

How do I extract audio from video?

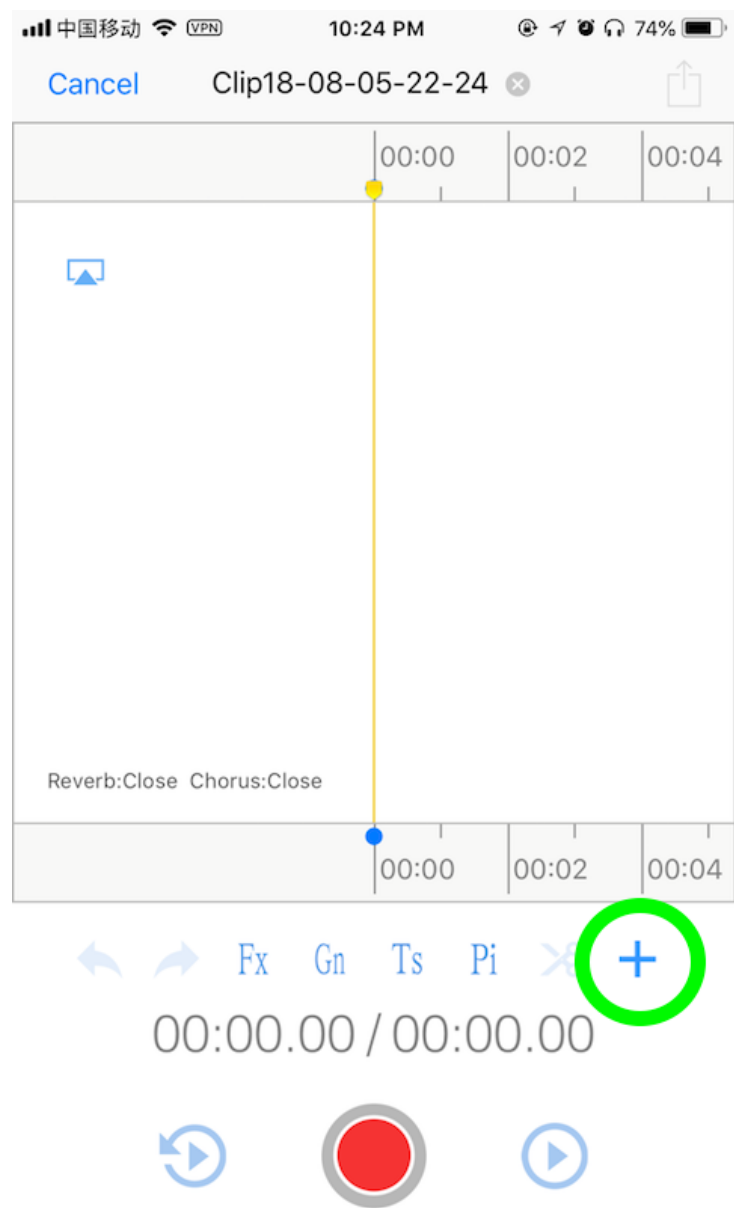

1. Make sure the video is saved to your phone's album.

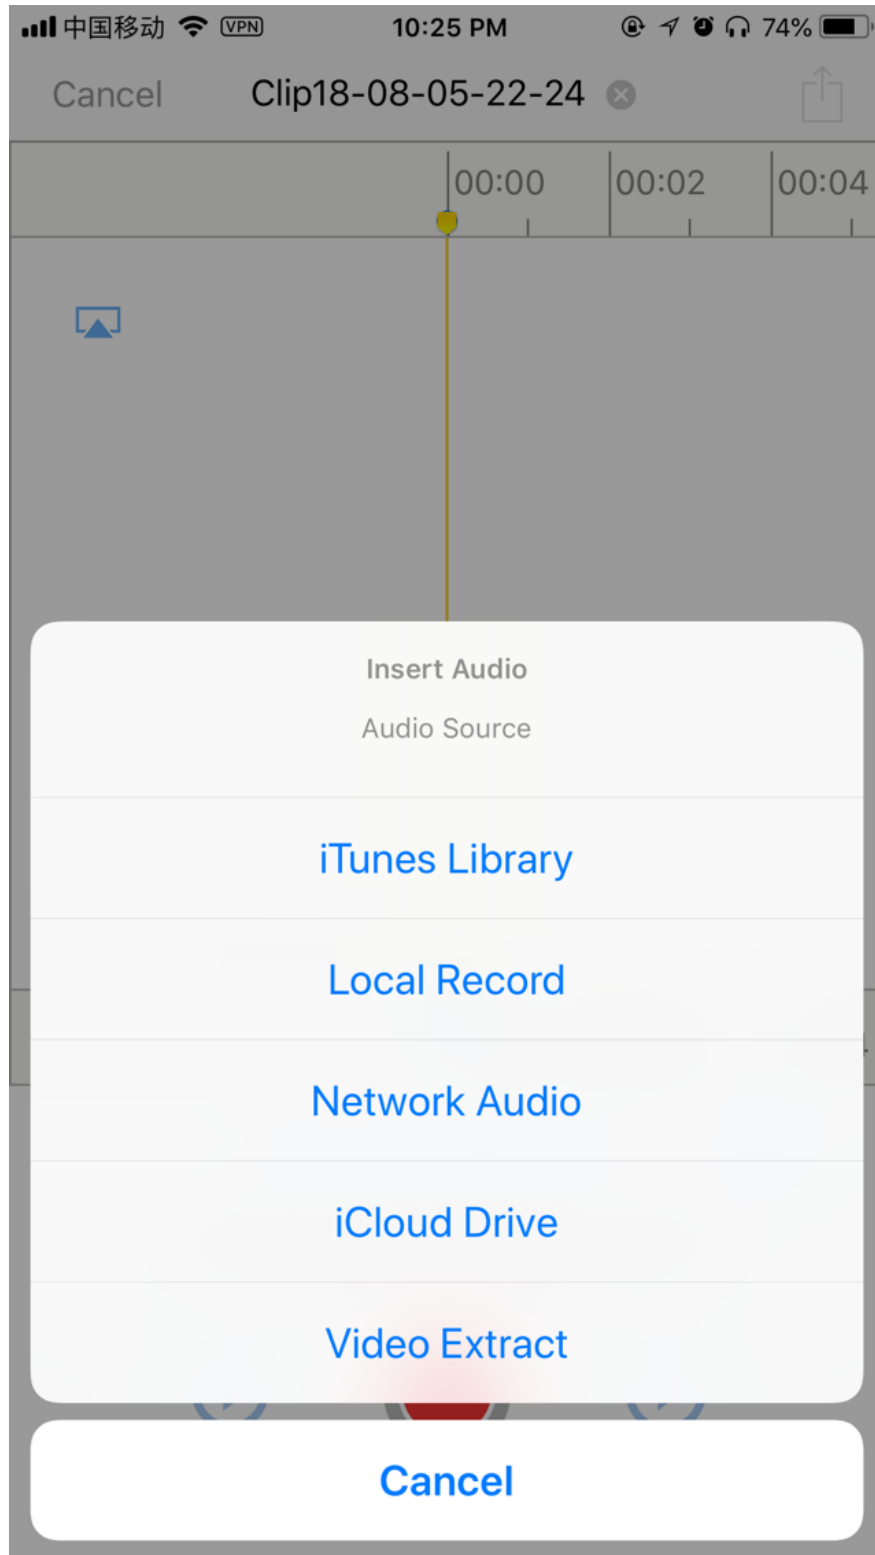

2. Open EZAudioCut, select the “clip” page, click “+” in the upper right corner to create a new clip.

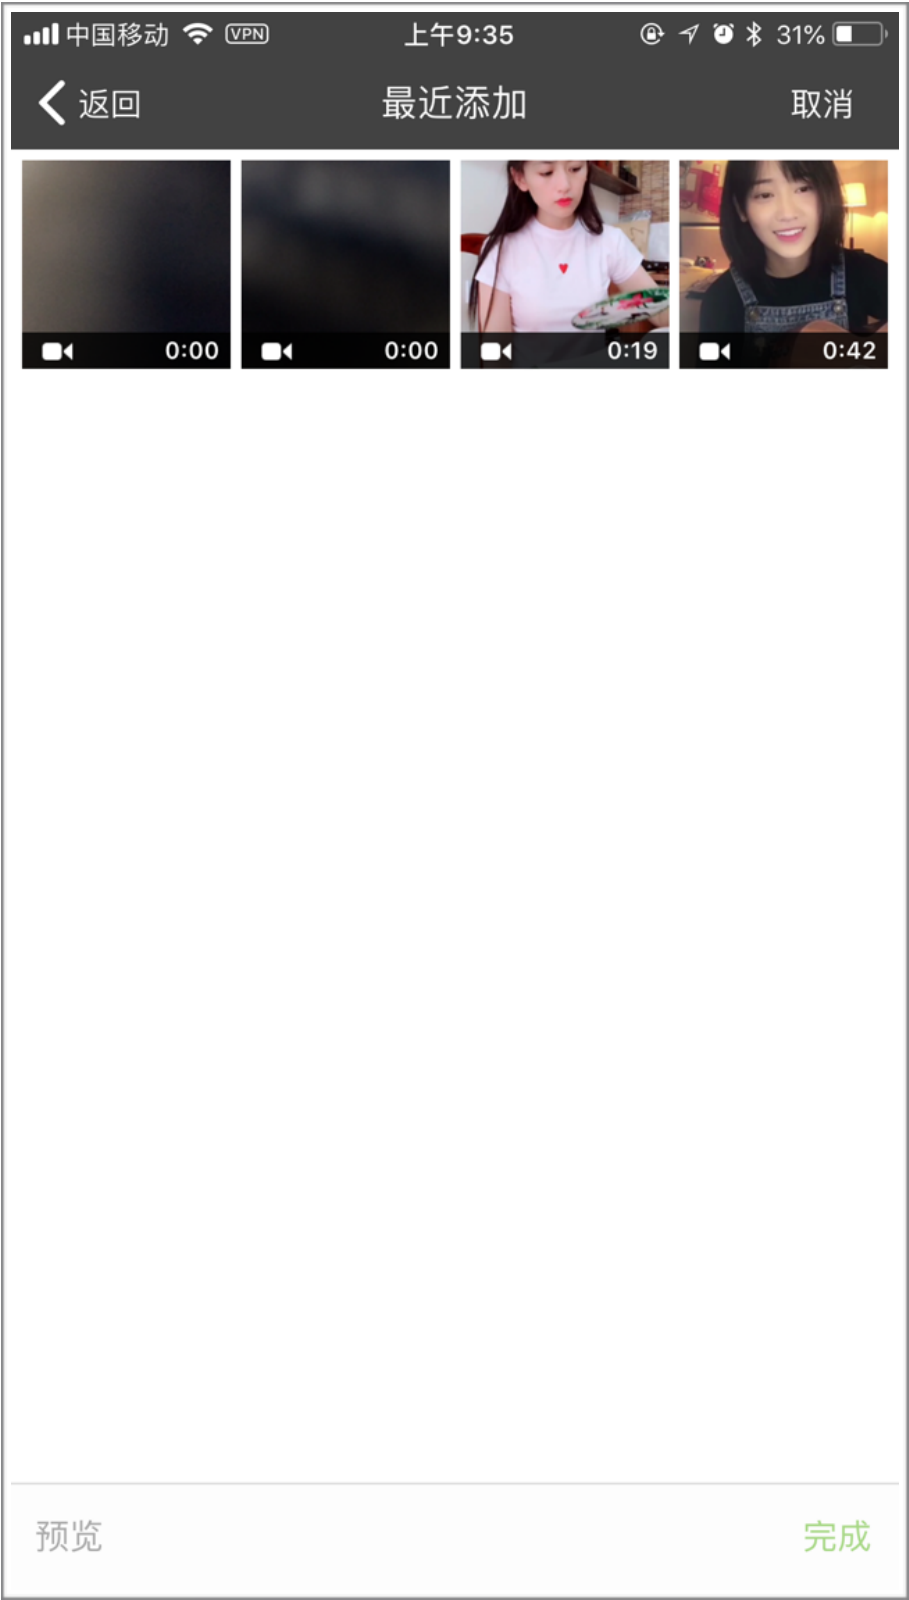

3.Click “+” to insert audio.

4.Choose “Video Extract”.

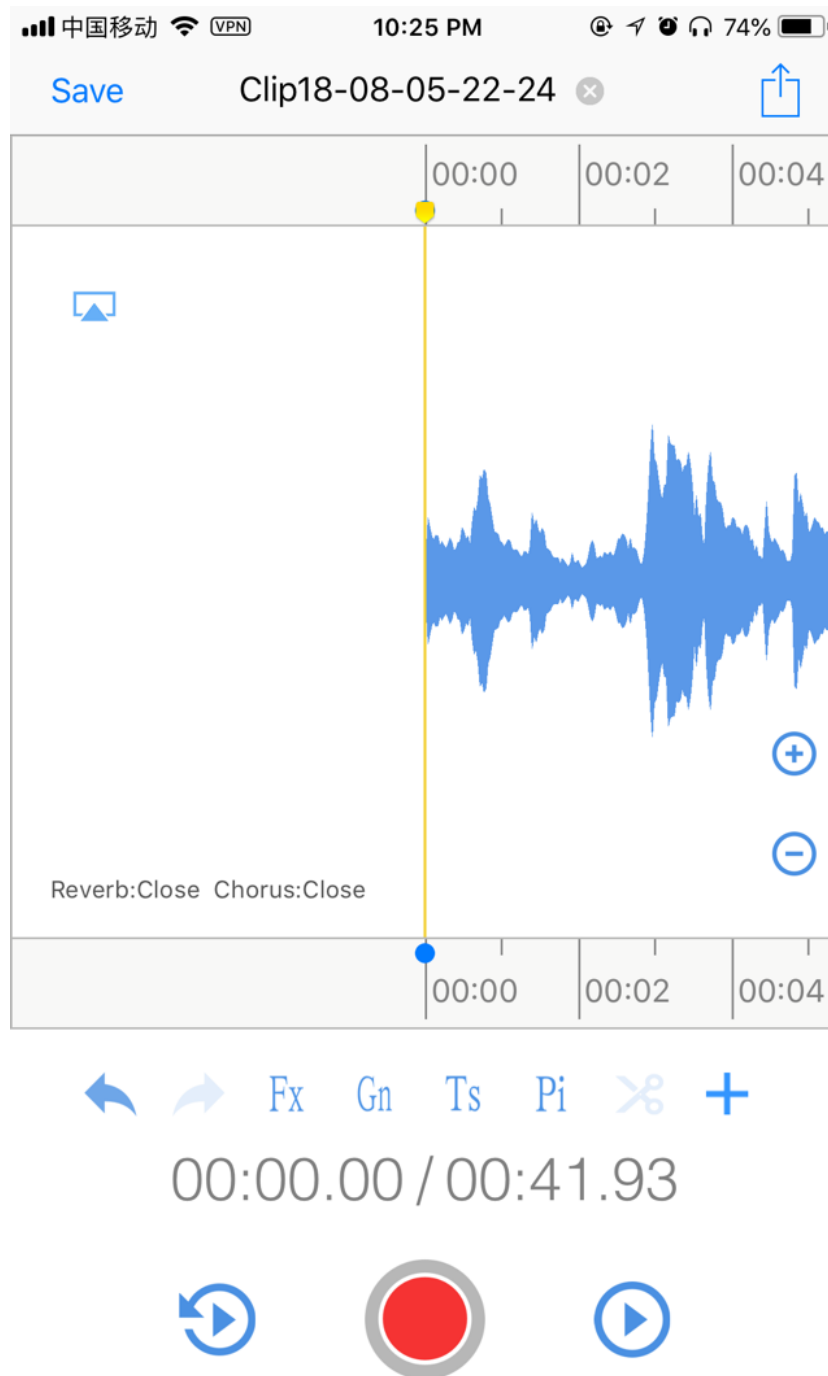

5. Choose the file you need to extract.

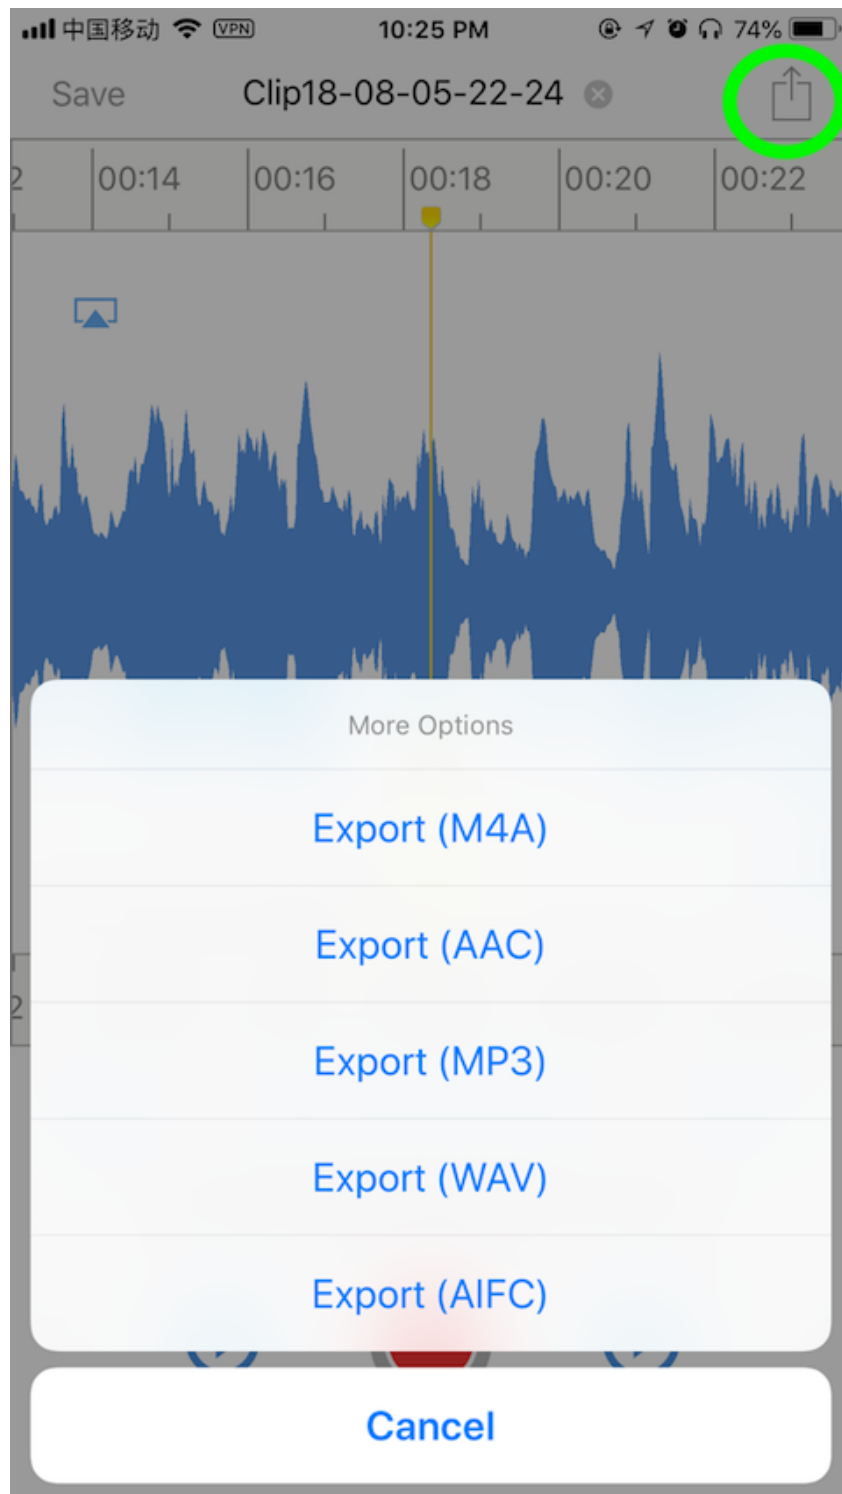

6. After extracting end. You can clip the audio.

(Tap the top scale and the bottom scale to select range, Using ✂ (Cut remove)).

7. Click the Export button. Select the format you want to save.

8. After the export is complete, the audio is automatically saved to the audio list.
