**Name** : Data Enrichment Exposure From PDL Customer

**Bio** : In October 2019, <a href="https://www.troyhunt.com/data-enrichment-people-data-labs-and-another-622m-email-addresses" target="\_blank" rel="noopener">security researchers Vinny Troia and Bob Diachenko identified an unprotected Elasticsearch server holding 1.2 billion records of personal data</a>. The exposed data included an index indicating it was sourced from data enrichment company People Data Labs (PDL) and contained 622 million unique email addresses. The server was not owned by PDL and it's believed a customer failed to properly secure the database. Exposed information included email addresses, phone numbers, social media profiles and job history data.

**Name** : Edmodo

**Website** : edmodo.com

**Bio** : In May 2017, the education platform <a href="https://motherboard.vice.com/en\_us/article/hacker-steals-millions-of-user-account-details-from-education-platform-edmodo" target="\_blank" rel="noopener">Edmodo was hacked</a> resulting in the exposure of 77 million records comprised of over 43 million unique customer email addresses. The data was consequently published to a popular hacking forum and made freely available. The records in the breach included usernames, email addresses and bcrypt hashes of passwords.

**Name** : Jefit

**Website** : jefit.com

**Bio** : In August 2020, the workout tracking app <a href="https://www.jefit.com/jefit-news-product-updates/jefit-data-incident-public-announcement" target="\_blank" rel="noopener">Jefit suffered a data breach</a>. The data was subsequently sold within the hacking community and included over 9 million

email and IP addresses, usernames and passwords stored as either vBulletin or argon2 hashes. Several million cracked passwords later appeared in broad circulation.

**Name** : National Public Data

**Bio** : In April 2024, [a large trove of data made headlines as having exposed &quot;3 billion people&quot; due to a breach of the National Public Data background check service](https://www.troyhunt.com/inside-the-3-billion-people-national-public-data-breach). The initial corpus of data released in the breach contained billions of rows of personal information, including US social security numbers. Further partial data sets were later released including extensive personal information and 134M unique email addresses, although the origin and accuracy of the data remains in question. This breach has been flagged as &quot;unverified&quot; and a full description of the incident is in the link above.

**Name** : River City Media Spam List

**Website** : rivercitymediaonline.com

**Bio** : In January 2017, [a massive trove of data from River City Media was found exposed online](https://web.archive.org/web/20170426084052/https://mackeeper.com/blog/post/339-spammergate-the-fall-of-an-empire). The data was found to contain almost 1.4 billion records including email and IP addresses, names and physical addresses, all of which was used as part of an enormous spam operation. Once de-duplicated, there were 393 million unique email addresses within the exposed data.

**Name** : Straffice

**Website** : straffice.io

**Bio** : In February 2020, Israeli marketing company <a href="https://www.databreachtoday.com/israeli-marketing-company-exposes-contacts-database-a-13785" target="\_blank" rel="noopener">Straffice exposed a database with 140GB of personal data</a>. The publicly accessible Elasticsearch database contained over 300M rows with 49M unique email addresses. Exposed data also included names, phone numbers, physical addresses and genders. In <a href="https://straffice.io/updates.php" target="\_blank" rel="noopener">their breach disclosure message</a>, Straffice stated that &quot;it is impossible to create a totally immune system, and these things can occur&quot;;

**Name** : Verifications.io

**Website** : verifications.io

**Bio** : In February 2019, the email address validation service <a href="https://securitydiscovery.com/800-million-emails-leaked-online-by-email-verification-service" target="\_blank" rel="noopener">verifications.io suffered a data breach</a>. Discovered by <a href="https://twitter.com/mayhemdayone" target="\_blank" rel="noopener">Bob Diachenko</a> and <a href="https://twitter.com/vinnytroia" target="\_blank" rel="noopener">Vinny Troia</a>, the breach was due to the data being stored in a MongoDB instance left publicly facing without a password and resulted in 763 million unique email addresses being exposed. Many records within the data also included additional personal attributes such as names, phone numbers, IP addresses, dates of birth and genders. No passwords were included in the data. The Verifications.io website went offline during the disclosure process, although <a href="https://web.archive.org/web/20190227230352/https://verifications.io/" target="\_blank" rel="noopener">an archived copy remains viewable</a>.

**Name** : Wanelo

**Website** : wanelo.com

**Bio** : In approximately December 2018, the digital mall <a href="https://www.zdnet.com/article/a-hacker-has-dumped-nearly-one-billion-user-records-over-the-past-two-months/" target="\_blank" rel="noopener">Wanelo suffered a data breach</a>. The data was later placed up for sale on a dark web marketplace along with a collection of other data breaches in April 2019. A total of 23 million unique email addresses were included in the breach alongside passwords stored as either MD5 or bcrypt hashes. After the initial HIBP load, further data containing names, shipping addresses and IP addresses were also provided to HIBP, albeit without direct association to the email addresses and passwords. The data was provided to HIBP by a source who requested it be attributed to &quot;JimScott.Sec@protonmail.com&quot;.
