

# FP WILL ONLY REMOVE CHAT FOR 1 WEEK

By LEMURIA

FP has abruptly chose to shorten the chat moratorium to one week. The reasons are unknown, but Lemuria's late realization of this almost made him fall short of the 02:00 UTC release deadline. But he was fast enough, so here we are with a fixed version.

# OVER 100 BOTS SPAM CHAT ON FRONT PAGE

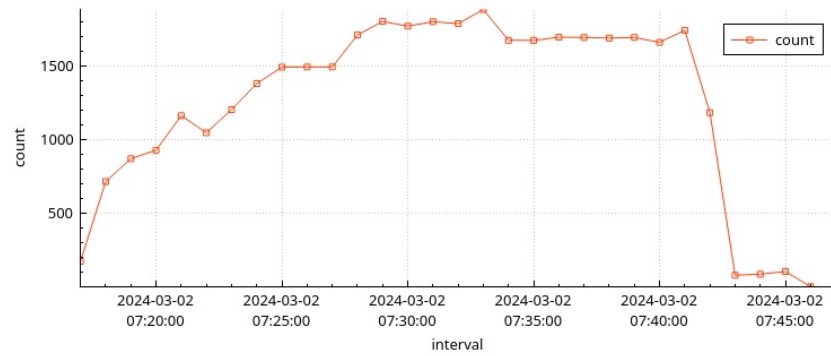

By LEMURIA

Our World of Text may have just encountered the worst spam attack that Lemuria has ever observed in the history of the paper so far, with 100 connections (includes spambots AND LEGITIMATE USERS), reaching far into the 120s.

The spam consisted of messages about "cheese pizza" of the illegal variety. Thankfully no images or links but Starianna, or someone with her scripts, was getting very, very close to getting the entire site taken to jail.

Thankfully at around 07:43 UTC FP had moved to counter the spam, banning several proxies and bringing the chat activity back to normal levels.

Lemuria's chat logger recorded at worst over 21 messages per second being sent, far above the usual activity levels for the time

# Notice to readers

The chat removal is scheduled for 23:00 EDT on March 10, 2023, which will be 11:00 Manila and 03:00 UTC. Due to this, the removal of chat will be reported under the "2024-03-11" issue, not 2024-03-10, as this paper runs on UTC time to ensure everyone (except Brits) have to deal with painful time conversions and put most of us on equal footing.

To allow us to cover the chat removal and its immediate aftermath, 2024-03-11's issue is scheduled for 04:00 UTC / 12:00 Manila, instead of the usual 02:00 UTC / 10:00 Manila release.

# Happy 10th issue!

By LEMURIA

Happy 10th issue from Our World of News! We will continue our efforts to deliver the highest-quality news to the people of OWOT with pride.

Here's to our next 10 issues!

So far, we've covered the continued attack of the Christa spammer, Starianna, the days leading up to chat's eventual removal, Slaskax's survival server stories, a rant from an anon about what the site has become, and even unverified rumors that Placeholder created Laserlime.

No matter what happens, except for if Lemuria falls ill or gets tired, OWON will continue its commitment to covering the events that unfold on our Great Canvas. And we're just getting started.

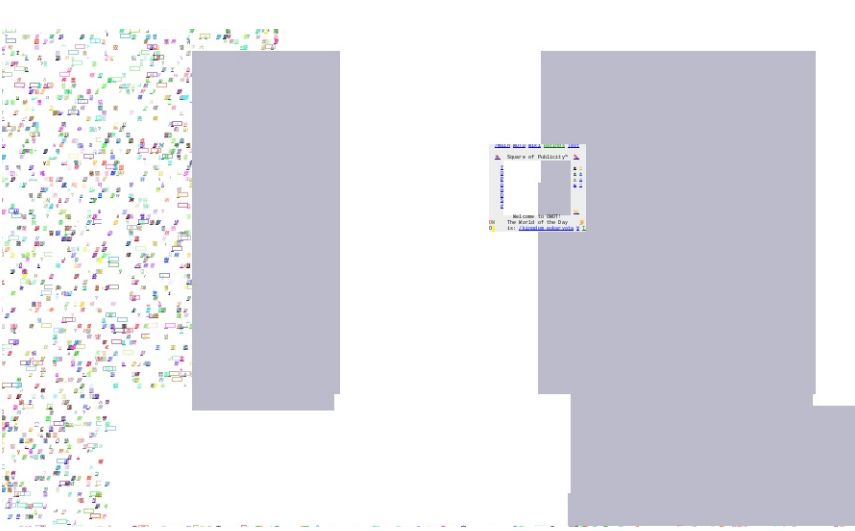

# FP Advises Against Reporting Site to FBI

By LEMURIA

However, FP has discouraged this.

"do not report it to the FBI.", he said on Discord, explaining that the spammer is deliberately attempting to provoke members into calling the FBI, risking the site being investigated and taken down, all without any

# Starianna Strikes Again

# DIMKA BRIEFLY FORGETS BASIC READING SKILLS

By LEMURIA

Dimka briefly forgot how to read comics in the Discord server. At 03:44 UTC, Mar. 2, 2024, Lemuria posted all four strips of his comic "What Will We Read Today?", which portrays a character reading random things and experiencing the consequences (e.g. reading a cheese pizza recipe book has

the FBI raid the character, unnamed).

Dimka replied with "how the fuck do i read this", Lemuria replying "top to bottom left to right". Dimka further replied with confusion, asking if Lemuria had tried reading it (he did, he made the comics), and that it didn't "make sense".

# D9EOEAD IMPERSONATOR MAKES UP FG NUMBERS

By LEMURIA

Someone named "d9eoadFGVersion" engaged in fictional googology on the front page chat today, at around 23:50 UTC, Mar. 2, 2024. There was another impersonator named "d9aoad" (note the "ao"

instead of the "eo" in the username).

Thankfully the fictional googology stopped. Remember, deport fictional googologists back to TextWall where they fucking belong! We will not let their numbers taint our Great Canvas! Wipe those numbers!

Our first issue. Just 1 page.

# Dimka

Continued from the front page

Dimka posted a screenshot of how they read the comics, showing that on the first left column, middle row, they skipped to the second left, top. They did the same until the third column where they moved to the next comic correctly reading from the bottom to the top of the next one to the right.

Eventually, Dimka figured out how to read the comic, but not without Lemuria having to teach them basic skills.

There's a 5th comic in this paper. Go read it. Try to find it? And if Dimka gets confused I think we'll need a kindergarten teacher to help them understand.

# ASCII War At Spawn

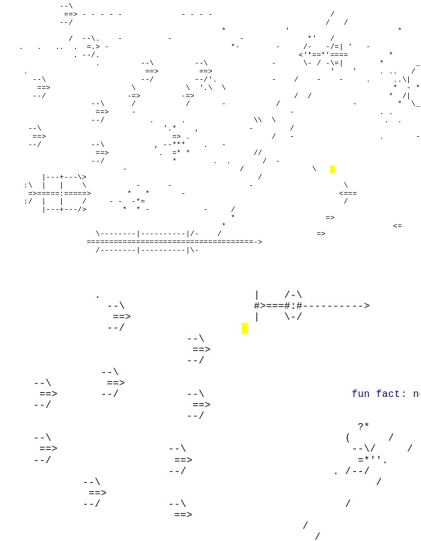

By LEMURIA

There appears to be an unknown battle raging between two unspecified sides at spawn.

Why the conflict is being fought at all in the first place remains unknown.

So far, our journalists have failed to open communications with these unknown ships, meaning we may never know their true intent.

We are advising our readers to avoid flying north of spawn for the time being to avoid ending up as collateral damage. You never know, you may get caught in the crossfire.

Pasting  
**Laserlime**  
Is a Crime.  
If you paste it, fuck you.

# Pony Pasters Strike Spawn Again

By LEMURIA

Ponies were pasted all over the canvas yet again. Lemuria has since wiped most of the ponies.

That was the first attack, early in the morning.

Unfortunately at around 23:27 UTC, Mar. 2, 2024, the pasters struck again. Lemuria got out of Scribus to witness the chaos as he began wiping every paste attempt with his wiper.

Continuing until 23:36 he valiantly wiped the same pony that kept pasting over the center console, only getting a brief amount of time to write this article before the paster struck again.

Eventually at 23:40 Lemuria just gave up, as he still had a newspaper to fill and he knew it wasn't worth trying to stop the paste.

Anyways, Ziggy continued to disobey Mommy's orders by being on the computer too long as it spammed the chat telling "wifefags" to stop and spamming the same allcaps message asking how to get hidden text fonts, effects, and animations in Capcut.

At 23:45, Lemuria sent a single "h" on the canvas, and it was quickly overwritten, which reinforced his suspicions that a bot was responsible for the paste.

Though at 23:46 Lemuria wiped the paste and it didn't come back, but a different image was instead pasted. FP finally took action and reverted at 23:52 after

Lemuria pinged him asking that he take action at 23:44.

FP deleted Lemuria's message though, reminding him to spoiler it (he forgot to do so in that message).

When the canvas was reverted the pastes started again, but FP quickly reverted those too and hopefully applied the worst ratelimits possible.

You know, if you do enough to wipe ponies off the canvas, perhaps FP should increase your ratelimit to 2048/s, don't you know?

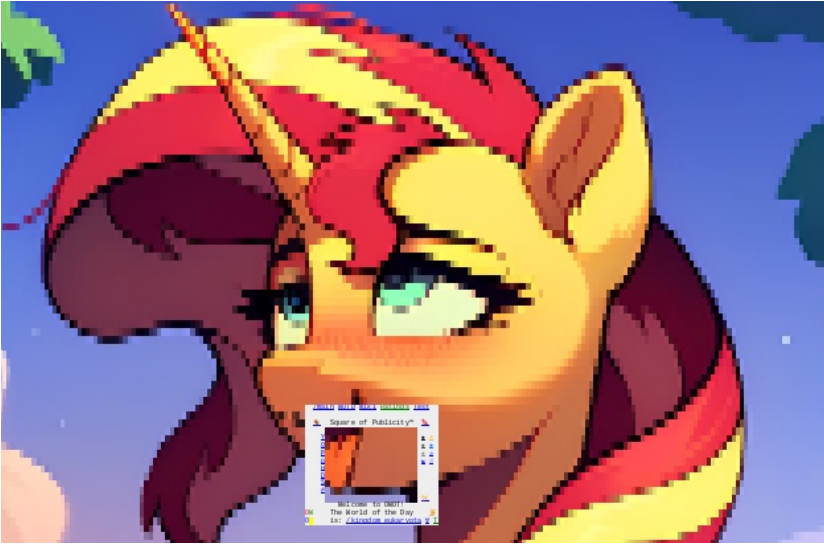

Anyways, if any pony pasters are reading this paper, OWON sincerely encourages you to get a life, a job, and to actually touch some grass for once.

If you are a child, then go to bed, listen to Mommy, and get the fuck off the computer. Because we're fucking sick and tired of your bullshit here on the Canvas.

Anyways, that's the end of my rant. I'd rather have that Christa paster spam the canvas than see shit MLP garbage for even one second. MLP garbage is the kind of stuff that can really make someone want to gouge their eyes out after sufficient exposure (sorry for putting MLP in the paper, just close your eyes).

Anyways, if you'd like to help stop MLP, there's a wiper available at /antipony for you to use.

Happy MLP wiping!

A ratelimited paster tries to paste, but only gets to write 5 chars/sec.

fuck image name too

# SLASKAX SURVIVAL SERVER STORIES

mc.slaska.xyz / Java 1.20.4

## Andrei to Deforest South of Spawn for Trapdoors

By LEMURIA

Andrei is willing to deforest the areas circled in red (image to right), he says in a statement in the #trash channel at 21:22 UTC, Mar. 2, 2024.

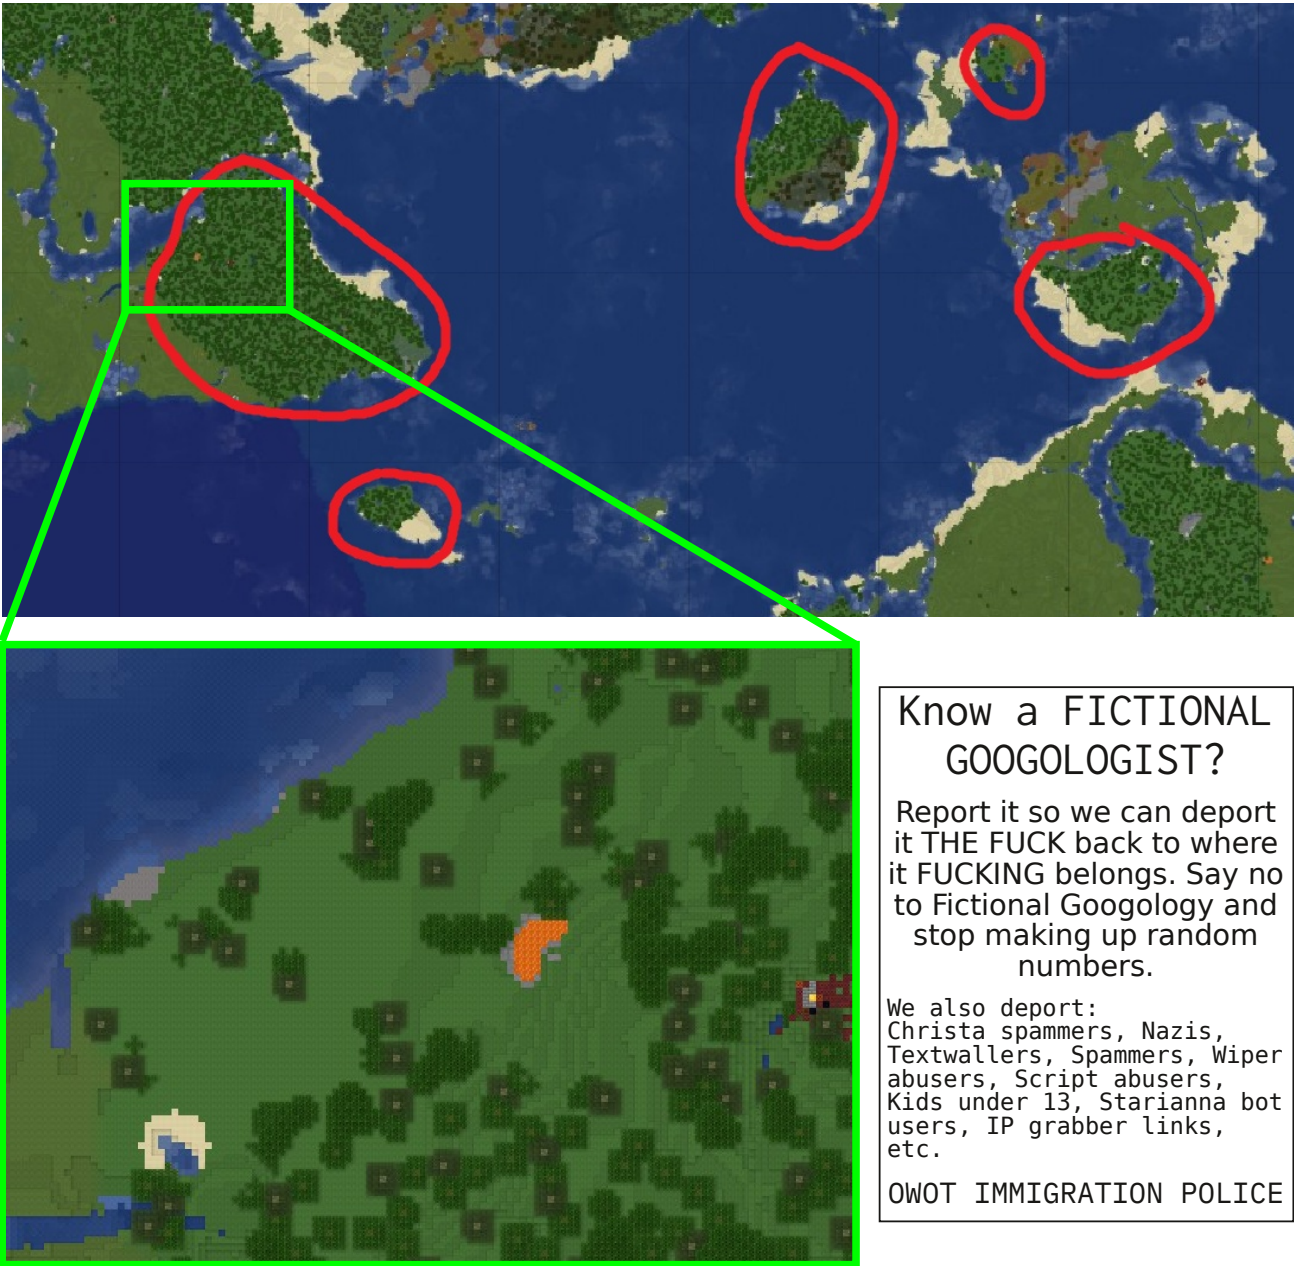

He say sthe deforestation is for the production of trapdoors, of which 13.5 stacks will be needed for the "Public Spawn Oceanic Creeper Farm" (PSOCF).

Slaskax likened it to the rich destroying the environment for personal gain in real life, remarking that the server was "starting to look oddly like real life". Andrei simply replied that he was "stroking" their "curly moustache".

Eventually, he began to cut trees down, reporting minor progress in the west through a screenshot sent at 22:30 UTC, Mar. 2, 2024. (note the less-dense trees near the lava pit in the bottom screenshot).

The creeper farm is expected to be complete in a few weeks, assuming Andrei continues to make progress in his deforestation efforts.

This is Minecraft, who gives a fuck about the environment anyway?

Know a FICTIONAL GOOGOLOGIST?

Report it so we can deport it THE FUCK back to where it FUCKING belongs. Say no to Fictional Googology and stop making up random numbers.

We also deport:  
Christa spammers, Nazis, Textwallers, Spammers, Wiper abusers, Script abusers, Kids under 13, Starianna bot users, IP grabber links, etc.

OWOT IMMIGRATION POLICE
