MORNING!

Afterword

Thank you very much for reading.
I bought my VR headset in June of 2020 when COVID was rampant and I received my stimulus payment. When a state of emergency was declared and I became even more of a shut-in, I was able to expand my world through VRChat. I could say I met some nice people and end it there, but I also broadened my horizons by using it to communicate with a diverse range of people in lots of different landscapes. In VRChat, neither age nor status matter, and you can see people from all walks of life.
I'm thankful to have such an outlet for communication while COVID has left the world in such a gloomy state.

In order to pay back my debt to VRChat in my own way, I began writing this book. The World where Hal and IZMIN meet actually does exist. It's one that I used the Quest to visit, and it left a strong impression on me. If anyone picks up VRChat after reading this, I hope that they'll go take a look. In addition, I modeled the characters in this book after my group of online friends.

In the next few pages, you'll find “The World of VRChat”, an article written by a friend who's been a huge help to me since I began using the app.
If you're curious to learn more about VR, then please give it a read.

The world is in turmoil thanks to the pandemic, and events are out of the question... These harsh circumstances continue on, but once things return to normal (though it will probably be a new kind of “normal”,) I hope we can gather at the Tokyo Big Sight with smiles on our faces.

May we meet again.

9/20/2021
Yoikono tt (Seikatsu Sesshishou)

The World of VRChat

By Alos-Linx

What is VRChat?

Movies like Summer Wars and Ready Player One are among the many works of science fiction about virtual worlds that let you to live in whatever form and environment you choose. This is no longer just fiction, however, as there are currently numerous virtual social media apps that allow you to communicate in VR. VRChat, which is featured in this book, is one such platform, and in 2020, it reached a record-breaking 24,000 simultaneous users.

VRChat allows one to use an avatar of their liking to socialize with others using voice chat, emojis, and physical gestures. People can flaunt their avatars, find people with similar hobbies, play puzzle and sports games, or do whatever else they please. You get the sensation of being physically near other players, and depending on your setup, you can make your avatar's limbs move with your own, so it provides a high level of immersion compared to video calls and other online services.

Many Japanese players in particular share their VRChat experiences on social media sites like Twitter. If you're interested in seeing how people are enjoying VRChat, you can learn more by searching the #VRChat hashtag on Twitter.

What do you need to start VRChat?

A VR headset is not required to play VRChat. As long as you have a Windows computer and an internet connection, you can download it on Steam for free and try it out. The specs required depend on the world and number of on-screen avatars, but an optimized world with few players can run even on a low-end PC. Watching through the screen as others interact using their avatars can be fun all on its own.

Since VRChat is an American service, the game interface is all in English and you're unlikely to meet Japanese speakers outside of specialized worlds, so it's difficult for Japanese players to jump in without prior knowledge. There are numerous articles on Google detailing installation and ingame controls.

Recommended Worlds

VRChat is a social game with no missions or win conditions, so it's common to hear worries such as "I started the game, but don't know what to do next" and "I don't know where I'm supposed to go". I'd like to introduce some cool worlds for new players to check out.

[JP] Tutorial world
tamsco274

The best place to start! This world teaches you recommended settings, covers all of the controls, tells you how to fend off griefers, and more. It's incredibly detailed and might be a lot to take in all at once, so I suggest just skimming over it real quick to get a sense for things. If you're lucky, maybe a seasoned VRChatter will walk you through it!

Himiko Avatar World: Quest
bbbbb_himiko

This world distributes a variety of free avatars that comply with VRChat's rules. You can find everything from sexy girls to handsome men and even furries and non-humans. You can use the provided mirror to try out poses, see how the mouth moves when you talk, and find the body that fits you best.

[JP] QUEST TOBIRA
UMIUSiO

This is a portal that lets you browse VRChat's most popular worlds by category. It acts as a guidebook to help you find worlds based off what you want to do, be it look at pretty scenery, play games, or try on new avatars. If you find a friend you get on well with, it's a good place to revisit and go on a trek together.

Quest Japan Meeting Hall [JP]
hirhir13

The real thrill of VRChat is obviously the communication aspect. If you're looking to meet new people, there's almost always someone here. It can be nerve-racking at first, but as long as you can manage a simple "hello" or use emojis, there's no need to worry. There are also posters showing events targeted at newcomers, so make sure to check it out.

Others

Most of the worlds on VRChat are created by players, and new ones appear every day thanks to ambitious creators (currently, in 2021, the total number of worlds is in the hundreds of thousands). There are worlds that recreate real buildings, fantasy worlds that show the uniqueness of virtual reality, and many others. Those who enjoy travel and fine art will find it even more enjoyable.

Actually, the world called “In the Silent World” that appears in Loving Living VR is based off a real world with the same name. I think every player who's gotten used to the program should make a holy pilgrimage there.

If you're interested but hesitant to go alone, there are many events where people congregate to tour different worlds together. There are also beginner-friendly events that are considerate to newbies and those with lower-end PCs.

Deeper Down the Rabbithole

Using a commercially-sold VR headset, you can fully immerse yourself in VRChat for even more excitement. To play for an extended time, you have to acclimate to motion sickness and the discomfort of wearing the headset. However, this lets you physically inhabit the beautiful worlds inside your desktop, pick up objects lying around with your hands, and chat with your friends as if they're standing right next to you. It's like a vision of the future from old books and movies.

There are a handful of VR-capable devices on the market, but the Oculus Quest 2 is the pick of the litter (as of September 2021). Most VR games are unplayable without an expensive gaming PC, but the Quest 2 is a standalone device, and its cheap starting price—no higher than your average game console—is tantalizing. It's also easy to get ahold of through Amazon or any major electronics retailer, which makes it even more recommendable.

The Quest version of VRChat supports crossplay, so you can mingle with PC players. However, there are some inaccessible worlds and incompatible avatars. If you have a gaming PC, you can play without those setbacks, and with additional sensors, you can even move your avatar's legs and waist, so that option will provide a high quality virtual experience that you can upgrade as necessary.

In addition—though it takes a certain level of knowledge—you can modify avatars and worlds or create new ones to bring into VRChat, just like in this book. There's so much freedom that many users have designed their own characters and costumes, and some have even recreated their own real-life rooms in VR, so that's something to give a shot if it appeals to you.

In Conclusion

Although VR headsets and virtual social networks have yet to catch on with the public, there are companies just now starting to step foot into VR to take advantage of its abundant time and space. Live concerts and doujinshi events in VR are also being held and are predicted to expand even further. It's not too late to try and get in on the ground floor.

In VRChat, where people worldwide gather in a space that feels real, all kinds of stories unfold on a daily basis—from usual day-to-day existence to dramatic tales of friendship and romance. I hope that everyone can have a fun VRChat life that's filled with passion and excitement.
