3 minutes

Shocking are the words of Steve Kirsch, a former Silicon Valley technology executive who set up the Covid-19 Therapy Fund (CETF) to fund research into treatments for Covid-19, in a recent panel pandemic speech. scientists in Pennsylvania.

Mr Kirsch initially revealed that ***"more people died from the vaccine than from the placebo. It should not have worked that way. Our tests show that we save a life for 20,000 people who will be vaccinated. However, more people died from the vaccine.***

Everyone cares about how many lives we save from Covid-19, but no one cares how many we kill with the vaccine. I did the calculations. You save one person for the 20,000 people you vaccinate, which means the

vaccines saved 10,000 lives in one year. 3 million people die every year and we saved 10,000 people! We destroyed the country to save 10,000 people and in the end we did not save even 10,000 people because it has 150,000 people who died from the vaccine.

Nobody talks about them because there is a cover.

Doctors fear that if they speak they will lose their license or be fired.

He went on to say that the actual number of deaths after the vaccine is higher, as there is a record.

"You get 10,000 deaths in VAERS, you multiply them by 41, and you get 410,000 deaths."

Now, if these people were not killed by the vaccine, what killed them?

Nobody wants to answer this question... You know the same goes for insurance companies.

*The CEO of the insurance company in Indiana thought he was just talking to his peers when he mentioned that **there was a 40% increase in the third four months in the deaths of people under the age of 64!***

*That should not have happened. **It is the greatest cause of death in human history! And no one knows what it.....***

*I spoke with funeral homes! **"93% of her cases - so they call the dead bodies, they call them incidents - had***

these clots that no one had ever seen before the release of the vaccines."
