

3D printed SCUBA accessories

2026

FUNCTION & STYLE

WHO WE ARE?

Whether you're dialing in your setup for function, adding personality to your kit, or both, we've got you covered. As divers and dive professionals ourselves, we design the kind of gear we actually want to use—and we think you'll love it too.

Our dive community means everything to us, and so does the underwater world we're lucky enough to explore. That's why we make a conscious effort to use environmentally responsible materials, including recycled and non-toxic options whenever possible.

Our goal is simple: help you stand out, make an impression, and express your style—without leaving a negative impact on the ocean we all share.

WHAT WE DO?

We design and 3D-print dive accessories that blend function, style, and real-world experience—made by divers, for divers. We also take pride in responsible production, using eco-conscious materials whenever possible and minimizing waste through small-batch, made-to-order printing.

Simply put, we create dive gear that works hard, looks great, and respects the underwater world we all love.

Customize your items with your name, initials, logo or text.

Our Offerings

Many of our products are designed to support or work with existing products. Line tamers are custom designed to fit several knife brands or our own line cutter. Cages are designed for many popular dive computers. As a small batch designer we can work with you on getting a product that works with your gear.
