persons with more than 1 month of continued exposure, suicidal tendencies due to lack of willingness to mitigate AOP-1044.

AOP-1044's physical head contains a biological computer that superficially resembles the human brain. However, based on AOP-1044 behavior as observed by Lemurian containment personnel, it is likely that AOP-1044's brain:

- Has a lower density of brain cells compared to normal adult humans.
- Is lissencephalic, meaning it is devoid of any gyri (brain folds).
- Has patterns consistent with the low-functioning end of autism spectrum disorder.

Addendum 1044-048: Nature of AOP-1044 Transmissions

AOP-1044 transmissions range from:

- The Hebrew-language phrase "שבת שלום".
- Arrangements of Latin script letters with no clear meaning.

Addendum 1044-087: Proposal for termination of AOP-1044

Proposals to terminate AOP-1044 through lethal force are pending approval.

Health notice from our Chief Editor

Our Chief Editor is having a headache right now and some food poisoning. He's been able to make OWON, but he's unsure if it's gonna get worse.

Don't expect everyday issues. You should never have expected them. Remember, he makes this newspaper for free so you're not entitled to anything.
