

# How to Use Bluetooth headset to record?

1. Confirm that the Bluetooth headset has been successfully connected to the phone.

**Open EZAudioCut, if there is a recording playback device that can be switched, the AirPlay icon will appear.**

**Black icon:** You can switch other Bluetooth devices, indicating that the current input is a built-in microphone.

**Blue icon:** You can switch between other Bluetooth devices or the system microphone, indicating that the current input is not the phone microphone.

**No icon:** Indicates that no other device is connected. The current input is a built-in microphone.
