

REDDIT ACCOUNT MASTER: THE ULTIMATE GROWTH BLUEPRINT

redditaccmaster.store

INTRODUCTIONS

REDDIT ACCOUNTS FOR WHAT?

Accounts with reddit karma are sold for even more money, accounts with only 1000-2000 karma can already be sold for \$10-15 and that amount of karma is very easy to acquire. If you were to raise 150 accounts per month on that amount of karma on older accounts you could be taking over \$5,000+ per month. For example reddit accounts that are over 8 years old and have over 3,000 karma are selling for over \$50+. You can easily find such accounts by scrolling through the forums for a couple of hours. If you had 100 of these per month, that's an easy \$5,000+. Of course you won't raise these accounts yourself, you will find someone to raise 300 accounts for you for example, buy 1 year old accounts for \$1 each, then find someone to raise them to 1000 karma in 30 days, sell them for \$15, that's it \$4500, give \$1000 to the worker, \$300 would cost your proxy, about \$50 for an anti-detect browser and that's it. Now I'm going to show you how to raise karma on accounts, so all those same methods, create tutorials for your virtual assistants who will work for you on this job, you can very easily find people who want to work for \$1000 a month

METHOD 1

KARMA4KARMA

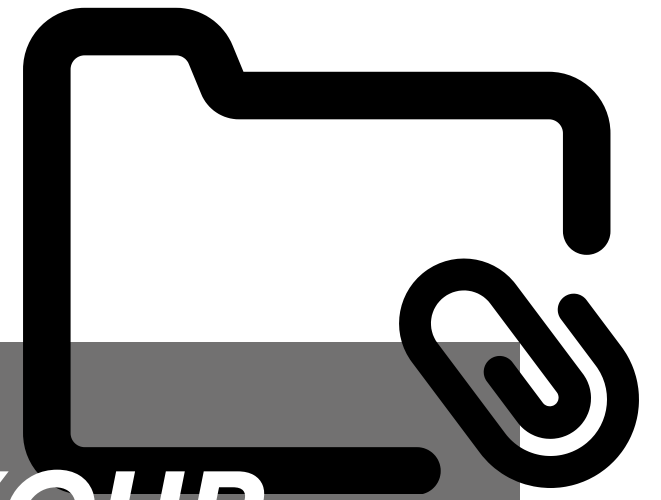

***QUITE POSSIBLY THE WORST
METHOD, BUT THE EASIEST AS
FAR AS WORK GOES***

You have a couple of subreddits for this method that you can use: As you can see literally make posts like "Karma 4 Karma" and the like because for every upvote in subreddits you get karma. This is probably solid if you do 5 days in a row cleanly to get the first 100 karma on each account so you can post in other subreddits or you can use other methods. Go ahead and post to all 4 subreddits for five days in a row just to collect 100 karma. After that, move on to other methods. Remember to hide posts for "karma upvoting" from your profile so your account doesn't look spammy when you start other methods.

METHOD 2

IMAGEPORN

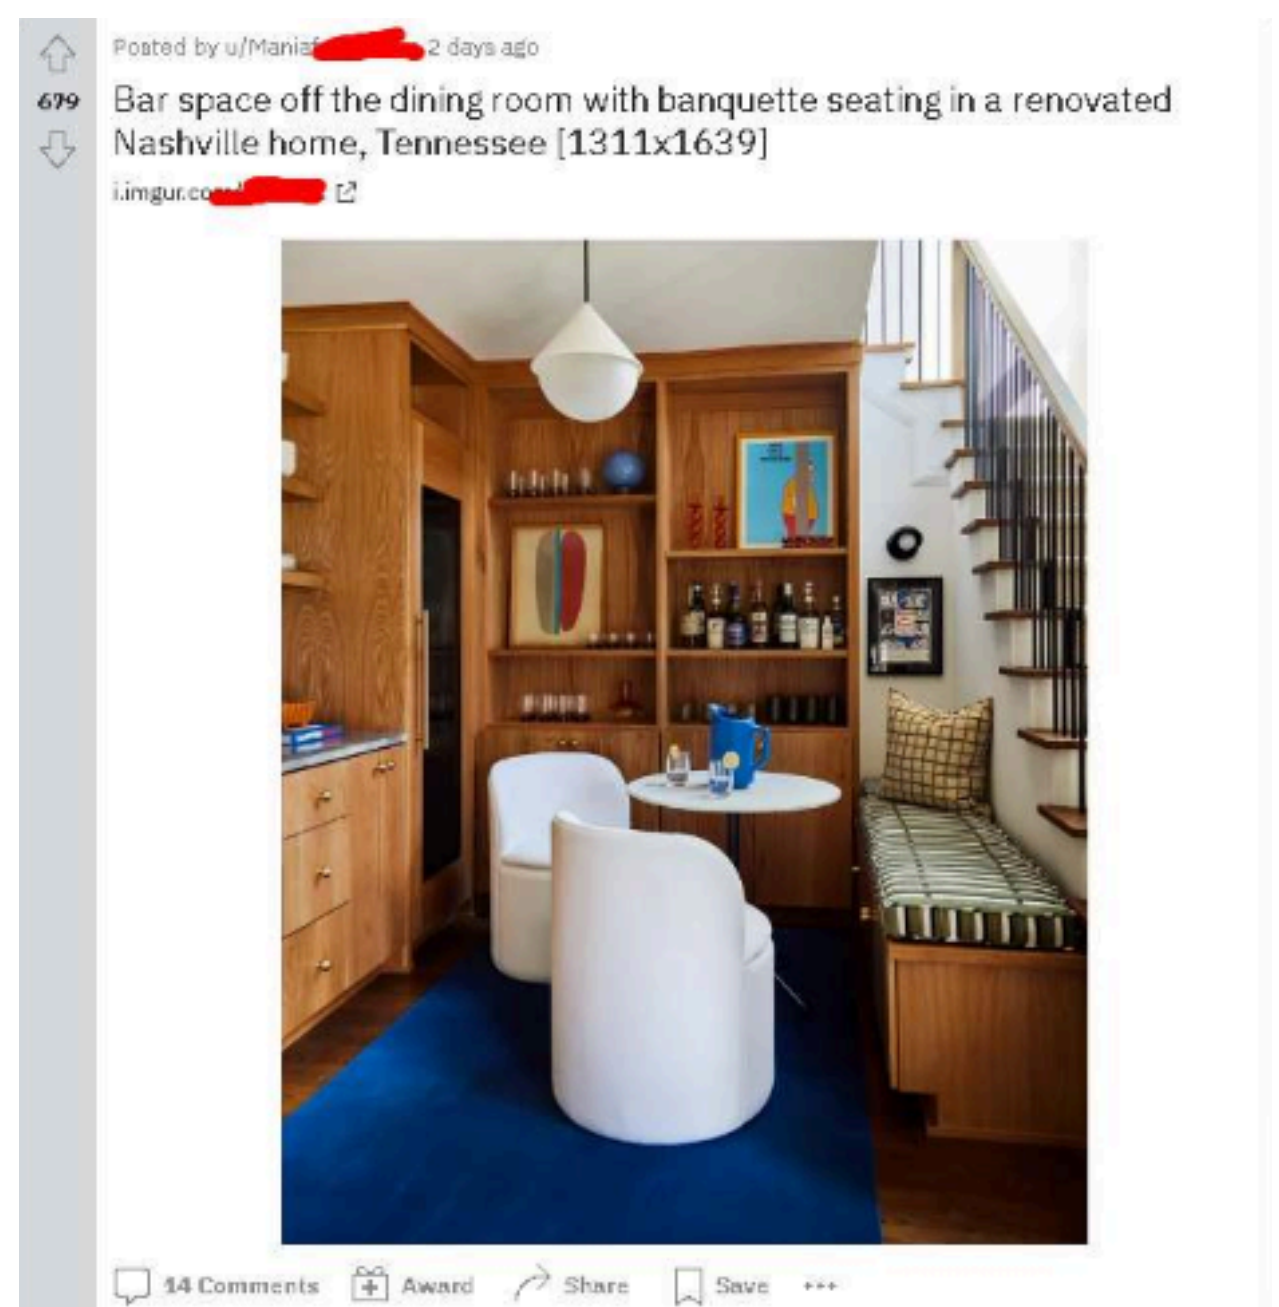

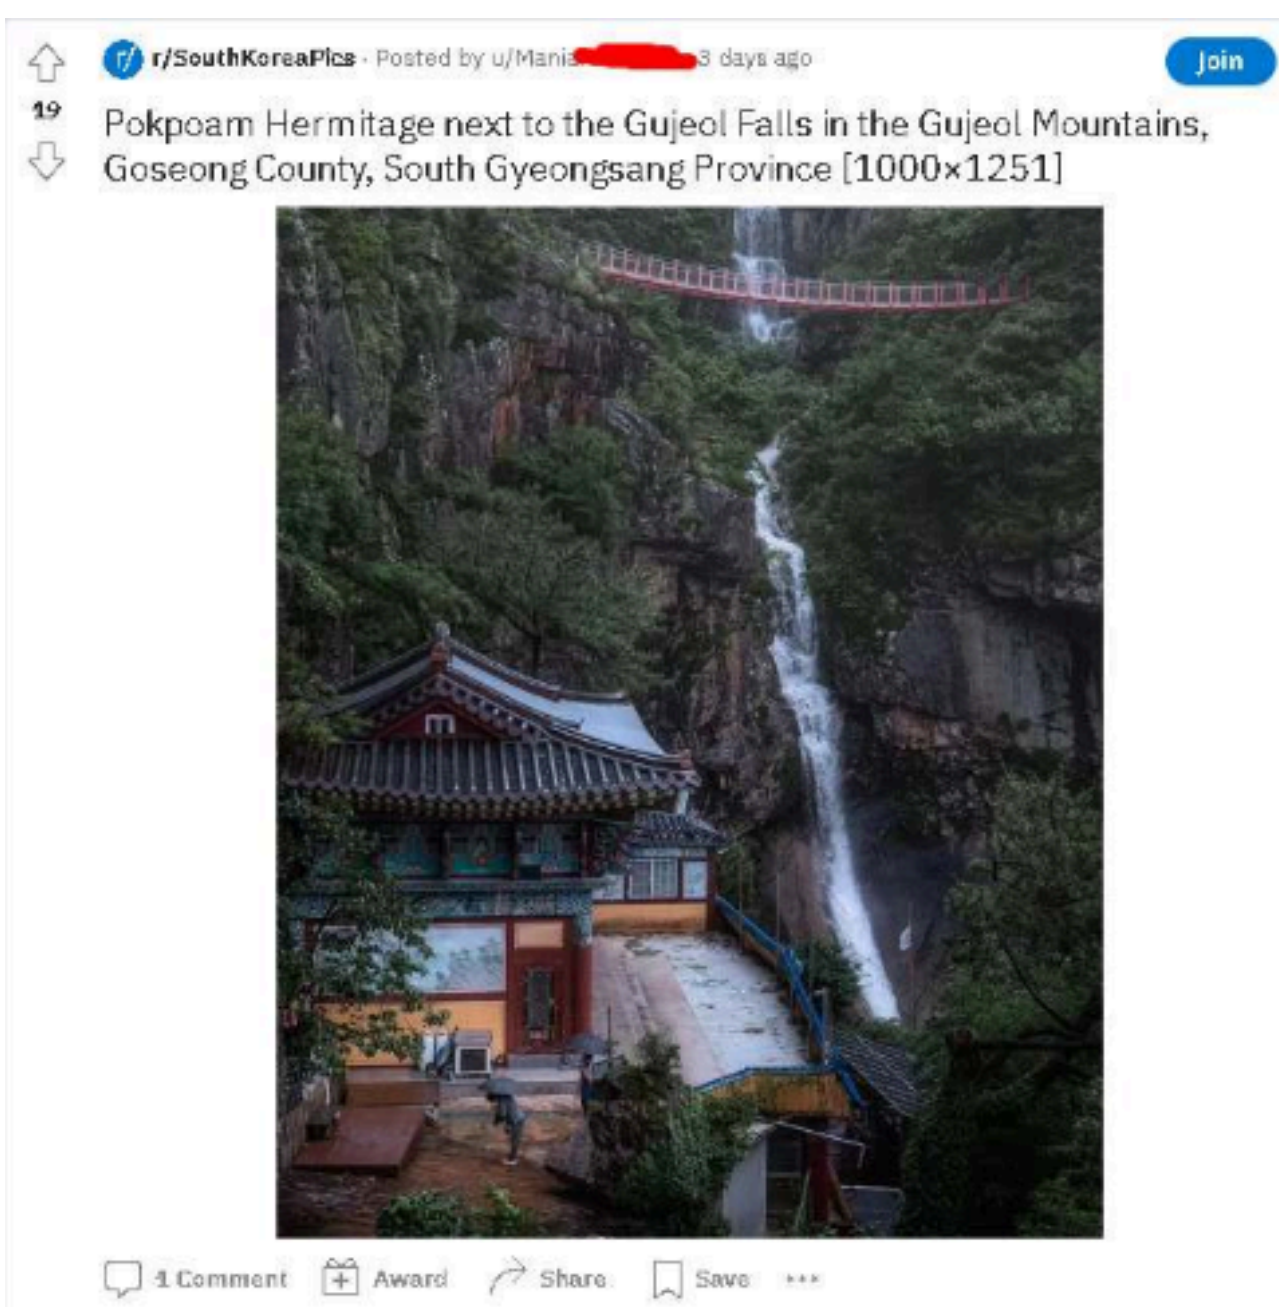

***LEARN HOW TO GROW YOUR
REDDIT KARMA WITH A NEW
OR EXISTING ACCOUNT.***

Prior to getting started, ensure that your account isn't under shadow banning. To verify this, just paste your Reddit profile URL into a different browser. If you receive a "No user found" message, it indicates that you're shadow banned.

1. Find some subreddits that are appropriate for your future posts (animals, cars, computers, boobies, etc). For example, we'll pick [/r/RoomPorn/](#).
2. You will need to find some good pictures, since RoomPorn is a subreddit about room decorating. My suggestion is Shutterstock. In the "search bar" you can type in any keywords related to home design (you will have to be creative): living room design, beautiful view from living room, etc..) *Tip: Make sure that the image is real and not rendered. If some users will find it 3D rendered, you will be penalized. *Tip 2: Go to RoomPorn and take a look on what kind of pictures are shared there before you start searching.
3. Download free images from Shutterstock: After you've found some good images, save their links in a notepad doc, and after you're done searching, go to Google and search for Shutterstock free downloader, you'll find many of them.

4. It's better to edit the images after you download them: You can do this with a simple photo editor: Flip the image (* <->), cut a little from the corners of the image (a few centimeters is enough). Finally, resize the image. After that, you can check the image on <https://www.tineye.com/>. You've done a good job if no other similar image is found. The idea is to do a remake of the image so that the appearance is original. 5. Posting on RoomPorn: Pick a good and contextual title for the image (Keep it human) and put your new image there. At the end of the title ("My beautiful living room") you must post the image size in brackets. So, if your image is going to have 1925x2433 dimensions, the title will be like this My beautiful living room [1925x2433]. To find out the image size: Right Click - Properties - Details). You will get at least 50-100 karma if the picture is good enough. For good pictures, I've even gotten 500 karma/day. Tip 3: Keep it human! Tip 4: Don't do spam! A 12 hour posting time for a picture will do. Tip 5: There are going to be haters commenting. Don't try to talk to them. Tip 6: If your English is not good enough, or if you don't know what the comment is about, it's actually better not to reply.

METHOD 3

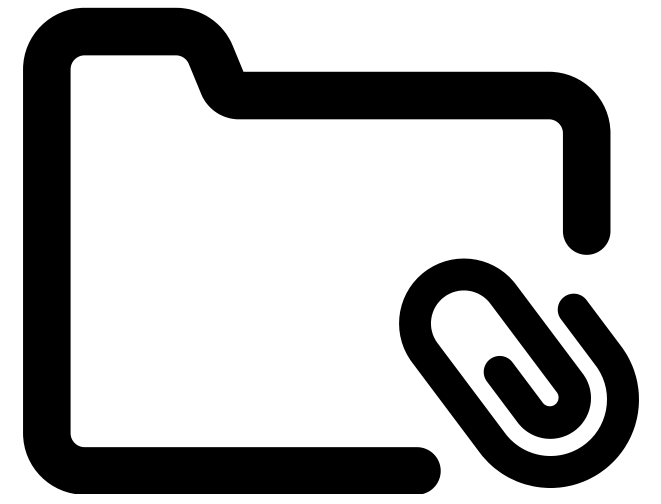

ASK SUBREDDITS

HOW TO BUILD UP COMMENTS AND POST KARMA ON 2 ACCOUNTS AT ONCE

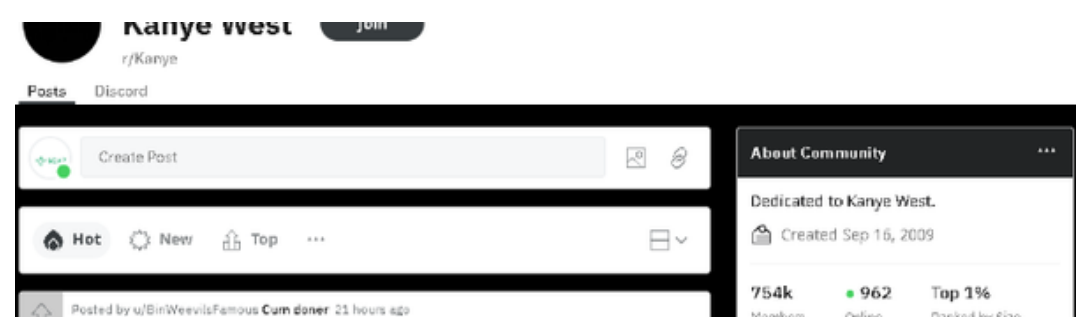

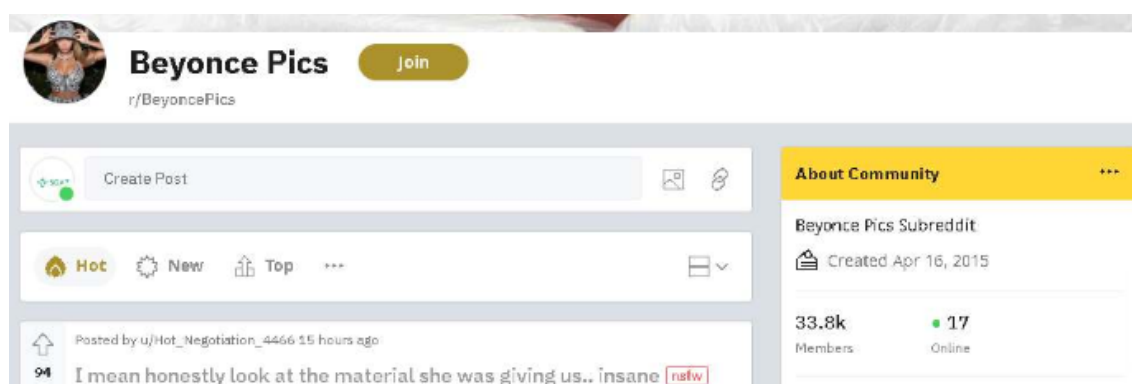

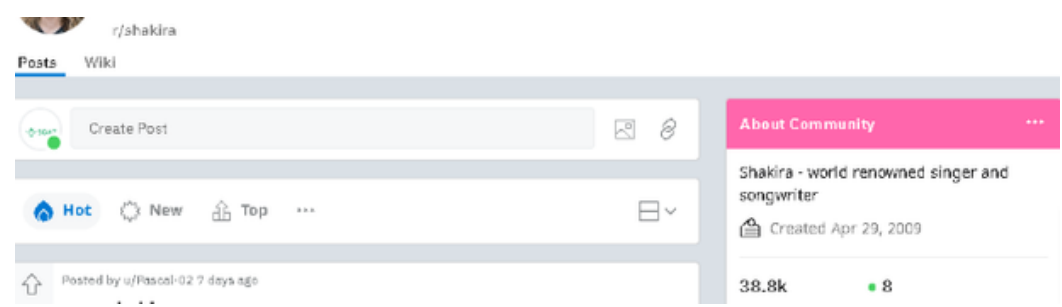

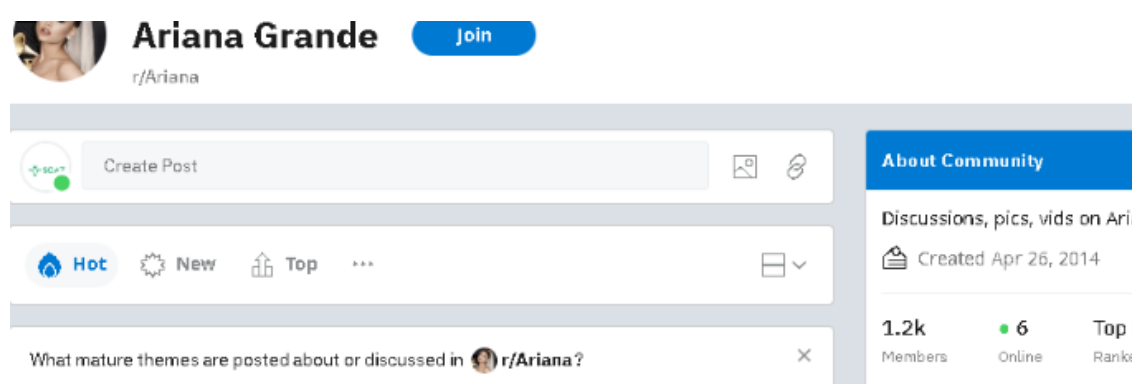

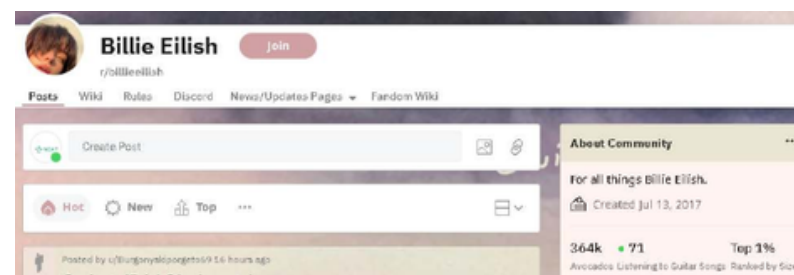

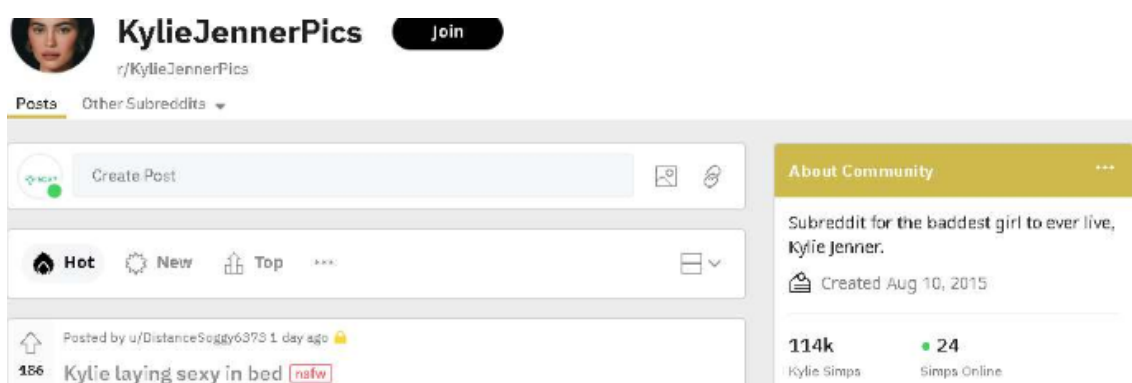

You will need at least two Reddit accounts for this, and a Reddit search tool: <https://camas.unddit.com/> We are going to start by farming comment karma and then we will move on to posting karma. r/askreddit and r/nostupidquestions are similar subreddits. The best part is that they don't have any karma requirements or account age to post. So what we're going to do here is use the search tool above to find older posts (about 8 months old) that have over 1000 upvotes on r/nostupidquestions. Copy the question in the post (make sure it's a summarized question) and also copy any comments with a lot of upvotes. Go to r/askreddit and use one account to post the question you copied. Use the other account to reply to that post with the comment you copied. Then sit back and watch the karma roll in for you. How to increase your post karma. When you have about 20 comment karma, go to r/blursedcomments, r/suicidebywords, r/murderedbywords, or r/pornhubcomments and grab one of the hot posts (make sure it's cursed). Then post it to r/cursedcomments.

METHOD 4 PHOTO KARMA FARMING

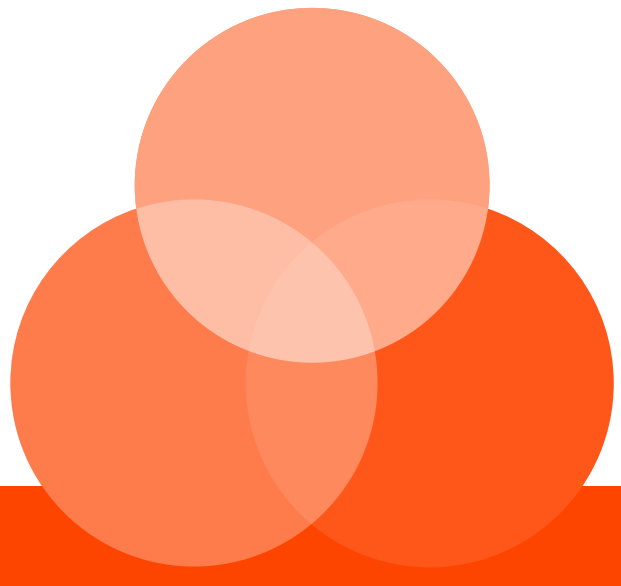

**YOU CAN FARM KARMA JUST
BY UPLOADING PICTURES OF
SOME CELEBRITIES IN
SUBREDDITS RELATED
TO THEM.**

redditaccmaster.store

METHOD 5 NEWS ARTICLES

***DO YOU KNOW JUST HOW
MUCH MONEY THAT IS IN
ADVERTISING?***

Just through this one post they probably got over 100,000 hits, do you know just how much money that is in advertising? But certainly the person who posted the post got a lot of karma. 100,000 Views which probably resulted in even more page views basically earns you over \$100+ as it is English news and has a lot of tier 1 visitor countries.

KEEP IN MIND!

Never use more than one account per IP address!

Never use more than one account per IP address! If you find someone who gets you 10k karma per month on each account, 150 accounts to give them, those are killer stats, don't hesitate to give them even more money just to keep them. I had a person whom I paid \$1,000 to pump me 150 accounts a month at 5,000-10,000 karma each and I didn't give him raises so after a while he left, I never managed to find someone who could do such a good job again, and quite a lot of money he was bringing me a month. From the sale of those 150 accounts that he made for me, I took about \$4,000 a month, if I increased it to \$1,500 for example, maybe I could still take a solid passive income. Look to find repeat customers, who will buy accounts in bulk. Antidetection browser is always necessary and important! Always use proxies. For larger purchases, consider giving discounts and entering into a deal with those people, because yes, you will earn less on a larger number of accounts, but you will be able to hire more people for more accounts, so you will profit even more in the long run. Remember it's always easier to sell to someone you've already sold to than to find new customers!

SETTING UP KARMA EQUIPEMENT

*You will need two things:
Antidetect Browser
Proxies*

Incogniton

Incogniton is a medium-cost anti-detection browser, there are some a little cheaper than it and some more expensive than it, but I found it to be the best in terms of price for quality.

Floppydata

Floppydata has always served me great for everything, there are plenty of good proxies providers out there, but they've always been top of the line for me so I haven't changed them. They work great for me on Reddit as well as other social networks.
