## Why is School castes carpet bombed/nuked?

Muv-luv – AOT Theory

This theory is intended to explain the AoT multiverse and it's impacts.

1. How everything theorized here fundamentally happens?

The paths act as something connecting each and every subject of Ymir as well as a tunnel that connects many worlds (think about Eren's balls theory)

Famous tree in Muv-luv franchise

// Paths allow the exchange of causality information between Shingeki's titan verse world and real life peaceful school castes world, which happens mostly through the transference of events and memories between the looping timeline and stable timeline. The nature and content of the exchanged information depends on the source, which senses relevant information and rips it from a dependent world through the paths and back to its world of origin.

(Words were stolen from Muv-luv Wiki Fandom)

We have talked about the Tree similarities and symbolism and all

Look on all this again

I almost want to lainah myself

In this theory there's literally a mess of memories, and it is indeed a man-made/created one, the eyes, jackets, and scarves, I mean!

Yeah the lyrics also pointed red scarf, I have to prevent me from going back to all of these evidence

2) First we have these arguments supporting this theory

// The main concept relies on Muv-luv almost entirely. The reason there is Muv-luv to begin with is that our MC, Shirogane Takeru got thrown into an alternate world. But why? And how? The reason for this is because the alternate version of Takeru's lover, Kagami Sumika's remaining brain, in the state of when her mind was only able to strongly wish to see Takeru again, brought him in by pulling Muv-luv Extra's world close to the Muv-luv Unlimited's/Alternative's world.

While the two are different, they were branched from one single timeline, made it being possible, with the quantum tech within BETA hive, to increase the gravitational force between worlds and made Takeru get sucked in along with his bedroom entirely through

the tunnel to the alternate version of his world. Remember this tunnel.

Moving on keep in mind that the two worlds behave like atoms, giving and receiving causality when there is something to trigger them to. The purpose is to seek an equilibrium between worlds and stabilize them.

Now let's jump to one occurring phenomenon caused by this law. When they made an experiment to retrieve Yuuko-sensei's equation for the sake of Alternative IV plan, Takeru travel and materialize into Muv-luv Extra. Our Takeru with minimum interference to events of the Muv-luv Extra's world and minimum interactions with any information holders (the people who know him), are unable to change anything drastically nor make the timeline branch.

However, one time he escaped to that world, he began majorly influencing it. The informations and events begin to go through that tunnel mentioned before, to correct the cosmic discrepancy, simply because Takeru in that world isn't supposed to be Takeru that has memories of Beta world. The fact that there are informations about Takeru in both worlds, yet there is currently only one Takeru, contradict physics.

Now unless there are two Takeru's again, the worlds will make effort to exchange infos and events until they're equal. Real effects on the law include: 1st the event of the death of Sergeant Jinguuji Marimo are brought to the diverged Muv-luv Extra timeline, resulting the death of Jinguuji Marimo-sensei. 2nd then because essentially the Takeru from that time doesn't exist in diverged extra timeline, but instead Muv-luv Alternative's Takeru fleeing there, so diverged Extra version of Meiya and Sumika begin to forget about him because their Takeru related infos are being dumped to the other Meiya and the brain of Sumika in Alternative, 3rd then there is this part of Alternate IV plan, the 00 unit that in the process of it's making required to 'kill' Sumika, so that event is also transferred to the diverged Extra world, resulting an incident happens to the Extra world's Sumika, but as the 00 unit keeps 'living', Sumika in diverged Extra doesn't die. And these won't stop, again unless exist two different Takeru's.

In the case this is also what currently happening in AOT, well even if not 1:1, it's reasonable to make assumptions that:

- We know that the two worlds here are Shingeki's titan verse world and real life peaceful school castes world, right? So there are two versions of Eren too.

Eren Yeager

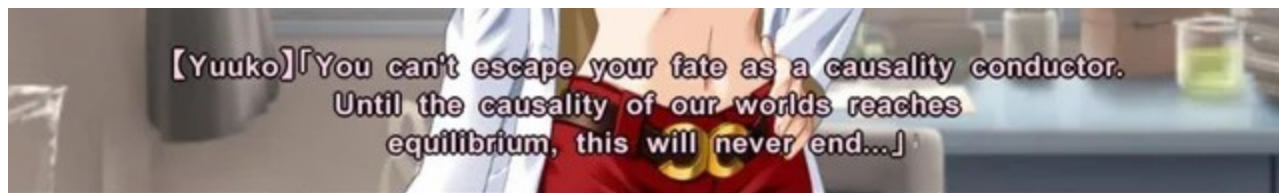

- Imagine that this bored Eren of school casts just so bored he let himself get thrown into different world. But yeah, about when, or does he have any slightest idea of it all, no one knows. This is the basic condition for this theory to be true.

**VOL. 12 COMING APRIL 2014!**

I DO FEEL ASHAMED ABOUT THE REVEAL BEING A DREAM.

## ATTACK ON ZOMBIE CASTES

- Finally, make it just that Eren from the world where there are titans do what Takeru did even if unintentional, for being in school castes, causing the events related to titan gets transferred, and now there's only one Eren despite there are two worlds. So the worlds will begin to seek equilibrium too by doing the same thing the worlds in Muv-luv did.
- Still with me? What will then happen? Yeah the memories from AOT School Castes will go into the other world who has titans. In exchange, informations from titan world get transferred to AOT School Castes, making suddenly: there is a movie about titan that EMA watch together, the titans exist 100 years ago, the giant tree is there too, there are survey corps related things, Marco's ykw, kid Ymir's sauna <--> mother Ymir with her children in the same year, and everything that didn't and shouldn't exist there, but keep existing in contradictions nonetheless.

If there's a sequel or something,  
let's go see it together.

It's hard to believe, though, right? That these  
Titans really existed a hundred years ago.

**COMING AUGUST 2020!**

- Given all those details before get sucked from Titan world to AOT School Castes, here ultimate fishy piece that will bug you:

3) Then we have these opposing this theory

// Because AOT School Castes is comedy driven substory there are people who say to take AOT School Castes with a grain of salt or just don't take it seriously at all, I can see where they're coming from. I seriously suggest you follow their mindset too and don't overanalyze this theory, no, it can't be good for anyone's sanity.

4) Unconfirmed causality across different timelines

// Here are some:

い  
っ  
て  
ら  
っ  
し  
ゃ  
い  
エ  
レ  
ン

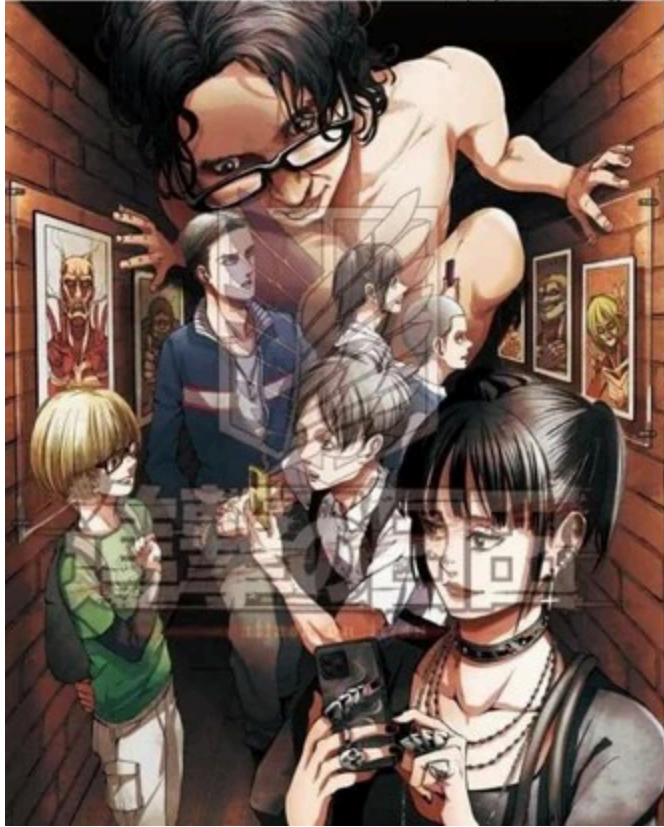

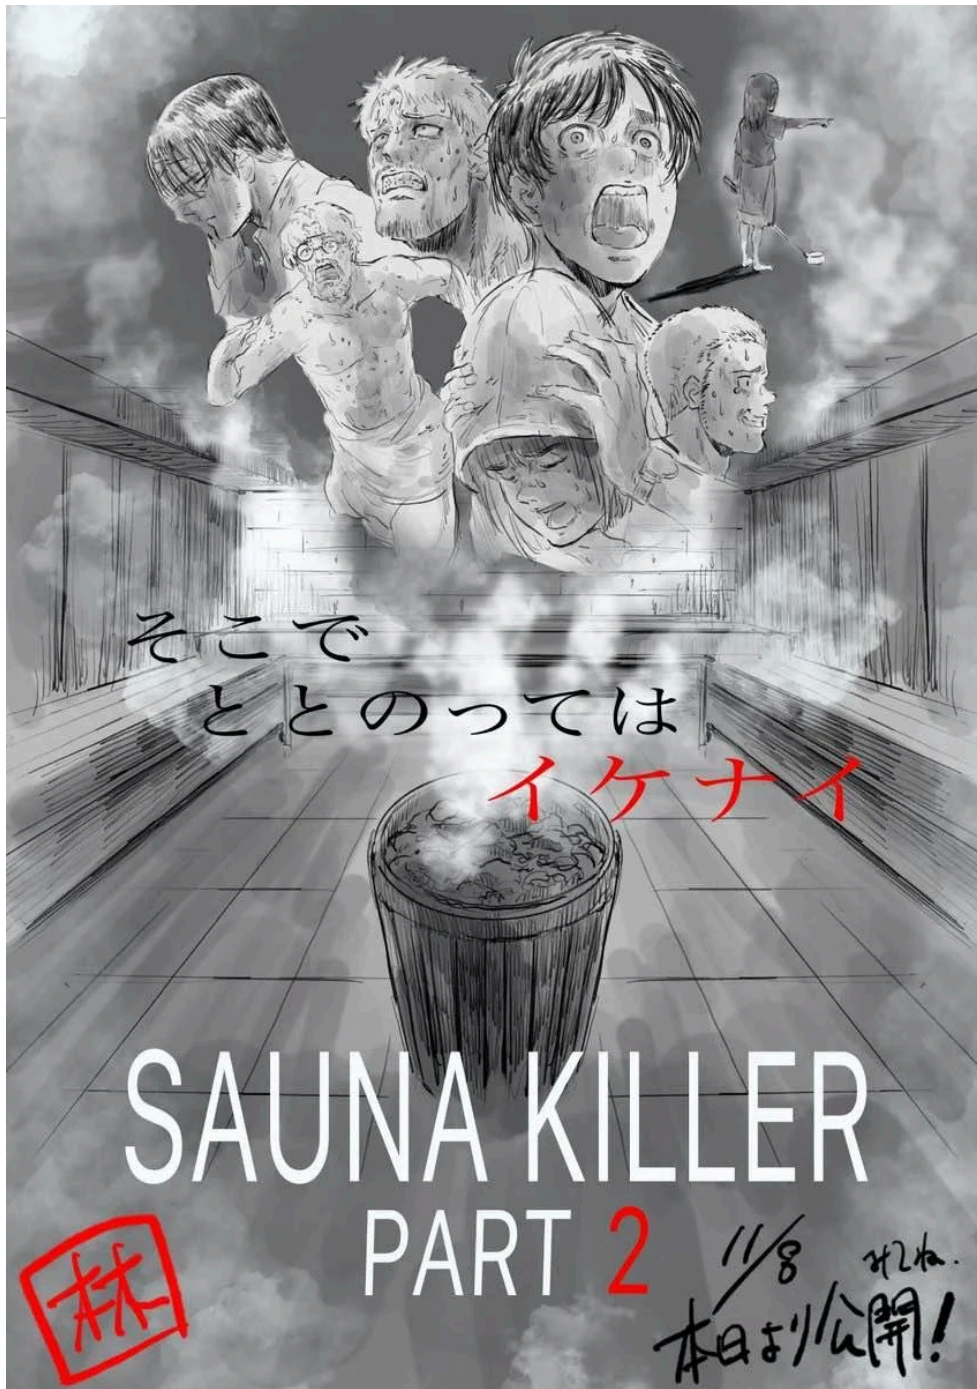

Summarize: Eren can bring the catastrophe to any timeline he accidentally takes a peek into, more reason for killing someone who made him the causality conductor, y-o-u k-n-o-w w-h-o

At the end, sorry for posting unfinished theory, my hands are too itchy to, I worked this lately but the big frame of this theory was old. If you have read Muv-luv then great, if haven't, well then good luck comprehending allat. Here miscellaneous:

Later.
