

>In pre-op for a minor procedure at a hospital
>Already been given relaxants and minor anesthesia
>Tae Takemi steps in to check on you, notes you're a little out of sorts
>In other words, a perfect guinea pig
>Gives you a shot of her new homemade soporific
>Immediately makes you feel warm, fuzzy, and woozy
>You have an allergic reaction to it, your belly begins to bloat and expand before your very eyes
>It grows like a hot air balloon preparing to take flight, filling your vision and busting your belt with ease
>A rapidly growing sensation of pressure fills your body
>Your chest rises like you're drawing a deep breath that doesn't stop, limbs forced spread eagle as they fatten and swell
>An involuntary erection bursts out of your pants, your inflating cock throbbing and straining
>You can only waggle your limbs helplessly as you grow bigger, and bigger, and bigger
>Takemi watches closely, eagerly recording how you're blowing up like a fucking blimp
>She teasingly tells you that if you don't cum and relieve some of the pressure you'll explode
>There's no way for you to reach it, you're just stuck swelling larger and larger
>You're rounding out as you fill, pressing against the ceiling and bulging out sideways
>The pressure won't stop rising, and you can feel yourself getting tight and full
>Your dick is so bloated now it might as well be a rocket on a launch pad about to blow
>With a gasping moan you erupt, ropes of fizzy semen spurting from your engorged member
>Takemi thanks you for the clinical data and gives you a second dose before leaving
>The pressure inside you skyrockets, your trembling body ballooning ever larger
>You swell, blowing up
>And up
>And up
>Inflating like a blimp, just how much larger can you get?
>The creaking of your taut overfilled form announces the answer
>Too Big
>Too Round
>Too Fucking Full
>With a final squeaking groan, you cum again and explode
