

## Anti-Semite Shotgun Shells

*DISCLAIMER: Use only in a slambang or 12 gauge with at least 19mm bore diameter.*

Highly effective ammunition against hebrews, but expensive, so use wisely.

Use 14x 2 cent coins as payload in front of a simple cardboard wad. They fit a 12 gauge plastic shell perfectly. 5 gram firecracker grade black powder will make sure they'll penetrate even the thickest kip-pah. Sign them with two Sieg-Runes or the Eternal Windmill of Friendship and Freedom to prevent regeneration through blood-libel.

Weak against other foes. Generally wont penetrate the hardened skull of Nega-Erectus specimen.
