General Announcement

- **PROMOTIONS!**
 - OKscythe, :catshocked:, and Nichts to **Senior Tech Artist**.
 - More to come when MT releases...

Anonymous Questions

- “With HOI4 adding faction dynamics, will we be adding dynamism to the TNO factions?”
 - Answered by **Boobs** - No, it relies on DLC and we don't fw DLC.
- “What happened with the Ukranian Facelift of Corn?”
 - Answered by **Boobs** - Will come after Moderate Tortillas, at least according to Corn's last communications before stepping down.
 - **Corrdendum:** Ukraine Must Survive mechanics **should** be able to come with MT.
- “Will Iberia/Moderate Tortillas have an Epilogue?”
 - Answered by **KD** - Each path should have its own ending slides
- “Does Iberia go to 76?”
 - Answered by **Internetisme** - Playable content goes to 72/73, no playable content beyond that; **there may be skeleton** after that.

“Unfortunately, a lot of these are questions I can't answer.”

- “El Sal Proxy?”
 - Answered by **Aplomb** - looking into it, still working on baseline (?)
- “What tags will be most likely to enter fine-tuning after MT?”
 - Answered by **Boobs** - In terms of non-singular tags, DV is the top contender, and a Cold War expansion patch is planned to fill out parts of the war by adding proxies and skeletons to give the Superpowers more bones to crunch - Asia and SE Asia are def one (Indonesia), and a LatAm one is being worked on too! The Middle East is getting bundled with Italy.
- “News about DV?”
 - Answered by **Boobs** - The main Congo GUI is being worked on right now by Mango and should be in a good place relatively soon. ConGUI has been one of the main bottlenecks.
 - After that, we should be able to get DV into fine-tuning sometime in the near future after Moderate Tortillas.

- **Big push soon, volunteer if you want to help!**
- “Scrum for Iberia?”
 - Answered by **Boobs** - No sprints are planned. The Fine Tuning team exists to prevent sprints from being needed. Fine-tuning is supposed to level out progress and attention so it doesn't happen at the very last second. We shouldn't need it for other patches
- “Canada Skel? Included in yippie?”
 - Answered by **Boobs** - Trudeau Land is in development; ask the designers for details.
- “Germany/Ostland?”
 - Answered by **Boobs** - According to the most recent plans, Ostland will be split into multiple tags to reflect that the Baltics would be more integrated by 1962, and Ruthenia will be tagged out to show that it's **literally a hellhole**.
- “Fixing Shaders?”
 - Answered by **Boobs** - shi man iunno, forward it to Rune.
- “What the Italy doing?”
 - Answered by **Boobs** - Design is going quite well! Design has been stratified from how it used to be for the last couple of months/last year or so. Paths have been melded together so they're not three separate Italies. In terms of how that's going, the current project is reflecting how the Oil Crisis is going.
 - The Italy Team will soon approach the body team proposal phase and will then go to dev.
- “Is the Oil Crisis the biggest bottleneck for Italy?”
 - Answered by **Boobs** - The big bottleneck is the Oil Crisis, but it's not the biggest overall. The biggest overall was scope and flow, ie, how do you make the transition to Libltaly feel smooth?
- “Plan for a fishing minigame?”
 - Answered by **Bassist** - yeah, fishing and whaling for Japantarctica.
- “Brazil plans? Quaddy, JK, Go-kart?”
 - Answered by **Boobs** - Ask nil for that, and other Brazilian designers.
- “Next Patch after Iberia?”
 - Answered by **Boobs** - Difficult to be certain, TNOdev is notoriously volatile. Probably Amur Rework, Ukraine Update (might be bundled), DV, other regional patches mentioned earlier, somewhere out there in Germany.
- “How much work is left for the next Russia patch?”
 - Answered by **Boobs** - Ask the Russia team.
- “Will Fortnite impact TNOdev?”
 - Answered by **Boobs** - If it is American Dad-related, it will impact development.
- “How will Clash Royale balance changes affect DV?”
 - Answered by **Boobs** - Kitanga uses the goblins, so they will need to re-evaluate their mid-spam approach.
- “What do I do if a Team Lead (Slav) is offline? Do I need to wait to post proposals?”
 - Answered by **Boobs** - If you haven't been asked to make a proposal, you probably shouldn't be making one. Still, try going to another lead, and if that fails, go to a TC. Uninvited proposals can balloon easily.
- “TNO x Fehlinger?”

- Answered by **Boobs** - Never.

Calph and DV RT #5

- Fillmore, Mango, HW, and Calph have been working to advance DV to a body team and have been doing behind-the-scenes work to get us to that phase.
- In the short-ish future, DV will be progressing again, it will be going ahead at full pace till it is finished or if we all crash out and kill each other.
- *“Any plans to address liberal bias in TNO?”*
 - Answered by **Boobs** - Yes, we are enacting natural hierarchies; none of you is safe.
- *“When are we adapting Valve-style structure into TNO?”*
 - Answered by **Boobs** - Gaben will be in TNO as a Team Lead.
- *“What will Reagan do to contain Japan?”*
 - Answered by **Boobs** - Talk to Mango. Detente with Germany.
