

WHAT'S THIS DOCUMENT

I ranked and classified danbooru tags, sorted by amount of pictures, and then ranked them by type and quality.

Results aren't tested using Waifu diffusion yet, but I hope this document is just a starting point for others.

Meaning

GOOD: Will provide solid results, images share common elements, predictable tag.

WARNING: Solid keyword, but has multiple good results.

SEMI GOOD: Has more common elements, but still not at the level of solid good prompt.

MEDIOCRE: There are small details that are shared, but pictures are too varied.

USELESS: Picture samples look too random, there's not common elements.

Useless tier will have the left keyword, being the useless one, and one tabbed at the right, which are the replacements.

Since Tags were sorted and evaluated by the amount of pictures each has, assume the ones at the top will always have more pictures than the ones at the bottom of their tier and type.

UPDATE:

Some anon on the waifu discord, gave me a link to a complete danbooru tag sorted list.

https://danbooru.donmai.us/wiki_pages/tag_groups

Refer from now on this list.

POSES

GOOD:

- Solo
- Navel
- Holding
