

Valuation Radar: The Good, The Bad, The Ugly

The Benchmark indices, Sensex and Nifty 50 declined 2.5 per cent each respectively last week. All the sectoral indices ended in red. BSE Consumer Durables and BSE Realty declined the most by 3.2 per cent each. BSE Capital Goods and BSE Tech declined 3.1 per cent each. BSE Oil and Gas declined 2.9 per cent.

Table with columns: Index, P/E, P/BV, Dividend Yield, Weekly Return (%), Monthly Return (%), Annual Return (%). Rows include Nifty 50, Sensex, Auto, Bankex, Capital Goods, Consumer Durables, FMCG, Healthcare, IT, Metal, Oil & Gas, Power, PSU, Realty, Tech.

The sector indices are disseminated by S&P BSE.

Table of company performance with columns: Company, CMP, EPS, PE, PB, Year End, Sales Qty, Profit Qty, Profit TTM, Wkly Rtn, ROCE, DER, Yr.High, Yr.Low.

Takeaways from Take 500

Wondering how to choose stocks for your portfolio from the dozens which are listed? Or how to keep track of the ones you own? Well, the listings on this page help you sift through the leading companies on their fundamentals and keep an eagle eye on their financial performance.

Wkly Rtn (Weekly Return) gives the change in the price of a stock in the last one week.

ROCE (Return on Capital Employed) tells you what returns a business is generating on the capital it uses.

DER (Debt Equity Ratio), which divides a company's total loans by shareholder funds, indicates how indebted a company is.

ROCE and DER give you the latest available year-end numbers for the company. Yearly High and Low tell you the range that the company's stock has spanned in the last one year.

Face value other than ₹10 per share as mentioned in brackets next to the company name. As far as possible, consolidated numbers (latest available) have been used for a holistic picture of the company's finances.

Given that the top 500 listed companies are usually the most liquid and well-run, we've restricted the list to the S&P BSE 500 index constituents.

Note: Very large percentage changes in sales and profit are reflective of a change from near-zero or negative value.

Table with columns: bl.rating, Scheme Name, Latest NAV, Latest Corpus, Expense Ratio, Trailing Returns, AA & Below. Section: SOLUTION ORIENTED - RETIREMENT FUNDS. Lists funds like Franklin Ind Pension, HDFC Retirement Savings - Equity, etc.

Our rating is based on the historical performance of funds (regular plans) measured both in terms of return (rolling return) and risk (sortino ratio). Rolling returns help identify schemes that have delivered relatively consistent returns during various market cycles and over the long run. We have considered one-, three- and five-year rolling returns for a total of seven-year NAV history for equity and hybrid funds. For debt-oriented funds, we have considered one-, two- and three-year rolling returns for a total of five-year NAV history. Sortino ratio measures the performance of the schemes during downturns, thus capturing the downside risk. One-year trailing return is also considered to assess the fund's recent performance. To arrive at the final score, we have assigned a 60 per cent weightage for past performance based on rolling returns. Sortino ratio and one-year performance is given a 30 per cent and 10 per cent weightage respectively.

The final score is used to rate funds within each category, from 5-star to 1-star, with 5-star being the best rating. Ratings for all funds now are based on data as on July 1, 2023. ADDITIONS We have newly introduced Passive, Cash and Overseas categories. Under international funds, we have showcased select global funds under three sub-groups — US-focused, emerging markets and global. Under the passive category, we have cherry-picked funds based on metrics such as relatively-low tracking error, higher trading volumes in ETFs (to ensure enough liquidity) and higher AUMs. Expense ratio for both direct and regular plans are disclosed now. For equity, passive, overseas and solution-fund categories, 10-year returns have been brought in to give long-term investors, a perspective. Three new metrics for all funds — sortino ratio (equity, solution, overseas categories), tracking error

(passive) and exposure to 'AA & below' rated instruments (debt, cash categories) are also added. While the ratings will be revised only at fixed intervals, returns data shown here are updated weekly. For other metrics, the latest available data is considered. RATINGS EXCLUSIONS Funds with a corpus of less than ₹100 crore, those that have less than a seven-year or five-year NAV history, categories that have less than five funds, and schemes that have undergone a drastic change in their mandate and portfolio (including multi-cap category) are not rated. Retirement funds, children's funds and overseas funds are also not rated as the investment styles of funds within each of these categories are not homogeneous. Passive funds cannot be rated based on return metrics and hence excluded. Since liquid, overnight and arbitrage funds are predominantly short-term parking grounds for cash, we haven't rated these as well.
