20-30% deaths? There is a fascinating 22 page pdf on the site (<https://stopmedicaldiscrimination.org/>) that no-one seems to be discussing. It is a long read, but to give you an indication on why you should read it here is an excerpt: "If these experimental coronavirus vaccines cause an **ADE** reaction and millions and millions of Americans have taken this vaccine, instead of a 99.98% cure rate for COVID-19 we could face a 20-30% death rate when all these millions of Americans are exposed to COVID-19 in the wild." Antibody-dependent enhancement (ADE) or pathogenic priming - another still-unproven yet undebunked threat. Does the "vaccine" create a greater threat to the immune system from contact with the wild virus? In the FDA documents, "vaccine enhanced disease" is listed as a possible outcome. (See below). Note the after getting covid vaccine FAQ, we don't know we're still testing it. Side effects are normal signs that your body is building protection against COVID-19. Keep that mask on. It may be effective, we don't know.

Watch the wording example: "How do vaccines for viruses like the coronavirus protect me from getting sick? Answer: Vaccines help train your body's natural immune system to recognize and fight a specific disease by stimulating a response to the virus that causes that disease. When a virus is introduced to your body for the first time, your immune system mounts a defense. This includes making antibodies that help kill or neutralize the virus. If you're exposed to the same virus again, these antibodies also help your immune system recognize and fight the virus quickly."

This ignores the fact that covid vaccine isn't a vaccine. It just says what vaccines are supposed to do. It doesn't admit this "vaccine" doesn't operate the same way. Word choice shields them from liability.

Summary: Shame on those who politicize health just to attack Trump. The wild virus pathogenic priming. Dr predicted the physical results we see from Pathogenic Priming. He emailed the companies to take out the unsafe stuff but they refused (but the poison is Trump's fault? Nah) animal trials skipped on these vaccine thanks to FDA. Older mRNA testing had been done with bad results. No new testing. 21% of people are having serious side effects from this vaccine. Additionally: Chemicals being used to clean schools cause neural tube defects and 50% sterilization for two additional generations in mice. Dr admits they tried to bribe him on the vaccine injury court. You can't win there. Government agency policing itself.

Details from "Facts" PDF:

Is the vaccine safe? Yes. The Food & Drug Administration (FDA) requires rigorous safety testing before it will approve any vaccine. Tens of thousands of people - including Oregonians - from many backgrounds, ages and communities of color, participated in vaccine testing. These studies were done to make sure the vaccines meet safety standards and protect people of different ages, races and ethnicities.

Is it safe to get a COVID-19 vaccine if I have an underlying medical condition? Yes. COVID- 19 vaccination is especially important for people with underlying medical conditions like heart disease, lung disease, diabetes and obesity. People with these conditions are more likely to get very sick from COVID-19. People with these medical conditions were also part of vaccine research.

What about side effects? According to the FDA, the most common side effects in the COVID-19 vaccine trials included pain, redness or swelling at the injection site, fatigue, headache, chills, muscle pain and joint pain. These reactions mean the vaccine is working to help teach your body how to fight COVID-19 if you are exposed. For most people, these side effects will last no longer than a few days. If you have any concerns, call your doctor or nurse

time, the lungs and the heart struggle to nourish the rest of the body. Long term mask wearing also hinders the body's natural ability to detoxify wastes, creates an acidic environment, and slowly strains the organ systems throughout the body."

Oct 1 2009: The published reports "clearly and consistently implicated secondary bacterial pneumonia caused by common upper respiratory flora in most influenza fatalities," says Dr. Morens. Pathologists of the time, he adds, were nearly unanimous in the conviction that deaths were not caused directly by the then-unidentified influenza virus, but rather resulted from severe secondary pneumonia caused by various bacteria. Absent the secondary bacterial infections, many patients might have survived,

Though I really wish I had his original study. Gotta keep on the look for that. It's a blue medical journal style paper. I wish I'd kept it at the time.

This connecting article has a social media post of girl who's brother was dying in the hospital from pneumonia from mask wearing: <http://archive.vn/A1bsw>

"For those of you who take wearing a mask seriously.... my brother John is lying in a hospital bed unconscious dieing of pneumonia because he thought he should have worn that fucking mask all the time. Doctors say he got a lung infection from rebreathing the bad infected air back into his lungs because of the mask. He tested negative to Corona. It was the mask that is killing him. He is on a ventilator so he can breath and it is sucking the fluid back out that his lungs are generating because of the infections. He has his arms tied down to the bed so he cant remove the tubes while he is unconscious. The doctors say they are seeing more and more of this but no one is warning the public,"
