The Vaccine Hoax is Over. Documents from UK reveal 30 Years of Coverup

Andrew Baker (FFN),- **Freedom of Information Act in the UK** filed by a doctor there has revealed 30 years of secret official documents showing that government experts have

1. Known the vaccines don't work
2. Known they cause the diseases they are supposed to prevent
3. Known they are a hazard to children
4. Colluded to lie to the public
5. Worked to prevent safety studies

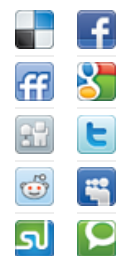

Those are the same vaccines that are mandated to children in the US.

Educated parents can either get their children out of harm's way or continue living inside one of the largest most evil lies in history, that vaccines – full of heavy metals, viral diseases, **mycoplasma**, fecal material, DNA fragments from other species, formaldehyde, polysorbate 80 (**a sterilizing agent**) – are a miracle of modern medicine.

On October 26, 2011, a Denver Post editorial expressed shock that the Obama administration, after promising to be especially transparent, was proposing **changes to the Freedom of Information Act** that

would allow it to go beyond declaring some documents secret and to actually allow government agencies (such as the CDC) to declare some document “non-existent.”

Simultaneous to this on-going massive CDC cover up involving its primary “health” not recommendation but MANDATE for American children, the CDC is in deep trouble over its decades of covering up the damaging effects of fluoride and affecting the lives of all Americans, especially children and the immune compromised. [Lawsuits are being prepared](#). Children are ingesting 3-4 times more fluoride by body weight as adults and “[t]he sheer number of potentially harmed citizens — persons with dental fluorosis, kidney patients tipped into needing dialysis, diabetics, thyroid patients, etc — numbers in the millions.”

The CDC is obviously acting against the health of the American people. But the threat to the lives of the American people posed by the CDC’s behavior does not stop there. It participated in designed pandemic laws that are on the books in every state in the US, which arrange for the government to use military to force unknown, untested vaccines, drugs, chemicals, and “medical” treatments on the entire country if it declares a pandemic emergency.

The CDC’s credibility in declaring such a pandemic emergency is non-existent, again based on Freedom of Information Act. For in 2009, after the CDC had declared the H1N1 “pandemic,” the [CDC refused to respond to Freedom of Information Act filed by CBS News](#) and the CDC also attempted to block their investigation. What the CDC was hiding was its part in [one of the largest medical scandals in history](#), putting out wildly exaggerated data on what it claimed were H1N1 cases, and by doing so, created the false impression of a “pandemic” in the US.

The CDC was also covering up e financial scandal to rival the bailout since the vaccines for the false pandemic cost the US billions. And worse, the CDC put pregnant women first in line for an untested vaccine with a sterilizing agent, polysorbate 80, in it. [Thanks to the CDC, “the number of vaccine-related “fetal demise” reports increased by 2,440 percent](#) in 2009 compared to previous years, which is even more shocking than the miscarriage statistic [700% increase].

The exposure of the vaccine hoax is running neck and neck with the [much older hoax of a deadly 1918-19 flu](#). It was aspirin that killed people in 1918-19, not a pandemic flu. It was the greatest industrial catastrophe in human history with 20-50 million people dying but it was blamed on a flu. The beginning of the drug industry began with that success (and [Monsanto was part of it](#)). The [flu myth was used by George Bush](#) to threaten the world with “another pandemic flu that could kill millions” – a terror tactic to get pandemic laws on the books in every state and worldwide. Then the CDC used hoax of the pandemic hoax to create terror over H1N1 and to push deadly vaccines on the public, killing thousands of unborn children and others. ([CDC will not release the data](#) and continues to push the same vaccine.)

The hoax of the vaccine schedule is over, exposed by FOIAs in the UK.

The hoax of the CDC’s interest in children’s lives has been exposed by its refusal to respond to a doctor’s FOIAs around its knowledge of vaccine dangers.

The 1918-19 pandemic hoax has been exposed by [Dr. Karen Starko’s work on aspirin’s role](#) in killing people.

And despite refusing to respond to FOIAS, the CDC’s scandalous hoax of a 2009 flu pandemic and its part in creating it, was exposed by CBS NEWS.

And the Obama administration, in attempting to salvage the last vestige of secrecy around what is really happening with vaccines, by declaring agency documents non-existent, has made its claim of transparency, non-existent.

But pandemic laws arranging for unknown vaccines to be forced on the entire country are still in place with [HHS creating a vaccine mixture that should never be used on anyone](#) and [all liability for vaccines having been removed](#). Meanwhile, a Canadian study has just proven that the flu vaccine containing the H1N1 vaccine which kills babies in utero, actually [increases the risk of serious pandemic flu](#).

Americans who have been duped into submitting their children to the CDC’s deadly vaccines, have a means to respond now. People from every walk of life and every organization, must

1. take the information from the UK FOIAs exposing 30 years of vaccine lies, the refusal of the CDC to provide any information on what it knows about those lies, and the Obama Administration’s efforts to hide the CDC’s awareness of those lies, and **go to their state legislatures, demand the immediate nullification of the CDC vaccine schedule and the pandemic laws.**

2. **inform every vet. active duty military person, law enforcement people, DHS agents and medical personnel** they know, of the vaccine hoax, for their families are deeply threatened, too, but they may not be aware of it or that they have been folded into agency structures by the pharmaceutical industry (indistinguishable from the bankers and oil companies) that would make them agents of death for their country with the declaration of a “pandemic” emergency or “bio-terrorist” attack. It is completely clear now that the [terrorism/bioterrorism structures are scams](#) so that any actions taken to “protect” this country using those laws would in fact be what threatens the existence of Americans.

It was aspirin that killed millions in 1918-19. Now it is mandated and unknown, untested vaccines with banned adjuvants in them that threaten the country with millions of deaths. At the same time, the CDC is holding 500,000 mega-coffins, built to be incinerated, on its property outside Atlanta. Not to put to fine a point on this, but it’s clear now that the CDC should not be involved in any way with public health.

Thanks to the Freedom of Information Act (FOIA), we know that vaccines are not a miracle of modern medicine. Any medical or government authority which insists vaccines prevent diseases is either ignorant of government documents (and endless studies) revealing the exact opposite or of the CDC’s attempts to hide the truth about vaccines from the public, or means harm to the public.

Thanks to the Freedom of Information Act (FOIA), we know the vaccine schedule is a hoax.

The health danger to American children and adults are vaccines.

sorry this is reply to Jo... when did this law change occur? i do not think this is true.... could you direct to your source of info? thanks

[Reply](#)

Jo says:

May 13, 2013 at 11:45

Sorry for the mix up, I meant they were trying to make it compulsory for beneficiaries to vaccinate their children, along with compulsory enrollment at an Early Child Education center for 3 and 4 year olds with over 5's to be enrolled at an officially registered school and also children of beneficiaries to be registered with a GP.

For some reason they think that once people go on a benefit they can no longer be trusted to make informed decisions for their own children, most of it is here –

“<http://www.stuff.co.nz/national/politics/8470697/Compulsory-beneficiary-jabs-axed>” and there is more information on the WINZ website – “<http://www.workandincome.govt.nz/individuals/benefit-changes/obligations-for-people-on-a-benefit-with-dependant-children.html>”

[Reply](#)

Caleb says:

June 7, 2013 at 06:13

seems like a rational idea, what would the downside be to early childhood care and ensuring access to healthcare for those who are most vulnerable in society? Regarding vaccination yes I believe it is a good idea to vaccinate as many children as possible however there will never be a time that it is acceptable to force it on people. Also there are robust legal and legislative systems in place in NZ to prevent this so a moot issue really, with regard to public early childhood care anyway.

[Reply](#)

Amstel says:

May 13, 2013 at 11:02

Still.

Since vaccination most common diseases like smallpox have (almost) disappeared from our world, while still common in less developed countries where vaccination isn't common. So, it must help in some way...

[Reply](#)

BENSULO says:

May 21, 2013 at 16:44

but small pox was a disease that KILLS – measles mumps and rubella do not kill people! if we banned cars that do 250 mph with no breaks would that mean that we should ban scooters? it is NOT the same thing at all! Being concerned about vaccination does not mean anti vaccination!

[Reply](#)

Sandy says:

May 26, 2013 at 10:47

Hello Bensolo. Thank you for this, and thank you nsnbc for publishing this article. See This one.

More than 50 % of those Diagnosed with Measles in Pakistan had been Vaccinated.

<http://nsnbc.me/2013/05/25/more-than-50-of-those-diagnosed-with-measles-in-pakistan-had-been-vaccinated/>

Dr. Tabish Hazir stated, that since January 2013 more than 550 children have been clinically diagnosed with measles at PIMS. 180 of these cases came from urban areas of Islamabad, 40 from Bhara Kahu, 25 from Alipur Farash, 15 from Bari Imam and 126 from Rawalpindi and the rest is distributed among other parts of the country. So far, only one death has resulted from the outbreak. To "immunize" is not indicated if it a) does not work and b) it either kills or damages more than it prevents death or damage.

People don't seem to understand that this is a risk – benefit question.

[Reply](#)

Steve Jared says:

June 1, 2013 at 03:16

Dr. Jenner's smallpox vaccine worked because of a symbiotic relationship between smallpox and cowpox. Those who had previously had cowpox were immune to smallpox. Today's vaccines are just a collection of poisons

[Reply](#)

B says:

June 1, 2013 at 14:31

Measles kills 1:1000 patients, rubella causes severe congenital deformities and blindness, mumps causes male sterility. Go to the WHO or CDC web sites.

[Reply](#)

Nsnbc says:

June 1, 2013 at 15:41

Hello "B" thanks for commenting but let us for fairness sake get something straight:

- a) You are right that measles can in some populations kill 1:1000 – Rubella "can" cause severe congenital deformities and blindness, and mumps "can in some cases" cause male sterility.
- b) I would not necessarily consider the WHO and in particular not the CDC websites as being impartial and objective. Sadly both of these august institutions are plagued by the most severe systemic problems.
- d) and finally, none of the points you are making have the slightest thing to do with the articles content, which focuses on the disturbing "facts" that :

Freedom of Information Act in the UK filed by a doctor there has revealed 30 years of secret official documents showing that government experts have

1. Known the vaccines don't work
2. Known they cause the diseases they are supposed to prevent
3. Known they are a hazard to children
4. Colluded to lie to the public
5. Worked to prevent safety studies

Thank you for reading nsnbc international. Please get a free subscription at the bottom left side of our website, but please, when you comment, comment "on the topic". Usually "off topic" comments are deleted. Read our comment policy if you are in any doubt. Warm regards.
Christof Lehmann – editor.

Louise Du Toit says:

June 17, 2013 at 18:16

It is seldom measles that kills. It is the inappropriate use of antibiotics and analgesics, given to children with measles that undermine the body's ability to defend itself. The child dies from the treatment it receives and the death is recorded as "death from measles. Rubella is dangerous for pregnant women (during the first trimester) and mumps affects the sterility of adult men. Given that the protective effect of vaccines wears off over

time, thus exposing adults to the risk of infection from a disease that is relatively harmless in children and serious for adults, one has to wonder.

Charlise says:

June 18, 2013 at 02:05

lol at the advice to go to the WHO and CDC websites. Definitely not a good source for factual information.

Beverly Wheeler says:

June 25, 2013 at 21:54

Interesting that you believe what the CDC says on their website since they have obviously been lying for years. Not to say it isn't valid, but I question everything they say.

Michele Graham says:

June 3, 2013 at 20:53

Actually, no. With the advent of modern plumbing and the practice of hand washing regularly, the more developed countries were able to flush their wastes away instead of dumping it out their windows, sometimes onto passersby, and keeping themselves cleaner. Remember reading about chamber pots? Vaccines do not make one immune to the disease; they only trick the body into thinking a particular foreign disease has been introduced so that anti bodies are produced. Supposedly, once the body encounters the disease, it will recognize it and work more efficiently to battle it out. One problem with this method is that vaccines do wear off, sometimes within 3-5 years, and then boosters are needed to do the process all over again. Plus, don't ignore the money factor involved in making these vaccines, which is huge, as well as whistleblowers that have come forward exposing tainted mixtures that would have been injected into millions. Our own government has funds set aside for people who have been injured or damaged from vaccines as long as you can prove it.

[Reply](#)

Camille says:

June 12, 2013 at 16:23

it is easy to applaud vaccines for smallpox's demise; however, sanitation techniques and nutrition greatly improved in the developed world as well. unfortunately these things continue to be a problem in less-developed countries. promoting these two building blocks of health probably had more to do with the eradication of smallpox.

[Reply](#)

Heidi N says:

June 12, 2013 at 16:48

I would rather focus more on the adverse affects of vaccines, such as the live viruses from them living in you, causing cancer, and numerous chronic, disabling ailments because it's the quality of the vaccines and the manner in which they are given that make them abhorrent. Until we can sue the manufacturers, they have NO motivation to make good quality, well-tested vaccines. The vaccine manufacturers currently state that millions of people have been vaccinated, as if somehow that indicates their safety. Millions of people suffer daily from all kinds of ailments, many disabling and fatal. That's the reality. And those of us who are in our 40's know that the world is extremely ill today in comparison to our childhood years. Anyone can easily Google to learn that we have epidemics of too many illnesses and conditions to list, today, as compared to the 70's and 80's. Those of you who feel it's better diagnosing are in wishful-thinking land. I could explain all this in technical terms, but just know that the docs making those with autism, MS, Lupus, ALS, etc. well (as in losing most of their symptoms), blame vaccines. Since those docs are more successful than the other docs, their opinions are more accurate.

[Reply](#)

Laura says:

June 26, 2013 at 13:20

small pox was actually disappearing before vaccination because of improved sanitation and hygiene. Raggedy anne was actual made by a mother whose daughter Died from the small pox Vaccine to bring awareness to the dangers of vaccines !!!! Check out VAERS which is where vaccine reactions are reported, if they were so great why do they need this and why can't you take action against the vaccine companies??? because the government has made it impossible. Do so hard research and you will find that many diseases were on the decline before vaccines were introduced.Read the side effects and

ingredients on the inside of the vaccine inserts, many vaccines cause the actual disease or others. Your better to catch the wild strain and allow the immune system to do it's job, support a healthy immune system to be able to fight illness.

[Reply](#)

Jayne Beasley says:

May 13, 2013 at 13:13

Every child in Western Australian kindys, pre-schools and primary school HAS to be vaccinated.....or no entry. How's that? I do have proof, enrolled the grandson in school.!

[Reply](#)

Tahlia says:

May 22, 2013 at 14:54

It is not law in any state or territory of Australia that children have to be vaccinated to be allowed into schools, child care centres etc.... But some are happy for you to think it is mandatory.

[Reply](#)

Ellie says:

May 13, 2013 at 13:18

Taking away parents rights and making them vaccinate is just insane but then thats what agenda 21 are pushing towards, this evidence has been around for ages and people are still proving to believe that these vaccines are good for our children, Scare mongering is in the daily media, look at wales and the measles outbreak, how many of these measles patients have already had the MMR? Has anyone thought to find out because I can find nothing on these stats!?

[Reply](#)

Peacefuln8ure says:

May 13, 2013 at 15:37

The thing that gets me is that the medical boards (I know specifically it applies to British Columbia Canada) dictate that in order to keep your medical license all doctors are mandated to advise patients to vaccinate regardless of their personal beliefs or feelings on the issue and that if they concur with a patient who chooses not to vaccinate they can lose their license to practice medicine. I received this info from a naturopath that I had taken my son to see since I prefer that method of treatment to traditional medicine. Even they are bound to push vaccines.

[Reply](#)

Ayesha says:

May 14, 2013 at 12:08

In South Africa, it is the norm to submit your child's clinic card with the enrollment into a school. They will not admit the child if the vaccinations are not up-to-date!

[Reply](#)

Patricia Bewley says:

May 14, 2013 at 15:20

Bill Gates is set on vaccinating the WHOLE world as he said on 60 minutes Sunday night show. he is very educated man and oblivious to the harm of vaccines

[Reply](#)

Josie says:

May 15, 2013 at 16:05

I'm not sure I would say he is "educated" as it applies to this. I'm not sure what it is about money that makes people feel they are smart or need to jump on a cause and "give it all they've got." It sounds good and looks good in the media. Also, the tax breaks are phenomenal!

[Reply](#)

Trey Hall says:

May 20, 2013 at 16:17

Bill Gates is also on board with agenda 21. He knows the harmful effects of vaccines, that's why he says he wants everyone to have them. If you are unfamiliar with agenda 21, you should research it. One of the main points, is population reduction and control. Hmmm.

I am beyond pee'd off at the CDC!! My 5.4 oz infant received an 8 lb vaccine. He came home from the hospital with autism. I tried to tell those bone head Doctors they just disabled my newborn!!! 9 years later they still want me to vaccinate my son. And each time he gets a vaccination I watch him deteriorate for a week. I had the flu shot and it caused me to be delirious and my nervous system went crazy!! Welcome to freaking America land of the free.Not!!!

[Reply](#)

Starlight777 says:

June 10, 2013 at 12:25

Stop taking him in for vaccinations – or, if you feel you must, get him thorough mental and physical exams (with pictures) before and after EVERY vaccine, so that you have documented proof that these vaccines are not doing him any good and in fact are harming him.

Every single state in America will allow a medical exemption for a child to attend school without vaccinations, if it is confirmed by a doctor that they CANNOT have them without risk of further harm.

Also, if you can prove that it was indeed a specific vaccine that caused harm to your infant boy, you may be able to get compensation from NVICS. Several of them are tied to manifestations of encephalitis, which can have an appearance just like autism. Find a lawyer who knows how to deal with vaccine-injury cases, and be prepared for a long, uphill battle whether you win or lose.

[Reply](#)

Dianne says:

June 10, 2013 at 18:24

There is a 3 year limitation on vaccine damage cases. Vaccine damage lawyers are very helpful.

[Reply](#)

Christof Lehmann says:

June 12, 2013 at 22:29

Hello Diane.

The 3 years limitation a) depends on what country you are talking about (we have readers from literally all countries) b) on what vaccinations you are talking about.

There exists both US and UN legislation that exempts the manufacturers of some vaccines from a) completing normal testing procedures, which often are bad enough as they are and b) from any responsibility for eventual damages...

The point with the entire article is actually not to discuss which vaccines are good, bad, safe, unsafe or statutes of limitations.. etc...

The point is rather that there is an urgent need for drastically improved transparency, publication of all studies, a stop to exempting vaccines from normal safety requirements, more safety studies, and the need to hold anyone who falsifies research, covers up falsified research, covers up adverse effects and damages criminally and personally accountable in criminal and civil courts.

At least that is why I chose to publish the article. ;)

Warm regards.

Christof Lehmann – Editor.

[Reply](#)

Andrea says:

May 22, 2013 at 17:21

You can choose not to vaccinate by stating religious preference in the USA I have done this for many years. I had to give my daughter vaccines however to live in the UK. But hav not given them to our son.He is 9 my oldest is 22 neither one of them had the MMR and will not.You can choose this option by telling you school religious reasons.They just have you sign a form to cover themselves.

[Reply](#)

Charmian says:

May 22, 2013 at 18:35

Do you know which are the vaccines that are worth having done? I'm asking because in South Africa – the whooping cough and diphtheria and polio are given by the nursing staff in the delivery room. I know I had a fight about the MMR, but was told it was mandatory. Also the tetanus shots. Which are the ones that are compromised/garbage? I am interested as my kid has learning problems and as a parent I've always tried to do the best I can afford; and many of these vaccines are provided free by the state and I don't actually thing that schools would allow your kids in if not vaccinated. I know what the constitution says, but my kids were told to remove their crucifixes at a government school; but the Hindu girls could keep their nose studs – go figure. I think if you weren't vaccinated, they would simply not have place for your kids.

[Reply](#)

Nsnbc says:

May 22, 2013 at 19:12

Charmain, a suggestion. Don't ask in a newspaper forum. Find an expert medical doctor whom you trust, who is working independently from any governmental or or pharma paid position, has no other conflict of interest, and who is an expert on vaccines and their risks and side effects. I could recommend a few but have to restrain myself being the editor of this newspaper. Search with due diligence and you will find one, or rephrase your question, maybe one of our readers can advise you on who to contact if you ask "Can someone advise me which independent, etc... to contact and how "... . Warmest regards. nsnbc international, editor.

Read The Vaccine Book by Sears, its a very good resource describing each disease and vaccines for it in detail, so you can make a decision. It is against the constitution to deny you entrance into school or workplace based on your medical status. They accept people with AIDS into work and school, so they cant possibly force you to vac ur child.

Did you seriously just compare not vaccinating to AIDS? And what constitution are you looking at? There is not constitutional right to an education. At least not the US constitution

I have not vaccinated my kids. When it came to pre-school requirements, I took a letter from my homeopath stating that he had provided us with homeopathic alternatives to the vaccines. This has been accepted so far.

No vaccines are mandatory in South Africa – you just need to be adamant that you do not want them – you can tell them you are waiting till the baby is bigger. I had my baby there and she did not have any vaccinations.

Wendy Lydall says:

May 25, 2013 at 12:24

They are not supposed to exclude children for not being vaccinated, but then they are also not supposed to exclude them for being Christians. It is BCG and OPV that they do at birth. No shots are mandatory. They lie.

You can be educated and ignorant at the same time – see this too a lot in doctors and veterinarians who were taught what to think but not how to critically think apparently....I also see a lot of vaccine reactions in pets, horses, dogs and cats primarily. My first cat died of vaccine induced fibrosarcoma (aggressive form of tissue cancer) that she developed at the injection site (between shoulder blades). I am now extremely conservative about vaccinating my pets and would feel the same if I had kids. My heart goes out to all children and families who were adversely affected by vaccinations and I wish that someday soon you will all be able to kick some major butt and get the compensation you deserve for future support and treatments of affected children....(((Hugs)))....wishing for a much more kinder, more honest and considerate humanity than what we are dealing with now....

Editor’s note: Some “**Troll**” who is known for having infiltrated several vaccine oriented forum and social media sites made the most brilliant point when stating the following in several groups where this article is being discussed:

“But N.N., remember now, that this is nsnbc, not msnbc. Notice the difference ?”

I would say, “Exactly Right – Just have a look at our list of contributors. – Notice the difference ? – and then look at whether we are state or corporate sponsored or not. Notice the difference ? I rest my case with an amused smile. Christof Lehmann. Editor in Chief nsnbc international.

My mother did not allow me to be vaccinated against small pocks or anything else when I was an infant.

At school during the 5th grade they simply herded us to the so-called doctor who vaccinated the entire school with the same blade, dipped into a vial and then cut us, one after one – that was Germany, not the Central African Republic (sorry, no racism or insult intended, its just that our colonialism makes you poor).

The result was that I was sick with high fever for two weeks. It took me month to get back on track and even as a child I could realize that my ability to focus and concentrate had suffered.

I would like to point out two things reading the article and all the comments: (actually three)

1) Why is nobody here discussing the very important point that it took 30 years to have the papers released – what about our so-called demockery ? What about the documentation of a coverup – maybe we should discuss suing people rather than only discussion our own noses and vaccines. We are dealing with a serious, systemic flaw that must be addressed.

2) I agree with the editor (God bless you). Find yourselves a good MD with a good record, who takes the time to inform you about the pro and contra re. vaccines and who supports you regardless your decision. That is what I did.

3) Trolls who infiltrate independent media fora, social media, who keep asking the same circular questions and argue the same tautologies and then complain about censorship etc.. failed want to be medical masters who compensate for their ability to accept that we need the freedom of informed choice, people who are trying to push their anti-quackery websites to inflate their ego – go to youknowwhere.

Having recovered my children from autism, I had to learn lots. You see, and there is much peer-reviewed published science that says that vaccines are adverse. Those who say such things that there is no evidence that vaccines cause autism can be easily sued for lying because it's easy to access this information on the Internet. You see, you can't just think what makes sense without doing lots, not a little, of research. The docs making people well, as in ridding their supposedly untreatable symptoms, are against vaccines, because, the live vaccines (measles, mumps, rubeola, influenza) stay in some and continue to live, are transferable via pregnancy and between family members. You may have lots of symptoms or none when you transfer your vaccinated live virus. Also, vaccines tilt your immune system, decreasing it's ability to fight certain pathogens, and increasing autoimmunity (asthma, autism, MS, ALS, Lupus, and too many others to mention). Some vaccines do work somewhat against some diseases. But, the quality of today's vaccines is abhorrent. So, since we can't sue, the companies can do whatever they want and get away with it. Also, if you look at the past, the government admits that the polio vaccine caused polio and some still do; that SV40 causes cancer, and that more than 1 out of 3 Americans get cancer now, but it used to be rare. So, quit believing what you want, quit lying for companies to keep your job, and just read and read until you can put things together. It can help you save your family's health and even reverse some illnesses that most docs say can't be done. Your choice.

I stopped vaccinating in 1989 when my oldest was violently ill following his first DPT. In that time the quantity and frequency of "required" vaccines has soared. I was not aware of the 1918-19 flu epidemic, but it sounds similar to the polio scares which pushed people to vaccinate. No one here argues that these diseases are not serious and can be life threatening. It is an issue of education and awareness of self and knowledge to work with the natural world rather than against it. We are seeing these kinds of problems with GMOs, with pesticides, with plastics, with fluoride and amalgam. Such a tragedy! Awareness is crucial because there are efforts to eliminate any and all of the three conscientious objector reasons most states allow. Great article! I am quite surprised by the ability to see this information in my lifetime. I thought this kind of information would take much longer than the research about smoking did. We are not as smart as we think.

Asad Rehman says:

June 7, 2013 at 11:06

Militants in the badlands of Pakistan have started a campaign to stop the Government from vaccinating children in the area against Polio. Some polio workers, men and women, have been killed..so have policemen protecting them. Though their motives are sinister, the militants, pointing to the research mentioned above, insist that the vaccination is harmful. Could they be on the right track...?

Dear Asad Rehman.

You may want to have a look at the following article. That is also where your comment would be more appropriate:

Bill Gate's Polio Vaccine Program Caused 47,500 Cases of Paralysis Death.

<http://nsnbc.me/2013/05/08/bill-gates-polio-vaccine-program-caused-47500-cases-of-paralysis-death/>

Warm regards.

Fahwad Al-Khadoumi says:

June 25, 2013 at 20:34

Nathali. No insult...

First of all your comment is "off topic".. The article is about the fact that industry, public service and elected officials cover-up adverse effects etc... The discussion should rather be "What to do about that". Second – You are very badly advised asking for "suggestions" in a public forum. Find a good medical doctor whom you can trust – ask him/her. Finally – since you describe India as "a dirtier country" – why don't you stay at home ! Respectfully – Fahwad al-Khadoumi. Comment moderator.

Thank you so much for posting the information. I lived in England during the 70s (expat)with 3 school-age, unvaccinated children. On numerous occasions they sent public health people out to my home because they considered lack of shots to be child abuse. It's so great to have this information so easily available now. Back then it was next to impossible to find anything about the dangers. All I knew was that one of my children had come close to death after a DPT shot at about 4 months. I stopped allowing it after that and did research as best I could.
