Sound

Base rate: **$50**

Model list

- Any Blender model that is rigged
  - You can find public ones here: https://smutba.se/
  - Models created by other artists shared on their social media page (twitter, patreon, etc)
  - Request model porter/creator to create a model for Blender
  - Or anywhere else. I don't care as long as it is rigged properly in Blender
- Models I used before in my work

If there is a 3D model of a character but not for blender (such as SFM or XPS), I will need to port it to Blender before I can use it for animation. Check Model porting below.

If you are not sure if there is a model or not, feel free to send me a message anytime.

Model Porting

Base rate: **$100**
I will port models into Blender if there is a pre-existing 3D model (SFM, XPS, fbx, obj, etc.)
Base rate is for rigging only. If it needs a nude body ported, shaders redone, outfits ported, any extra work, the price may increase.
Contact me for more details.

** I do not create models from scratch, meaning I do not create models for your OC

Genre

Anything is fine as long as it is not gore or scat.

How to request

More detailed, the better. Don't be afraid to write a page long document of what you want. With more detail, it is easier for me to work and you are more likely to get what you want.

Here are some guidelines on what to include in the request:
Required
- The main character
- Number of characters in the scene
- Description of the pose
- Camera angle(s)

Highly Recommended
- Reference image or a video of the pose **(please give me this)**
- Variation of the loop (ex. Blinking, subtle body movements that break the loop, etc.)
- Request on the character (ex. Outfit, hairstyle, body type, etc.)
- Facial expression (+what the characters are looking at)
- If you want sound or not

Recommended
- Background
- Lighting
- Any other minor/major details you consider important
