

How to import audio from others app?

This example is importing audio which in "Voice Memo" to EZAudioCut. Other software, the operation is similar.

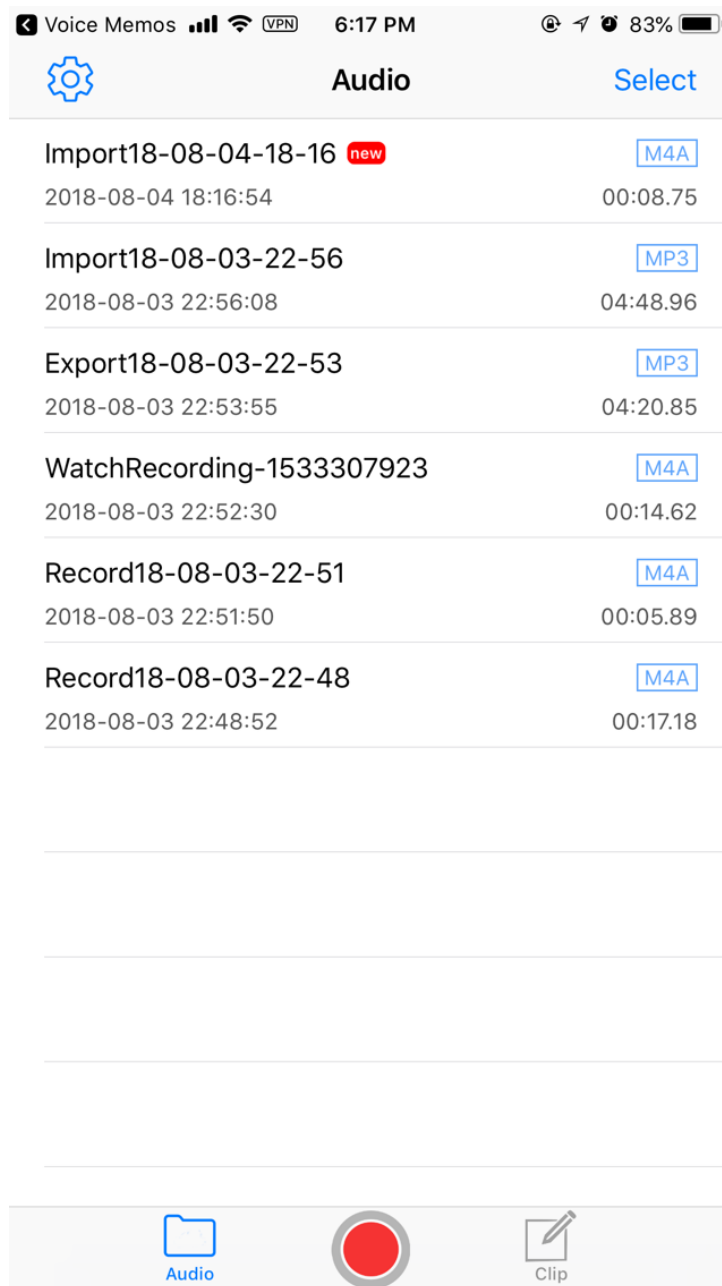

1. Open "Voice Memo", Tap the audio which you need to import to "EZAudioCut".

2. Click the share button, choose the “Copy to EZAudioCut”.

3. After copy end, the audio file will import to the “Audio” list. It will have “Import” prefix.

Now, you can use this audio in EZAudioCut.
