

Two Weeks To Flatten The Curve, We Promise!

THE LOCKDOWN FLYERS

VOLUME 58

MAY 2021

We Were Told A Great Many LIES:
All to sell us on “two weeks to flatten the curve”. Now look where that has got us.

SOME FOOD FOR THOUGHT:

*We were told a series of foundational lies, which when combined, were the pillars for all of the lockdown measures, restrictions, and mandates we have all suffered through. These include: (1) that there is significant asymptomatic and pre-symptomatic spread of COVID-19, (2) that the mortality rate of COVID-19 could be as high as 1-2.5%, (3) that there were not any safe and effective treatments for COVID-19, (4) that the virus was ‘novel’, in other words, 100% of us could catch it, (5) that the virus could easily be spread through surfaces, and, (6) that masks are effective in preventing the spread. The first myth was a known LIE prior to being told, and the COVID-19 data now shows this too (e.g., see Volume 31 of *The Lockdown Flyers*, and, Dr. Fauci, in January 2020, before it was politically convenient to say otherwise, <https://files.catbox.moe/633gv0.mp4>). The second myth was based on manipulated and incomplete data, which could have reasonably been known at the time. The third myth was an outright lie, given that Chloroquine was known to help with the SARS-1 virus, thus, it could be reasonably inferred that a drug like Chloroquine could help with COVID-19, aka, SARS-2. The fourth myth, is contradicted by T-cell studies. These have shown that prior to any COVID-19 infections, that 30%, 50%, or as high as 80% of us had partial immunity to COVID-19. This might have been known as early as January 2020. With this level of partial immunity, the virus could not spread as easily. The fifth myth has also proven false, which may or may not have been known prior to March 2020 (e.g., see Volume 41). The sixth myth, that masks work, has proven false, using the empirical data from the mask mandates (e.g., see Volume 8). There were also scientific studies dating all the way back to 1920, which suggested that masks do not work. Even the N-95 masks have only shown to have a limited effect on the transmission of COVID-19. **Given all of this information, why did we lockdown at all in the first place? And why do we continue to?***
