

At around 20:07 UTC on Feb. 24, 2024, a mysterious user, ID 1803, nicknamed "A-O" made a long public statement on the front page chat. Our World of News has taken the liberty of republishing the entire statement verbatim below. The following text will NOT be licensed under CC BY 4.0, as its copyright rests with "A-O". Do you agree with them?

Ladies and gentlemen, you are listening to the A-O broadcast.

One and a half years ago, someone created a world named /antiowot. In this world, a complaint about the behavior of OWOT users was written. "OWOT is an unsafe place. A lot of degeneracy is spreading on OWOT, especially in the chat. It is definitely not a good place. As someone on OWOT once said, it is "impossible" for people on OWOT to not swear. Furthermore, many people on OWOT post NSFW content, are

drunk, are racist, etc. Once, a user was threatened by rape on OWOT. Over the years, OWOT's community has become trash. OWOT is only a place for swearing, porn, drugs, gore, etc. Nothing else on the website interests these users. This website will face a terrible future." Many statements in this complaint are strikingly correct. The chat, considered to be the "trash can" of OWOT, contains low-quality content. Spam, trolls, disrespectful statements, and illegal content. The content of the chat is undoubtedly harmful to society, and users who spend a lot of time in it are negatively affected. Some users have been mentally harmed by the community. Like other humans, OWOT users must serve humanity by behaving well. Currently, according to the common opinion, they are undesirable.

Continued Page 3

Clearly, some have not learned their lesson. The mystery triangle guy continues to post sexualized triangles on the canvas, despite the entire OWOT community telling this person to shut the fuck up.

Our Chief Editor has not encountered any triangle boob pastes on the canvas, and if he did encounter one, he wiped it long ago.

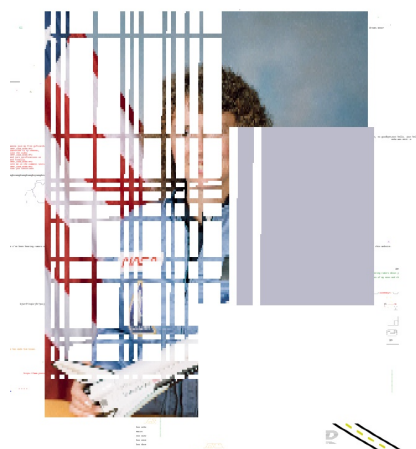

This may suggest that the triangle sexualizers may now be giving up on OWOT and simply taking their pastes to their own worlds, Textwall, YWOT, or places far, far, far, far, far, far away from the spawn where we can all safely

Continued Page 2

The Christa bot operator has taken to pasting Christa all over the canvas again in the wake of FP choosing to block his Christa bot from the spawn.

Vigilantes are bravely on the look out for his spam and are thankfully armed with wipers. Remember, if you see a Christa paste, wipe the everloving fuck out of it until this asshole learns its lesson.

Who the hell gave it
an image paster?

You bet our Chief Editor wiped that bitch faster than she died on Challenger.

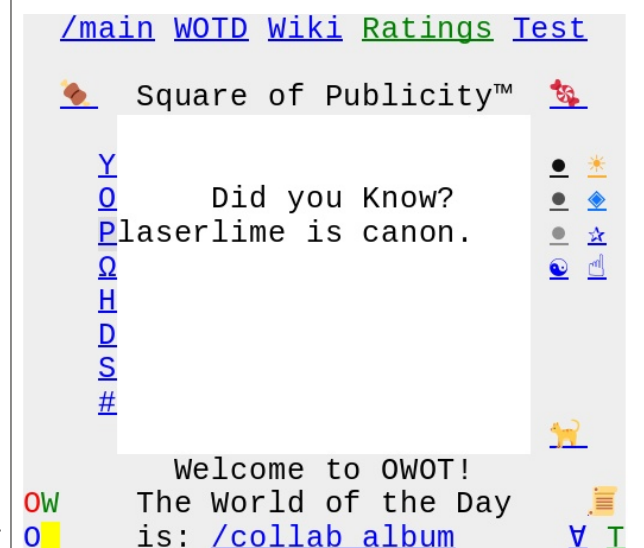

To everyone who has wiped at least one copy of annoying Laserlime ASCII art, thank you from the bottom of the collective hearts of every OWOT inhabitant.

Laserlime is not canon. It is wrong to ship two people together. Especially more disgusting is shipping a minor with an adult. I have heard from a few sources that lime.person might be a minor, under 18. I am unable to verify this information, but I am choosing to assume that this is true.

However, I did see a comic about Lime enforcing their boundaries (yay!) and telling Laserdude to fuck right off. If you're gonna paste Laserlime cringe, then paste that comic where Lime enforces their boundaries.

Our mysterious Laserlime pastar is a pedophile that must rot in prison immediately and as painfully as possible for as long as possible.

And remember, bring out your wiper when you see any of these pastes. Tell the Laserlime loser that we will NEVER tolerate such abhorrent material on our Great Canvas.

Laserlime is NOT canon. Stop pasting it all over the canvas. We're sick and tired of that garbage polluting spawn.

Throughout the long, long history of OWOT, we've encountered many, many pastes that are disgusting and simply need to be removed. Today, our chief editor has compiled a select list of the stuff that needs to go. Perfect targets for the very latest in wiper technology.

1. Laserlime - Someone has shipped Laserdude and Lime for some reason. It depicts Lime with his mouth out and as for Laserdude, something graphic. You'll know it when you see it. Just wipe it off the canvas.

2. Christa - FP may have blocked the Christa bot from spawn and the role-playing may have ended, but we never know what the mysterious bot operator is working on. And browsing out from spawn you may encounter a large Christa paste. If you see a NASA astronaut lady, wipe it.

3. Mentula - Mentula is some yellow strange character with a purple hat. Pastes of the character list her as using she/her pronouns, "not trans", and

that she is "from object
show 'S.E.X.'".

4. Image paster scripts - Seriously, image pasters are nuclear weaponry. They can cause damage in the wrong hands. Who gave the Christa spammer an image paster?

5. Wiper scripts - They are nuclear weapons. Use responsibly.

6. Nazis - obvious reasons.

7. FG number lists - Seriously, go back to Textwall. Stop making up random numbers, stop wasting your time.

8. N-Word spam - obvious reasons.

9. My Little Pony imagery - MLP is cringe and has no place at Spawn.

Remember, always use wipers responsibly. May ratelimits come down on all those who paste disgusting repulsive things like what we just listed in this article. Perhaps 1 character every 1000 seconds will be good for you low-life spammers. Touch some grass.

Get out of your mother's basement, a job, a life, and do something productive.

3:08 AM 📶 📶 📶 Mr. 1052

Are you using a 32bit or 64bit Computer?

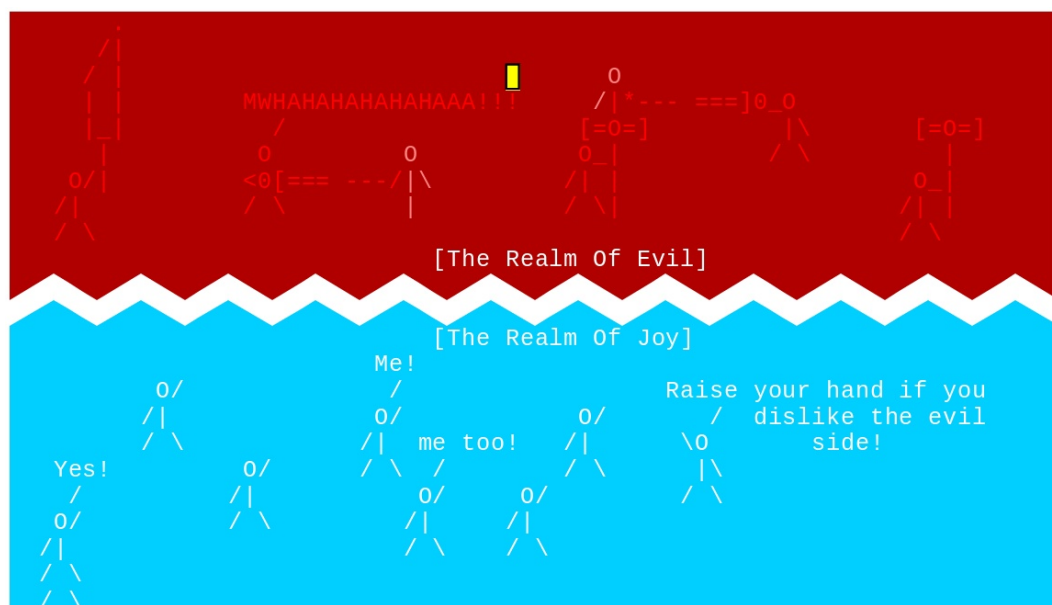

React:

- 🖥️ - if you are using a 64bit computer
- 🖥️ - if you are using a 32bit computer (edited)

🖥️ 16 🗳️ 🗳️ 🗳️ +11 🖥️ 1 📶 1 🌐 1 📶 1 📶 1

Oh, Our World of News is created on a 64-bit computer. Also, it is mildly concerning how someone still uses an old TV for OWOT and whatever Andrei reacted with.

This is our Chief Editor's choice for today. Fine piece of art we have here on the main canvas.

Anyways, as I scoured the canvas looking for more Christa pastes to delete, I found these wise words from a mysterious anti-Christa canvas person:

"STOP POSTING ABOUT CHRISTA! I'M TIRED OF SEEING IT! SOME GUY ON OWOT PASTES THAT BITCH, ON DISCORD IT'S FULL OF PICS...
"I WAS IN A SERVER, RIGHT? AND ALLLLLLL OF THE CHANNELS WERE JUST NASA CHALLENGER DISASTER STUFF."

I fully agree with you there, mystery canvas person. Fully 100%. We're all just trying to get to the bottom of why this guy likes Christa so much.

Want to help investigate? If we establish a group to stop this guy, let's call it the Antichrista.

Laserdude recovers from hack

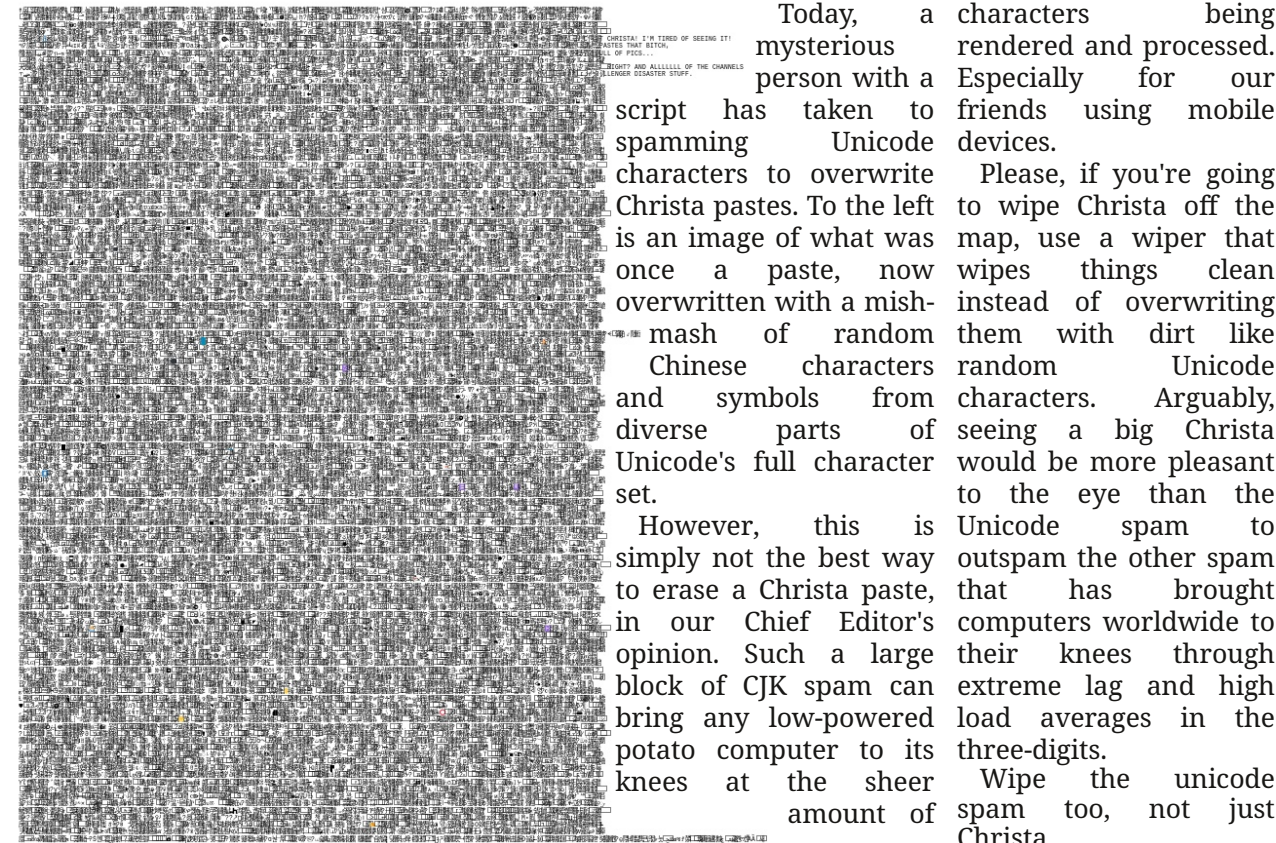

According to Lime.owot in Discord, Laserdude has recovered their account from a hack. "laserdude recovered from getting hacked yay", said Lime in the Discord. Hopefully Laserdude takes a stance against the annoying Laserlime ship pasters.

Finally, something about Lime that isn't a Laserlime paste

Well, happy to be seeing something about Lime that's actually safe for work. Let's start pasting SFW lime content to drown out the Laserlime pasters. Lime's reaction looks quite jaded. Guess he's just used to the Laserlime pasters now. He doesn't deserve this though.

Unicode Spammer Overwrites Christa Pastes

Religious Bullshit on the Canvas

Our chief editor here had a bit of an argument with some religious bullshitters on the canvas a while ago. He's included it here. Seriously, God is not real. You, dear reader, are probably an adult. Too old to have imaginary friends. OWON is proud to be a secular newspaper that refuses to push religious misinformation on its readers.

Canvas fun east of spawn - a convo about a different kind of googology?

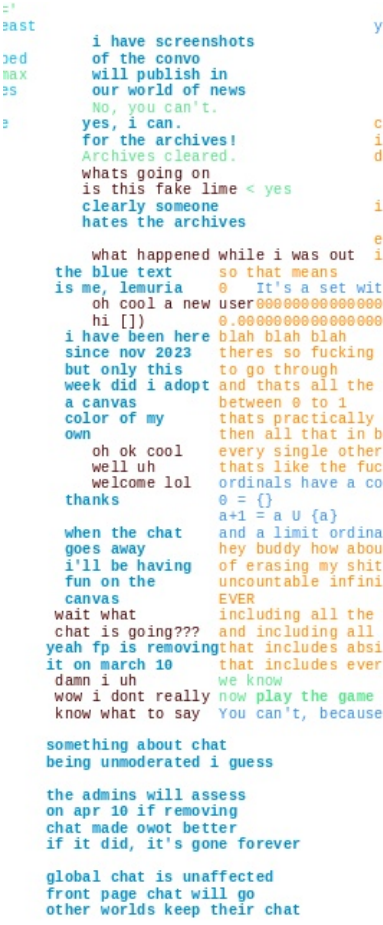

AND SOMEONE WHO DOESN'T GET THE MEMO THAT CHAT'S GOING AWAY

In recent times Lemuria has finally adopted his own canvas color, #008ec4 bold. He recently brought it out again on the canvas, having a fun conversation. Lemuria observed a conversation about numbers (thankfully uncontaminated by fictional googology) that he found interesting. It's to the left of this text block, lovingly screenshotted by him.

Then someone wiped the conversation. Lemuria said that he had archives, but then someone told him that he can't publish it. Well, the very existence of this article right now is a middle finger to you. For the archives!

Some person who speaks with a maroon canvas color though doesn't seem to get the memo that FP's removing chat on March 10. Well, spread the word. We all need to get our act together and make OWOT a better place.

Anyways, our Chief Editor has no idea about the conversations so he's included screenshots here in the paper. Just read them on your own, and come up with your own interpretation of them. Have fun reading!

Ziggy, shut the fuck up

Nobody gives a fuck about your shitty substandard dreidel made of F-tier materials at your local dumpster guarded by some random homeless cocaine druggie. I'm going to dump a bucket of water on it so you can't play with it anymore. Go the fuck back to Textwall where immature crotch goblins like YOU belong. Your dreidels are nothing more than litter to be cleaned up by automated cleanup crews and left to rot in dumpsters across the nation.

We estimate that your constant production of useless dreidels will result in about \$500,000 of Mommy's money being wasted on basement upgrades and expansions due to your lack of self-awareness as to the extremely low quality of your dreidels and your intense hoarding tendencies and unwillingness to give up on a single dreidel or even a single piece of 1. Go back to school and learn something better than dreidel making.

You had a little dreidel, you made it out of clay! And when it's dry and ready, that dreidel I'll destroy!

ultraleland7Ziggy: I have a little dreidel, i made it out of clay. And when its dry and ready, oh dreidel ill should play!

A message for the Laserlime paster troll

Warning: Laserlime troll is active. Recommended to leave the front page fo about an hour or risk seeing offensive troll comics and fics. Message to the troll: Your "comics" aren't good No effort whatsoever smh Also, I suspect you're jealous of laserdude and lime.person because they are friends (you have none) and they chose peace instead of toxicity (you are incapable of doing the same)

Triangles

Continued from the front page

ignore them. Some people though are thankfully reinterpreting the "boobs" on the triangles as just eyes. They are eyes. Let's reinterpret it that way while we work on fully eliminating it.

A-O'S RANT

Continued from the front page

One of the many ways typical OWOT users harm the world is by writing obscene content. Pornography is widespread both on the canvas and in the chat. In the chat, some users have threatened to rape multiple people. In some countries, these acts is criminally offensive. Some users support pedophilia and child pornography, which increase societal problems. You can find many salacious stories, mostly written by anonymous users, on the website. In addition, drugs and other illegal items have been advertised in the chat.

Let's look at an example of the behavior of typical OWOT users. At the beginning of 2024, some anonymous users who supported pornography claimed that OWOT allows pornography. Someone replied that FP, OWOT's moderator, censors pornography on the canvas. Even though they claimed that FP was only against spam and not porn, facts proved otherwise. On the wiki, they discovered that FP has explicitly prohibited "pornographic images done via full-color Unicode block characters". An anonymous user, realizing that FP opposed pornography, demanded that the rule be removed. These anonymous users had a flawed reasoning. They have claimed that censorship on OWOT is prohibited by the First Amendment, that lime.owot wants to censor everything, and that anyone who opposes MHZ and porn spam is a Textwall user who supports censorship. As someone described, "When their claim is denied, they do not show introspection. Instead, they worsen the conversation by adding other unproven things or being disrespectful".

/antiowot's message about the OWOT community is truthful, but typical OWOT users cursed at it upon discovering the world. One of them claimed that /antiowot was a community of pedophiles. Another person claimed that someone who supported /antiowot pasted "laserlime", a pornographic depiction of laserdude and lime.owot. People with troubled minds stayed blind to reality, but they could not disprove /antiowot's message. The OWOT community did not stay still. As OWOT's toxicity became more visible, FP announced that the chat would be closed between March 10th and April 10th. If the removal does not lead to improvements, the chat will be restored. Earlier, FP told people that "owot's mainpage chat in its current unmoderated state may not exist beyond this year, and

that's after recent legal concerns". The decision to remove the chat is in accordance with Article 4 of the Declaration of the Rights of the Man, which specifies the limits of freedom: "Liberty consists in the freedom to do everything which injures no one else; hence the exercise of the natural rights of each man has no limits except those which assure to the other members of the society the enjoyment of the same rights." Whoever uses OWOT to harm society should be stopped. You will possibly claim to oppose censorship, or fear that the community ostracizes you if you support censorship, but you might agree with censorship on OWOT, if you do not ignore its benefits, which outweigh its harmful effects.

A potential symptom of the terminal OWOT disease is the lack of rationality. You can find a myriad of examples in the chat. Some people, when they are told about the unfortunate state of the community, react with hostility. What prevents people from discovering the evil on OWOT is their lack of rationality. However, a portion of users end up agreeing with its message. First case in point: A user, who is not going to be named, admitted that "the main page is full of actual psychopaths". Second case: "last time i went into the chat you couldn't even have a conversation because of how braindead the users were" Third case: "2021 owot was pretty good ... but then it turned into shit like spam". We are reminded almost daily of the degeneracy of the OWOT community. The following remark was made: "Over the years, OWOT's community has become trash." What is the solution?

(A-O) /fixowot, February 24, 2024; The mission of the A-O broadcast is to analyze the problems of OWOT and facilitate its improvement. Let's build a better digital world!

In response to this, four people simply replied "kill them", saying that OWOT's entire community should be killed off.

Our Chief Editor simply replied, with three words - "rewrite their brains".

Well, this is something to consider. As I have said in this paper many times before - the period between March 10 and April 10 is our one and only chance to make OWOT better. Prove to the admins that we are mature enough to have chat and that our community will never be torn apart by trolls, creeps, Christa pasters, and all those who wish to do us harm.

SCRIPTING

"Type '!h' to get a random piece of hate speech": bot in the chat

In the evening of Feb. 24, 2024 (UTC), a mystery operator deployed a hate speech bot. When you typed "!h" in the chat, it spewed out a piece of hate speech as promised, within 15-20 seconds.

Some highlights of the hate speech provided were that

"mexican water has shit bacteria in it", that Central and South America could "actually be considered Mexican" since "they are all just fucking brown beaners", and when Lemuria himself typed "!h", the bot complained of a "fat black bitch short of breath raging about her

special rights to spray her monkey looking graffiti".

Well, if you do run !h and get offended, don't say I didn't warn you. OWON does not condone any opinions broadcast by the Hate Speech Bot.

Will FP delete it all? Not sure. But it was there.

Show your username in the chat window

If you're the kind of user who changes usernames on a frequent basis, has way too many alter egos, or you have a penchant for trolling as an anon and don't want to blow your cover when you send a message with the WRONG identity, or you just want to know if you got ID 1 without having to say something in chat to check, this script may be what you need.

Paste it into Tampermonkey and it will, as it says on the tin, show your username in the chat window. Helpful.

There's a screenshot below to give you a preview of what the window will look like.

Have fun!

And if you are a troll, please stop. Do something productive for OWOT instead.

It should work for all major browsers. Just needs jQuery - but OWOT already has it included so we're good to go.

Though Dimka modified the script and some people helpfully

```
// ==UserScript==
// @name      Username in chat window
// @namespace  http://tampermonkey.net/
// @version   2024-02-24
// @description Shows your username in chat window.
// @author    Lemuria
// @match     https://ourworldoftext.com/*
// @icon      https://www.google.com/s2/favicons?sz=64&domain=ourworldoftext.com
// @grant     none
// @require   https://code.jquery.com/jquery-3.6.0.min.js
// ==/UserScript==
```

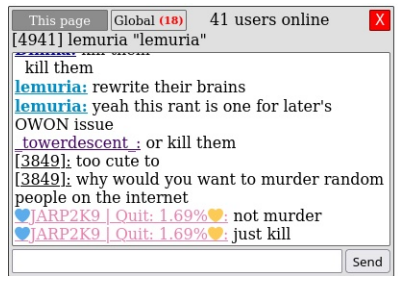

```
!function(){
$ = window.$;
console.log('Username in chat window: starting');
```

```
function lem_update_info() {
    var user = state.userModel.username
    var id = w.clientId
    var nick = YourWorld.Nickname
    var anon = user == "";
    var txt = `[*${id}] ${nick}`;
    if (!anon) {
        txt = `[*${id}] ${user}`;
        if (nick) { txt += ' ' + nick + ' '; }
    }
    $('#lem-chat-info').text(txt);
}
```

```
$('#chat_upper').append('<div id="lem-chat-info"></div>');
setInterval(lem_update_info,1000);
w.on("chat", lem_update_info);
}());
```

told him of the existence of the w.jquery() function... good luck.

Anyways, the script checks updates your username every 1 second, and everytime you send a chat message. Now that we've filled this in, over and out.

Kimapr's Matroska script

The doll looks cute!

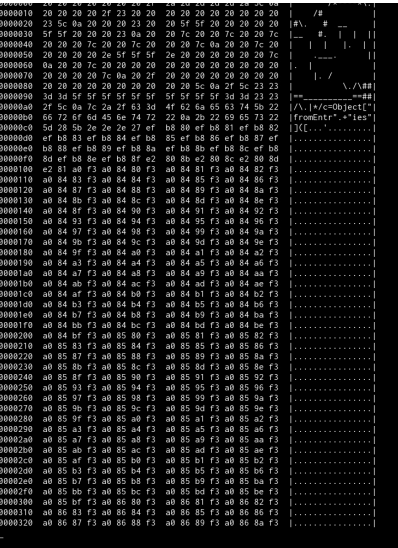

Kimapr, one of the members of the OWOT Discord, made a JavaScript Matroska doll, posting it at around 13:23 UTC on Feb. 23, 2024. The file is over 15 megabytes in size, and our Chief Editor,

despite having 21 gigabytes of RAM on his computer, had a hard time opening it. Oh how powerful it definitely was.

Hexdumping the file reveals a long string of strange characters. We're not quite sure what happens when you run the script, and if you do, we advise being very careful. Not that Kimapr has malicious intent - we assume good faith here, but if it can bring a text editor to a standstill it might cause other problems.

Anyways, for those not in the know about Kimapr, they describe themselves as a "computer enthusiast" and that they are "very shy."

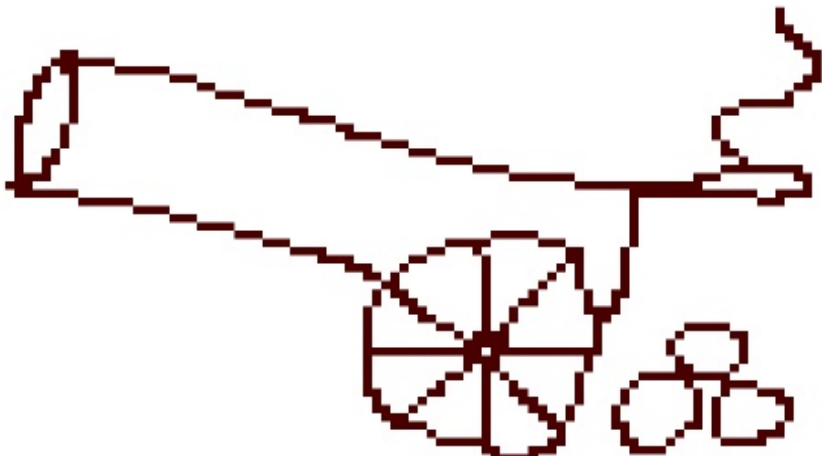

Well, good work on the script! It's quite lighthearted,

Our chief editor is confused by these characters.

looks cute, and helps distract us from the reality of OWOT and the constant spam attacks we always seem to get. Oh, and the Christa paster too. Don't forget him.

Random Things on the Front Page our Chief Editor Liked

Anyways, to finish off today's issue of Our World of News, here are screenshots of some things our Chief Editor found appealing. For the archives!

From a cannon with three balls, a stick figure observing a UFO attack, and a pretty nice tower, the people of OWOT are truly keeping up the good work.

By the very nature of the site, content on the front page is transient. So if you see something you like, screenshot it! Distribute it far and wide and help preserve the long storied history of this website.

Our World of News frequently takes screenshots of the canvas and publishes them in the paper, because everyone deserves a piece of OWOT history.

Artworks on the site are often erased before anyone can appreciate them, but that's the way it is.

If you'd like to find some great art, keep tuning in to the issues we release at OWON, browse and scroll around /main, check #daily-screenshots in the Discord server, or take the brave step and browse round the front page. Try not to encounter Laserlime, Christa, or any of the other spammers though. You know who I mean.

nice linux penguin

LONG LIVE THE TUX

"I use Arch, by the way."

What fonts do you use for OWOT?

By default, OWOT uses the Courier New font. However, our Chief Editor's computer doesn't have the font, so the font that his computer fell back on is what he prefers these days now.

Plus, it's significantly more readable to him and he's pretty much used to it by now, having been on the site for a few months.

So today's question to all our readers: What font do you use for OWOT and why?

A stick figure staring at a UFO around some burnt cities. Hopefully the aliens won't get him, but if only that Christa bot operator could impale those aliens with his gravestone. There's a cannon above we can use to defend, but it only has three balls in it, so we'll need more ammunition refills. Bring some fighter jets too just in case they bring more ships. Now, off to the frontlines we go!

Ignore this Christa gravestone, it was part of the screenshot where the stick figure looks at the UFO.

S. Christa McAuliffe
1948-09-02 1986-01-28

REST PEACEFULLY IN
PROXIMA CENTAURI

If it falls on the alien craft below that'd be great. Left some empty space behind. These words will probably make things a bit more sharper and make the job of killing the aliens easier.

Anyways, thank you for reading today's OWON issue.

Random conversations on front page chat

Suffice to say the front page chat can get quite chaotic at times. As I write this, a debate about circumcision is ongoing right now. At around 00:35-ish UTC, Feb. 25, 2024, "Alastor" posted several YouTube links in the Goatway Remake server, which acts as a bridge to OWOT chat. "Imagine being circumcised", said `_towerdescent_`, with Alastor replying that "circumcision is for jews". 6263

Fuck Dimka spams Among Us in #trash

Dimka was observed spamming "AMONG US" in a thread he created in the #trash channel of the OWOT Discord.

This was done to test out an autoclicker. Lemuria replied with the "STOP POSTING ABOUT AMONG US" cospasta message. All is well.

who
you lol
lol
