That looks bad to outsiders though. We don't want the UN thinking they can get all uppity and "help". So much easier to drug them then catapult them back over the wall while they're sleeping. ;)

The UN doesn't have any control over any super power or anyone allied with a super power. It only has as much power as the countries backing any particular motion.

Jeez... Don't forget to leave room for nature.

Your suggestion about everybody having as many children as possible creates a fucking scary ass future, unless you're preparing for war or a plague-like disease killing off half of your offspring in this utopian commune you're designing.

I'm paraphrasing, but you stated "as long as you have a woman who's willing and able."

I noticed you conveniently left out the word "wife." Do you practice polygamy? Do you mean if your current woman can't produce, you'll just find a new one? Younger? Are you a man of God?

By the way, there are many facets of law. I hardly believe that your son(?) can master all of them in order to represent you no matter what kind of scenario you find yourself.

I am not a polygamist, but I don't necessarily object to the idea.

I am not any form of desert god worshipper.

I am leaving room for nature. I'm in the process of creating the legal framework for permanently protected forests like the Black Forest of Germany.

We're not all crammed into a small place. We acquire lots of land. Some parcels are quite a ways away and we buy out everything in between whenever it goes on the market.

Remember to leave someone in charge after you die and make sure your children understand the importance of this. My family did what you did and it worked until one generation consisted of 3 women and 1 man with the man leaving to see the world. Now nothing gets done, nothing gets decided. Forests have been sliced up, fields are next and the houses rot.

Yeah, I've got that in order already. I've got three in a succession line and set up a voting system they are to follow. If they want trust money, they will have to follow the game plan.

Yeah, that is pretty nice, actually.

Think of it as bond that starts paying out after 18 years.

After children reach the age of 14, child care gets cut by one third. If you have a child every two years and divide the work evenly between of age members of the family, your individual child care load is reduced by 1/3 then by 1/4th, then by 1/5. Meaning by the time your oldest is 22, net child care per of age individual is only about 20%, if evenly divided. That's not even taking into account that it's easier to take care of 5 children in a group than 5 individual children. Cooking for a big family means you can cook better meals and streamline processes like doing laundry that usually would take more time and energy.

Individualist wage slaves who die as poor as when they were born are wimp retards. I am one, and my crappy low six figure income is meeting our needs at the moment. In this economy, I could easily find a better paying job if I really wanted to as well. So I feel less poor than when I started.

My family makes more than 6 figures a year and only a few of us are of working age.

One estate with a 7 figure combined income is pretty fucking nice, wouldn't you say?

"My biggest obstacle is finding strong smart White men and women for my children to marry that will stay under the family's banner."

Jesus, it sounds like a compound and a little nuts. It's YOU who are going to choose who they marry? Do you make ALL their decisions for them. Seems like this lifestyle just keeps your kids sheltered and dependent. Even the Amish have rumspringa and give their kids a choice.

I don't make my children's decisions past around 16-17, but they're smart and I tell them the reasons to do or not do something. Whenever we travel somewhere, I point out the degenerates, how they've ruined their lives, and how they will try to ruin everyone else's. I took one of my daughters to a party to meet a celebrity I know who told her about the unglamorous parts of her life and how the media makes her out to be rich but all her money goes to her (((producers and accountants))) who try to get the celebrity hooked on drugs to make her dependent on them. She no longer wants to be any sort of performer.

I'm not arranging marriages, but my children don't want to marry the dumb or non-Whites and it's slim pickings for intelligent Whites in my state. I'm streamlining the process so they don't end up spinsters.

I like your idea sadly I'm but a single person making it on his own from a family that kinda never really gave a shit. I do wanna add something. Invest in stuff that will yeild in the long turn right now I'm investing in crypto but once I have enough I'd wanna start my own business with some of my crypto gains.

A multigeneration family that is close together should definately start your own business. I think you could be very succesful with that kinda attitude.

We've already got a few businesses. Our family is slowly merging with high IQ White families in the area and acquiring the businesses they've built.

We're reshaping the culture of the area since we don't allow (((Christians))) into our fold. Instead, we're converting marry ins to Asatru and reviving White identity. A lot of the Whites here aren't fond of that idea, but the incentive to marry into our family becomes clearer by the day. They want the wealth, stability, and future our family provides. A good number of my children have IQs over 140 and are just as strategic as me in erasing Judaic influences from our lands. I figure as the third generation comes of age we'll export our model across the USA and fill in the gaps until the degenerates are begging to be deported to some other country.

They would be better off if you taught them to start their own businesses and work to grow them.

The problem with that model is that if all my children are business owners we will need workers that are outside of the family living in proximity to our businesses, meaning we'll always have a population of degenerates living amongst us.

I don't want to build that mentality into my family because the long term implications will mean we get swarmed with non-Whites and degenerate Whites. I'd rather see my family grow to completely occupy cities and selectively import Whites with high IQs and otherwise good genes.

Like I wrote, designing a mechanism to secure good marriages for my children is my biggest obstacle now.

we must build homesteads from every tiny hut.

As you get going with additions. I really recommend following a checker board pattern with interior court yards with drainage plumbing. Our family collects plant species and let the kids plant what they prefer in their gardens. We've got tons of dogs too and they more or less get their own private garden. Because these interior gardens are mostly all enclosed, we don't have to worry about people breaking in through the french doors and all the rooms get plenty of light and air. If there was a fire, each interior garden has a ladder to the roof so no one would get trapped anywhere.

Tesla doesn't even put up a fight. He could make a jeep, a truck that hauls a 5th wheel, a motorcycle. Actually he could get interns to shit out fine designs of all that. I could go on with smart low cost ventures he is absent on.

I will: Small monolithic solar designs for outback settings, fast charge/discharge multi volt power supply offering, a rail system that stupid people can maintain easily instead of hypothetical bullshit

Heating and power combined systems.

I don't think we have a firm grasp on just how many angles the cartels are attacking him from.

No. Stop.

While some of these people are certainly jewish, it does us no good to avoid pinning down the specific people that pull strings. When you leave it at "the jews" you're showing your foolishness, embarrassing yourself, and diluting the conversation. If you don't like those tough truths, that's your fault.

With that being said, the point was never about white genocide. If these banking systems depend on funneling out tax payer money to subsidize the rest of the world, they don't in fact wish to kill us all off. The Democrats taking advantage of immigration systems serves to secure them more votes. When you read in to it as secret jewish genocidal plans, you entirely miss the point. Maybe you're nnot wrong and someone sees this opportunity to do just the thing you're describing, but if that's where you're jumping you're just needlessly stretching the scope of things with this.

The point was that the people that control the central banks, BIS, CFR, etc, don't give a fuck what race people are so long as they can extract their funds to fuel their various interests.

You're right about the necessity to name individual Jews responsible while making apparent their Jewishness.

You're wrong about Jews, not all but the elite ones, not trying to genocide us. Their gameplan is to relocate American research and industry, including military, in Israel while burning down the West so that the world leadership will recenter in Israel.

Even Whites, as dumbed down and selectively bred for manual labor are still their biggest threat. If they can't genocide us by force interbreeding with dumber races, they will genocide us by force.

Whites are mostly intelligent farmers. We have never had plots to take over the world and we've been losing our territory to other races since pre-history because of this. We do excell at killing off abusive ruling classes though.

Because their leaders don't care about what race people are.

Their leaders are a totally different issue. Jews infiltrate various governments and occupy them. It doesn't make the actual citizens of that country complicit in their actions.

The Nation of Israel is still to blame regardless of what country their spies occupy.

I personally investigated Patrick Little and what I discovered Will SHOCK YOU.

He's a Lizard. That's Right. HE'S A FUCINGK LIKSARd

Also, what you're seeing isn't proof of a government level scrub. If you were looking for that, you would need to get data access from telecom providers. If they don't have a history with the ISPs, you're looking at a deliberate deletion of data. But that doesn't necessarily mean they work for the government. The US government goes to lengths to protect citizens that serve US interests who are under threat.

It's not as if the government agencies themselves even keep records of every person they're protecting. Like the FBI, other agencies have various bureaucratic barriers preventing leaks of truly sensitive information.

I suspect there is a kind of understanding among various groups that if such an indicator is found they are to back off because they don't know what they'll be getting into. People with scrubbed records therefore are an asset since they are somewhat invulnerable to various kinds of threats and intimidation.

Sterilization is the moral, ethical, humane solution, but the mentally ill are a huge industry, they're worth a lot of money. I have no idea why the asylums were closed down rather than renovated and improved, but that created this outrageous situation we find ourselves in.

We can create a covert sterilization program like Japan did. Modern sterilization can be done with mock vaccinations. We could create a program where nurses working for us administer routine anti-body sterilization of people who have been diagnosed with schizophrenia, psychopathy, and narcissism. Who knows, such a program might even make Jews compatible with the West.

You're taking it to that worst case extreme, but right now we've got schizophrenics and people with dangerous personality disorders presenting a huge threat to the population. They are the mass shooters, the murderers. Society needs this.

The thing about schizophrenia and personality disorders is that they are genetic and they used to be mitigated in the population by ostracism, but now in anonymous cities these people propagate and spread their disease. Since these genetic diseases often have a late onset, people don't realize they are afflicted until it's too late and they already reproduced.

What we need is genetic and psychological evaluations to identify these people and sterilize them. Japan sterilized these people and is almost entirely free of psychopaths, schizophrenics, and low IQ delinquents just one generation later.

Jews already have convinced the public that counter-semitism is a mental illness. There's no guess work in how such a law would play out in their favor at a crucial time.

I wonder if you understand what Zionism is? It is the idea of Jews having their own nation, *and not living in other peoples' nations*. It is something that non-Jews who don't like Jews should embrace. Initially, even the Nazis did so: Adolf Eichmann had some serious talks with Zionist leaders of his time to get rid of the Jews out of Germany, but with Palestine (the to-be-Israel) being controlled by Britain, there was too little room for practical cooperation after the war had started.

I'd say it is more the case that Joe is sympathetic to Zionism rather than being a Zionist, which would be incorrect to say about a non-Jew.

The Jews have no intention of ever leaving the Western world they parasite off of unless it is totally destroyed.

You'd sooner find a tick leaving a wound because you built it a small house.

Maybe he thought you share the sentiment of the journalist who wrote that article?? I recommend, that you add quotation marks around titles that might be mistaken as coming from you instead of some liberal. In Europe, there is a legal requirement for public buildings to enable disabled people (e.g. those in wheelchairs) from visiting too. Blacks don't talk to police because it means their relatives will end up getting arrested too.

When someone helps the police convict a criminal, that criminal retaliates by telling the police about the people that reported them. They all end up going to jail. As a result, the drug dealers proactively punish people that talk to the police to keep themselves out of jail.

If you ever want to be a professional burglar, target people that are involved with drugs. They won't report anything.

I wonder about Little. He's so simplistic in his tirades against the Jews, I have to suspect he's a plant by the left to poison white racial and cultural pride and to cause whites to distance themselves from nationalism and racial issues. I don't like him, and I don't trust him, and I don't believe him. Yes, much of what he is saying is true, but he is saying it in a way that seems deliberately designed to poison the message.

I've done a bit of background checking on him, like I've done with so many others. He's not entirely the way he presents himself. No, I suspect he was White Nationalist from the very beginning and infiltrated Jewish organizations. That's a far more likely scenario given his origins. We have no way of keeping track of all our own people, nor do we have a reason to. Decentralization is good for us and we get by dropping packets of info where they're needed and vetting it with our own groundwork.

The Jews pull stunts like this when they want to draw votes away from real counter-semitic candidates, but he's the only one in his political races so that serves no purpose.

If he turns against Whites, we'll just burn him like the rest. I doubt that will ever be necessary. Often it only benefits us to allow even confirmed shabbos goy to work, purportedly for Whites, for a time. They inadvertently advance our cause while trying to build up a reputation with Whites and we destroy that reputation when they begin to turn.

The Jews believe we have no capacity for reconnaissance so they don't even try to conceal their subversive recruitment. We usually have their details before they even get deployed in the public arena. There are so many Jews that see the anti-White plots as a threat to Jewry in general and are eager to help. Israel is sloppy and aggressive in promoting Zionism in synagogues, there's no shortage of Jews willing to sabotage them. The best infiltrators undergo a process of psychological transformation. They really believe what they profess while infiltrating and so there are no indications of duplicity. And then one day they flip back into their normal state of mind and take all their collected info with them. I've known a couple people like who made their way into the heart of Zionist communities and left with troves of information. It must scare the shit out of the Jews when they investigate the backgrounds of Goyim Nationalists to find that they are members of synagogues and were close friends with elite Zionists. It's just impossible to run an operation like Zionism without recruiting the natives, they can't plug the hole without also severely restricting their operation. There's very little, probably nothing, White Nationalists don't know about the Zionist operations in the USA and abroad today. When it comes to opsec, White Nationalists already have to keep their operations truly secret. The Zionists have forced Whites to evolve. Their mistake.

It could still potentially end the game of passing the Jewish plague around from country to country once and for all.

If you send all the Jews to Israel, they will collapse under the tension of their own exploitative tendencies.

While it's good to have details in hand to debunk the Holocaust, it itself shouldn't be allowed to superceed the message of the Holodomor.

Because the primary purpose of public schools is to institutionalize individuals so they will be unable to go into business for themselves and instead work for a wage slaver. They have to be habituated to the 9-5 schedule and both their parents must be worked to death instead of raising their children.

No public schools would cut the labor force in half over babysitting alone.

Well this is the thing that pisses me off most. These 'Nazis' know so much Nazi history, except for the co-operation between the Nazis and the Zionists!

I know about the co-operation. Pre-Hitler and early Hitler established the first kibbutz in Israel and help them form their pseudo government there decades before the Jews did terror attacks on the British to get them to give them land there.

The thing about that is that the bankers had already formed a cabal with the oil tycoons who had discovered oil in the Middle East. Their initial intentions were to use exploit the Jews by sending them into the cross fire to justify invasions if the oil was shut off. The Saudi Arabian monarchy was established at the same time with the help of the banksters and big oil, AKA Rockefeller and some other Europeans.

The police have a key to everyone's home basically. It's called a bump key.

If you haven't modified your locks to prevent bumping, you should. You merely have to remove the correct pins and use a hacksaw blade and a drill to shape them into security pins. It will provide you with more protection and some lock smiths won't even be able to open it without drilling the lock.

Not every lock is made for you to easily access the pins, however.

When Russiophobia reaches fever pitch, it will be turned on the AIPAC.

We should saturate the Left and Right with fears of foreign meddling no matter who the meddlers are.

On the Left we should spread fears of Russian meddling.

On the Right we should spread fears of Chinese and Arab meddling.

When we reach saturation, we will converge on the Israelis.

The Israelis will help us spread fear of Chinese, Arab, and Russian meddling, then the Chinese, Arabs, and Russians will help us spread fear of Israeli meddling.

This is how we play the game.

I think your definition is different than mine. To me a nuclear family is 1 father(male) and 1 mother(female) with any amount of offspring they produce. Children are raised by both parents equally to grow up, marry and reproduce. Tell me how this is a bad thing?

It limits the amount of information conveyed by grandparents about the Jew and speeds the resocialization process from media and school.

Jesus Christ. Nuclear families made up of a father and mother with their children, make up the clan, which make up the tribe, which make up nation.

The nuclear family propaganda was designed to be a stage in dismantling goyim organization. It started in the 1940's. The nuclear family looks nothing like the traditional White family structure.

Edit: title says opposite thing now. Disregard this.

Yes. But differing chelation drugs work differently.

Some can be taken periodically in large doses, others should be taken in small doses regularly. It depends on the kinetics of the chelator and it's accessibility to the brain. EDTA for instance can cause a temporary increase in brain lead levels since it cannot cross the blood brain barrier in BBB intact individuals while also not having a high enough affinity for lead to immediately carry it out of the body in urine. Calcium EDTA in conjunction with MSM periodically applied to the skin is an easy to procure treatment in the USA despite the FDA trying to limit access to chelators for goyim.

Feminism and all the theologies/ideologies like it are a direct result of the Marxist teaching of the education system. Take any "theybie" and put it in a standard nuclear family and it will grow up well adjusted and typical. Its the nurture that makes these degenerates not nature.

You realize that the nuclear family was a stage in dismantling the family right?

You can buy iodized salt, but any gains you get from using it are probably from the additional electrolytic salt.

Make sure it doesn't have aluminum in it.

Also, when actually tested, iodized salt has next to no iodine in it. Better to buy lugol's so you know you actually are getting iodine.

By the turn of the 20th century, "bromide" was widely understood in the context of a being a sedative or being sedate. It was then, in April 1906, that American humorist Gelett Burgess (1866-1951) published an essay in The Smart Set, a magazine edited by George Jean Nathan and H. L. Mencken, called "The Sulphitic Theory". It was here where Burgess is credited for coining the usage of bromide as a personification of a sedate, dull person who said boring things.

Bromine salts were discovered by the mid 19th century to have calming effects on the central nervous system. In 1857 it was first reported in a medical journal that potassium bromide could be used as an anti-epileptic drug.[5] This action derived from the sedative effects that were calming and tranquilizing but not sleep inducing. Its medicinal use grew so widespread in the latter half of that century that single hospitals might use as much as several tons in a year (the dose being a few grams per day per person).[6] American physician Silas Weir Mitchell, considered to be the father of neurology, also reported lithium bromide to be an anticonvulsant and hypnotic in 1870; and later advocated use of all the bromides to calm "general nervousness." [7] Sodium bromide had a narrower range of safety and efficacy but it was an ingredient in remedies such as Bromo-Seltzer that were popular for headaches and hangovers, in part due to the sedative effects.[8]

By the turn of the 20th century, "bromide" was widely understood in the context of a being a sedative or being sedate. It was then, in April 1906, that American humorist Gelett Burgess (1866-1951) published an essay in The Smart Set, a magazine edited by George Jean Nathan and H. L. A Holdomor of white South Africans is about the only thing that is possible(it makes sense since South Africa is going to lose its agricultural production and now depends heavily on food imports to meet its food needs). Blacks and colored people will take priority when it comes to getting food and welfare in South-Africa, while whites will be neglected.

Otherwise, a Holdomor in Europe will never happen anytime soon(Europe is much more anti-immigrant and only certain elites and media outlets support in en masse; our corporate factions and the US backed E.U. also supports it extensively), plus even the elites know that Europe needs to stay predominantly European(Europe is more European than North America demographically speaking) to keep Russia at bay in the long-term.

In North America we have not even reached the stage where our enemy has come out in public on a large-scale and promoted white genocide or ethnic cleansing as is the case in South Africa. African-Americans are a very weak constituency in North America and Hispanics are not really as anti-white as African-Americans are in fact. North America will never undergo anything in the short-term(talking 200 years) where whites are starved or removed from their property(the left knows it would trigger a massive revolution and they would in fact lose; the left actually wants to avoid a revolution even though they know it might empower them if they won; they are very scared of the potency and capacities of the far-right and know the ramifications if we get into power).

They are not willing to run that risk quite yet(they need to wait until America becomes less white demographically speaking(under 20% is the starting point and that won't happen for at least 100-150 years on the current pace). We have not reached the point of no return yet(but I suppose in 35-50 years we will know). We technically have a president in power that represents the last tide against leftists taking over America wholesale.

My main fear is that blue-collared whites are not as concerned with a wholesale takeover(so many voted for Obama), since they would be the first target of a leftist multi-cultural tyranny and have historically been the piñata of the left-wing(sort of does not make sense why they still vote Democrat in the droves; I think a lot of it has to do with Democrats/Northerners are responsible for their economic demise and they have been driven into hating the right because of this and because Democrats will provide them with welfare, pensions, and cheap goods from China.

The left knows it cannot just target the white middle-class, but what they will try to do is to desegregate white middle-class neighborhoods(forcibly), forcibly promote racial-mixing among the white middle-class, and create greater "racial equality" among the white middle-class, which will drive down white middle-classes salary through a combination of flooding the middle-class job market with unqualified workers and heavier taxes on the middle-class).

The other problem I have is that a lot of Trump's supporters are in fact moderate leftists who would back a leftist takeover and largely back Trump for his pro-business/corporate internationalism(will deter Trump's efforts to make America a self-sufficient economy again) and Trump basically won states like Florida because the Jews in Florida decided to vote for him(they knew Trump's line of thinking when it came to the economy would back the state of Israel and the "corporate Zionists in America."

I would say the genuine base of Trump constitutes about 40-44% of the population(most of his voting base to be honest), that Trump diehards are about 20% and are made up of some weird mix of evangelicals, big business advocates/local small business advocates, and members of the alt-right. All the rest are floaters and basically supported Trump because he was on the party ticket and because Hilary was running against him.

The left might even see this as strategic; they put Trump in power to justify radicalizing the left even beyond Hilary or making Hilary's views more mainstream and casting the illusion of right-wing takeover vis a vis nostalgia and the bad old days of Obama, which will in fact be short-lived.

The blue-collared voters might be alienated in the long-run, but this generation of people is dying off and moving to more multi-cultural areas in America, and the Jewish vote which is very powerful, despite its size, will shift more towards Hilary's side of the aisle when it is all said and done(Hilary would have backed Israel very heavily and might even started a war with Russia over Syria; at least Trump is considerably more even-handed than Hilary).

The natural outcome of this will be Latinization and the creation of a racial caste system in America which will be meant to please both the left and right(the negation of the Republicans and Democrats, which is what is already happening). This is highly undesirable and the middle-class will be the main target of this program(caste systems usually concern themselves with removing middle-class elements, because they see them as the primary movers of any potential revolution against an oppressive state).

We will not see whites starved out necessarily and I don't think this will happen with Latinization, but you will see desegregation of white communities, whites becoming poorer, and increase in racial-mixing. Latinization usually involves having the races co-exist. Even people like Chavez/Maduro have to pander to wealthier and whiter constituencies in their countries and the Castros basically embraced certain elements of Cuba's plantation society(even though there was a massive brain drain and whiter Cubans who were doctors, lawyers, and bankers had to flee the country).

I just expect a massive brain drain will occur in America(a lot of professional whites moving to Europe, some to East-Asia, and a few to the Southern cone of Latin America(this is still a little ways off but closer than some might think, because it will cascade quickly).

You are wrong in assuming Russia is not already under the control of the Jews.

The Jews want the West to fall into complete ruin while recentring the world's finance and military might in Israel. They're not trying to replace the West's population with Jews, they're trying to completely destroy the West. And they don't need Whites to be a minority to do it, they only need small White execution teams and a media blackout. They have everything they need right now, they're just assessing the risk of a retaliatory attack on Jews.

This is why the kikes suppress what really happened in history. The people need to be redpilled on the Kike Bolshevik Revolution and Holodomor and the Federal Reserve etc. The Kikes are responsible for so much death destruction in misery in the last 150 years. I drop Redpill bombs in comment sections on Yahoo and it does catch on.

The redpill we need is direct exposure to anti-White violence.

As long as they can manage the violence by shutting down hotspots and not reporting it on the news, Whites as a group will remain in slumber until they are gunned down in their homes.

About 3 years ago I field tested various things on promoting White identity and the most effective method was promoting traditional pre-Christian holidays, food, and customs. Interestingly, it was White women that had the most affinity for White identity when it was promoted in the form tradition.

So here are some good topics to invest in:

Celebrating White Holidays Traditionally: Samheil, Yuletide feast, etc.

Old White food, just grab a Polish or German cookbook and post recipes to your faceberg. Always mention that it's traditional European food.

Snippets of information about how White Europeans live like how Germans always have a pair of indoor shoes that they switch to when they enter the house, keeping the inside of the house much cleaner.

Semites are the people south of Phoenicia, no?

Phoenicians are semites too.

"Semites" was originally a term used to classify people by the letters they used. If you used a semitic lettering system, you were a semite. In the past before forensic anthropology, this was one of the only ways to classify ancient peoples. As a result of adopting the phoenician syllabary, which they added vowels to, the ancient Greeks were also semites.

Now the term semites has come to refer to people of genetically Arab origin, or a closely related ethnicity, or the original meaning of describing which lettering system one uses.

Semites are the people south of Phoenicia, no?

Phoenicians are semites too.

"Semites" was originally a term used to classify people by the letters they used. If you used a semitic lettering system, you were a semite. In the past before forensic anthropology, this was one of the only ways to classify ancient peoples. As a result of adopting the phoenician syllabary, which they added vowels to, the ancient Greeks were also semites.

Now the term semites has come to refer to people of genetically Arab origin, or a closely related ethnicity, or the original meaning of describing which lettering system one uses.

Looking at ancient Greek art, it's clear they were Whites and not Arabs. Modern day Greeks are Arab rape babies though. If they have black hair, they're not white. If they have a hooked nose, they're not white.

Ask people what they think about Dual citizenship and whether Dual citizens can be trusted in governmental offices.

It flies right past the irrational defenses implanted in them by the media and public education. A week later, they will start realizing how many dual citizens there are in the government and how they are all Jews. It won't be long before they realize the contradiction of a Jew with citizenship in any other country than Israel. And from there, they will start thinking about Nationalism. And you don't even have to mention Jews.

Goyim Nationalist? Sounds like a contradiction, or oxymoron. The idea of nationalism is by definition opposed to words like goyim.

Having a layer of ambiguity makes it harder to destroy a conversation defining term.

Think about "Anti-semite". It doesn't actually refer to the group "semitic" refers to, only Jews. And because it is such a confused term, it's hard for people to get a grasp on what it is they're talking or hearing about.

Making terms that are a little confusing only makes them more flexible and hard to defeat.

Ok. So?

A nigger is a subhuman with roughly an 80 or less IQ.

You're actually using that term "subhuman" wrong.

Subhumans are humans that have defective reasoning and harm their own self interests and that of their community. They don't necessarily have a retarded IQ. It's probably something physically wrong with the wiring in their brain.

When Christianity enslaved Europe for the Catholic church's profit, they breed these people en mass and killed the people with fully functional brains. So there are quite a lot of subhumans in White populations. We normally call them Leftists, but sometimes they are Republicans too.

What would be your deciding factor for job placement in essential services like sanitation (garbage, sewer) vs noble professions? Would you stratify professional eligibility by IQ? Would you automatically demote someone if another candidate applied for citizenship and was assessed at to points higher? What about high functioning autistic persons verses people with normal brain development but only having IQs of 139? What about children assessed at lower IQ potentials then their parents? Would you require abortions or demand that applicant families leave spouses and children behind? You haven't thought about any of this at all. You've asked what seems to be a simple question that could only (and has only) spiralled into a cultish slave state. Years ago, there was a Live Action Role Play (LARP) group dedicated to this question. I think They were called Mensa.

High IQ people can still do things like sanitation lol.

Children with IQ's that aren't high enough citizenship won't get citizenship if I was running the show. Instead they'd have partial citizenship and be sterilized. They can live out their life in comfort and adopt children.

You know that the USA used to sterilize low IQ individuals right? You can thank the Jew for fucking that up.

Reservations can grow basically whatever they want as I understand it.

They should plant cannabis and then ban alcohol. People will make the switch and the curse of alcohol on the Natives will end.

I'm from a family that can't handle alcohol either, once someone starts drinking at all there's a 50/50 chance they'll become an alcoholic. I've got family members now that can't stop or it will trigger seizures. Alcohol is the fucking devil.

We cannot really boycott Israel(the interesting thing is that Israeli Jews basically turned that part of the Middle-East into a highly developed place; they could probably do that elsewhere).

They are just so obsessed with advancing their foreign policy and ideologies that they sort of wreck destruction on some scale. We sort of encourage them and support them, so its not exclusively an Israeli problem. At times we are willing submissive to them, but people think the Israelis are not tactical and subtle about enacting their desires.

They only are more aggressive when the enemy poses a legitimate threat to their plans(Iran) and are too weak to resist in a legitimate fashion(Palestinians). Middle-Eastern economies know that if they allow to have any influence in their economy they will allow Israel to take control of other aspects of their socio-political and socio-cultural order. They approach America in the same way, although in some cases, such as Iran, they can't do business with us anyways because we don't want to or place sanctions on them.

The Middle-East, outside of Israel, usually has terrible economies and none of it really has to do with American oppression(with the amount of money we give to the Saudis you would think they have a highly developed society and economy but they do not).

Israel is a less of an economic menace to other Middle-Eastern states and more of a geopolitical menace(they have their hands into many things from behind the scenes because they are paranoid delusional).

Israel produces nothing but weapons and a few drugs stolen from the West. Oh, and spyware.

While I generally agree, 5G is necessary ASAP for national defense.

Quantum communication seems to be too far off for mass production. Our drones might be semi autonomous, but we need real time information about where attacks are occurring to send more in.

I feel like the USA is behind the curve on this because they've invested too much money in now defunct military equipment. Also, everything that's invented is immediately acquired by China and Israel. We're hurting in a bad way. The good people in our government need to step in now if we're going to have any military defense at all.

An army isn't going to come into the USA, instead it will be swarms of cheap drones laden with compact explosives targeting civilian and government buildings. China's already got missiles that can by pass our interception systems thanks to the Israelis making our cyber infrastructure insecure.

We are so fucked. It's unimaginable. It's treason.

As for radiation concerned, get some anti-rad paint.

The internet of things and 5G definitely have problems associated with them, not least of all unsafe radiation and privacy concerns.

But, 5G isn't just a massive illegal spying on Americans operation, it's also going to be part of our national defense system of drones that will be rolling out sooner or later.

See, drone warfare is a thing now. A Chinese or Israeli or Arab person could bring a boat to our coastline and release a couple thousand AI drones laden with explosives targeting people's houses, infrastructure, etc.. So, as technology evolves, we'll need a system of relaying information rapidly and reliably to fend off an attack.

If the USA doesn't secure its cyber infrastructure and eliminate backdoors into their systems, it's a lost cause and you should think about finding a country that isn't run by slackjawed politicians sabotaging their own country. If the USA doesn't secure its cyber infrastructure, I promise it will be the end of the country. There's no point in trying if they can't even manage that. It will be game over for us.

Eliminating the backdoors and protecting the cyber system needs to be priority number 1 and if they don't do it now, there won't be enough time for the systems to be replaced.

I am pretty certain that we are redpilling the JIDF operatives that are here. [@zyklon_b](#)

JIDF themselves are too entrenched. Maybe they have been redpilled and see how Israel will be offered as a sacrificial lamb, but Israel has strict laws limiting free speech and they dare not say anything lest a group of censor goons beat them up in the streets.

In Israel, it's not even legal to publish something without first getting approval from the military censor. Israel is ripe for exploitation by the foreign bankers calling the shots, supposedly for them.

There is no way forward for them. Either they will be attacked by China after the bankers launch nukes or something else, be poisoned eternally by depleted uranium dust that surround their little country and permeates the lands they are told they will receive, or they will be made into the new threat for the military industrial complex to extort money from the Western and Arab world.

There is hardly much difference between the Jews and the African warlords that regularly get gunned down by their own guards or beaten to death by mobs armed by their own financiers the moment they step out of line. Their supposed leaders always have their finger on the trigger of public opinion to genocide them if they cease to be subservient. But they're lost to the greater picture and instead feel that the bankers support is a blessing from god.

It's kind of sad.

Is a complicit pawn any less guilty for being a pawn?

But is that the way on here? You call for violence and every one thinks that you are a skill...

Out of curiosity, when did I actually call for violence?

Maybe I did and I just don't remember?

I think in my case, it doesn't really matter because I've already done a lot to protect the USA. The Israelis are just another pack of rats to tease out into the open.

I don't think anyone really knows what I'm doing, only that it has net positive outcomes. Autonomous protectors are in short supply and government agencies have their hands tied by fly by night politicians. There is no doubt in my mind that what I'm doing is right and will benefit the USA in the long run. I wear many masks and play a lot of games, but the end of each campaign my records are scrubbed, other countries back off, and I live a quiet life.

Honestly, I would like to move onto another group trying to sabotage the USA, but other countries throw so much money at their advocates that I have a hard time competing.

But I will continue playing a decoy to lure them out. I will continue attracting attention from the law to lead them to the nest, so the professionals don't have to play their hand.

I've already left my mark on the world, cost other nations millions in wasted operations. A decade ago I wouldn't have tried to take on the Israelis, but competing interests have made this an opportune time. It actually grieves me deeply that the Jews refused to be legitimate allies and instead, stricken by fear from the narratives of the people exploiting them as a private spy army, decided to sabotage us.

De re amissd irreparabili ne dokas.

Constitutionally protected free speech btw.

The only thing backing up the claim that calls to violence are illegal in the USA is a precedence that would be overturned by anyone with the money to hire a competent lawyer or the connections to put the ZOG on notice.

If calls to violence were illegal, we'd be arresting anyone that advocated war or led an armed military division, or even instructed police on how to handle lethal adversaries.

Oh know! What a disaster. Some bullish claim saying that Jews will fuck up banking because they are Jews. Jews! Jews! Jews!. if I got a dollar every time I saw some one blaming the Jews on here Ill be able to buy 1000 Bitcoins at \$20000 a pop. Like come on you really think banking is a disaster because of Jewish people. Your such a retard. Like fuck man.

Oh wait. I have an idea! Why don't we have rules and regulations or design banking to not be so vulnerable to control by some group or have alternatives to banking! That way anyone can be a banker and be in the financial business! I know what an brilliant idea huh.

And besides I know that Jewish people are not gathering in some board room trying to figure out how to control the world. So go on. Live your fucking fantasy and tell yourself what you want to believe but in reality no one cares, no one believes you and everyone else knows your wrong. Yes the banking system is messed up in many ways but it has nothing to do with Judaism.

My advice for you is to get out of your mommy's basement and talk to people. (No Lefties) but people. And become a better version of yourself.

Assuming all goes well, we'll want for nothing very soon and we can choose to leave this planet entirely and erase any sign we were here. Maybe the remaining people will evolve, maybe they won't. At that point Earth might as well be a nature reserve.

Even assuming an abundance of advanced technology that has been hidden from the general public, I still can't accept as realistic the possibility of colonizing the solar system (let alone interstellar space) without the Earth as a Homeland and safe port. And EVEN IF it were possible, I would still be unwilling to surrender Mother Terra to the shitskins. Purge the orcs, long live the Homeworld!

You're assuming the colonizing planets will come before learning how to live self sufficiently in space itself.

Whites don't necessarily need to live on planets.

No. He is completely correct. Studying the New Testament in the Koine Greek makes this abundantly clear. The entire Jew/Gentile paradigm is false. The only ones still claiming "Jesus was a jew" are jews and cucked Christians who don't know any better. Which category do you fall into?

Jews are the Synagoge of Satan, the literal offspring and descendants of the Edomites and Canaanites - a cursed and bastardized people who have always been at odds with Christians.

I'm White, not Middle Eastern. I have nothing to do with that foreign garbage religion and its desert god.

Goddamn it, you get it! Fucking one of you fucking gets it! Yeah they both became rich bastards, but Gates at least started a normal human. Truth is Microsoft success was due to Bill's father and his fathers Law firm, where as Apple was Jobs being evil. Heck Jobs even exploited the Woz. The Woz!?!?! Can you imagine a universe where Gates just happened to be friends with Woz instead of Jobs?

Bill Gates comes from one of the best and most Nationally protective families in the USA.

His wife however is a complete anti-White.

Why Is It Necessary To Have Trials For the Deportation Of Non-Citizens? Sounds Like A Jewish Sabotage Tactic To Me. by [butters4eva](#) in politics

You have to have them because you have to have a finding that someone is here illegally. You don't want an ICE agent determining they don't like someone and just deporting them as an illegal when they are a citizen, for example. The real problem is that there are a ton of other reasons they may let them stay besides them actually being here legally. I don't care if you want asylum or not, should have went to an embassy and filled out the paperwork before you got here. I don't care if your country is war torn, should have done things legally. I don't care that you didn't realize your visa expired, should take care of that shit. That is where they make it harder and harder to deport. The question should be "Is this person here legally?". If the answer is no then they go. Period.

EDIT: As pointed out below, you can legally request asylum at the border. That's fine too. But waiting until you are caught here and requesting it should not be allowed.

Are any Mexicans really citizens considering the Constitution does not actually say someone born here gets citizenship. It says that they get citizenship if they are born here and both parents are already US citizens. Virtually all Mexicans in the USA are therefore non-Citizens.

As it was written, even children with only 1 US citizenship parent must go through the legal immigration process and may be denied.

I disagree.

Let's assume we actually manage to expel/disenfranchise jews and non-whites from the West. Let's assume that, afterwards, there are no further global conflicts, or subversive cultural attacks to deal with (not possible, but bear with me for this thought experiment). What are left with? We're left with at least a century long recovery period where White Nations have to rebuild our countries' infrastructure, economies, cultures, and populations.

Think about it. White Nations have been,under assault for at least a century, and it's ludicrous to think it wouldn't take just as long to recover. But, let's further assume that this recovery happens. What does the world look like then? You have rebuilt and prosperous Western Nations (and possibly Russia), but you still have overpopulated and impoverished countries around the world squatting on tons of resources they are unable to effectively utilize.

Looking at such a future, why wouldn't the US expand the concept of Manifest Destiny to encompass all of central and South America? Why shouldn't the european powers recolonize Africa? Why shouldn't we recolonize India? We will need those resources if we ever have any real intentions of colonizing space. Its the indigenous peoples we have no need of.

All just speculation, I know. I really doubt the reconstruction period of any surviving White Nations will go so smoothly, and there's no way China and Russia allow such a period to go by without acting on their own imperialistic ambitions. Still, my point remains: rebuild our Homelands FIRST, but afterwards we shouldn't shy away from expansionism. It may well be necessary someday.

Depending on how we reboot the country, there may not be any Leftists left. Civil war has a tendency to make people re-evaluate their positions.

As the White Leftists, and there are fewer and fewer of these every day, get confronted by immediate threats to their person, they will come to our side because we are the only side they can join.

As for the other nations and resources, our need for copper, metal, etc. to produce any given technology is reduced every day. Our landfills are chalk full of metals that can be reused. And we are about to go into space if the Jews do not collapse or paralyze our nations any further.

White inventors are sitting on technology because they as a group have been more or less banned from Jewish occupied universities and Jewish investment. I myself am sitting on tech that I don't feel like giving our country as it is. Implementing a positive eugenics program in the West will create a new wealth of geniuses that will give us even more tech. Assuming all goes well, we'll want for nothing very soon and we can choose to leave this planet entirely and erase any sign we were here. Maybe the remaining people will evolve, maybe they won't. At that point Earth might as well be a nature reserve.

Europeans don't owe other races diddly squat. Our ancestors have given so much in the form of science, and medicine, and agriculture. It's not our problem that Mexico has some sort of ridiculous population density problem. It's time for whites to take a cue from the elves and recede away. Let's let them sort it out themselves, lol.

It's in our best interest to free everyone but the Jews of the Jews.

As in Europe, they will use other country's armies and finances to harm us and get back in.

Good thing the stop of illegals is currently underway, huh? That'll definitely help the numbers.

There's enough white people left that 20% of them could race-mix, and *still* have enough whites left over to de-mud-blood the kids that pop out in the next few generations afterwards.

What you're describing is a worst case scenerio since half Whites virtually always identify as non-White.

They're not an enemy or a friend. They do not have the brain power to be anything but extremely biddable primates. We can preserve them in Africa like gorillas, and even root out the Chinese and the jews if you wish to gain ownership of the minerals and resources found there but they will never be our equals unless they are very selectively bred.

Black Nationalists have such a eugenics program in mind.

As for their resources, we're moving into a new age of technology that won't require them and the USA has significant reserves of virtually everything.

White nationalists, at least of my strain, don't have a world domination imperative. We can peacefully co-exist with other nations and peoples if they are willing, just not in our own countries. The way I see it, even if the world became entirely White our own populations would still develop factions, so we need to learn how to create a sustainable peace and sovereignty between various peoples.

If youve prepared properly it shouldnt be too much of an issue should it?

Sending 75 million Mexicans to an already overpopulated Mexico of about 135 million would weaken Mexico greatly.

Considering all the hostility Mexico has forced us to deal with and how many times we have had to deport Mexicans (1954 1.5 million) we owe them as much.

Well... look at the black on black murder rate. They will end up killing themselves. Black people have poorer heart health than whites. I mean, their whole sort of "life culture" has high rates of attrition whether it be through murder, poor daily decisions that down the road lead to things like heart disease, diabetes, overdoses... and if they're not fertile then they are not replacing themselves when they die.

And ultimately they would be sterile, so what does it matter? As soon as the last one is dead we can wipe them from the record and pretend like we never wasted so much time and money and so many lives on the homo africanus.

I don't see Black Americans as an enemy, I see them as a people who got caught up in a Jewish trap, much like us. First brought as slaves of the Jewish plantation owners, sold by Jewish slavers, and later exploited by Jews as a subsistence wage workforce and pariah to distract the Whites.

Even in their homeland of Africa, Jews and Arabs still prevent them from sovereignty. At first they did this through forcing Whites to colonialize their countries to pay back illegitimate debts to Jewish banks, and later they did it through bribing warlords and IMF loans.

If Black Americans help us free the West of Jewish occupation, I will do everything I can to help them free Africa from Jews, Arabs, and Chinese.

My strategy is to craft the language and subjects to appeal to either the targeted demographic or the majority. Like in all things, you need to know who you're talking to and what information is relevant to them.

It's the Jews using the Swastika propaganda to false flag us.

America was predominantly German during WW2 and no one complained about German immigration because Germans were never a problem. There is no reason why Americans would use a Swastika instead of an American flag.

The use of swastikas was exclusive to Jewish false flaggers. Even skin heads shave their head so that they can't be identified by their grotesque Jewish locks.

Well, the larger the group, the more soft communist the 'democracy' ... I'm opposed. I see it as a downgrade from monarchy, which may not be perfect, but has advantages over democracy. A monarch with hereditary rights at least sees the realm as his property and is incentivized to increase its value, as opposed to a democratic ruler's 'temporary caretaker' or 'renter' incentive to loot the realm during his tenure.

I don't doubt the value of northern Europeans and in fact I think the West picked up a lot of its ideals from the Dutch trading empire. When it comes to great thinkers though we do have a disproportionate representation from the ancient Greeks, and that's what I'm referring to, our philosophic projection of the world, i.e. the lens through which we look at it, the notion of the existence of self, and everything else being outside the self, the rationalistic evaluation of nature and scientific determination of knowledge, I don't credit only the Greeks but that's the lineage.

Monarchies can be usurped also through intermarriage. Just look at the British monarchy touting it's descendency from Muhammed.

I think a monarchy which by law must marry into its own population is better than a democracy with open borders and no IQ voting prerequisites.

Many independent, non Jewish players have invested a great deal in mining. The system is much easier to compromise on the developer side using the government model: censorship and mind control.

Don't use that as cash, we the experts who know better than you declare it's unsustainable and bad for the environment. Since we know what is best, we will protect you. Wait for our solution to this problem.

Any commie on the planet who has invested nothing in the network can simply hop on board with the narrative. This is happening.

I don't think Satoshi created for the Jews. And, we know the Jews themselves don't really create. The Ashkenazi aptitude is verbal not visual-spatial. It's existence may have been predicted, but I think the system is simply being compromised like anything else.

But compromised it is.

I would rather see countries close their banking to foreign currencies entirely and negotiate strictly the movement of goods for like goods or continue to use the Federal Reserve fiat currency to create a trading disparity whereby foreigners exchange goods for currency which rapidly devalues.

We can argue that but I was talking about the way we look at the world descended from the ancient Greeks.

Whether or not the Greeks actually contibuted so much to the Western world isn't entirely certain. More likely the Northern people's architecture was made from wood and deteriorated and their writings were erased by the Christians which took aim at anything written in runes.

Democracy is an idea older than the Greeks. The Northern Europeans even assembled into vast conferences called "Things" to debate waging war, trade, etc.. But all this has been largely erased by the Christians and Jews. The oldest known writing is not from Babylon or Ur or Egypt, rather it's on wood and in runes.

We don't even have to ship them away. I think it would be worth the cost to give those people free money equivalent to lower middle class in exchange for sterilization, and if they can make a referral of another nonwhite they get some sort of bonus. It would ultimately be cheaper in the long run. Yeah. just like, completely halt immigration, the ones that are here can stay and be sterilized, and the half-breeds. . . sterilize them too. I don't know at what point a nonwhite becomes white enough though. One-drop rule? If he we can stop the jew from whispering in their ears they'll go for it. We all know that they don't think more than a week into the future, so they can't possibly comprehend the consequences of what we could do for ourselves in sterilizing them.

If we allow non-Whites to stay, we will be stuck caring for them in old age. They would continue to bleed our country of resources and cause problems for as long as they live.

You say to send my kids, but my kids most likely wont be hired, and even if they are they will be passed over for promotions in favor of the jews. Religious Nepotism in jewry is real

I don't think they will face that kind of discrimination in Jew free White banks.

Starting a bank is not that difficult. The Jews create laws to try to limit this, but it's still quite possible. In the future they might try to disconnect banks they don't control from SWIFT, but that is all the more reason to create as many White owned banks as possible now.

Ok, true, although we could talk about usury. But I think the core aspect of Western culture which is used against us is our ability to be self critical. Just not an issue for Islam or Judaism. Westerners derive this from their philosophic heritage, when not under threat it can be our greatest asset. But, it's presently our fatal flaw which is being exploited. To us it looks like the West must 'toughen up' or 'buckle down' but what that means in practice is setting aside self-criticism.

You think Christianity is our heritage?

The true answer to almost all these sociological questions is simple - we need a filter.

Previously it was the hardship and reward of colonizing the west that grew us generations of strong independent men. Once we lost a frontier, people began to stagnate.

We need some kind of function in society for high value individuals to take risks and reap the rewards, as well as a ruthless environment where fucking up can leave you as nothing more than a gutted wagon that someone else takes as warning.

Space might be this frontier. So might ocean colonization, or a large war. Ever notice how military generally tends to output more competent folks than usual? It's the risk, the stress, whatever you want to call it - I like the word frontier.

I agree that we need some sort of selection process, be it circumstantial or eugenics to prevent the degeneration of our population.

As it is today, the real winners of Anglo-Saxon expansion were the Jews who gained access to a larger region to parasitize. We have to evolve as a people to stop this parasitism before it becomes fatal.

This would be a good time to list the safe captcha alternatives.

Things that use simple matching of bot illegible characters, using images of uniform data size, are safe if the answer is sent in a uniform data size.

You could narrow down the possible users using the time the packets were sent, but the amount of internet traffic passing through the ISPs would probably make that impossible. It is possible that the captcha servers could delay the loading of the captcha and use a statistically unlikely image data size, but in order for that data to be relevant they would have to have real time information on the entire internet to ensure their traffic was not sent at the precise time as other information of the same size. It would also be hindered possibly by VPNs that add superfluous data, but I'm not sure that's a thing yet.

My understanding of how the internet works is actually pretty small. I was only made aware of Google's captcha tracking system by an insider who explained it roughly.

There is one bot I'm aware of, and he's rather pleasant. If you ask the operator to anonymize you, I know he at least will for the automated lists. And possibly for all posts? The bot doesn't archive comments.

[@SearchVoat](#)

This site is crawled by numerous bots. If it wasn't, nothing of voat would appear on any search engine.

Bitcoin (BTC) has been usurped and the protocol modified, it is now rate limited and being turned into banking 2.0 on layer 2.

Bitcoin Cash (BCH) is the original project.

The original protocol was flawed as well.

The creator of bitcoin would have realized that his system would have been compromised easily with the production of faster processors or bulk computing through something like Amazon cloud. Meaning, he deliberately did not future proof it by allowing individuals with the seed to an account to also create a secondary changable encrypted password.

If Satoshi had created bitcoin with users being able to create a changable password, this kind of bulk seed collection would have been rendered invalid.

I can only deduce that Satoshi was creating a global currency for the Jews.

Jewish banks have been using encrypted electronic ledgers before Bitcoin, Satoshi just took that basic technology and made it into a sort of torrent system paired with a flaccid anti-(((banking))) white paper. Just another Jewish trick to make a the goy adopt a global central bank.

While I don't object to your proposal, I believe that over the last couple thousand years the Jews were banished dozens of times from just about every place in Europe by Christian and non Christian monarchs for other reasons as well, not the least of which being ritual child sacrifice.

And yet they returned each time by using the finance systems of the other European countries and (((Christianity's))) provision against usury against the country which deported them.

If you want money out of the hands of the Jews, start buying bitcoin.

Bitcoin is insecure. I can download the blockchain and collect the seeds of every single account using Amazon cloud.

Because bitcoin is insecure, it will have to be centralized at a later date. Meaning, the banks will take control of it. Look a few steps ahead, bitcoin is a way to centralize a global currency so the Jews can control the entire world's economy.

I thought three parentheses meant "jew." Are you saying Christians are Jews? Aren't most Christians offended that Pharisee Jews conspired with Romans to kill the Son of God?

Are you serious? They banned Whites from handling their own finances and imported Jews to every part of Europe to do banking, something Jews already did in the Middle East. Jews then flip this around and say that Whites discriminated against them and forced them to do banking. It's a fucking shit show. Christianis are fucking Jews too.

Islam recognizes Jesus the same way Jews do. They claim him as a prophet. Nothing more and nothing less. Jews claim that Christians don't understand their original texts. Muslims claim Jewish/Christian texts have become so corrupted man that the only legitimate remaining word of God is in the Quran. Which is especially ironic since there has never been a more corrupted religion and religious texts in the history of man than Islam.

So no. Jews have more in common with Muslims than Christians.

Jews recognize Jesus as a prophet? You mean Messianic Jews? They're Christians.

I would add a couple gallons of rubbing alcohol, wide spectrum antibiotics (fish meds work), long needle nose pliers to remove bullets, red laser pen (AA or AAA batteries) for cavities in teeth, canning salt for making saline, and I would plant medicinal plants in your bug out location.

Honeysuckle tea can prevent death by sepsis and should be given at the same time as antibiotics if the infection is major.

Toothpaste doesn't do anything positive, just stock pile tooth brushes and floss.

i dont think we should be calling people 'racist' we should be trying to normalise and take away the stigma from the word 'racist' instead, make it so people dont have to defend themselves when called 'racist'

i understand using the enemy's weapons against themselves, but i think there is more to gain by making 'racist' more acceptable towards 'patriot'

You'd be better off with the star of david and sticking the word TERRORIST on it. It's a word that already DEEPLY associated with israel to begin with, and will be easier to make it stick too.

When the word racist loses its effect, we will switch to supremacist.

As long as that white intelligensia is purged of all Marxists, and maybe even those with a history of bias towards science, politics, economics, philosophy and psychology, where studies and discoveries that don't fit the prevailing liberal narrative were systemically suppressed.

At this point we need multiple rounds of house cleaning in our institutions and structures.
The more obvious shit first, of course. Just to draw (((that line))) in the sand once and for all.

I am skeptical that Marx was actually a Jew. He doesn't look like a Jew and his plans could have just as easily fucked up Jewish supremacy.

It's spreading a idea with a image. Just have to make it good so it catches on. "Smart and white? Baby alright!" or some shit, then add a funny picture. Or little comics. The point is getting your point across, maybe be more subtle than my idea.

I wish I was better at making memes.

As I understand it, you just have to pump out memes until one clicks with popular consciousness and goes viral.

What is "anti black" rhetoric? What's wrong with hating niggers? They're a plague in literally every way.

Black Nationalists want to help us because we have mutual interests, deZOGifying the West.

Sub-Saharan Africa will not be free until the Western world is free, because Jews use the West to strong arm Africans into allowing (((their))) companies in to exploit and steal resources using slave labor.

If the West is not controlled by Jews, the warlords of Africa will lose their funding and access to weaponry. Then, and only then, can Black Nationalists retake their countries of origin.

Black Nationalism and White Nationalism are brothers under Goyim Nationalism.

This is inline also within both our interests of halting the spread of China into Africa, because China is bent on genociding all but Han Chinese.

Black Nationalists, at least the ones I know, see Whites as harmless farmers unwillingly coerced into serving the Jews.

A Christian is any person who believes that Jesus Died for the sins of the world and rose again after 3 days.

Romans 10:9 that if thou shalt confess with thy mouth the Lord Jesus, and shalt believe in thine heart that God hath raised him from the dead, thou shalt be saved

A Semite is:

A member of a group of Semitic-speaking peoples of the Near East and northern Africa, including the Arabs, Arameans, Babylonians, Carthaginians, Ethiopians, Hebrews, and Phoenicians. n. A Jew. n. Bible A descendant of Shem.

That's a modern classification. In previous classifications semites included even ancient Greeks that reinvented their alphabet using phoenician letters and adding their own vowel characters.

I'm more into the ideas not the source. I pieced it all together and came across various sources in affirmation. Voat has been key in educating me as I didn't know shit a year and a half ago.

What we witnessing is high level social engineering. The west is the strongest so it needs the heaviest dose (according to the globalists). The de-stabilization is to weaken all countries then when they are distracted, weakened, and desperate...(via migration - increased crime, conflicting cultures)...then to offer them a centralizing solution into a one world govt. (the fake alien invasion is supposed to be the final card according to von Braun, Steven Greer, Reagan etc...a common alien threat to "unite" against space terrorists...once again trading fear for compliance).

Civil war is by design, it will only help the globalists. WW3 will also help the globalists (Georgia guidestones, I'm sure your familiar with them). The globalists want as much chaos as possible.

I'm sure your familiar with Yuri bezmenov, YouTube vids with his info on subversion, destabilization, and collapse of a society are priceless.

The Jews are rethinking a one world government since they lost control of the UN so rapidly lol.

Well, you should know when you can record and when you cannot.

And when you can then do. Recordings have kept me out of prison. How? Simple: people lie and so do groups of people. My word v 5 others? Not going to win the day. My recording v. 5 others? Wins the day.

If you suspect a crime is being committed you can record regardless of the location or permission of other parties.

Seems like asking for more trouble. But I'm no expert.

These kinds of discriminatory prosecutions only target people who don't have the money to defend themselves in court, aka poor.

If you are in such a situation, what do you have to lose?

Whites are already discriminated against in every aspect of their lives.

We live in a "Christian nation". This whole agenda goes back into secret societies, one of the key being Freemasons (which are in alignment with Zionist Jews and fake Jews who are actually luciferian). It is the goal of the Freemason to destroy Christianity/Christians and eventually take out all religions, depopulate the planet, and remaining humans to be ruled under luciferianism (there is an argument here to bring in the transhumanism agenda as the new race, as transhumanism is 100% Satanic, the deconstruction of gods natural creation...different topic though but related). Eventually they will come for all people of all races and religions, white people/western culture/Christians are the biggest obstacle. If they can deal with that it's a straight shot from there.

There are a few ways to hit this topic but let's take this route. Are you familiar with Albert pike?

He was a Freemason who in 1870 prophecized three world wars and got 1/2 correct. You can read about the third below.

<http://www.threeworldwars.com/albert-pike2.htm>

The Freemason's were not originally controlled by the ZOG.

Keep in mind the counter-semitic writings of the founding fathers.

I am familiar with Albert Pike and have read his self admitted plagiarized "Morals and Dogma".

I'm not so sure blacks will want to be sent back. Look how many Mexicans come to the US. Look how many African and Middle Eastern migrants go to Europe. Look how much lower the average IQs of these groups are. We can clear out the corruption in their governments and a generation later a new corrupt dictator will be sitting there fucking them over just as badly because they're too dumb to prevent it. They will always want to move to countries full of people who know how to run things better than they do. I think the only answer is a new colonialism, and that will require whites to breed twice as fast as we breed now so we can send whites to other countries to make things good enough there to keep their people from wanting to come here. Might as well lighten up the rest of the world.

By and large Whites are too dumb to prevent it from happening to us. It's our governments that are occupied by the ZOG. They control other nations through our military and economic force. We unleashed this on the world, they at least wouldn't have allowed another ethnic group to seize control so easily.

True, they are vastly outnumbered.

They like to slow down the opposition with fragmented direction. We could fragment theirs many multiples over by focusing on random concepts and backing them with their own jargon.

That's all the left is. Jargon.

Post retaking the West, we obviously won't enshrine the jargon and instead we'll distill the essence.

Blacks will want to be repatriated to Africa after they help us clear out the Israelis occupying our government and we help them clear out the groups occupying their governments.

Black Nationalists and White Nationalists can walk this path together.

If the Jews want to leave to Israel, that's fine by me. But there must be a total withdrawal of Israelis from US politics and US companies. Even the Jews can take the high-road and avoid being erased by China if they play their cards right.

It's on nearly every kind of packaged food though - not just convenience/junk foods. It's on coffee, dairy cream, aluminum foil, etc.
I think the best course is to let people know so that they can pressure food companies not to charge them the extra kosher tax on their food.

China is not a current threat. The current threats are within our own nation. If, once we achieve an ethnostate, we need to take a stand against China, we can assess the situation at that time. Making a nation for my people and my children is much more important now.

You are very wrong to think China is not a current threat. They are copying the Jewish playbook to a T. Fortunately, this poses a direct threat to the Jews as well.

You can't boycott Israeli(Jewish) companies. At least in certain states, where they have a law against doing so.

If you're poor just don't tell anyone your reasoning for it and discuss it as something other people do while not disclosing or advocating it. People will still get the message.

If you're rich or an untouchable due to connections, then tell everyone and let them try, you'll be able to overturn the law.

I think that some US goys may have forgotten that it is illegal to encourage the boycott of (((Israel))).

"In the United States, the Export Administration Act discourages, and in some circumstances, prohibits U.S. companies and individuals from furthering or supporting the boycott of Israel. The Department of Commerce's Bureau of Industry and Security (BIS) is responsible for penalties are imposed for each "knowing" violation with fines of up to \$50,000 or five times the value of the exports involved, whichever is greater, and imprisonment of up to five years."

They will never try to apply such a law against anyone with money or influence because it would be struck down as a violation of Free Speech.

What we need is an entire website that labels all Jew owned businesses. This is completely within our first amendment rights, and this is how it should be dealt with.

Btw, the Talmud also teaches them to practice Usury, and to never practice it on another Jew, only Goyim.

No. It's far better to hit them one at a time in retrospect.

When you present people with too much information too fast, they become overwhelmed. And we should hit major corporations one at a time in order for goyim owned businesses to replace them, otherwise consumers will have no options and just give up.

Guys, be careful about publicly talking about boycotting Israel. Many states have passed laws that prevent people that boycott Israel from receiving fundings. Some people couldn't get help after the hurricane in Houston. So be clever, don't put it in writing or have plausible deniability.

Those laws will never be used to prosecute anyone with money or influence enough to take it to the supreme court. It's the same with the calls for violence. Calls for violence are clearly a protected right.

Excellent. That's great.

I was considering hooking up Patrick Little with a Black Nationalist security detail. I'm personally involved in too much to broker such an agreement without contaminating Little's campaign. Get high definition photos and save them for later.

If anyone causes trouble we'll need high definition photos of them to dox and reveal their Jewishness or connection to Jewish organizations.

Key people in the real White Nationalist movement should not participate since it's almost certainly going to be another Richard Spencer shit show.

Carry signs with a star of david crossed out with big bold letters, "Racist", and you'll give 40 million Jews an aneurism. Make sure these signs are in every possible photo. Saturate the crowd so that they will have to take low angled shots to avoid photographing the signs. We'll be taking photos of everyone with a camera and make a nice exposé on how they have deliberately tried to spin the narrative.

Black Nationalists are supported by soy leftists who also rail against cultural appropriation. A white with dreads is going to be screamed at by both leftists and black nationalists. One of those festival sluts in a feather headdress is going to be yelled at by leftists and American Indian nationalists. There are black nationalists trying to educate their people on who is calling the shots in the west, but they still lump everyone who is not black in one group pitted against them. I group leftists with black nationalists in this post because they both act similarly.

All the better. Their being supported by Leftists is strategically valuable in the fight against Jewish occupation and exploitation of nations.

Sub-Saharan Black Sovereignty is in the interest of the USA to halt the spread of China. Why would we not support them? I think you'll find that Black Nationalists are stalwart allies to White Nationalists in time.

No, he's smart. He's the best kind of counter-semite because he's familiar with the Jewish apparatus. I've been working for years trying to make more people like him. What makes you equate Black Nationalists with Leftists?

Black Nationalists, at least the ones I know, see Jewish occupation of the West as the cause of continued exploitation of Sub-Saharan Africa. Black Nationalism sees ridding the West of Jewish influence as the first step in winning true sovereignty for Black African nations.

Even colonialism they see as something demanded of Whites in order to pay off usury debt to Jews.

Find me a Black Nationalists and I will show you a Counter-Semite.

Best thing you can do is put some bacon bits in the kosher aisle.

Jews legitimately don't care about bacon for the most part.

American Judaism in particular underwent a kind of reformation, they now eat pork and shrimp. They look for kosher symbols to avoid buying from goy.

It is. I've been infiltrating Jewish communities to study how the Elite Jews maintain control for over a decade and not a single one has ever caught on while using my Jewish identity. Even if they discover my counter-semitic activities, false flagging is so common they still think I'm one of them.

Gustavo, that is a myth perpetuated by the Jewish media.

That Middle and Lower Class White Nationalists get their lives ruined for advocating for themselves is a complete fiction. **The fact is most of us have absolutely nothing to lose and the Jewish media does not want to elevate any of us so that we can speak on our own behalf.**

We are already discriminated against in every facet of our lives and they can do little to nothing to make that in the slightest bit worse, except psychologically harass us into believing we will face repercussions.

I am an infiltrator of the Jews and I know their actual game plans. When they craft these stories of White Nationalists having their lives destroyed, they actually are using all Jewish characters in order to ensure they do not give fame to someone that will speak for White Nationalists.

In the same way that they do not want valid White Nationalists to form their own organizations and leadership, they do not want the victims of their attack to be genuine White Nationalists either.

I have probed the minds of Jews that have formed and controlled "White Nationalist" organizations, I have been there to see step by step as they entrap foolish Whites who are not privy to the signs of a Jewish false flagger.

Listen to me and speak openly. You have nothing to lose and everything to gain.

Collectively women are simply a corrosive force. This has been known throughout the ages. That is why they need to be kept in check.

I wouldn't say that.

I think women have been tricked by Jews that wish to divide and conquer into attacking and destroying their very own families and the most fulfilling act that a human do, producing life and safeguarding their genetic lineage.

Older feminists, who didn't have children or who gave up parenting to the (((television))), will often acknowledge directly how they were robbed by (((popular sentiment))) deriding motherhood.

One of the biggest mistakes the Nazis made was targeting gay men.

If you fix the society, they will cease to see having sex with men as an identity. Being free from this false concept, many of them will still form happy families.

Legal and illegal. That's just a way to objectify the 2nd amendment

As far as I am concerned rocket launchers, gatlin guns, bombs, and nukes are all fair game if I can get my hands on them.

When asked what I am doing with these items I would simply reply " the 2nd amendment guarantees our right to keep and bare arms and that is irrefutable."

I generally agree.

This is a tactic to discourage discussion.

If you have sources all providing different information, it is difficult to start any sort of debate about it because any given premises on which the debate is started can be immediately thrown into question.

During the Loss Vegas mass shooting for instance, hotel owners tried to limit liability by getting the police to state contradictory details on which a lawsuit might be based. No matter what argument a lawsuit takes, the facts will be thrown into question due to police corruption.

Just boycott Loss Vegas, it's run by scum.

Never mind the millions upon millions of Americans who also have caches of guns and bullets.

There is a difference between legal registered weaponry and illegal weaponry.

Many of these caches also contain bomb making materials in vast quantities in property zones which do not allow for the storage of such hazardous materials.

There is also a matter of intent.

Snark aside, they are going after anyone who has any knowledge of any Muslim terrorist organizations, past or present. It may be funded by the United Arab Emirates going through the leadership of the Center for American Progress.

The Chinese and Arabs are eclipsing Jewish influence in Western nations. They've learned from the Jews precisely how to influence our governments with money.

For the time being, this is a net positive. The Jews want them out and they want the Jews out. The more they fight, the better it is for us. Countries like China and Saudi Arabia would be far better off with Whites calling the shots, rather than Jews. We have to play this by ear.

What you need to do is set up profession guilds that advocate on your behalf, like the Real Estate agents have. It might cost you 20 dollars a year and that can be enough to pay a lobbyist to make rounds in your state legislature.

This can be a double edged sword if the market is saturated with professionals of one type and want to keep others out.

Bernie is a Fucking Jew that voted to give US money to Israel.

What else is there to say?

Anyone who gives money to the Jews is a fucking traitor and their descendants will be tortured to death on live tv for their ancestor's crimes against the West and all the other regions the Jews have exploited and enslaved.

Pass new laws and build up public rejection of foreign influence then WHAM!!! Fuck those Dual Shitizens right in the ass.

Those were agents of Mossad

There's no doubt that Mossad or ex-Mossad, the technicalities hardly matter, instruct these groups ultimately.

Most of these "people" that do sophisticated operations in the USA are not permanent residents from the information we have gathered. Usually they are individuals that have recently finished their obligatory service in the Israeli military (IDF) whom the government paid to attend university in the USA in order to conduct operations like these. It matters little. When the tides eventually change, we force Israel into signing and extradition treaty and they will hang. I only wish they weren't just pawns of the Israeli government so we could deprive the Jews of key individuals.

Niggers have been following the Jew lead for decades. Lately it was the homos and transvestites. Now it's going to be the beaners. The Jews show the way, and those groups too stupid to come up with the con on their own imitate them.

That's why we're going to show them the way too.

We are going to purge Africa of Jewish and Chinese exploiters and pave the way for repatriation of Black nationalists into a Jew free Africa where they can finally have self determination. From the perspective of Black intellectuals, the only way for Africa to get sovereignty is to first purge the West of Jewish influence, otherwise the Jews will simply send the West's armies or dogs of war into Africa to sabotage them again.

Last I checked Tommy Sotomayor had been silenced but one of his videos was something to the effect of "don't look to Blacks as allies against Jews." It wasn't that he was opposed to it - far from it. But he saw up close the foibles we see in our own communities of the indolent, money-grubbing, short-sighted clowns who can't even comprehend the bigger picture. There are Blacks and Whites who know about the Jew problem but they aren't the majority in either case, sad to say.

The majority don't matter.

The Blacks are mobilizing on the Jews. Maybe later I will post some literature from their own movement to counter the Jewish influence in the Western world and Africa.

How much more can we take until some hero snaps and shoots some bankers?

They already have, the news hasn't covered it to avoid copy cats.

Dozens of bankers have been thrown off roofs in the past 20 years. They usually get them in the parking garages and then throw them off the building into the street.

I'm not the only one. You've got an increasing number of political double agents on your side thanks to voat.

The Democratic party is going White Nationalist or it will become a no-Whites party and be decimated.

One of my side projects is to foster Black Nationalism and a "back to Africa" movement that focuses on Jewish destruction of traditional Black societies through arming drug lords and the Jewish slave trade. Africa is the largest continent on Earth, full of resources that belong to Africans, not Jews or Chinese. I will arm them with the knowledge and will to return to Africa to clear out the Jews, but first they have to help us in the (((belly of the beast))) or African countries can never become sovereign ethnostates.

Boomers and even Millenials use illegal immigration for cheap labor.

If the people didnt hire them, they wouldnt be here. And i understand not everyone does it but yeah a lot of them do.

I drove by some nowhere town and in a house they had setup a little taco shack in the middle of nowhere. Mexicans in mexico do this too...they live in shitty communities and sell shitty shit from their shitty houses.

That's not true. Mexicans come here whenever they get sick for free medical treatment, housing, and food.

What "race wars" have occurred in history that wasnt started by jews to divide others you cuck?

Hundreds of wars in the history of China.

Plenty of wars in Africa between different tribal nations.

Even right now the Burmese are having a racewar against the Muslim Bangladeshis that tried to annex part of Burma into Bangladesh.

It's far better if we turn the unified goyim against the Jews, if that's possible. Then we repatriate all the non-White goy to their origin country so they can finish the job and free their people from the Jews too.

Except that the boomers that can't retire keep planting this idea that millenials are bad so they can keep their jobs.

You're ignorant of history.

Race war are par for the course as far as humanity is concerned.

Diversity has been tried several times and it has always turned into racewar. Because that's what it is, it's a pre-empt to a racewar that will instigate a seizure of new territory for the winning ethnicity.

I'm not talking about the US military. I'm talking about defending your people in any capacity. Even a cripple in a wheel chair can shoot a gun.

I'm saying, if you don't have the instinct to protect your people and act on it, then you are unfit to breed.

Since Christian popes enslaved us, using their appointed kings to manage their state sized plantations, they have bred us into a more and more docile population with dysgenic policies favoring docile slaves and killing free thinkers. We have to undo this by testing our people. A defective man that will not fight should not breed.

Listen if 80 percent of niggers weren't shit people I wouldn't care, but I'm looking out for my kind, and the biggest predator besides the jew is niggers. Now if we have socialism it just isn't going to work unless the whole country is one race. While even than their will probably still be shit wrong with it.

Also I could give a shit about the palesteins I just dont care for jews the enemy of my enemy is my friend. With that being said I dont mind if the palesteins have Israel as long as they never leave and dont want any federal aid.

Blacks will be repatriated to Sub Saharan Africa. What they do is not our problem or our business.

White Nationalists have no intention of ruling over other ethnicities, Blacks will have full autonomy in their own lands.

We don't have any obligation to make it work for them, or force them to adopt it. They will have to sink or swim on their own.

Idiot.

Who the fuck cares about Israel, the average right-winger like me just want my privilege back. I have more respect for racist supremacist rabbi than some virtue signaling SJW libtard.

Fuck human rights, it is steaming pile of shit invented by globalists to subjugate useful idiots. Many human deserve to be treated worse than a piece of dirt.

I like ISIS more than any liberal. I want foreign culture to keep their status quo, these barbarians should keep doing their thing like cannibalism and FGM, just keep them away outside of the first world. Fuck globalism. "Western progress" must be reverted back at all cost, even if human sacrifice is necessary. Who the fuck cares about Palestinians? If I pay 1% less in taxes if I allow IDF soldier to shoot random Palestinian then I'm good.

Cruel and unusual punishment is necessary and beneficial for humanity. Fuck democracy, fuck freedom of speech, and fuck civil liberty for anyone who have leftist world view, death should be their only rights. Conservative authoritarian government is the answer, our goal is to make leftist libtards suffer as much as possible.

Just because you hate Israel doesn't mean jack shit. Homosexuality is a choice and all lgbtqiaap should be send straight to correction camps. Leftist values will never be compatible with those who want good old times back.

Obvious anti-White false flagging. I didn't bother reading it.

There's nothing wrong with ethno-nationalism and prioritizing the people of a country over foreigners.

I have no idea what "privilege" you're talking about. The privilege to lose your pension to a thieving Jew? The privilege to support an illegal immigrant to have 8 kids while you can't afford 1? The privilege to die fighting a war for a Jewish homeland while the Jews give away yours to foreigners?

Because the Jew, by his very nature is a wanderer, a nomad. He has no soil of his own. Rootless. Like a gypsy. He envies what the others have, he envies how people can have attachment to their land and their people both at once.

People see Israel and they use this as an argument against the "Jews don't have soil" premise, but in reality Israel as a whole is no more Jewish than America as a whole is Christian.

That's not true. European Jews had Khazaria. Soviet Jews have their own Jewish state near China. Ethiopian Jews have Ethiopia.

Jews simply claim that Goyim is a word that means "people." Which AFAIK is technically accurate. This may not be as foolproof as it might have seemed in your head. Good try, though.

I'm sure that would work if there weren't explanatory texts covering just about every term in Hebrew in National archives.

Am I missing something here? Bullets can't wait to get out of my gun. Either by being fired or by being ejected by the charging handle. Ejected seriously... they fly..

Are you talking about a jam? I don't expect to ever have one because my gun is clean and I don't use bullshit ammo.

Federal !!

I'm saying that it's standard practice by private military forces being used by the USA in the Middle East to remove bullets after shooting someone so it cannot be proven who did it.

We should have delayed the Normandy Invasion by a Year or two to allow Hitler time to have gassed 12 Million of the hooknose'd SOB's instead of the alleged figure of Six.

He didn't gas anyone. That was propaganda. Originally they said the death camps were in Germany, then they changed their story entirely and said Poland because it was Soviet Territory where no one could inspect the supposed sites. None of the places tested that supposedly had millions of people's ashes contained human remains because it's totally fictional. Germans were only deporting Jews. It seems to me they might as well have done it since they were going to be blame, starve, and kill 9-15 German Civilians in cold blood anyway.

You were doing this with pseudo jew friends?

Yes.

We originally started as a group of Far Leftists perturbed by the plight of the Palestinians and the double standards of US support for Israel. The more we learned the more we found in common with the Far Right until even the concept of diversity was realized to be a violation of human rights and genocide. We started wanting to save the Palestinians, but it looks like we're going to save ourselves in the process.

The bum rush I speak of would happen after you spray them. Hence the being organized and such.

You need to start thinking about pressure containers that can hold a couple hundred psi and discharge without you holding the trigger. That'll be the ticket.

You can put more in a water gun than just pepper spray solution.

There are plenty of drugs that, in the event of a civil war, could be deployed in water guns. Bullet proof armor does nothing against a liquid and a machete can take care of the rest. But this is all speculation. If there is a hot war though, we'll win.

"Goyim Nationalist" is like saying "Nigger Nationalist". It has its uses to refer to ourselves as they do in an ironic or satire context, but have some self respect.

Actually, its a very clever way to fuck up Jewish narratives of anti-semitism since the material itself "Goyim Nationalism" references Jewish Supremacy.

Jews can't scream about racist "Goyim Nationalists" since the term itself draws attention to Jewish racism.

The "jew in the staff" is tough. You can never be 100% for sure. And some jobs are task oriented and don't allow for influence on policy.

Never voting for a jew goes without saying.

There is a pilot program collecting DNA samples from individuals to test for Jewish DNA markers. A Chinese company is helping us produce the enzymes necessary to run the tests independant of existing DNA testing companies in the USA.

The plan is to create a cross check system for White Nationalist organizations to prevent Jewish infiltration. We take a small DNA sample either on request or covertly, then perform the tests. If we find a Jew in an organization, we'll inform all other White Nationalist organizations which can demand samples to test with non-compliance resulting in excommunication of the compromised organization.

If the USA bans this kind of genetic identification, we'll just send samples overseas.

Politico ran an article on August 5, 2016 titled [How to Hack an Election in 7 Minutes](#). There is a wealth of information on voting machines in the article, but disregard their assumption that Russia had hacked the DNC database, since that has been debunked by several researchers.

The Left is set to become the White Nationalist Democrat Party.

The Russian narrative is a build up to passing laws to deal with Jewish-Israeli meddling in our elections. The Jews are being told it's to stop the Chinese and the Russians from meddling in order to safeguard Jewish influence. Jews are so fucking stupid. Once Whites realize this, it's game over.

Meh. If they were smart and organized, they'd just bum rush you. You'll get one, maybe two, but so many bodies would take you down in short order.

Still though. It'd be funny to carry to one of those antifa rallies.

Thats why you disable them first. You spray the bum rush, then you hack them down individually.

There are psychoactive and paralytic substances that can be added instead, but we'll wait for a hot war before exchanging recipes.

The two party system is headed toward a common end. Time to learn how to grow food and make ammo and stuff. Voat got me to start a vegetable garden and I'll be reloading ammo soon.

They will not allow a food shortage for more than a small segment of the population at a time even if they have to pay out of pocket to feed the nation, because it would result in the loss of their heads.

A food shortage would work in our favor.

Any suggested white nationalist parties we can join?

Yes. The Republicans and the Democrats. Just don't donate to or aid the party itself, only to individual White Nationalist candidates.

Right now we have White Nationalists running overtly in California and they could use support being promoted.

We also need White Nationalists watching the ballot counting and demanding inspections for the illegal Israeli owned trade secret voting machines currently in use.

We also need people on the Left and the Right challenging the validity of the vote counting because it is without question rigged.

Can also just fight for peaceful freedom. Basically aiming for the same thing.

History has shown us that peace cannot be maintained as far as the European Jews are concerned. Their religion is exploitation and subversion; they cannot persist according to their own rules without parasitism and maliciousness towards non-Jews.

Arab Jews are harmless and should be left alone so long as that is the case.

In United states of Israel we have one last chance for saving our country peacefully. Not sure how we can organize. I don't trust any current offerings as there have jewish influences in them. With jews you loose!

We don't have a chance of saving it peacefully, but depending on how things go the violence can be minimal.

Jews usually surrender and then work out a deal where they remain in the Western world while only losing the assets they looted with financial tricks. History has shown us that these sort of compromises are far more deadly for us in the long run though. Jews sent into the Arab world rarely come back, we should opt for that.

We will be able to organize and go to war with the Middle Easterners and their evil devotees without hinderance.

I think this is underestimating the difficulty of organizing disparate groups with interests that aren't necessarily overlapping at any given point in time. Top down systems still have quite an advantage in aligning people's interests. Do you disagree?

Christianity also basically eliminated tribalism (with a glaring exception or two) in Europe, so that Europeans had one fewer point of division among them. I think that was also pretty important.

Whites in Europe used to be united under one religion.

Top down systems are easily hijacked with bribes, blackmail, and assassination. Whites will unify when they are brutally awoken by a common threat, and one is coming. We aren't going to wake most people up with pamphlets and memes, they will wake up to local overt violence against Whites.

The ideal outcome for the Democratic party is that it will either be co-opted or completely dominated by a White Nationalist agenda or it will become an explicitly anti-White party that foments a hot civil war.

As long as we do not allow democrats to remain neutral, the outcome will be in our favor. We have to keep infiltrating the dems and redpilling their leaders, we will either take over or force them to reject all Whites.

White nationalism is no longer negotiable, it is a bipartisan issue and we will make this 100% clear to Americans in the up coming elections.

That's not an actual time period. It's literally Jew propaganda. Those who push the idea are anti-European and ignore the many advances made in physical science, military engineering, civil engineering, masonry, metallurgy, and any facet of philosophy or economics you'd like to discuss.

It makes you appear foolish and easily brainwashed. I doubt there is much hope for someone like you who's been lied to their whole life, but since you're here try to learn something.

When Catholics enslaved Europeans under Charlemagne they confiscated all the books and plunged Europe into illiteracy and extreme poverty marked by constant warfare between minor lords.

Jews weren't allowed into Free Masonry until after the French Revolution on account that they were not White.

That's what the historically revisionist Marxist academics tell you these days in order to propagate the slander that is historical European racism

The fact that Wikipedia says this should be indication enough that our history has been compromised:
https://en.wikipedia.org/wiki/Judeo-Masonic_conspiracy_theory

I'm inclined to believe that the Catholic church was the only fighter against Jewry all the way until the 20th century, where Jewish Marxists and Freemasons infiltrated the Catholic Vatican and changed the entire religion.

That's a heck of a conspiracy theory. But don't you think they could have hired traitor whites to do it with less personal risk? Or too much risk of those whites selling them out?

It's not a conspiracy theory, in my youth I befriended a former Jewish False Flagger who ran a Neo-Nazi operation for the ADL.

These operations are conducted out of the ADL. The way it works is the ADL grooms young Jews for this and either pushes them into existing groups or creates them from scratch. All these young Jews then immediately become FBI informants receiving about \$1,400 a week, though it can be more, and report Whites that get involved with them. Many of these informant Jews also run drug dealing operations with the FBI granting them immunity. Our government is bankrolling the whole thing for Israel.

Things are changing though as Whites infiltrate Jewish groups like the Jewish Defense League and other terrorist Jewish groups and similarly get bankrolled by the FBI.

Embed yourself in a Jewish community, find some dirt, then make contact with the FBI. It's an income booster, you get limited legal immunity, and it's tax free money.

The Jew was kicked out by the religious kings of Europe and prospered in the Atheist kingdoms like Fredrick the Great who was a sniveling atheist just like you, was friends with Voltaire (the Jew who started the atheist/jew led French Revolution), and Fredrick also invited the Jews into German and Polish lands to begin with, plus he gave the Rothschild's Empire it's start and took loans from them to slaughter Christians. There's just no way for you to deny that all of European problems fall on the feet of your fellow Atheists and Jews (whichever you are).

Have you ever read the Bible and how pro-Jewish and cucked it is?

Instead of throwing out a bunch of words that make you feel good about yourself, go do some research. You'll end up embarrassed at yourself but if you've got at least half of a functional brain it will be worth it. The bullshit you're shoveling out is garbage.

Oh and no, I did not put mercury in the water. Hysteria and stupidity are indistinguishable. You should slow down and listen to yourself, then maybe you can tease out which one of those platforms you're standing on.

I didn't read your post.

I think that Free Masonry started out with good ideas, but was infiltrated by the Jews long before the French Revolution, sometime during the Middle Ages probably.

The French Revolution was definitely a proto-Marxist endeavor, as they attempted to rewrite history and change the calendar to 10 day weeks, likely in order to brainwash people into working 9 days and only resting for 1.

You're wrong. Jews weren't allowed into Free Masonry until after the French Revolution on account that they were not White.

The only reason Free Masonry has Hebrew themes is to keep the Catholic church from killing them all as heretics and to keep Christian terrorists from destroying it from the inside.

Nepotism among Christians is alive and well. Some young lad who joined my congregation would have several business owners in the pews next to him every week, who'd be more than happy to give him a great job he could train for along the way.

It's not a coincidence that atheists and Jews want to sever this lifeline, rip out the heart of the community. There is no better thing to help you prosper in a community than to go to church and know all the good people.

Those communities would better serve our people if they were Hofs instead of (((Churches))).

Christianity enslaved Europe and imported Jews to handle European finances. White genocide today is a direct result of Christians forcing Jews into every corner of Europe and killing independent thinking Whites that rejected slavery under popes and pope appointed kings.

One of the most important things that needs to happen, is changing the existing stereotype about whites, that if you attack a white person, they are too pussy to fight back. That needs to change.

I've killed several "people" in self defense.

When gangs see a built White man, they try to intimidate him. Walk around shirtless and you're a gang magnet. You don't need an automatic rifle to take down a crowd of people.

1 to the gut for everyone, then 2 shots to the kidneys for everyone. Proximity attackers, then runners, then the remaining. Never let someone get away when dealing with gang bangers because they're running to get more people. If you see someone reaching for their pockets, they take top priority.

Go to a gun range and git gud.

For every 1 of ours, 10 of theirs? 50 of theirs? 100? We need to make it too expensive.

I think you would enjoy reading about the phenomenon of "price tag" attacks by Jews against Palestinians in Israel.

For every Jew killed, they kill many Palestinian civilians in retaliatory attacks.

It's a pretty effective deterrent.

Some guy came door to door campaigning in my neighborhood for some local position. His name was something like Goldstein or whatever. I didn't even bother talking to him but my wife did. She said he seemed like a really nice guy. I mentioned his last name and said no fucking way. She probably voted for him buy I didn't on principle.

I don't vote non-White period. I check all the candidates for Jewry as best I can.

There are different kinds of people.

Some just agree with the majority, they can be surrounded by people with a new belief and they will change.

Some people think independently, but their skepticism places an unrealistic burden of proof on any idea which is overtly promoted. These people's views can be changed by using indirect, gradual, and non-overt persuasion like articles about anti-White attacks, anti-White discrimination, or being placed in a situation where they are harassed for being White.

Some people are deeply brainwashed and have built their identity around a view, like vegans. These people can be changed by gradually introducing a new understanding of what it means to be a SJW. If your wife is a SJW, expose her to information about the plight of the Palestinians and she will grow to loathe and doubt all things Jewish as a part of her very identity.

Do you know faggots and lesbians in real life? There's something fucked up about them that goes way deeper than just a "fetish" or "lifestyle choice". There's clearly some biological fuckup.

I've fucked men when I was younger. Now I'm married with kids.

It was just a passing fetish. It's mutual masturbation with a touch of domination since fucking a man is dominance affirming.

In Spain only the men that take it are even considered gay. It's assumed that every man is willing to fuck another man, but few are willing to be fucked.

By voting for an anti-immigration Jew you might temporarily be halting White genocide, but they will remain in power and begin another day!

If you vote for the anti-immigration Jew and he wins, that just might give you enough time to put together your own candidate for next time.

The reason Jews control their opposition is to keep the opposition from taking action and it's very effective.

Most Whites will hold out hope that the Jews running on anti-immigration positions will keep their word. Hope is a powerful psychological weapon to paralyze your opponents. Without Jews leading the anti-immigration parties, by no exaggeration, Whites would slaughter all foreigners in the streets.

Cops are still on the darkie team though. The People of Light still have no means of force. Always remember, they use our empathy against us. That sad feeling you feel when you see an injured child. That remorse you feel thinking about that time you lied. That distaste you feel when you see gore videos of niggers in Africa burning eachother alive with tires... They feel NONE of those things. When they see an injured child they will think... Better him than me. The remorse about the lie is that it did not result in a free resource as intended. The gore videos in Africa? They see something humorous that they wish they could have seen in person.

I know this sounds wild and amazing but it is true. You watch blacks in an all black environment where they are not being monitored by whites and you will see that I am right.

Its OK to be WHITE.

They really aren't by and large.

If civil war is declared, our people can take out anti-White law enforcement point blank in the first moments.

"White nationalism" is a uniquely American view. In Europe there are a bunch of different white nations and they all hate each other.

I don't like many Italians, Spanish, Portuguese, and most Eastern Europeans because they aren't actually White, they're significantly Arab.

DNA testing and the reformation of European nations around ethnic lines will clear up a lot of disputes from the past that were misattributions of (((banker))) activities to Whites.

As long as Jews retain power positions in society, they can control the dialog about Jewish crimes.

The idea that people in positions of power in a society can control the dialog didn't work out so well for the pre-1912 Russian nobility.

The Communists moved in and published their own papers gradually turning the people against the monarchy.

I'm not advocating for either the Romanovs or the Jewish Communists, I'm saying that (((they))) don't control the dialog. They control the TV, but they don't control the internet and they absolutely don't control the ground.

Psychopaths are simple people in a sense. You can bribe or threaten and they will do exactly what you want because they don't have a sense of collectivism or common good.

The reason so many politicians are pedophiles is because they're so easy to blackmail into doing just about anything. Whose pulling the strings? It usually starts out being the military industrial complex or the CIA niggers, but it degrades into being anyone that has dirt on them.

Blackmail and bribes are the currency of the modern political market.

Redpilling the people tasked with keeping track of White Nationalists is a pretty good goal isn't it?

Maybe we'll get 1 guy in the ADL who found out he's only 1% semitic and 99% White to flip sides and stay embedded in the organization for us.

Maybe we'll get some people from three letter agencies.

Maybe we'll get transnational intelligence workers.

Maybe we'll get policy makers and think tankers.

Free Masonry started out as a White Nationalist movement to free Whites from slavery under the Catholic Church, their pope appointed kings, and Jewish banking cartels.

Look at the anti-Jewish writings of the founding fathers of the USA, almost all Free Masons. They refused non-White immigration and often advocated for nothing less than the total extermination of Jews.

Free Masonry was taken over by the Jews, but that is not how it started.

The Catholic Church placed Jews in control of all of Europe's finances and only responded to Muslim invasions because it threatened their own cushy existence. The Catholic Church didn't care that Arabs remained in Spain, Italy, Turkey, etc. and look at what has resulted.

The French Revolution and the American Revolution were both good since the Monarchies of Europe were all Catholic appointed plantation managers pushing Jews into every nation of Europe.

I agree. All non-whites deserve to get the axe.

The world needs only 500 Million people, oh and look at that, there's 500 Million white people in the world.

I wish I was an autistic virologist so I could create a deadly virus that target all non-white humans and killed them within 72 hours, long enough to get it to spread to every airport in the world.

I'm not advocating all non-Whites be exterminated.

Peoples that don't infringe on our lands or try to harm us should be left to their own devices. And there are plenty of peoples like that. Tibetans and Hindus (not Muslims that illegally immigrated into India) come to mind as they haven't tried to invade or conquer other ethnic groups for hundreds of years.

72 hours? That's not how an efficient viral weapon spreads. The longer the incubation period, the better.

Okay then, you've got answers. How about the book of Enoch? Why was that omitted from the new testament? Must have been that fiery wheel in the sky displaying images of different types of animals. Fuck knows if the world knew our blood came from royal extraterrestrial DNA they couldn't spin this obey, consume or die theme that has a lot of people are still brainwashed on. How about a fresh thought? Say you're 18 years of age and you have never heard of religion at all. I show you a copy of the bible. Would you really jump on that train without question? Some mortal putting two of EVERY animal in the world on a boat? Some jackass parting an entire sea? Some other shithead changing the chemical makeup of water? You would drop it like a NYC hooker on new years drops her pants. The only reason you buy it is because it was forced on you at a young age before you were capable of comprehending critical thought. Religion is repulsive and offensive to be honest. No Gods, NO MASTERS.

I'm White, I'm not interested in the fables of Middle Eastern Schizophrenics and retards.

why don't you take 5 minutes to do some actual research instead of living in your imagination. People like you have an unreal concept of the space on earth.

I've traveled enough and have the spatial logic to have a good conception of the size of the Earth.

People like you have an unreal conception of the size of the Earth. You're the type to poison the ocean with mercury with the belief that it is so so big that you could never cause a impactful level of contamination. But here we are with mercury poisoned fish.

We live on a finite planet and humanity is growing exponentially. It doesn't matter what you calculate to be the maximum capacity of the planet, because, assuming technology keeps up, we will surpass it if unchecked. We're already at 8 billion and that number was incomprehensibly great just 100 years ago. If unchecked, we can number in the trillions within 100 years.

Massive amounts of social pressure. Having it in TV shows, commercials, ads, just a constant barrage of "race mixing is cool" and "if you aren't ok with race mixing, you're a bigot" pounding on the heads of the people all day, every day. Same thing with trannies, gays, and so on. People start to think they're abnormal for wanting someone of their own race. Once that happens, they'll probably end up in an unfulfilling relationship with someone of another race and thing they're some kind of monster for being unhappy with it.

It's insidious but can you really expect anything less from the jews?

Homosexuality isn't a sexual orientation or an identity, it's just a harmless fetish like being aroused by shoes or BDSM.

Are you talking about the United States? Sure sounds like it. We aren't even 'overpopulated' , yet require massive external resources and borrowed money from the future to continue on our path of destruction.

What are you talking about?

The USA produces more food than it consumes by far. Who do you think is feeding Africa's 1 billion over current capacity population?

And we don't require external resources, the USA has everything in huge supply. We buy goods from other countries to create diplomatic leverage over them. We buy something we don't really need, it leaves US raw materials for a rainy day, and the people we make wealthy overseas influence their governments in our favor. It's just a way of laundering influence money for the most part.

Overpopulation is a myth. it's mismanagement through and through.

You could fit the entire population of the world into Africa and feed them all without ever having to import a thing. Africa has more resources than the USA and Canada combined. Britain has never had resources of much note.

The best resource is creativity and initiative. That's what shitholes do not have and neither do globalists.

First, you need to explain why paganism lost out to Christianity. Then you need to explain how paganism can be made more resilient so it won't lose out to another ideology. Then your idea will deserve to be taken seriously.

The Old order lost because of the time it took to conduct "Things" to wage pan-European war against invaders and Catholic slavers. The Catholic's top down power structure made it much faster to declare war and mobilize.

There is no latency to conducting "Things" now that we have internet, phones, etc.. We will be able to organize and go to war with the Middle Easterners and their evil devotees without hinderance.

Paganism is not what we are talking about here. The Old Gods are OUR Gods. There are a million pagan gods in Africa alone that have nothing to do with us.

The USA doesn't need oil, that whole premise of energy security was just a Jewish scam to get land for Israel that used the profits to pay off politicians who "invested" in oil shares in the conquered regions like Bush and Cheney are doing in Syria right now.

Sorry but fuck that. The asshats who rewrote the bible didn't even have enough respect for the readers to make it more than "interpret it as you see fit". No gods, no masters.

White Religion/Culture doesn't establish masters for free men. Tribes and Clans assemble in "Things" to make decisions that require a large cooperative effort like waging war against invaders. In the past "Things" caused vulnerability for our people because of traveling time needed to make decisions, today they can be conducted instantly and war can be wagged rapidly.

Come for the guns I don't have, well good luck guessing what I do have

Complacency and death are not such different things.

No strategic enemy takes actions that will only bolster their rivals in a future conflict. The Jews have rode out centuries of hostility and attempted genocide of Whites by making Whites over confident and pretending to not be a threat.

Guns are almost not important anymore, not on a large scale anyway. A sword or machete is just about as good at close range surrounded by the enemy that doesn't want to accidentally shoot their own. And if dealing with mobs consisting of only the enemy, claymores are more efficient and discourage them from assembling again. Strategically unimportant buildings can be hit with explosive drones. Strategically important buildings can usually be smoked out. Bunkers can be melted open and flooded.

We have to just let the Christcucks die out. They live in fantasy land and while they're committing self-righteous suicide like their Jew on a stick, we will be building ourselves up, ready to use their dying religion as fertilizer.

We need their genetic contributions to maintain a healthy gene pool and many worthy people, that would otherwise be great assets, are trapped in communities were they cannot speak out. They are cultural hostages and we can easily free them by running operations countering Christian terrorism against critics.

Remove the enforcers and spread the truth, that Christianity is a slave doctrine spread around the world to enslave populations, and the growing rejection of Middle Easternism will become the new norm and irreversible without force.

We were converted to Christianity by force by Charlemagne and beaten into line thereafter by terrorist Catholic pets. Christianity is not natural for our people.

Once at a Pagan Pride festival, I heard a guy say, "I am not Middle Eastern, why should I worship a Middle Eastern god?" Jews, Christians and Arabs are Abrahamic monotheism. They are based on the same scriptures and from an outsider, look like the same religion. Neopaganism is evolving by refining the best things about all religions. It is a more personal relationship with the divine, and less preachy authoritarianism.

That sounds like something I would say.

Christianity really is a religion of defeat. All that blessed be the meek stuff. We need a religion that puts protecting your people as a virtue. The jews have that, all their holidays are basically celebrations of how they jewed over some group of people or another and killed them off.

We have that too. It's etched into the body of all Whites.

Look at White holidays like Christmas, Halloween, and Easter. Thousands of years of slavery under pope appointed kings and the image of Odin's Hunt and Yule pierce through as Santa Claus flying through the sky.

When you don't have terrorists attacking people for the opinions and views that come naturally, the Old Religion and the White Gods recreate themselves, seemingly from scratch.

The Old Gods are our gods and we are their people. The Old Religion, sacrificing criminals and invaders, is self preservation of our people codified and passed down through culture.

Christian's have killed more Jews than you ever will. Go look up Martin Luther. Christianity has been subverted (just like everything), check out the Schofield bible that's where it started. God literally commands you to go out and kill Caananites (jews). They're scared of an old school revival. If you ever run into a brainwashed Christian, show them revelations 2:9.

Martin Luther played a part in chipping away at the Christian slave complex.

The Catholic church looted and enslaved Europe, using local terrorist Christians to force everyone else to feign belief in the desert god of the Jews.

It's pointless to talk about returning to pagan gods (which gods? who gets to pick them?) because it isn't going to happen. It's a waste of time and energy to pretend that it is ever going to happen. The only chance the West has is a return to a revitalized, revamped form of Christianity, the religion of white Europeans.

Judaism, which was entirely focused on sacrifices made to the ark and the covenant, was completely destroyed by Nebuchadnezzar, but was reinvented to become the scourge that it is today.

The Old Religion never died out and has been practiced for more than 1000 years of occupation by Judaites in secret. We do not have a full picture of the Old Religion as it was practiced in every region of Europe, but we don't need it. Surely you wouldn't say Christianity is invalid because 99% of Christian variants have died out, so why should the Old Religion be held to such a double standard.

The Old Religion is has never ceased to be practiced. Even Judaic slaves in the Western world celebrate our holidays. Easter, Yule, Halloween, you think that's some sort of accident? It would be easier to drain Whites of their blood entirely than to erase the religion that is ingrained in our bodies. The most you can do is suppress it.

OK. White don't control the "printing press" like jews do. So that's not going to work. This only ends with ropes and guns. And that isn't going to happen until a lot of us get hungry. This is why they have the tiger by the tail with their ponzy schemes and welfare state.

Challenging them through soft power will cause them to crack down with hard power.

Whether they concede defeat or start a race war, as long as it happens soon we will win. The worst case scenerio is that they capitulate with temporary restrictions on immigration and we let them hold power so they can start again in 50 years.

Blood exchange like this has been going on in the elite circles for some time.

I first noticed it among the gay elite, who offered to pay young gays for blood which apparently made them more youthful.

Apparently, young blood transfusion effects was first noticed more than 50 years ago from sewing young animals and old animals together cardiovascularly and there has been an underground market since.

When I was quite a bit younger, I was asked to be a donor for a rich old guy. I don't recall how much they said they would pay, or if they did. I recall them wanting to do blood tests before hand. I think they might have said they would pay for me to live near him. That they would ask me in particular now seems fishy. At the time, they probably didn't know what exactly caused the effects and so they selected the most attractive and healthy as a general rule.

The whole scheme probably accelerated the HIV epidemic as youthful gays infected the old elite gays, who then infected gay prostitutes.

When I think back on how many important people I've been intimate with, it makes me wish I was redpilled sooner.

All just pipe dreams.

The intelligence community has already been taken over. If a field agent gets out of line he is eliminated. Back in the late 70s/early 80s there was a purge of the old guard and the CIA and other groups assassinated their own guys. The Jews own the intelligence community.

Also, people like the Rothschilds are inaccessible to the public.

The way to put pressure on the Jewish power structure would be to send assassins for the guys at the top, but once they find out where it's coming from they'll bring the entire weight of the system down on you.

I've been thinking of a solution to this for years and can't really come to one aside from a scorched earth policy. The most we could accomplish is sending them into hiding though.

They are a mafia. You have to get another mafia to take them out. Only option.

The way to bring these guys down is to

You're wrong about the intelligence communities being owned by the Jews.

When you give a group so much power, they gradually become independent agents with their own interests. The Intelligence communities of the West are like that, not least of all the Russian one which overtly replaced its own (((government))).

If there is a profit motive, even if the community is controlled from the top down by Jews, the top man may still betray the Jews and purge his own ranks of them in order to fulfill the request of his pay master.

The infatuation with the Rothschilds is mostly just a notoriety scheme financed by the Rothschilds. The Rothschilds are mostly non-notable and uninfluential today. Anyone could tell as much by their occasional desperate pleas for joint ventures and funding.

What you're describing isn't a working model. That's all I'm saying.

" Let's shake down the Jews for their assets"

Lmao, that'd be like trying to go after the Mafia or something. Good luck. They control the system. It'd be like someone saying they were gonna start going after government owned assets. Delusion.

The current governments installed by the bankers are motivated by blackmail, bribes, and threats to their personal safety.

There's enough dirt on all of them, all you need is a few people in the intelligence communities.

Bribes are just money or favors, campaign donations and foundation donations are all legal, nothing stopping us there.

Their safety is only assured if they are cordial with the winning side. The ZOG might control things today, but what about tomorrow, the next decade, or the next century? We won't forget their crimes against us and new governments will hold descendants of traitors responsible for their ancestor's crimes. If not their descendants, than their friend's descendants. How will they operate if they have no allies? The punishments for crimes are determined by what is necessary to deter unwanted behavior, not by some sense of cosmic individual judgement of souls. There is nothing morally wrong with driving on the wrong side of the road, but you'll get thrown in jail and fined if you do because it's a matter of what is needed to deter. Their descendants may have committed no treason against us, but they will hang, drown, bleed, etc. to deter the like of their predecessors. It is the crookedness of these multigenerational traitorous crime families that drives us to find ever newer and harsher deterrents.

You do realize that modern methods of sequencing can match you to other people you are related to right?

Just because you use another name does not mean that you will not be added to a group/list/etc.

You can write fake names/addresses/etc all you want. If you send YOUR DNA to them.. they have it forever and will match it (or apparently even fake it.. because fuck science?) to whatever they chose.

Until you can reliably do this yourself..trust no one.

Also, the fine print allows them to use any part of your DNA for basically anything. They can patent parts of your genome and use to make whatever they want. Dont trust any of these companies.

I can reliably do this myself. The process is simple. <https://voat.co/v/Identitarians/2605929/13117593>

It appears Weinstein was sacrificed as a distraction.

No, Weinstein was just a kingpin, backed by the Mossad and Israeli mafia, in the Jewish strangle hold over the media.

What we aren't seeing in the media is that these take downs are happening throughout the media world, and other Jewish controlled industries. It's starting with legal pressure, but it will end with mass incarceration for the ones that don't flip.

There's no end to the dirt in Hollywood. A smart Jew would just lay down and take it before things escalate further.

The JQ is a question of allegiance/loyalty, always has been always will be

You can add the MQ, as in muslim question, same deal, where goes your loyalty? To your country? To your ethnic group? To your family? To your faith/god/highest ideal?

For some people the question isn't even one, their country, their family, their ethnic group, the faith are one and the same, for others it's not that simple, this situation shouldn't exist, but it does

I say that I say nothing

I've been studying populations for quite a number of years and much of the time which group you identify with or are loyal to is determined for you by hostility from other groups which have picked your identity for you. Other times it's an arbitrary decision.

Jewish cohesivity is a product of a feedback loop where Jews are hostile to Goyim and Goyim reciprocate that hostility reinforcing the Jewish imperative to protect and serve their own. Smart Jews understand this and in times of weakening cohesion, or for profit, they instigate or fake attacks against Jews. The result for their in-group is greater prosperity and safety while fake attacks against Jews cost their population nothing.

This feedback loop largely hasn't been an option for Whites in the past, but as it turns out the Jewish White genocide plan has made it a reality. They didn't think things through and in their rashness created the causes for a cohesive White population with all the fierceness and greater numbers than they.

You don't have to submit it under your name.

The government probably already has your DNA since they've been bulk collecting DNA samples for decades, mostly from newborns.

These companies only analyze select portions of your DNA. They don't have the capacity for completely sequencing people's DNA or the ability to store saliva swab samples indefinitely.

If you submit DNA under your name for testing, you're an idiot anyway.

I think this is a great idea. How do we do it?

The first level public database itself is simple. We use an excel clone, because excel is spyware. Anyone can submit.

The second level of public database will be cross checked against private data aggregator files to assign a probability quotient to each suspect. The framework for such a system has already been built. This second level checked list will be distributed by organizations and individuals that the public may deem, at their own discretion, as trustworthy or not.

The third level will be private and consist of the second level data along with sensitive data for high risk individuals. The public will use their discretion to decide which White Nationalist individuals and organizations to submit this info to.

The orchestrating of a multinational entity to handle level 3 blacklists is in the works and will, in all likelihood, incorporate elements from existing National intelligence communities. The Jews are already kvetching to no end because we are acquiring the hearts and minds of the intel communities; they've already tried to publicize info about their dilemma so this is no secret.

As far as the public is concerned, on the ground collection of info is what we need. We want everyday civilians to mobilize in a 9-11 like "See something, say something" campaign. On one hand this will help us flesh out and discover Zionist networks that might have gone unnoticed, but it will also make it much more difficult for the Zionists to operate. It's a win win and definitely worth showing our hand in this case.

I think she's too much of a dedicated Alinskyite to be any kind of "our gal" herself. I think Obonga if anything is more likely to be some kind of insurgent. Plus, the way people think at those high levels is probably a lot more complex than us with exposure to information we don't know. However, the current climate is too severe and self-satirical to imagine that there aren't a lot of saboteurs in high places.

Such is the way of inherited wealth and power.

Expelling obviously has not worked in the past.

I don't know if you know this, but the plot of creating Israel was originally pitched as a way to get rid of the Jews. We create Israel, they leave forever, never to return. It didn't work out that way, but we can't just keep kicking them out to another Western country. When Jews get sent to non-White countries, they tend not to come back. We can also do as they intended for us and force them to intermarry with non-Whites, so they will never be mistaken for us again.

Here's a redpill for you, abandon the idea of a party altogether and embrace nationalism. You, your family, friends and co-workers fate is tied to that of your nation. Why would you want any less then the best possible future for your nation?

If someone can hide behind a party that has good PR but will sellout a good future for you and all of those you care about in your nation for their own benefit they are your enemy and the enemy of that nation.

When a politician has no party to hide behind but must run on their own virtues (or lack thereof) the bad ones can't survive to fuck you very long because they are quickly seen as the charlatans they are when standing next to others who are more virtuous.

Abandon the Democratic party but keep the ideals you find appealing, vote on issues not a brand name.

I don't know if you noticed, but we have allowed the dem and rep parties to create laws preventing third parties or independents from winning.

We have to take them over first. We can abolish political parties later.

It's possible. I always thought it was incredibly likely that there's people in lots of different political factions with a very different agenda that let on. In the case of the Clinton Machine, I actually think your theory is more likely for the money source (Soros) himself than it is for Hillary; some of what he does seems to make more sense from an accelerationist perspective than it does from a strategic or pure power one, and the level of hatred he gets from what seem like mainstream (conservative, but mainstream) sources far outstrips that of any other elite billionaires who we should be hearing about, like the Rothschilds.

It's very hard to know what political types really intend, even if you have a personal relationship and talk privately.

I don't doubt that money plays a significant role in the Clinton's decision making process. Whether she has always been a crypto-White Nationalist or she's just in it for the money, the projected outcome is the same.

Things are changing and the White Elites are learning a very hard lesson about not paying back into and maintaining the system of White sovereignty that made their wealth and the modern world possible.

Maybe the Clintons just smell the money? Maybe they just noticed the change in the "wind" and decided to change to the winning side?

I know one thing though, they're running out of options. If they side with the Jews, or the Arabs, or the Chinese their ride ends and their children become paupers or dead in a few decades. If they side with us, they keep their assets and get a second chance at creating a Clinton dynasty. It's really a no brainer.

Even if she flips no one in their right mind would trust her. She's done in politics.

Politics doesn't revolve solely around votes and it certainly doesn't rely on public approval.

The Clintons are the complete package as far as political heavy weights are concerned. They have dirt on everyone, they have wet workers, they're White, and Jews are trying to fuck them over.

You think the Clintons can keep their wealth and influence without purging the Zionists? I don't.

Whether we back them or not, they are up against a wall. They might not be cognizant of just how fucked they are yet, but it will sink in totally over the next few years as the Israelis try to take them down.

They will side with us, or they will be crucified by a "multicultural" landscape.

The English Rothschilds are only a tiny fraction semitic.

A banker is nothing without a private army of dedicated zealots following their every word.

The Belgians gave special treatment and elevated the Tutsis in order to subjugate the Hutu. The Hutu hated the Tutsis for their being treated special and for the abuse the Tutsis gave the Hutu on behalf of the Belgians. The hatred of the Tutsis made them vulnerable and dependent on the Belgians.

This is the geopolitical game bankers regularly play. The Belgians did it with the Tutsi and the Hutus and the European bankers did it with the Jews and the Gentiles.

Jews are the private army of shills dedicated to the Rothschilds, but the English Rothschilds themselves are primarily of English noble stock now.

Truth be told, the Rothschilds can be flipped to White Nationalism. As the Arabs and Chinese encroach upon their economic territory more and more, expressing their hostility to Whites and Jews alike, the Rothschilds and all the other Europeans will be pressed into a corner with only White Nationalism to save them.

That would be a very hard back pedal from the master puppeteer, unless their intention all along was to bring race up to spur whites into action.

People change. Maybe she realized that she lost the election because she relied on a voter base with a heavy anti-White bias while simultaneously being targeted by the the Zionists for siding with Obama during the notorious"USA is Israel's bitch" kerfuffle with Israel's prime minister.

Was she a crypto-Nazi all along? I don't think so.

There isn't enough room for Jews, Arabs, and Chinese to occupy the US government. She was forced to pick sides and was chewed up and spit out for it. In such a situation, Whites are screwed. She's trying to build a dynasty and foreign meddling in US politics is slapping her ambitions down because she's White.

It doesn't take a lot of foresight to see that foreign meddling is a direct threat to her and hers. The solution? Ramp up anti-meddling support against Russians, create laws barring foreign meddling, then throw Israeli, Chinese, and Saudi Arabian spies under the bus, HARD.

Hillary is a very rich White lady with a lot to lose and her eyes have been opened by hard lessons.

Or you could replace abortion with free reversible sterilization. Make sure reversing it costs at least 1k. Have a small tattoo on the hip done after the surgery so that women can know if a man is sterilized or not.

Promote it as the standard and 100% effective form of birth control in males.

Nationalist Democrats.

Dear God, just stop.

Anyone that purports to be a White Nationalist, but doesn't want to make White Nationalism a pan-partisan issue, is not a Nationalist at all.

What's your end game if it doesn't involve all political parties in the Western world taking White Nationalism as their most fundamental immutable tenet?

well i suppose it could work out that way. i get nervous collecting peoples dna and storing that data as it is just a waiting databank to be used and corrupted.

Store the results with numbers and keep the actual contact information on paper, securely destroying it after delivering the results.

Then it won't matter that your databank was hacked.

People are generally better off and happier among their own people, provided the same level of technology and the same level of societal progress.

And that's the problem, black people among their own would be far from our level of technology and societal progress.

Fewer computers, cars, etc. is not necessarily going to decrease the quality of life. Getting away from these things is typically called a vacation.

just remember purchase the printer in cash. each printer prints a code that identifies it, you will be charged with a hate crime if you pay for anything of this with a credit/debit card

Cash is always a good idea. Hate crime prosecution requires a crime to be committed and a prosecutor willing to stick their neck out.

Political discourse is never a crime. Even explicit calls for violence are virtually never prosecuted because they are technically legal and only a thin precedence keeps the myth of its illegality alive.

Inkjet printers don't print a code, but you can always check by scanning something you printed in high definition and changing the contrast-hue etc. in order to look for yellow dots that encode information.

Inkjet printers are usually identifiable by forensics by measuring some overlapping print lines or clogged pore lines on the printed document by local law enforcement. If it's federal they can just check NSA records if you're running Windows OS and are connected to the internet. If you can, run tails OS for print jobs on an air and sound gapped computer.

Inkjet printers rarely have static memory and if you smash it up or just destroy the USB ports with a screw driver before throwing it in a dumpster no one is going to try to salvage info off it.

Laser printers are another matter and should be put through an electronic shredder after use.

The slaves of Egypt cut their dicks like jews do. Christians cut their dicks like jews do. Its satanic psychological warfare on males. Christianity is a satanic religion and jesus is masquerading as a flowery angelic kike spreading the torah but for some reason christians suffer from cognitive dissonance and think he was a white guy or something.

Breaking that brainwashing is like trying to gain access to a cult. Its trauma based. They will fight you to the death. Their reptile brain cannot comprehend what is wrong with them.

They are broken beyond redemption for the most part. I just stay away from them. They are just as toxic as jews.

The slaves of Egypt? You mean some religious Egyptians?

Circumcision was first practiced by Egyptians as part of their religious hygiene rituals along with removing all hair. Removing the foreskin usually eliminated smegma.

Moses was an Egyptian and formally trained by an Egyptian priest. Much of the ritualism he introduced came directly out of the Egyptian religious practices.

well assuming the process of anonymization is something that could be relied upon then thats fine. then again if you anonymize the dna to that extent will it even be a meaningful proof anymore? would probably be able to get that DNA from anyone relatively easily.

I endorse blanket and cross organizational DNA testing.

Getting a DNA sample off someone is as simple as grabbing a glass or two that they drank out of.

So each organization tests people who are joining the organization and the DNA of people in other White Nationalist organizations. If anyone comes up with Jew DNA, we take them down or oust them to the rest of the White Nationalists who can demand a DNA sample to confirm the claim.

This whole idea is not that unusual in the intelligence communities that regularly grab samples of politicians' and CEO DNA for one reason or another.

There are some White nationalists that have already started bulk collecting DNA on personalities like Richard Spencer and the like.

In the past Jews and Jewish collaborators were able to just change their identity and move to another country to avoid punishment, but those days are firmly over. If you assisted in trying to genocide Whites, you and your progeny will be erased from the tree of life by future governments. It doesn't matter how powerful or untouchable you are today, because in 100 years you're descendants will be exposed and at the whim of the current rulers.

Maybe I should of said that different, Jews and Niggers are the same as always trying to be the victim. And y\that is true.

I don't think Blacks are always trying to be the victim. They are just out of place and need to be repatriated to Africa.

Different ethnic groups rarely do well together and the Blacks that remained in the USA instead of going to Liberia after the end of (((slavery))) probably didn't make an informed decision. Modern Blacks in the USA need to do some soul searching and see if they want to continue to live among non-Blacks.

so this process would avoid sending your entire genetic sequence to people? with high levels of success and confidence that your genetic identity was not sent along with the sample?

If you are sending PCR amplified snippets of DNA there will be a small amount of complete DNA which could itself be PCR'd. You can eliminate this by running the PCR amplified solution through gel electrophoresis and cutting out the kD range of the snippets from the gel or just running it until the snippets emerge from the other side of the gel.

Working with DNA is actually very very easy.

Sure that is why the jews in the letter loved Jesus right?

Wow you really are ignorant. Might want to read the Bible a little bit more to learn what the synagogue of Satan is and what the Pharisees did to the Son of God.

Until then you should not talk about things you don't really know.

Have a nice day.

Jews lie about their history.

They say this, they say that. I'm not interested in debating the minutiae of the pathological.

You clearly don't know Mr. BoogersGhost. He identifies Christianity for what it is- a sand nigger religion, which worships the jew god, and was designed for *slaves*.

It's Tallest_Skil that you need to convince. Or 9-11; there's a lot of Christfags here that seem to think the key to defeating the jew is to worship their god and his carpenter son. Mr. BoogersGhost and I are of the opinion that White religions are what would be called "paganism" or "druidism" in today's languages. We Europeans had our Old Gods before the jew slipped Christianity into the back of the Roman Empire like an assassin's dagger- and what better way to weaken a people than to force them to follow a religion that preaches submissiveness and passivity?

(((They'd))) be shitting their pants if we still worshiped Gods of strength and war, of death and life, of nature- the Gods that the Whites knew.

Tallest_Skil is a Jew trying to disrupt voat. I pay him little notice and neither should you.

So they did no parasitizing before the time of Jesus? Look up Purim. They literally deceived a king into killing his loyal servant who was going to get rid of the Jew problem by lying to him and convincing him that Haman was going to usurp him. Who did the deceiving? None other than the king's Jewish wife Esther. She knew he was only taking out the Jews because they refused to assimilate and refused to recognize the sovereignty of the king, but lied to get others to kill for her. She then had his 10 sons hanged as well because they continued their father's mission to remove the kikes.

And they celebrate their treachery and deceit to this day. They also celebrate 9/11 during the same event...just saying.

Don't drag me into the depths of Jewish narratives.

Jews weren't slaves in Egypt. King Solomon was a dirt poor king.

Jews lie about their own history and you expect me to humor their tales of victimhood for even a second?

Airborne virus because of rapid transmission. Jew DNA specific in order to wipe out any in the western world who have hidden their status and burrowed into our society like the parasites they are.

You can't take out Israel and magically solve the problem. You have to take out every single Jew before we can comfortably say that the issue has been resolved.

You're completely wrong about that.

Jews detest Blacks. If they ever have contact with them it is to manipulate or otherwise exploit Blacks.

Yeah, eat shit. You know nothing about what you're saying, you fucking kike shill.

But I say unto you, That ye resist not evil: but whosoever shall smite the on thy right cheek, turn to him the other also.

– **Matthew 5:39**

What did He mean by this? It's better translated as "do not diametrically oppose an evildoer" and the reason you were supposed to turn the other cheek is:

1. In antiquity, you only hit someone with your right hand (the clean one).
2. Backhands were to insult, a frontal slap showed equality and challenge.
3. By turning your cheek, the aggressor was forced to stop hitting you or acknowledge you as an equal; that was quite a statement to a Roman by a conquered Judean.

So Jesus was telling us to fight back smartly, using public shame as a weapon, not just attack head-on like a moron.

ἐγὼ δὲ λέγω ὑμῖν μὴ ἀντιστῆναι τῷ πονηρῷ· ἀλλ' ὅστις σε ῥαπίζει εἰς τὴν δεξιὰν σιαγόνα σου, στρέψον αὐτῷ καὶ τὴν ἄλλην·

First of all, ἀντιστῆναι, translated as "do not resist", has more to it than 'resist'. Strong's Concordance at 436 notes "to take a complete stand against" and it derived from a military term to diametrically oppose one's foes. Thayer's notes "to set oneself against." 'Resist' here is passive, but the term ἀντιστῆναι clearly denotes an aggressive posture. Better might be "But I say unto you, do not square off against an evildoer." Especially in the context of the examples all being examples of how to engage in intelligent resistance. "Give him your cloak, too" is Christ referencing Exodus 22:26 to shame your opponent. Exodus 22:26 compels creditors to return the cloak at night so that the poor can sleep in it. By giving up your cloak, you shame the creditor who is willing to sue for your tunic—and God will hear the cries of the debtor. As for walking the extra mile, that's a reference to the Roman law of impressment which allowed a Roman soldier to compel a person of a conquered state to carry his pack for one mile, but no further. By carrying it the second mile, the soldier would be forced to comically beg you to put it down lest his commanding officer see and he get in trouble. So it clearly does not mean "don't fight back"—it means to fight back smartly. This is what happens when people try to read scripture with no reference for the history or culture in which it was written. Remember, Christ taught us to fight smartly, not to not fight. Of course a Christian fights against evil! How could we not?

I didn't read this.

Jews like you shouldn't waste so much time typing out long responses.

Even if they don't consciously know where that quote is from, its embedded in a net of mental objects that lead back into Christianity through association with other mental objects.

Now obviously I'm not saying they should keep their financial gains. I'm just saying that it should be collected by the government instead of individuals so that the proceeds can go towards building roads, schools, hospitals, etc. so we can rebuild the nations they've wrecked.

Warriors reclaim what was stolen alone, they should receive the spoils alone. Why should the weaklings that helped destroy their country in the first place profit while sitting on the sidelines?

National sovereignty is not a spectator's sport and non-participants should not be rewarded for their inactivity and cowardice.

Tested by whom? The commercial DNA companies are hardly reliable

You can buy the materials to do PCR and select the various gene snippets used to identify Jews. You can then ship the snippet samples to be sequenced for about \$5 if you're checking for alleles. You can then check the sequences you get in your email against the known sequence for Jew genes.

DNA haplogroup identification is not rocket science. Once you learn the process anyone can do it.

If I created a company just for this, I could probably get the cost down for identifying Jews to \$30 if there were enough samples coming in regularly. It's such a simple process, a one man operation could handle 10,000 samples in a day.

It should be depicted as lulzy prank and a good way to get back at someone who has wronged you in some way. Depict it as fairly inconsequential, it's not like it's the end of their life and they can always decide to try to go back. After all, they did make it once already.

"Did your gf cheat on you with an illegal immigrant? Call ICE on him!" Then "Is your bf an asshole illegal alien and you want to break up? Call ICE on your bf lol!" Next round: "Did your son's whore of an ex-gf cut off you income stream of repatriated US earnings by having your son deported? Call ICE on her! Let her see how it feels!"

Nice. Now we need people to specialize in spreading this among the Mexicans. Do Mexicans read memes? I bet they do.

If somebody looks white, but you can't place them into Britain, Germany, France, The Netherlands, the slavic countries or Scandinavia, they're either Spanish, Italian or Jewish. It's that easy.

If they have black hair, they aren't White.

If they have a convex nose, they're not White.

If they have kinky hair like Albert Einstein, the patent office worker that stole ideas like relativity from real scientists, they're not White.

Serve White Nationalism and you will be rewarded with a portion of the wealth recovered from hostile foreign agents and a future.

Hi JDIF. First off that's socialism. Secondly any wealth gained by taking back our nations should go towards rebuilding the nation. Make no mistake about it they're not going to take getting removed, robbed or killed lying down. They'll burn everything to the ground just to spite us so we need to use any gains for rebuilding instead of personally benefiting from doing what needs to be done. Don't worry though, we won't need financial motivation to take our countries back. You put some food in our bellies and a gun in our hands and we'll take care of it for free because we're going to be motivated by the greater good of doing right by our people, our children, our nations and the world as a whole. We'll preserve the multicultural planet by forcing isolation between nations putting an end to ((globalism)) once and for all and more than that we're going to learn from the mistakes of our past like artificially propping up other nations with foreign aid and completely end all that shit too. It'll be the global reset we so desperately need and when the time comes all we're going to want in return is a full belly and a gun to shoot.

No, it's not socialism. Its how wars are meant to be funded.

Do you advocate we allow them to keep what they have stolen from us?

I picked a tall, big framed, high IQ, beautiful faced woman with some meat on her.

The (((media))) portrays the ideal woman as a thin, weak framed, retard because that's what they want Whites to sexually select mates for.

Boney asses and stupidity don't make for a good wife or even good sex.

No they wouldn't. By the second or third generation, they'd be intermarrying with the whatever new Chinese Dynasty springs up to replace their current "we're trying to be western!!" system. So the chinks would continue to trade with them. And that's with the best outcome of everyone retreating to their own dynastic entho-nations.

European monarchies intermarried with foreigners because the Catholic church wanted to alienate them from their people.

As an Australian, i promise having a government that is completely crippled without a reliable monarch is a massive burden on everything. All we need is one of the royals to leave england and actually run our country, but they would rather fuck niggers apparently.

The British Royal family clearly want no part in the affairs of the world anymore or they would have lead the charge in repatriating all of Europe's Jews to Israel in the 1940's while also banning foreign ownership in European companies to cut the parasites off for good.

Yes, is there a Hohenzollern or Habsburger somewhere available? Windsors are not eligible and must abstain.

I have a family in mind. Though ultimately, monarchies belong to all the people of the nation. Describing a sovereign monarchy as something other than your own would be doing it wrong.

Blacks really are not the problem. I don't want them living here, they should be repatriated to Africa, but they are not the crux of our governmental and economic problems.

Because at least half of whites would stand with the niggers and probably 90% of people are peaceful

You've never seen an ethnic conflict unfold.

Sometimes ethnic conflicts happen over completely arbitrary things, but once the ball of retaliation gets rolling it can be very hard to stop without an outside force exerting pressure. That's why historically sovereign nations, not colonial nations, tend to be so monoethnic and monocultural.

That monarchy would be (((compromised))) in 5 seconds flat. Any time there's a centralized, unquestionable authority (right of succession), you're handing away your destiny to vested interests.

In the past, the only way a monarchy could make a deal with a serious foreign challenger was to inter-marry. Blood/genetics were the first thing on the table. And Royal Houses ended up only mixing with other Royal Houses. Royal Courts became closed systems. The clergy became filled with second born sons of connected families. Sealing off all power positions in society to a handful of bloodlines.

Fuck Monarchies.

You're thinking of monarch dynamics under the Catholic church which forced their monarchs to marry foreigners to distance themselves from their own people.

Sovereign monarchies don't do that kind of shit and instead intermarry with the most intelligent and well formed of their people, thus becoming a sort of focal point for the nation's eugenics.

fyi OP, this kind of rhetoric has to be approached with care. Inciting mass lawlessness *isn't* protected speech in the USA.

Because a judge deemed it so?

There's a reason prosecutors don't push that precedence too far, it's unconstitutional. They would never attempt to pursue such charges against anyone with enough money to bring the debate up through the court system because they would lose their ability to instill fear, which is far more valuable to them.

Banks are more deadly than armies. We should start a bank. Then buy ourselves media. the second most powerful thing behind banks. The banks and media are why we are getting beat. The two things we are almost completely not involved with.

From my point of view, banks have a limited range of influence. When armed conflict comes to your door, money and banker promises mean very little.

Fear is a more powerful motivator than greed by far.

As long as people are convinced the banks cannot protect them and cannot ensure their survival, or that of their kin, they side with whoever they believe is most likely to come out on top of an armed conflict.

I dont think the founding fathers expected to win, or for the nation to survive this long. Thus they didn't see all of the current flaws.

You're wrong about that. They expected it to last and become the norm. They had every intention of destroying the power of the Catholics and their appointed plantation master kings.

They saw it as a natural progression of human society under divine providence as per the bombastic ramblings of Marcus Aurelius later adapted for Free Masonry.

nope

a race denier denies differences between races, not ethnicities.

An ethnicity denier denies the differences between ethnicities.

race is not ethnicity. Race is a bs concept. Ethnicity, genetics, and phenotype are much more accurate and useful concepts.

People who conflate race with genetics are like people who conflate USA with a democracy. If you think USA is a democracy, you're going to have a hard time understanding things; if you think race is the same as genetics, you're kindergarten approach to reality will make it hard for you to understand life's complexities.

let's talk about phenotypes

I just defined the term. Now you are telling me I defined the term wrong?

The Jews have done a pretty good job of destroying white Christian culture with only words. Mind you, it took them half a century, but they did it. They kept picking away at our customs, our beliefs, our holidays, until they picked a hole right through America.

Now they are subverting the young whites in the schools and universities to hate their own race and their own religion. They are conniving to keep the southern border open to illegals who hate America and spit on the Stars and Stripes. And nobody is trying to stop them, because they've all been bought off and corrupted.

Christian culture isn't White.

You don't know that.

I've been studying the dynamics of populations for many years now and it seems likely to come soon.

Expand your mind through learning history. These sorts of conflicts happen very regularly. One could even say it is the nature of humans to do so in order to not outstrip their resources entirely.

Socialism doesn't embody anything good.

According to whom? Your banking overlords?

Fundamentally, I don't care about Left Right or any other ideology or paradigm. I want our people to persist, to thrive, to have a high quality of life, to advance, and to be secure. I don't care about the words. A knife isn't as good as a gun for most things, but if it gets the job done I will use it in a pinch.

Political ideologies are psychological traps and causal slight of hands. The same Jews use the words of communism to justify stealing from and slaughtering us and then use capitalist words to do the same. The words, the supposed "reasoning", don't matter in the slightest. Our deaths and terrible lives leading up to death are real and physical, the words are immaterial and most of the time don't mean a damn thing.

A good life and the continuation of your ethnicity under capitalism is just as good as under communism because that's all that matters anyway and that's all those political ideologies promise anyway.

We also constantly accuse them of being lizard people inbred rothschilds jews satanists globalists and 'obsolete'

You reap what you sow.

How are we supposed to get what we want if we cant actually agree on the right direction to be going.

You're thinking of those families which were appointed by the Popes and forced to marry foreigners to alienate them from the people they ruled over.

A natural monarchy works differently from a slave managerial arrangement for a papacy.

Monarchies are just as bad as communists. The rich or social elite reap the rewards and the poor get poorer. Capitalism is the best because lazy rich can lose bigly as rich people think eveeeyone else is rich.

From my perspective a monarch family with extreme wealth ceases to be occupied with acquiring more wealth, but become totally absorbed in maintaining their wealth by maintaining popular support. This is done through policies which maintain a high standard of life for the majority of citizens, defending borders, and courting the intelligensia for guidance in ruling and intermarriage to produce wise royal descendants. In the pre-Christian past, a monarch was the center of a very large family that encompassed all of the citizenry. The sense of alienation that came with the Pope appointed kings marrying foreign spouses didn't occur. The White race can potentially unify around a single White monarchy and meritocratic intermarriage between the monarchy and the most intelligent and well formed stock.

Autists that are naturally disposed towards our cause can do 10 times the work and with much better quality than a normal think tanker.

Don't believe this without some shred of proof.

Most of the material about White Genocide online is generated by only a few autists.

That's an extremely heavy claim to make with zero proof.

If you have an especially gifted one, they can write a book in a day or hit the internet with 10,000 original posts supporting or rejecting this or that.

Yea. I'd need some examples. I know normal, very intelligent, functioning people that produce a lot where I work.

If proof mattered to the masses, we wouldn't be paying the bill for the Iraq war.

The very moment one of these board members contacts another in this context, the deepstatefucksticks will have their grain-of-truth excuse to get a FISA warrant to take control of it. Take your keyboard to some other place, like Reddit.

These are our nations, aren't they?

To say that the citizens (us) of a country should not have control of their own armies is a kind of treason.

Let (((them))) seal their fate, and that of their descendants, by coming at us head on. Every security guard they add to their details increases the odds of an easy victory for us.

Nopey nopey. White monarchs tend to get people trodden on. Nobels walking around having folks arrested for addressing them as equals.

Fuck that shit. Monarchies suck. I don't care if they're the same color as their "subjects", the liberties they'll take on commoners would be just as bad, if not worse than a problem with foreign invaders.

You're thinking of Catholic appointed monarchs whose purpose it was to enslave Whites and deliver gold and such to some Middle Eastern Religious fanatics in Italy. Whites were so enslaved by the Catholics and deprived of literacy (worshippers of the king of the Jews stole all the books for their monasteries), they could not either support a king or deny a king to any effect.

Kings prior to this killed foreign invaders and created an atmosphere of literacy and individual wealth since a monarchy of free men only survives long by the will of his people.

Let's face it, we need another Hitler. That is, we need a fearless, charismatic white leader who is willing to sacrifice his life to improve the future of his race.

We need more than that. We need every Whites man to be a soldier and fight for their nation.

This is a war fought on different terms. Instead of bullets we are being massacred with financial scammy where our tax dollars are spent to breed foreign peoples and psychological abuse damaging Whites ability to reproduce. We are being cut down systematically using hundreds of tactics. Slow acting incremental poisons in our food, terrorists in our places of courtship, political alienation, and demonization rhetoric from shape shifting Jews.

Justice is blood. There is no alternative. We must carve justice out for ourselves.

I'm Just waiting for genetic understanding to develop enough to where we can pinpoint the black genes, asian genes, etc. Studies have been restricted due to the current socio political climate, but until we get certifiable data on racial genes, I have to deny races being superior or inferior, or even having negligible differences.

The work that is published on human DNA is miniscule compared to the total work that has been done.

Computers make isolating ethnic specific genes a piece of cake and whether you like it or not, the USA G collects tissue samples shortly after birth by default and an entire black market exists to supply the USA with DNA samples of different ethnic groups and influential people.

When my wife attended college for a sociology degree, her professors insisted all races were the same with absolutely no differences. When my wife then asked why the university gave blacks extra consideration on admissions, to the university, how could the admissions tell who was black and who was not. My wife got an F in that class, after which she changed majors to something useful.

That's a good example of why logic is wasted on most people. Logic to them is foreign and repulsive. Instead we need to speak their language with soundbytes and simple images to convey our messages, like on 4chan and elsewhere.

The perfect example of this shit is Joe Rogan. Says he can't wait till everyone is mixed, that in the future racism won't exist because we'll all be more educated, and other such retardedness almost every show. He has become pretty unbearable over the last 6 months.

Sometimes it's useful to have intermediary philosophies to gradually guide popular thought closer to Nationalism. I'm not saying he's one of us or that his stuff in particular is useful. I've never given him much attention. I spend plenty of time analyzing media, but no one can cover it all. We don't have the resources to deal with individual actors, so I focus on crafting inoculating language against various themes of rhetoric. Well over 80% of the whites both of the street transient type and school age children have no aversion to the formation of white power gangs that will be necessary to project control, in fact they enthusiastically support me, when I make contact with them to spread propaganda in the form of CD's, flash drives, flyers, material aid, etc. Which gives me the necessary energy to continue.

I'm trying to work on creating resource guides that will give them the necessary blueprint and ideological mould to form their own cells and ways to meaningfully resist the system. With as many people are on the streets, there should be no shortage of recruits from here on out. Our goal is to find the small percentage within these populations who can be successfully radicalized to physical action and give them the necessary knowledge to accomplish their mission.

Do not distribute flash drives. Flash drives can carry viruses which there is no remedy for and expose your influence network.

You should not overtly state anything about "physical action", implying as much is fine. If someone takes "physical action" it should be a personal decision in order to protect the group from gang laws. You should prepare anyone that may enter the prison system with a model for recruiting people in the prisons for group protection and let them know that they should not make any statements to law enforcement, you will work to get them released, and send them things in prison should they not be released. The "Aryan Brotherhood" was not legitimate from the very beginning, though it could perhaps be made legit.

You also should not use language like "propaganda", "radicalization", "ideological", "cells", or "missions". Instead, use the positive connotation terms like "information", "activist", "philosophy", "groups", "campaigns".

Is this the right place for White Nationalism? It was a few months back, but today we have over half of voters ready to line up and go to war to die for ANOTHER jew. [PNG](#)

Unless all of the White race collectively acknowledges that jews are our adversaries, it'll never get better. They'll continue to manipulate the masses with emotionally charged stories like Robinson's bullshit, and thus they'll remain 2 steps ahead.

Midnight, we are not playing in a rational arena.

For public actors like Robinson who will have no position in our new governments, feigning support for Israel has a net advantage for our cause. By feigning support, they direct negative Leftist attention to Israel and keep Israeli agents at bay since they themselves often don't really know whose side someone like Robinson is on.

In addition, Israel is dumping funds and running interference for White Nationalism, so long as it doesn't hurt Jews, in an attempt to force out Chinese and Arab meddlers in Western politics. We've already proved with Richard Spencer that we can take down their shabbos goys when the moment suits us.

Ultimately, those who aided us will be rewarded and those that worked against us will have their bloodline executed. Whether Robinson is really on our side or their side is a matter for future courts to decide and we'll kill his influence over White Nationalism the moment he ceases to advance our cause.

It's taken me months to get to the point where I can speak to "liberal" friends without sell censoring too much. I also successfully shamed them into not using the phrase white privilege around me. That was a lot of work, and they're fairly open minded. You have to have a clear set of goals, such as: * Free speech. * Freedom of association. * Removal of diversity quotas and other discriminatory practices.

If you win those fights then white self determination becomes MUCH easier to achieve.

If we can't even get free speech, then we're sure as hell not going to get white self determination

Both the left and the right have crafted language. They use different words and different rhetorical patterns deliberately to divide and conquer us. But, as I've tested and confirmed, you can package any message in the rhetoric of either side in order to bypass their knee-jerk rejection and in many cases to get them to completely adopt your point of view as if it was their own originally. Such is the deep state of pavlovian programming of most Americans today.

I started on the Far Left, having been brainwashed by public schools and television as a child, so I have a distinct advantage in speaking their language. But you can learn it to. Calling a SJW a Nazi by bouncing rhetoric about the destruction of African and Mexican culture through forced assimilation (via people trafficking) and framing mass immigration as a plot to ultimately allow Judeo Christian Whites into every country to take over and drop the wages of workers is a lot of fun. As long as you frame actions against Whites as harmful to non-Whites, they will agree with you or you can easily take them down by calling them a Nazi.

My guess is not nearly far enough to actually pull the trigger. No joke, anyone smart enough to attempt that is smart enough to realize how fast the bioweapon would evolve once released. EVEN if there is some "foolproof, impossible to circumvent" safety factor built in.

I genuinely think that even if they have such a weapon, the Jews, Persians, Chinese, what-have-you wouldn't release it because the chance of it backfiring on its creators is so high.

You don't know enough about virology.

A biological weapon that targets a specific ethnic group or groups is feasible. There is a zero percent chance that some haven't already been developed.

If this is for his political campaign then if you do this and get caught it is breaking Federal Law. If you donate legally it can't be above a certain amount or it is also breaking more Federal Laws.

Ask Dinesh about it. <https://www.justice.gov/usao-sdny/pr/former-college-president-indicted-manhattan-federal-court-campaign-finance-fraud>

That's a good point.

There are no legal complications to donating, in the ways considered above, to activists for non-campaign activities that you're aware of, are there?

Getting the civilian USA Jews in general to leave wouldn't be very hard, but they aren't the real problem.

USA civilian Jews are mostly just "useful idiots" that do some of the groundwork in securing Israel's blank checks. The real problem is a minority of the Jews, crypto-Jews like the Bush family, and IDF being sent to the USA universities.

Would there be some way Traveller's Checks could be donated and then converted to cash?

Traveller's checks require a business to cash them. The business could refuse to pay out for any number of illegitimate reasons and leave one of our advocates without the necessary funds.

A cash live drop or a reasonably secure cryptocurrency deposit seems ideal, though I would not advise an advocate to keep their funds in cryptocurrency form since they're fundamentally insecure.

The other day while I was taking a break I was pondering the sino-american relationship, and came to the conclusion that, as long as jews have control over the us government, as long as the "jew world order" keeps going forward, confrontation between both countries is somehow inevitable, one has to be the vassal of the other

Not saying there's no room for a sino-american confrontation without it, I'm saying there's no room for peaceful coexistence between both within the JWO

And then I remembered some people here saying "jews" killed JFK

And I was thinking, let's say it's the case, let's say they are the ones behind it, and let's say there are proofs of it, undeniable proof, buried somewhere, wouldn't it be one of the best way to dynamite the us zog to leak that information to the us public?

I think that in the future a fusion between East Asians and Europeans is probably inevitable. East Asians and Europeans both have traits that could contribute to a better future race.

Conflicts between China and Europeans seem to be caused entirely by Jewish bankers forcing Europeans to seek an unnatural amount of material resources in order to pay off usury debt scams. Europeans don't naturally do things like colonialism since we're quite happy to simply be left alone.

I don't think exposing that the CIA/Mossad killed JFK would be adequate to end the ZOG. The CIA/Mossad have been exposed as things just as abhorrent, but the public is poisoned with lead, fluoride, bromine, and Jewish sitcom morality.

That is their goal, but few of them have considered the ramifications.

In a feudal society, lords kill each other to claim each other's land to increase their estate.

In neo-fuedalism, they will kill off each other's families and then buy up the relinquished stocks and assets to increase the size of their portfolio.

Jews are uniquely unequiped for such violence and this is the worst case scenerio for them in reality. They tend not to think that far ahead.

Yeah

Unless they decided to actually side with chinese and throw their old goys under the bus

I spent the last 3 decades educating SE Asian Chinese about the Jews. The elite of the CCP are now furiously vigilant against the Jews. Many even see Jews as responsible for various humiliating periods in history for China such as the Opium wars, as well as colonialism, backed and spurred on by European Jews holding stocks.

Smoking out a fox is only done after placing a dog at every exit to the burrow. They won't escape. If they want to survive as a people, their best chance is for Israel to become a vassal state with no representation in our government whatsoever. If they try to maintain control over the USA and Europe, they will be fed to the dogs.

I personally see the situation differently than you do. I see it as a teachable moment and an opportunity to reinforce why white people are great and why you don't let a bunch of foreign invaders into your country who share little to no values with you. While altruism is one of our greatest weaknesses, it's also what has made us so strong and flourish. We need to find that right balance again.

White people are only pro-immigration because of ignorance. They invite people they know next to nothing about into our countries because the (((TV))) tells them so. The (((TV))) instructs people with tales of false morality where immorality, such as betraying your own race, is rewarded by circumstance, while reality punished it. You can make a story that has a morality theme saying anything.

There is nothing moral about being a race traitor. It's the highest offense and a tremendous sin.

You are way wrong on this. When Hitler came to power, he was able to partner with elites because there was still industrial capitalism in Germany, and they were obviously weary of Bolshevism on their doorstep. In the British Empire, finance capital had already triumphed (London was the capital of finance after all).

Xi Jinping Thought works because it is still based off of industrial capitalism, and the Chinese are still making things and Chinese oligarchs are loyal to China.

I didn't mention Hitler. Do you think Hitler's era is comparable to today's?

I don't think they are.

words are not swords.

how will you have them by the balls? how?

The time when Zionists were above the law are over in much of the country. There are too many non-Zionist parties vying for power. Many of the political prostitutes have sided with the Arabs or the Chinese and they are eager to rid the country of Jewish influence to increase their own control.

Documenting their vote manipulation will give us ammo. We can hold onto it and flip the Zionist politicians to our side, or we can hand over the documentation to a politician serving a different master and take out some of the Zionist pawns. Either way, it is very valuable for us.

It has to start somewhere, 1.8% of the votes for a first attempt, by a candidate running with fuck jewish supremacism, in california, isn't that bad

It's not much, to say the least, but it's not nothing at all

1.8% with no Jewbucks from the Federal Reserve is astronomical.

At the next election we will have 20 times the resources. One of the biggest obstacles to funding a Goyim Nationalist campaign was the inability to point to any actual candidate for reference. I'm a gay with a lot of access. I will be running interference to stop and sabotage plots against Goyim Nationalists from the Left and from within the Jewish camps. I will be drumming up support for Goyim Nationalism at every level of the social pyramid. I will convince Jews that Goyim Nationalism is 100% necessary for the survival of the Jewish people.

There is a tremendous amount of money to be made in Goyim Nationalism. Goyim Nationalism is the new economic In-Group.

For every candidate that runs, at least 50 autonomous people like me will be working behind the scenes. I've recruited more than 100 on this path, and thousands more are mobilizing from the internet to infiltrate enemies of the Goyim.

We will take back our lands or they will become Chinese and Arab property. The Jews have no choice but to support us and hope we will be merciful and allow them to retain Israel.

Notice how Voat & voting machines went down during the election??? Regardless of Putt's actions, (((They))) are scared. Look @ the Google searches for Patrick Little, he was searched most often in the higher Jewish populated states, NYC, CA, etc...Especially compared to his rivals who were only searched for in California. Not huge, but I'd bet every kike in the US is aware of Patrick Little.

Patrick Little had no chance of winning without bringing a lawsuit and getting people documenting vote manipulation before hand.

I have deliberately not spoken to him directly, so I don't know for sure if winning this particular race was his objective.

We collected a lot of valuable information thanks to him. He's really pushing the Goyim Nationalist movement to the next level. And it's not like we didn't win any seats. Overt candidates are absolutely necessary, but they are not the full arsenal.

Moving forward, we will have 20 times the resources in California in the next primary. Having this take place in California will motivate all the other states to move forward with their own candidates.

Many of our white brothers and sisters have long been brainwashed and we should do what we can to help them, not shun them. Many of us goats here were at one time just like them. Someone, somewhere wrote, or said, that one thing that finally broke the spell. I can't imagine abandoning another white person the scenario you described.

Haha. Yes. Increasingly so.

I helped make that happen. That's the power of transcending the Left Right paradigm.

To tell the truth, I started my political journey on the far Left and crossed over into the far Right in order to tap into a wider demographic because the Israelis tend to use one side to stop the other. Needless to say I have been redpilled on various subjects since. I've been grooming more and more people to be like me, to transcend the Left and the Right so they can walk unhindered between political camps and end this divide and conquer game the (((media))) plays.

The Israelis should have bribed me with a couple million dollars and a lifetime of payments when I was young and naive. All this trouble they face is due to their poor planning and their inability to recruit talent. There is far more wealth and security in siding with White Nationalists now. Aiding the Jew today is practically a death sentence waiting to be carried out.

How did you do it for less than 100\$ when a lawyer was involved?

They knew and wanted to participate in the plan, because plan B was to initiate lawsuits and Plan A involved no actual work on their part. Plan B doesn't look necessary, the lawyer involved took over a dozen written statements against various contractors though.

Any lawyer wanting to be involved in the same OP need only provide their phone number and mailing address. The phone number should have a message instructing people to submit copies of written statements and documentation to the address. If there is enough evidence to move forward on any of the cases, they can take the case on a contingency basis where they only get paid if they win, so it's win win for everyone.

Goyim Nationalist lawyers that get a reputation of serving White interests pro-bono or on contingency will inevitably get much more business when it comes to other legal matters. I will always hire a Goyim Nationalist lawyer when available. It's just common sense. We support or own. We protect our own. It's too much hassle to raise money for every time Whites are targeted and discriminated against, instead we'll lavish work on lawyers that serve our cause pro-bono and ultimately make them far wealthier in the long run.

I stand with Patrick, This guy is legit. One piece of advice, avoid in fighting within the Alt-Right. I know there are some kike shells and people taking money from kikes or putting kikes in leadership positions. Honestly the big Alt Right sites seem compromised. They wanted to promote themselves not the movement. Just avoid them look for others that do support you and you're "optics". Stay on topic, keep doing interviews.
You are on Fire! I want to see you on the Alex Jones show!

Already distributed ideological vaccines against shabbos goys.

Will continue to inoculate as new mutations of plants occur while letting them ride as long as they inadvertently promote our interests kek.

To a degree, the Israelis are promoting our cause because they are being pushed out of Washington gradually by Arabs and Chinese interests. The "diversity/oppression" ideology they pushed is now being used against them, so they have to kill it. They desperately want Whites on their side now as they are going the way of South Africa. No one cares about oil, the USD is being challenged by the Yuan, Arabs and Chinese are moving in playing the same cards as the Israelis did. To a degree, the Mexicans are organizing too. Any semi sane informed Jew will know that the normal compromising and bribery that works on Whites won't fly among collectivist Chinese and Arabs. Their only hope is to get the Whites to become Nat-Soc and push out the Arabs and Chinese, but not Jews! That's a hard sell isn't it? The Jews are so fucked and yet there are situations where a parasite has no choice but to defend its host.

What was the point again? Oh yeah, we'll let the shabbos goys go unhindered up until they stop serving our interests.

If I were the Jews, I would start working for the Whites immediately to try to become a vassal state of White America. Chinese have erased thousands of ethnic groups from the world, they kidnap people from all around the country, they're immune to Jewish media because they don't allow free press, they are an ethnonationalist state, and they're very well informed about the Jewish problem. Rothschild's beware. China isn't a fool.

i see where your idea comes from but i think a better solution exists

we must restore the nuclear family and become the core of the morality that was taken from us, that held the west so strong for so long

The nuclear family was a stage in the Jewish deconstruction of the White multigenerational and clan family.

The nuclear family idea which cut out grandparents, aunts, uncles, and cousins was pushed in the 1940's and 1950's by Jews to break down White social structure and collectivism.

Because people are brainwashed and weak. They watch tv and listen to jew propaganda all day. Nothing needs to be infiltrated. Sinking to jew level isn't going to help. Jew tactics come from a different playing field, they are very outnumbered. All you have to do is start speaking truth. The jew existence is only maintained from a web of lies. So truth demolishes them. They know their time is short like the devil. That's why they have been rapidly expediting foreign invasions and degeneracy. That's also why we keep hearing about the jews saying we need to educate more on the holocaust. Well, when they say this, we need to tell them, yes, let's educate more on what really happened with the so called holocaust. Let's start asking more questions when they open up with more holocaust training and start exposing all their lies. Let's stop being afraid to be called anti-semite and racists. Let's make them use those words so much that the words have no more power. Press them on the issues.

No. You're wrong. Infiltration is highly successful and we are making huge strides every day to eliminate dual citizens from positions of influence and power every day.

When you catch Jews in a dirt Op, they "shut it down". That's where that phrase comes from. We've been doing this a while now and forced them to shut down many underhanded schemes or just documented them for later treason trials.

This isn't a game of words either, we're keeping track of their weapon caches, both legal and illegal, which we can raid and take, or report to a friendly in law enforcement, at any time. We have evidence of so many illegal things too. Drugs, illegal weapons, prostitution, bribery, fraud: Jews are possibly the most criminally inclined people in the world so it's easy.

Investigate an adult Jew for a day and you will find them either committing a crime or associating with a criminal. It's like shooting fish in a barrel.

I personally have caused more than 40 news websites to be created.

So you can't name any. Got it.

Almost no news makes a profit today.

That's due to jews not giving a shit about profits when the job is to control all discourse.

We're working on our own advertiser network

Yeah, that'd be damn well necessary. All these services want to cut off advertising to ✪problematic✪ outlets.

If you weren't obviously a Jew

Try harder.

Every time someone suggest real action, you come and take a shit on it.

It's not possible goy! You can't do that goy! It will never work!

You're a fucking Jew. Don't even bother lying about it.

We need hundreds of White owned and operated websites

Can you even name ten?

news programs

Can you even name one?

we need to buy existing media companies out from under Jews

And what makes you think they'll sell?

we will dump 2 decades of dirt into the public arena in calculated pulses

Why aren't you dumping 2 millennia of dirt right now?

I personally have caused more than 40 news websites to be created. We are not aiming to make a profit, though obviously self sufficiency is ideal. Almost no news makes a profit today. We're working on our own advertiser network so we can distribute ads to all our sites and screen the ads for Anti-White propaganda.

I would use jewish instead of judeo because there are lot of idiots who thinkg judeo-christian is a thing when it's an oxymoron. Jewish-Supremacy or Jewish Supremacist is better. Supremacy has a negative connotation to it.

Christians not only let the Jews into the Western world, they gave them 100 percent control over our banking industry from day one.

Christians are literally demonic.

Just imagine a teacher in a mixed class going around and saying we should all be proud of america as americans. And if you are hispanic, black,asian, latino, or even queer you should even be more proud and speak up about it... but you, YOU evil white people with no culture and nothing but evil history should never speak of white pride you shouldnt even say its ok to be white! Because its not look what you did to the native americans!!!

White kid slowly raises his hand...

Teacher: ohhh yes johnny you have something to add to these facts.

Johnny: Ms. The spanish killed as many or more south americans and they had a more advanced civilization. Should those latinos feel guilt as well??

Teacher: to the principles office, your parents must be racist! Rheeeedddd

Spanish (Arab Ghaulish Hybrids), also cut off people's hands regularly and all sorts of other things.

I don't consider Spanish to be White. Never have. It's clear as day they are not White. White people don't have black hair, Arab noses, or that particularly non-White pigment to their skin.

"We don't need to take back the country with violence, we just..."

And here we go again, trying once again to avoid that particular part of the equation...

Far from me the idea to glorify violence, however, the fact remains that most if not all of us, try very hard, to come up with some sort of plan which ultimately boils down to circumventing violent action, and unsurprisingly, we always end up with no real solution, just more wait and see, while the clock is definitely not on our side. Peaceful resistance, at best, this is still bordering on complacency

It's better than being completely clueless, but it simply isn't enough to cut it

We do so because we know that violence comes at a dire price for the individual, either death or loss of liberty in most cases, for a start, not because we're convinced that "it doesn't work"

Of course it works, that's the most outrageous part when it comes to violence, look at history. It works as long as you're on the winning side evidently, and it always comes at a price no matter what side you're on, an individual price we aren't willing to pay, for the vast majority of us

That's the bottleneck

The irony is that when "we" will be willing to pay that price, chances are, it will be too late

Look at white south africans

I'm afraid we're only expecting to win the muay thai championship without taking several blows, that's not going to happen

I didn't say we should take options off the table.

Not studying enough jews way is what comes to mind when I read this

Regardless of what you think of them, individually or collectively, the fact remains that they are rather very effective when you put their influence in perspective with their numbers

...

I remember when jiu-jitsu was barely a thing in the west, when Royce Gracie came in the octagon, it was game over for pretty much everybody else

No amount of more boxing, more lifting, more this or that could stop it

In most cases in the end only more jiu-jitsu was the answer, and pretty fast jiu-jitsu became a must have skill, nobody could expect to go very far without bare minimum jiu-jitsu level, today "to go very far" has borderline just become "to fight"

Later on a new style emerged, called Chute Boxe, much more aggressive, combining not only (Brazilian) jiu-jitsu and boxing, but jiu-jitsu and Muay Thai, specifically, with an emphasis on Muay Thai/percussions, the strategy basically being to get a black belt jiu-jitsu level to always escape the ground fight and force the opponent to go stand up fight, and if the adversary is stronger on stand up (which was rarely the case for Chute Boxe fighters), force him to the ground

https://en.wikipedia.org/wiki/Chute_Boxe_Academy

But I digress

What I'm getting at is that, while the goal isn't to become jews, the goal is also to be able to fight just as good as they would on their own turf, because if we don't learn from that, from their way of doing shit, we'll get screwed by it no matter what

The problem isn't entirely the Jews, but also the Whites that keep them in the country to use for their own schemes.

I've always wondered if there are feds, NSA people, etc.. who were tasked with keeping an eye on us (places like Voat/4chan) and got secretly redpilled because of it. Now they're like our guardian angels and are doing things to help us, even if we don't know it

Not necessarily. These organizations are compartmentalized in a way that keeps the people that sort through the material themselves from calling the shots of the organization. However, these people get promoted and they can choose to interpret what they are sorting through as one thing or another.

By this point, we definitely have people at the tops of these organizations.

Putting on an air of invincibility is warfare 101. It costs nothing but some agents time to spread rumors of how great and powerful their masters are. I get that impression when I watch Massive Dynamics robot videos. I smell a fake. I would also wager that the NSA spying capabilities aren't as great as they make it out to be. It's far easier to control people by making them think they are being watched constantly than to devote the manpower to doing so. I have no evidence of this, however. It's just speculation.

The NSA does at least filter everything, it's hardly an advantage though because when they designed the system of spying they wanted to use the information for their own purposes so they created plausible deniability though independent contractors which do sell information. Israel sells the info too.

There's nothing that the NSA has that you cannot buy from one of their affiliates, so it's hardly an advantage to any one group anymore.

You're right, but the one thing you did not attribute to Jews is their loyalty to each other. They operate as a tight-knit group, and seeks to only help itself while fucking everyone else. Once again demonstrating how powerful cooperation and group-think can be... especially if you think about how many deep flaws it can overcome. Jews are stupid inbred retards, and simply because they cooperate with each other and coordinate they are still able to rule the world.... Let that sink in for a moment.

We would all do well to take a page from the devil's handbook.

You're wrong about group loyalty. When it comes to real threats to their finances, freedom, or safety in a way that the group cannot save them, they always turn on their own.

When doing things you don't want them to know about, take out the battery or leave the phone at home.

It's possible there is an RFID chip in a battery free phone that can be detected when entering stores with RFID detectors. Leaving it at home is the best option.

There are also GPS trackers in all new vehicles, you can ask for them to be removed when you buy it from the dealership and *maybe* they will. They are almost always in the dashboard and you can look up online how to remove them. It's too easy to place a tracker on a parked car though, so you're better off taking public transit with cash, a bike, or walk.

Video cameras are everywhere, but a baseball cap and sun glasses makes most of them useless.

It is immeasurably cruel to subject an innocent infant to such pointless trauma.

And dysfigurement and dysfunction for the rest of their life.

Circumcised dicks don't work correctly because of a lack of skin. Penises are supposed to be inserted once and then glide within the skin while pulling in and out, but circumcised dicks don't do this and cause large amounts of friction in the vagina and microtears.

There are many other reasons why the foreskin shouldn't be removed, including that it is part of the immune system.

Personally, I don't have any hatred for Blacks. I would just like to see them repatriated to Africa. Whenever a country is made up of more than one ethnicity it is vulnerable to foreign instigation of civil war and ends up Balkanized.

This! My main issue with the whole movement is that we are stating our positions clearly to fucking everyone!! While (((they))) are using every fucking rule in the book - and by book I mean The Elders of mother fuckers / Machiavelli / Prince / The Art of War / and every psychopath's wet dream type play book/ etc...) - to trick us and and manipulate our people in order to win!!!! We should fucking do the same. Wake up white people! The best way to win is to play as dirty or even dirtier than (((them))) we will NOT win ever if we play clean... Let's figure out what WINNING looks like and work backwards to achieve that goal.

I believe that we will win when we fight one (((enemy))) at a time. That is exactly what (((they))) are doing!!! They don't love immigrants! They don't love Avangelists, they don't like Mexicans and minorites. They are just using them as missiles to hurt us. They will take care of the rest after we are no longer. For the love of Jesus, lets learn from (((them))) and use similar tactics! The end goal is WINNING! I believe that once we overcome the biggest (((threat))) to our existence, the rest is child play. We will be able to take care of the riff raff. The rest does not own us the way (((they))) do. Cut the snake head first. The rest will crumble.

- I had a few drinks tonight, please excuse my rant as it is coming from straight from my heart and not filtered through my mind as usual.

I agree. We should do the same, and many of us are.

I'm just a mouth piece spreading the fundamental ideas. Other people people implement. We should act independently, but towards a common goal.

When we have enough people, we will unify into a new government or take back occupation of this one.

Yeah, maybe an all black party could break the democrats and it would never win election outside of the ghetto.
It'd steal votes from the democrats ensuring they can never win and blacks are too stupid to realize they are just throwing away their votes. I'm sure the democrats would figure out how to make them illegal, though.

Blacks have occasionally voted their people into Congress, even with Jewish democrats trying their campaigns down.

If you're pathetic enough that you need free shit to survive, you won't stop voting for it until the option is taken away.

I beg to differ. Waking up minorities to self representation is poison for the democratic White Jewish candidates.

I think waking up "minorities" to the lack of minority self representation is the best way to get people to stop voting democrat.

**White Jews are continually presenting themselves as if they can represent the interests of Blacks, Mexicans, Chinese, etc..
But the fact of the matter is that NO ONE CAN REPRESENT AN ETHNICITY TO WHICH THEY DO NOT BELONG.**

Just like Jews cannot be trusted to represent White interests, Jews cannot be trusted to represent Black, Mexican, etc. interests.

However, I think White Nationalists need to run as Democrats and Republicans. This is our country after all. Why would we ever allow a party which doesn't represent our interests?

My neighborhood is getting a little bit South of the Border so this weekend I hung a nice big American flag I hope others follow my trend. Because after living there for 30 years I sure as hell ain't moving out I will defend my neighborhood.

You'd do better to post ICE information hotline number fliers around the city and do a little false flagging by tagging with the name of a rival gang/cartel. Then the Mexicans will start killing their own searching for their rivals while the Whites report illegals.

The drug cartels actually move in Mexican populations to disguise their drug trafficking activities. Mexican cartels only use Mexicans for almost their entire operation. Only the last link of dealers sometimes isn't Mexican. They do this because they have control over Mexicans because they can easily kill Mexican relatives still in Mexico.

TOTALLY!!

Which is why you've created your own banking and media conglomerates and robbed them of their power... as opposed to feebly whining about them on a message board.

My family has a fund which owns 2 banks, one of which exists solely to service our kin allowing us access to ultra low interest loans. If a loan is dodgy, they package it up into a financial product and sell it to your pension fund.

As for media, I'm a one man social media powerhouse. Message boards is where public opinion is made today.

The only reason Jews have continually become a problem again and again is because in the past they could pose as other ethnicities

Part of the reason they go after the Goy's foreskin! Easier for them to blend in if shit hits the fan for them if it's common practice to mutilate most babies.

That is a very good point I hadn't considered before.

It would be far better to embrace national flags and frame all opposition as a foreign and hostile influence.

That's the strategy the Jews had in mind post WW2 when they called all other national movements "Nazi" and implanted people using Swastikas to make White Nationalism appear as a hostile foreign incursion.

The only reason jews have any influence today is due to the industrial and technological revolutions. If we all stopped chasing the dollar and started living self-sufficiently in tribes again, the system would collapse within days, and the jews would be toast.

That's not true.

Jews have influence today because they are the perfect pawn. They exist across Western nations, they're self serving enough to betray their own people, and they're also tribal and capable of networking to accomplish something. That means, if you want something done without tying it to you, you can bribe one Jew to fool the other Jews into thinking something is in their own self interest, like creating Israel. And when they get caught, the Jews get blamed and no one ever looks any further into the matter.

you can say a lot of things about jews, but calling people who have successfully controlled and manipulated the worlds monetary systems for no less than 600 years dumb seems kind of, well, dumb. never underestimate your oponent.

Assuming they do control the world's monetary systems and aren't just the public face of it.

I've seen the people that are supposedly Jews controlling banks. Maybe they were Jews 200 years ago, but generations of breeding with elite Anglo Saxons have made them one of us and Jews are just a gang of rabble, pawns, from their perspective. Look at the English Rothschild's branch, not that they control much of anything now, and tell me if they look like Jews.

I wish vigilantism would make a comeback. When I was a child, I used to imagine setting up a group vigilantes and going round dishing out karma to scumbags who hurt animals, children, etc.

The media doesn't like copy cats. Vigilantism is alive and well.

What you're experiencing is called a conscience. It's the basis of morality. Don't let the media convince you that killing the bad guy is immoral or that a corrupt court is a moral authority.

You don't have to kill the people, there are thousands of ways to ruin someone. Socially, financially, legally, or just psychological warfare until they suicide. Never confront them directly, never say why you're doing this to them, never brag, write down, or tell others about what you've done.

Lifting weights is like brushing your teeth. If you aren't doing it, as a man, your parents didn't raise you right and you need to start.

You don't need to be ripped (low body fat), but you need to have bulk muscle. Even obese men are more attractive if they have significant muscle mass.

10 minutes a day doing HIIT will get you 21" biceps if you eat enough protein. You can easily gain 40lb of muscle in a year, up to the limits of your physiology, doing HIIT.

There are only two supplements worth taking, creatine and whey. Maybe DHEA if your hormone production is declining.

Tesla has a market cap of 51.13 billion dollars, \$51,130,000,000. Soros has invested \$35,000,000, which is .06% of the entire value of the company. Soros wouldn't even be given a front row seat at a share holder meeting! He is probably just trying to earn a few million bucks quick so he can fund some commies shit parade.

Doesn't this say Soros bought bonds? He wouldn't get a seat at a share holder meeting even if he bought all the bonds issued, to my knowledge.

Bonds are just a form of limited loan, it doesn't give you any say in the company.

This article is pure defamation against White Nationalists equating us with common criminals.

Just because a criminal carries an American Flag it doesn't mean Americans are all criminals.

Personally, I have never been convicted of any crime. I never stole anything past my toddler years. I don't use any sort of drugs. I don't even speed.

This article is pure defamation of Whites.

Say Jews push immigration in White countries, so we distribute flyers to boycott Israeli companies.

Not the best move imo. It might help bring attention to the laws that prohibit boycotting Israel, but the normies accept this as okay.

However "open borders for Israel" is strong as fuck, imo. They love promoting own borders, so making them be consistent with their beliefs will cause them to stammer and destroy their own position.

Apply this concept to your other examples and you'll be in a better position.

This kind of political rhetoric is what's winning, it appears to me. Open borders for Israel, Jewish supremacy, it's okay to be white, how will Jewish universities survive without an increase in diversity?, these are all the strongest weapons that are all fairly new on the scene.. And they work.

[openbordersforisrael](#) is the best.

We really need more people in Europe carrying this slogan in various languages though.

You are running those narratives. but I live in one of the most densely concentrated areas. We talk. White people are idiots and giving up power on the daily for easy ass, cheap tv and watered down beer.

If you are a white nationalist you gotta fix your own group. All the jews I know are highly educated and very dedicated workers. Their kids go to school for 8-10 hours a day not the weak 6 hours that public school kids do.

They put in the effort to get ahead so they do. If you aren't doing those things you don't have room to talk. I do. That's why I get to work with them.

Lol. And Jews have an average IQ of 104, except when in Israel where the average IQ is 94?

Tell me another one Rabbi!

Read my bit and tell me what you think?

Short: I'm a racial preservationist, 'racist' is a whitephobic racial slur used to stop whites from doing what is best for white survival.

Long: Many today speak a commie marxist language, oppressor versus oppressed <https://i.imgur.com/WF8JyLV.png>  they have been told in all ways whitey is to blame for all worldly wrongs, this is a mind virus, here is a crash course and antidote:

Terms like xenophobia, white privilege, nazi, white supremacist, diversity, racism and so on are whitephobic terms aimed to take advantage of white's overly strong sense of kindness and empathy, in an effort to disarm whites from doing what is best for white survival.

Racism has a new meaning; anything good for whites is 'racist', anything bad for whites can never be called racist. Blacks targeting whites with rape? Blacks exterminating whites in South Africa? Doesn't matter, whites deserve it, can't be racist to whites.

<https://i.imgur.com/9Cz1bIH.png> 

The word racism is a whitephobic racial slur, I am a racial preservationist and do what is best for white survival.

I think saying "racism" is "whitephobic" causes people to associate racism exclusively with Whites and further defames us.

It would be far better to expose the double standards and beat anti-Whites over the head with the term "racist".

Calling non-Whites racist is extremely effective in practice. I've used it, I've seen the results, it's just as powerful against non-Whites as it is against Whites.

Spotted In New York: Bankers Against Bitcoin by [penisse](#) in [whatever](#)

This is obviously a false flag by bitcoin holders.

1. Bitcoin advances the cashless society agenda. Without cash, dissent can be shut down instantly by freezing accounts.
2. Bitcoin is insecure. It has been proven to be profitable to systematically check all bitcoin accounts, which don't actually have a password because the account seed is the password, using cloud computing. At any time it can be shut down or forced into the hands of a private group to "protect" the ledgers from being spammed, except all the seeds can be discovered using already distributed back ups.

Bitcoin is a fun idea. Make money on it if you can. But mark my words, it won't last as is and the bankers will benefit from it in the long term.

Run as a democrat or a republican. It honestly doesn't matter. If the people in your area historically vote dem, run as a dem.

Most candidates are practically anonymous and instead just publish a list of vague positions and have some publicity stunts where they say vague things and make everyone the same promises: More wealth, safety, and better quality of life.

If you analyze political positions enough, they all boil down to a set of promises. They all promise the same thing, the only difference is how you say you'll get to that goal. No one actually cares about the how.

Every group wants power and white males are (for the most part) opportunistic lazy assholes who are selling out themselves. Only they can be blamed.

You're wrong about that.

Jews in the USA are being organized by Israel to advance Israeli interests, including by infiltrating law enforcement to target White Nationalist movements and by advancing mass immigration and diversity propaganda and legislation.

No, Jews are the least affected by banning dual citizenship for politicians.

They can easily give you their Israeli citizenship, and get it back whenever they want because of Israeli law.

Jews do it all the time. Some give up their citizenship when they come here to study, then get it back when they return to Israel after finishing their degree.

Ban dual citizenship for politicians, and they will give up their Israeli one without a second thought when they run for office. If they lose, or after they retire, they will get it back within a week.

That's a good point. We should bring it up during the debate and ban all Jews from having US citizenship.

Still waiting on a reply from him. But yeah, 100% agree. His optics are actually pretty good, he knows his shit, he's a fucking marine. All in.

It's far better to maintain radio silence from my perspective.

I don't need to tell him I'm running interference for him from the shadows for instance, and it's far better that I don't because it would endanger OpSec. Smart people don't NEED to communicate directly. They can infer what their peers are thinking and function independently, but as a group.

He's never spoken to me directly, and I would discourage him from doing so. But I can tell he's read my material online and that for that reason he likely knows that people will be running interference for him.

Decentralized movements often occur like this, with distinct disconnected elements working in tangent. It's very hard to stop. That's how we will win back our country.

Coordinated in radio silence. People in all the right places functioning independently towards a common goal. Some of us spread ideas, some of us act, and the two shall never communicate directly.

I like it when people use my name, it makes it feel like I'm talking to a real person.

I've noticed that every ideology proposes the same things, the difference is not just their explanations, but what they propose, and what works out in real life. "Perfect communism" (which doesn't exist) would be great: everything for everyone, and free shit everywhere, only work when you want to, sounds great. The reason I'm against it is not because I don't want people to be happy, but because in practice it never works that way. They think that if "the people" take over the local mill, they can make flour for everyone. But what actually happens is that they break the mill because they have no idea how to use it (or they'd have their own), which means no flour (and bread) for anyone, everyone dies.

When you refer to white people, what you really mean is people that think and act exactly like you. You (and I) are white, but that doesn't make us think the same. Every race has an IQ distribution, so you're going to get some really smart whites, and some really dumb whites too. Also, just because people are white, doesn't mean they won't betray their own race for monetary gain. [This cunt](#) looks pretty white doesn't he? Send your thanks to him for selling your country to the Rothschilds.

Liberty and freedom are possible when everyone is willing to fight and die for them. The first amendment in the US ensures liberty, and the second amendment protects the first, and provides the means for the population to rebel against their government. Foreign powers can only take away your country through war, or your own government. If your government is extremely small, then even if it is taken over, nothing can really be done because they just don't have enough power to do anything.

What you want is a libertarian party, smallest possible government, no or zero taxes, no welfare state. I GUARAN-FUCKING-TEE you that if you got rid of the welfare state, or made a quarantine state (like hawaii) that was the only one with welfare, the vast majority of niggers, spics, and even trailer trash, would leave the mainland. So many people came to the US, and many of them simply went home because they couldn't make it. The difference today is that welfare keeps them afloat. If everyone has guns, and they open carry, even the niggers who can survive through theft and other crime, won't last long.

That was a really long post. I didn't finish it. Or start it.

Burner phones can also take pictures and video. That makes it a better way to spend \$40 than for just a microphone, as far as I see it.

Except that burner phones could end up collecting information on you and would absolutely give them access to the information you have collected in advance, and allow them to delete it remotely.

Jews Manipulate All Sides, Pretending To Aid Everyone While Sabotaging Them All. How Can We Take Their Sociological Niche? by [butters4eva](#) in [whatever3](#)

We don't want their sociological niche.

Look at history - while it is true that the ruling class among the Jews will often do things to benefit Jews as a whole (at least for Ashkenazim, or at least relative to non-Jews), there are just as many examples of the Jewish ruling elite screwing over their own populations in a bid for power. They will happily watch countless Jews die, or put under tyranny, if it helps establish global hegemony for themselves.

We risk this if we use their manipulative tactics. There are absolutely white people who would stand for white people as long as it gave them power, but would happily throw white people under the bus and hide it (or use it as a victim narrative to rally whites against an enemy of the elite) if it gave them power.

What we need is a system that does not allow manipulators and rent-seekers into positions of power. We need a tribal system, where the leader is the person mostly likely (and most capable) of leading for the interests of the group.

Also, look at the results of the Jewish ruling class trying to screw everyone else. They are hated pretty much everywhere they go. There have been dozens of times where a wide variety of people have had to kick them out of their host nations, because the Jewish corruption was burning down the whole society. Do we want to be like that?

Let us build strength in our own societies, for our own societies, without the corruption inherent to the Jewish ruling elite's manipulative tactics. Let's set ourselves up to be able to build allies on the world stage, if we need to, without having to buy out all of their politicians and making them weak and corrupt hives of bullshit.

We don't want their niche. We want a system where their niche doesn't exist.

Often people don't reject a system until it spirals out of control. We can do that if we have people in all the right places.

You must not live in a coastal city. Liberal whites are so self sacrificing to look morally superior it'll make you blow yourself. Even if you couldn't before after one convo you'll go home suck your own dick just to try to comprehend their logic and now after swallowing, your own existence

I live in a coastal city and my hatred of Israel as a Lefty is what brought me here. I am a convert to White nationalism, but I still can speak the Lefty language and have considerable indirect influence within the Lefty sphere.

White Nationalism has to transcend the Jewish paradigms of Left and Right, so sayeth the architect.

There is a certain logic to Leftism and to Rightism, the difference between the two is in what groups should be the benefactors of policy. I've experienced discrimination for being White enough times now that I don't believe in diversity anymore. I'm not malicious towards other ethnic groups, but I know that the diversity dream is a pipe dream and mass immigration is just setting us up for civil war and possibly, if we don't take back control now, genocide of the White ethnicity.

You'd be surprised how hard that actually would be to accomplish. Identifying MAC id's that connect to the WiFi is fine, but a \$40 burner phone in Airplane Mode that's doing nothing but acting as an audio logger on your pocket? Much more difficult.

Why do you need a burner phone when a truly offline and non-bluetooth accessible MP3 player will do the same and make it a whole lot easier to upload the MP3 online.

OP is closer to the mark than you think. The people parading around as Hebrews today with Jewish last names are not "God's chosen people" from the bible they are eastern european ashkenazim. The descendants of the 'wanderers of the desert' that Moses led out of Egypt are mostly dead or diluted to Caucasian. All the Jews taking offense all the time are probably not even remotely closely related to the Hebrews.

There was a study done on one bloodline, last name Cohen meaning Priest. Levi's brother Aaron was Cohen of the tribe of Levi. Some living Cohens have actual Hebrew blood in them.

Wroooong.

Jews didn't even have last names until the 18th century to avoid paying taxes. There is no basis for the Cohen surname except that they picked it when finally forced to use a surname for tax purposes. Jewish geneology past a 5 generations simply doesn't exist.

Everyone has a cell phone that can record.

Do we necessarily want to potentially give them a heads?

Creating a program to use aggregated telecom info to identify cell phones recording within say, the GPS coordinates of a synagogue, would be trivial and we know from experience that they do things like this.

And they can remotely delete it and regularly do that kind of thing.

No. You have to have an ideology of liberty and freedom.

I don't care if you're 100% white, blonde hair, blue eyes, perfect Aryan. If you want to do things like ban guns, and increase taxes/welfare, you may as well be a nigger.

All this shit is is Marxism. You have classic Marxism (proletariat and bourgeoisie), cultural Marxism, and this is just race based Marxism where the whites are the good guys or the "oppressed class". It's all marxism, it's all bullshit. It all leads to the same bullshit Communism.

Matthew, if you haven't noticed already, every political ideology promises people the same things. They only vary in their explanations of why people don't already have those things and how to get them.

As a group, we need to move past the paradigm of Left and Right, Communist and Capitalist, etc. etc. and reintegrate our people into a protectionist collective. But how do we achieve that?

I have transcended political parties and walk freely between political camps spreading my messages in whatever political tongue is spoken there.

Liberty and freedom are wonderful things, but they are something that is established by force and destroyed when foreign powers have taken the reigns of our countries away from us. We do not have freedom of speech right now and we do not have liberty and that is because we do not have White sovereignty and the non-Whites simply don't share our values.

Keeping in mind that Jews sometimes push white nationalists, like Richard Spencer, to try and spark civil war, or at least violence that helps them tighten down regulations on guns and speech.

Richard Spencer is a Zionist you fool.

Maybe you didn't notice Jewish media giving him the spotlight and him throwing Nazi German salutes in order to defame American White Nationalists.

Richard Spencer will end up with the other race traitors hanging from the lamp posts after a brief trial. That is the price of committing treason against Whites. Unless, perhaps, he deals a lethal blow to the Jews before it is clear we will win against them for the 500th time.

No way, that's awesome.

How do you get elected? Do you need to be hot or have a J.D?

Most of the time you can be elected by simply entering your name as a candidate.

That's why I'm saying, we just need to spam all the elections to start out with, then we can mount on the ground campaigns and protest without corrupt police cracking down on us.

Interesting. I'll look into it.

Do they get to make any decisions on how to handle the jewish problem in the city?

If you're on the city council, you can prevent Jews from shutting down White Nationalist activities, yes.

Most White Nationalist movements that get past the brainwashing that Jews are omnipotent are killed on the ground by city council members ordering the police to target them. If you're the city council members, they can't do that.

Except most of those candidates will be controlled op funded by kikes.

We can give everyone in the USA the impression that future generations will change the laws to torture and execute Zionists and their descendants for their crimes against Whites today. Which is not a misleading statement since that is exactly what we intend to do. History has shown Jewish plots ALWAYS fail and they are purged from their host countries. There is no uncertainty at all about what will happen to race traitor Whites and their families.

These race traitor Whites aid the Jew because they believe it will give them and their family social mobility. When they realize that it will instead end their family in horrendous fashion they won't side with the Jew.

People only side with the Jew because they have been made ignorant of what happens to people that conspire with the Jews. End that ignorance and you will end their double dealing.

Some of us here should run. Just to see what happens. We could ask people who plan on running to put together a website, doesn't have to be anything fancy, just information on where they stand on the issues and where/what they plan on running for. Then we as individuals donate to the campaigns that seem like they might have a chance or at the very least, cause a stir with the status quo.

I would run on a platform of I'm not a democrat or republican. Democrats and republican candidates represent the hopes and dreams of a handful of people in their parties, my goals is to represent the people who vote for me. Here's my website. Here's where I stand on the issues. Here's how you write my name onto the ballot. Then just see what happens.

I can't tell you how many times I've looked at a ballot and just threw it in the trash. There's never anyone on the ballot that I would ever have interest in voting for, specially living in a liberal state of liberal ballot stuffers. I know I'm not alone in not caring for our current crop of Jews running to represent us, maybe there are more people out there than we realize.

We should run for local seats first so that the Jews can't suppress campaigns for state senate, governor, fed senate, and president.

Local seats on city councils are easy to win, you just have to spam candidates.

We also need to spam the Grand Juries.

This is assuming that the MSM didn't do this deliberately knowing that people have an instinctive reaction to oppose that which another is directly trying to convince them of.

If I tell you I've got a million dollars directly, you'll doubt me.

If I "accidentally" drop a bank statement receipt in your house or car that says I have millions in my bank account, you will believe without a doubt that I'm a millionaire.

It's basic human psychology. By instructing people directly to a conclusion without providing significant justification, you're actually causing them to reject what you're saying. There are exceptions to this, but that's the general rule.

A lot of the coverage I see on the media is actually favorable to Trump, like the news about "two scoops". The MSM isn't stupid, they know what they're doing. Trump ran as an underdog and the big bad media theatrically treated him as an underdog. All of this plays directly into the psychology of a very distrusting public. Trump is an actor, just like Obama and Bush Jr.. He's carrying out the same agendas as the previous two presidents.

So you try those psyops here first? Cause this seems awfully unpolished.

Who knows. Who knows.

Psyops is rarely a hit or miss game when dealing with populations. On the internet, it's a game of spamming a panoply of themes. You gotta grind to get this view.

It's only when you're dealing with individuals or individual concerns that you have to use a test group because you've only got one shot to do it right. If you do it wrong, your target gets paranoid and while you can direct that paranoia their personal snapping point makes them not entirely predictable.

There is a crack down on the Israelis though. The USA has had enough. China is trying to get in on the Israelis game. There are too many termites in the walls so they're bringing in the tent.

The problem is, it's not just a religion to them. It's a race, it's a culture, it's a business, it's a secret society, it's a victim status, etc. It's a lot of things to these people who call themselves jews.

Hitler was the last person that tried to remove them from Europe. The problem is they own and control the media and the press. If we could remove all jewish influence (including their zionist supporters) from the media and press then it would be over for them.

Too many people are duped by jews false narrative. Many people have it ingrained in their heads that criticizing jews is evil.

Many Christians are so stupid they think the jews are somehow still the chosen people even after they murdered Christ.

Christians are the chosen people. judaism is a dead religion.

This is why you see many attempts at trying to control the internet. All the censorship. They realize that they are losing their monopoly on the press with web sites that don't jew censor.

Matt, you also need to include their psychological warfare against Whites where they convince Whites that Jews control everything in order to demoralize Whites from taking any real actions against them.

Most Whites have been brainwashed to believe they can't do anything against the Jews, but the reality is we are the majority and if we wanted to we could kill them all overnight Rwanda-style. Whites are smart and still in the majority in many White nations. The biggest problem is that we believe we are powerless.

You're well-spoken. You need to make some uploads telling this stuff. Get the cogs twisting.

Thank you.

Most Americans are political and economic non-actors. They're too demoralized to take things into their own hands so their opinions don't matter.

I post here because voat has become a node in the chan/think tank axis. Some of the things I've posted here, under other accounts, have ended up on television, have been included in think tank reports, and are being analyzed by governments. Voat has been a great conduit to influence these groups so far. Really, I'm posting to influence them, to give them something to think about, and to make them change their strategies.

Glow in the darks are very careful about the ideas and people they allow into their organizations and so it's not feasible to shape the opinions of their recruits before hand. But if I say something that triggers enough red flags the glow in the darks will read it and make reports, and their superiors will read the reports. If I word things right, I can get top people reading my word for word communication; I can get directly into the heart of these groups.

If the aristocracy of France had paid attention to the peasant culture, they would have known from art and media that a revolution was coming. They would have appeased the peasants by making economic and legal changes to prevent a revolution. The bankers and the world superpowers learned this lesson and pay close attention to peasant culture.

I'm just telling them they need to make some changes.

What could the Jews really do about it? After all the laws the Jews have created to allow them to distribute disgusting pornography, they wouldn't have a sucked off baby penis to stand on. They couldn't hurt me financially, as the more they attacked me the more people would know about the toilet paper and the more I would sell.

You're right.

Whenever they attack with media shaming they only elevate the person their attacking to a media personality, which is a big mistake if that person starts using that publicity for their cause.

There's two pieces of info that will be coming sometime that once is made public will cause mass hatred for jews. It is over for them. Americans will hunt them like animals once these two things are released.

Two?

I happen to know there are databases on specifically Israeli crimes against and in the USA being sequestered for a time when the courts are ready to prosecute them or extradite them from other countries. After Israel falls, these Israelis are going to be narrated by US media as terrorists and hunted down. If somehow Israel miraculously doesn't get destroyed by war, Bibi is going to get Gadhaifid for threatening US officials.

Why it didn't already happen remains a mystery

Because the CIA niggers protect their own.

If you've been involved with a dark project like the Clintons were, smuggling drugs and money in order to fund various CIA operations off the books, the CIA will protect you for life and consider any of your dirty business to be just another angle that can be played later. It's a very bad policy.

That's why we need to start using modern tech like retina scanning to prevent Jews from slipping back in.

There are plenty of people and organizations tracking every Jew through various means.

Lacking information about these people is a big part of why they have not been purged in the past, but now we have DNA testing, a huge amount of data from the internet, phone records, personal computer records (thank you microsoft), etc..

The Jews also showed us how to create extensive back channels between governments in order to deal with enemies abroad, which are increasingly subverted for our use against them.

And it doesn't help them one bit that Jews are so willing to turn on each other for a buck. Money is all that held their networks together really.

Only the very south(Andalusia) of Spain has any Arab Berber admixture. The range is from 2 to 10% so I don't know how much that would effect physical appearance. The rest of it is full of pure Celtic people and basques. When did you realise it won't ever happen because white american males are the most feminised males in the world.

When did you realise that White American Males are scared if blacks and barely leave their houses.

When did you realise that these same pussy "males" would rather get angry and post on the internet behind anonymity than actually go out and shoot niggers and Muslims and other degenerates.

America is dead. Its just getting the last shovels of dirt thrown on now.

I'm not scared of Blacks if it's full on conflict.

The problem with Black violence is that they usually aren't doing enough to justify killing them. A black person hassling isn't justification enough to kill them, but it's still a problem. It's a situation that doesn't have a clear resolution. All out war with blacks is something I would be fine with though. I'm a good shot and one of my biggest fantasies is going through a zombie scenerio. A race war with blacks is about as close as I'll ever get to that right?

White House considers restrictions barring Chinese citizens from engaging in sensitive research at U.S. universities. Why has this not happened already? by [Dfens](#) in [technology](#)

There were various protections against Chinese spying in place before Bill Clinton.

Bill Clinton's campaign was paid for in large part by the Chinese government through Chinese nationals living in the USA. The money was funneled through Chinese "businesses" and fake Buddhist temples like Hsi Lai in LA. The way it works is large sums of money are funneled through "business" people into the USA, then they distribute it to various people that then donate, often keeping a fraction of the money. In the case of the fake Buddhist temple Hsi Lai, the "temple", which is funded by the Chinese government for their spy operations in Taiwan and the USA, hosted Bill Clinton's fund raiser then had all the guests make large sum "donations" with their own bank accounts and the temple cut them a check for it, which they said was a loan that was never to be paid back. Because it wasn't a loan, they were just distributing money from China for bribing the Clintons.

Because Bill Clinton accepted the money, China has blackmail dirt on the Clintons and thus the Clintons cover up China's botched operations in the USA. Bill Clinton himself took part in CIA drug smuggling and so the CIA has to cover up Bill Clinton's botched operations too. The USA government has its hands tied because too many people have blackmail material on each other.

Plenty of people know about China's operations in the USA, but traitors like the Clintons are involved in so much shit that they are keeping the entire law enforcement and national security apparatus from working. We will be so much better off after the Clintons are finally dead. Then China and their spies in the USA will be fucked.

And that's considering they can make the distinction, to begin with.
Most people don't make a distinction between the zog, the us gov, the us citizenry. It's just "America"
Anyways, arab muslims usually don't make ideal neighbors, but that's another topic

The average Arab is acutely aware that Americans don't control their own government.
You can actually travel to Iran as an American citizen and tell people there and there's no hatred at all.

De Beers has a literal warehouse full of these worthless stones. They control the market price by dribbling out a truly massive supply. Diamonds are *not* rare stones. Aquamarine is a fucking rare stone, and it's actually beautiful. Diamonds just look like glass.

Do not buy your girl/wife diamonds. Make her watch this and then get here something actually rare. <https://hooktube.com/watch?v=Nlrvpu0lrts> HookTube

edit - there are many other videos you could show her. I just picked this one because it has what looks like a liberal chick in it. Pick whatever video you want, just don't buy fucking diamonds.

My family does emeralds exclusively for wedding rings. We also give two sets, one with emerald and one that's just a gold band.

The gold band is for regular use, the emeralds are for events.

When stating facts becomes the wrong thing to do, that's when you create propaganda. That's why news needs to be backed up by sources. Otherwise, pigs can fly and we are all supermen and whites are winning and Jews are losing. Who cares about moral? We need facts.

What's wrong with propoganda if it benefits your people?

Every news station has to cherry pick what they report on. There is no way to avoid bias when conveying limited information. So why not just skip that part all together? Most people don't even read more than the headline.

Israel as a state has a vested interest in forcing the migration of Jews from the Western world into Israel.

Not really. Israeli conservative jews especially hate these diaspora liberal jews and view them as race traitors.

Israel is actually a better place to work for high IQ merit-based goy like me than all these white nations controlled by libtarded jews and their welfare and their AA/diversity hire bullshit that I do not benefit from.

or go to Israel and live among other predatory Jews

Obviously you never lived in Israel to say this kind of ignorant shit. Israel is one of the best place to work in the world for people who like urban life. In Israel, if you are a skilled migrant you're set for life, AND you will definitely vote alongside the jewish supremacist/ultranationalist to limit "affirmative action" towards arabs, women, blacks, etc.

I won't affirm or deny my having been to duh holayland.

But Israel is Mexico with more screaming Arab hybrids. (Yes, Mexicans are also part Arab.)

Israel is indistinguishable from the other Arab shitholes in the Middle East. Saudi Arabia is far cleaner, nicer, and civilized honestly.

Are you saying 3D printed stuff is less durable than the crap you buy at walmart?

Yes. The resins used in 3D printing are not as strongly held together as injection molded parts. They are made of layers that often don't fuse together well. They also contain a non-zero amount of water that causes defects in the layers and leads to weak point. FDM (fused deposition modelling) cannot mix the layers well so using glass fiber reinforced materials such as Nylon so the reinforcement material can only do its job in one dimension. Polymers such as thermoset plastics are also not as usable because they aren't very compatible with FDM (though ABS does alright). PLA (polylactic acid) resins are not good for long term water exposure and flexible materials like TPU (thermal polyurethane) will get destroyed by water. Proper injection molding with the right resin or elastomer makes for huge improvements in durability. That Walmart piece of crap would easily outlast a 3D printed replacement for this reason alone. I would trust a Walmart can opener far more than a 3D printed one, which would only be made of plastic anyway. Also, I can buy a large plastic chair cheaply at Walmart and use it for years (which I have) but I can't 3D print one because it is too large and the materials would far exceed the cost of me buying one from Walmart.

I have bought 4 can openers in the past half a year and they all broke.

I don't know what you're doing with your can openers, but I buy cheap ones and they last me years. The last one I replaced, which I had for years, only got replaced because it accidentally got thrown out. I rarely have to replace my cheap goods so it's not a function of how they are made so much as how they are used. I take care of my things and they last. I also take care of my 3D printed items, but they break more often then my cheap goods. That speaks volumes to me. \$10 GoPro drone camera mount from China- still going after many rough crashes. 3D printed copy of it- broke after one small crash. Yup.

I ain't reading that shit nigga.

From my point of view, plastic is a wonderful carbon sink offsetting global warming for a time. If you were to break it down into CO2 H2O and various nitrogen compounds you would be contributing many tons of CO2 to the air, though I don't have a figure for quite how much.

We should appreciate that this carbon isn't entering the atmosphere for the time being.

Power consolidation by the (((world's elite))) has been largely the consequence of central banking. There is plenty of well sourced evidence pointing to it being this way by design. This comes straight from the horses mouth which is extensively documented by "The Creature of Jekyll Island".

Educate yourself.

Power consolidation in families can only last a few generations. Consider the history of European monarchies.

When a powerful family grows, they produce many branches. Every 2 or 3 generations these families cannibalize themselves and it's not always one of their own that ends up continuing the monarchy.

If it came to wanting to use biodegradable stuff instead of plastic, we wouldn't have to clear cut forests.

We'd just use bamboo. Easy to work with, and there's ways to make it into stuff like paper and cardboard. At the very least, we could break it down into its constituents and play with them that way until we figure out how to use it.

Problem is, plastic is cheap. Cheap and easy to work with. Until that changes, nobody's going to look for alternatives, environment be damned.

It's cheap so long as we use gasoline.

Realistically, plastic will become biodegradable. There are already bacteria that can degrade plastic, soon there will be fungus with the ability.

At one time cellulose was not digestible by any organism on Earth and plant material just piled up. It's the same with plastic. The more we produce, the more incentive there is for plastic digesting genes to proliferate.

You obviously don't have a 3D printer. If you did you would know that they are not good enough for durable products. You would also realize that all you can do with the is print parts such as enclosures and simple, non-precision mechanical parts which would only suffice for simple machines and devices. Without the ability to manufacture microelectronic circuits, optical components and power delivery systems (such as motors), a fully functional and finished device is not going to be possible. And lets not forget metal parts. 3D printed metal is still very early in its capabilities and it can't make hardened parts or precision machined features. 3D printers are gimmicks and the future doesn't look too promising because they have too many constraints. The materials they use are not cheap and their accuracy leaves much to be desired. I have a 3D printer and a laser cutter and I know their limitations. I can do a lot with them, but ultimately I cannot do it cheaper than a large scale manufacturer can do or with better results. All the people who have so much faith in the technology are the ones who don't understand how limited they really are. You learn that by using them. Sure there will be incremental improvements over time, but much like the mouse trap, it's hard to improve on the tried and true ways afforded by well honed traditional manufacturing techniques.

I didn't read your entire post.

Are you saying 3D printed stuff is less durable than the crap you buy at walmart? When you buy from a big box store, it's designed to break. I shop at thrift stores specifically to find stuff that won't break since the new stuff is crap. I have bought 4 can openers in the past half a year and they all broke. I agree that the weaponized mass immigration from shithole countries is resulting in an "exodus" of Jews to Israel from Europe, but the ones we have in America are still too comfortable to join them.

If they were so comfortable, they wouldn't have been conspiring with Israel in the first place.

Israel is their plan B. They're keenly aware of what happens when Jews abuse their host nation for too long.

Well, even Hitler allowed half-Jews to command troops in the army and whatnot. So anything is possible.

However, given the cruelty of the weaponized mass immigration targeting every single white nation on earth, I'd say they don't deserve any mercy. They are clearly showing us none. Their plan is obviously the complete dispossession and destruction of white people everywhere.

Mercy needs to be redefined as something you show to your own people only.

Global Trade Is Breaking Down. 3D Printing Is Making Asia Obsolete. The Age of Getting Rich By Importing Is Ending Along With the Primary Financial Reason To Back Globalist Policies. by [butters4eva](#) in [whatever](#)

With automation and particularly 3D printing, it will no longer make sense to ship materials to China for processing into finished products.

Show me one mainstream, mass produced product that is 3D printed. 3D printing is not very efficient at scaling compared to injection molding and other traditional fabricating techniques. Also, 3D printed plastic parts are not very durable and you can't use as many different specialty polymers as injection molding. Its only true advantage in industry right now is for prototyping and small run manufacturing where injection mold making costs exceed the cost of making the small run of items and quality/durability is not a big factor. Automation has been in factories for decades and it has not eliminated human workers because automation is not perfect. A bunch of Chinese factory workers working for chicken scratch is more cost effective than automation and robots. Never underestimate the power of cheap labor. Just as the advent of the motorized automobile did not replace the bicycle, automation and 3D printing will not unseat cheap labor and traditional manufacturing techniques.

You're assuming that the printing will be done in a factory, which would be slower than injection. But projections say 3D printing at home will become the norm. So instead of buying a finished products, you will buy the printer and reels of plastic or other materials and perhaps the design for the product. Why buy the DVD when you can stream it on Netflix?

Chinese factory workers are not cheaper than automation. Chinese factories are being rapidly automated, so obviously human labor is not cheaper.

It didn't work in Spain. There, they had "conversos" who converted to Christianity but carried on with their usual nepotism and even hid Jewish religious decorations and whatnot at home. This became such a problem that it led to the Spanish Inquisition.

Sephardic Jews are hardly comparable to the 99% White Jews of Europe.

Many of these so called "White" Jews don't have any of the typical deformities of Jews and have less Jewish genetic material than other Europeans that identify as White. They are only so poisonous and traitorous because of ideology and a false education about their heritage.

You said they were willingly clearing out their desks. I disagreed. How exactly do you plan on "handling" them now that you admit they aren't going anywhere?

I didn't say they weren't going anywhere.

Israel as a state has a vested interest in forcing the migration of Jews from the Western world into Israel. Israel will carry out terrorist attacks on Jews to force their immigration and as they have realized that the spooks will not tolerate Israeli meddling anymore they may even exaggerate or contribute to the Jewish purge to increase their demographic of "White" Jews.

Israelis believe they can make it without Western support by having nukes and selling information they collected from spying on the West to China and Russia. I don't agree with their appraisal, but I have no incentive to contradict them, and frankly they don't have other options so they should go ahead with whatever plan they do have.

No they're not. Jews make up 60% of Harvard graduates. They are firmly cemented in America's halls of power, and they would never give that up willingly. I'm not holding my breath that organizations like Google, Facebook, Disney, and other media conglomerates owned by Jews pass that power to white Americans. When Jews do pass that power to a non-Jew, they almost always give it to a non-white. Case in point: Microsoft's ((Steve Ballmer))) hands the torch to a dot-Indian, and now Microsoft has hired thousands of Indians and opened a headquarters there, thus depriving white Americans from carrying on what Microsoft had accomplished.

You're talking about 2% of the population.

I think we can handle them.

People of Color cannot continue to be represented by Jews any more than we can.

This is the age of SELF representation and Jews that make up only 2% of the population have no place in it.

We need to poison (((Feinstein's))) campaign by redpilling Mexicans and Blacks about self representation and double dealing by "White" Jews.

Blacks and Mexicans have been screwed over by Jews 10X as much as we have. Central and South American history is the history of Jewish bankers profiting on the backs of essentially enslaved peasants. Black history in the USA, Haiti, and much of Africa is the history of Jewish cultural and economic sabotage. And yes, Jewish families like the Du Ponts and Monsantos were the driving force between black slave trade into the Americas.

Their beaches and parks are also filthy as all fuck from everyone refusing to use bins and the government passing the buck by always saying the responsibility of cleaning the beaches lays with a different department. It's just a big circle of "not my job" so nothing gets done and the whole country is slowly starting to look like Haiti as a result.

Goddamn it's going to be a joyous moment when the world condemns those kike rats for being filthy fuckers. I propose we tell them even muslims wash their feet so we make them feel dirtier than those inbred goat fuckers and that no wonder they never claim to anything more than (((fellow white people))) as it would hold them to a higher standard to be our equals.

Lol, they are those inbred goat fuckers though.

European Jews were made better because of European genes they acquired, but fundamentally they are the same ethnicity as the Arabs, Iraqis, etc.. That's what it really means to be Jewish.

No, Q said they have 2 trillion dollars net worth. Largely because of their central bank scams.

Based on the assumption that they profit from central banks still.

I don't know about all the central banks of the world, but the Federal Reserve in the USA only allows banks to buy its stocks.

Meaning, the Rothschilds can only get access to Federal Reserve money by buying stocks in US banks that own Federal Reserve stocks, in theory anyway. I suppose they could own private banks to make this money. The return on those stocks now is 6% across the board, but I guess it used to be much higher for larger ((banks)).

I doubt it. I've had friends visit Israel for "pilgrimage to da holla land" and it's a complete fucking cesspool.

Who knew inviting in so many Arab Jews would turn a country into an Arab shithole?

They brought back video of the people there. It is completely indistinguishable from any other Middle Eastern shithole now, except they use Hebrew characters. Even the buildings are ramshackled and Arabized.
