

I keep reading that the Rothschilds own the world through money, so, I started digging into them. Here are some facts and links that I organized starting with some points found on [this site](#) about the Rothschilds:

Reddit removed this as soon as I posted so I am sharing a PDF version

THIS IS A FINANCIAL CLASS WAR. CRITICIZE EVERYTHING!

<http://themillenniumreport.com/2019/08/the-rothschilds-global-crime-syndicate-and-how-it-works/>

1. They bailed out the US Government

“During [1895], the US was going through one of the worst recessions in its young history. The government was running low on gold, and was concerned about not being able to pay off their debts. Naturally, President Grover Cleveland wanted to avoid defaulting on the government’s debts. He reached out to Nathaniel Mayer Rothschild. Rothschild worked with **J.P. Morgan**, and they loaned the government the money to pay off its outstanding debts. This prevented a dreaded default and rescued the US Treasury.”

2. They have ties to the Vatican

“Back when Italy was not yet Italy, a bank owned by the Rothschilds donated large loans to the Papal States and various kings of Naples, the duchy of Parma, and the Grand Duchy of Tuscany. When Italy unified in 1861, the Italian aristocracy declined, and the Rothschilds were forced to close their Naples bank. But rather than this being the end of things in Naples, the Naples branch of the Rothschild family

had become closely tied to the Vatican Bank, and association which continued into the 20th century. In fact, when Carl von Rothschild met Pope Gregory XVI in 1832, he was not required to kiss the Pope's feet."

Vatican and Rothschilds Resources

The Vatican is a permanent observer state of the UN.

The Vatican has a secret property empire.

The Vatican has a bank called The Institute for Works of Religion and is the most secretive bank in the world. They have been involved in many financial scandals. More recently [this one](#) and [this one](#).

Also, this is not connected to the Vatican (as far as I am aware), but it should be mentioned that the Mormon church also has significant involvement in finance through their [Ensign Peak Advisors](#) fund.

7. They are the wealthiest family EVER.

"We've heard of the Rockefellers, the Trumps... the Kardashians. And yes, we've heard of the Rothschilds, but their relative privacy compared to other wealthy families makes it hard to believe that they're actually the wealthiest family... ever. You won't find their names on the Forbes list, however. The wealth has been distributed over the centuries amongst dozens and dozens of heirs, diluting the fortune. But make no mistake, they're pretty wealthy. The estimate – the low estimate, mind you – is that they have \$350 billion USD assets. Higher, and possibly more accurate estimates, put their wealth in the neighborhood of \$1 trillion USD."

The Rothschilds have set up the world's financial institutions making sure they literally receive 90% of the generated interest paid by the populace at large.

According to the "Global Wealth Report," the estimated total wealth of the World was estimated as of 2015 to be \$250 trillion dollars out of which the Rothschilds alone claim half of this amount.

The Rothschild Family were the main backers and massively influential in the decision for Britain to purchase shares in the **[Suez] canal**. This actually led to controversy because then British Prime Minister Benjamin Disraeli did not consult the Parliament.

8. They Throw Weird Parties

"Photographs emerged from a party the family held back in 1972. The strangeness of this party starts with the invitations themselves – they were sent in reverse, only readable if you held up a mirror to read it. Upon arriving at the building, the lights in the front were all red. Guests at these parties would wear animal style heads and masks with multiple faces. Birdcages were also a thing at these parties. This may not seem as crazy or influential as some of these other facts, but it certainly doesn't help the rumors of the family being tied to a number of secret societies."

[Here are some pictures. And more...](#)

9. They Are Linked To A Number Of Conspiracy Theories (funny how these seem to come true..)

Detailed history, and connections to The Payseurs, Araham Lincoln, JFK, Rockefeller

Richard Rothschild invented a 'Method for Testing for COVID-19' and the provisional patent date was in 2015. If this shows that COVID was planned is up for debate. [Check out my post on COVID for some more background.](#)

Overview of the Illuminati and the Rothschild family connection

Tricia Rothschild is the President of the Apex clearing house. (Apex restricted trading of GME in January)

10. They Set The Price Of Gold (From 1919-2004)

“In 1919, the Rothschilds and their colleagues, leading traders of the industry, began meeting twice a day to set the price of gold. Gold became one of the family’s most valuable assets, and it eventually became a benchmark amongst the world markets. The meetings apparently went down like this: several participants would send their representatives to the Rothschild offices. They would then call their trading room and raise the Union Jack. Once all the flags had been lowered, the price had been agreed upon. The daily meetings continued from 1919 to 2004, when Barclays took up the spot that the Rothschilds once held.”

“..The Gold Fixing occurred daily at Rothschild’s headquarters in New Court, St. Swithins Lane, across the road from the Bank of England, with five men from five bullion banks..”

12. They Are Behind One Of The Largest Mining Corporations In The World

“Rio Tinto, a mining company headquartered in Melbourne, Australia, was founded by a Rothschild venture. Founded in 1873 by a group of investors who purchased a mine complex in Spain from the Spanish government. It was at the end of the 1880s that the Rothschilds became involved with the company, and their production increased. The company now produces iron ore, copper, uranium, coal, diamonds and more. The company is all over the world and operates through multiple subsidiaries. Queen Elizabeth herself is rumored to be a shareholder through a private bank account. Mining is just one venture that the enterprising Rothschild family are a part of.”

[A podcast on another? mining company owned by Rothschilds.](#)

14. They Assisted Brazil With Independence

“In the early part of the 19th century, the Brazilian Empire was trying to gain independence from their overlords in Portugal. This meant war, so after a multitude of battles, Portugal complied... sort of. They agreed that Brazil could be independent if they basically paid Portugal for the honor. Well, here’s where

Nathan Mayer Rothschild comes in. Portugal wanted 2 million sterling, and Rothschild was the one to pay up. Now, Brazil did have to agree to pay off any debt the Portuguese government owed to Rothschild's company, which from interest alone must have netted a decent profit. This goes to show what an influence the Rothschild's had on political affairs."

[More info](#)

15. They Played A Part In Napoleon's Defeat

"Believe it or not, the Rothschilds may have played a part in Napoleon's infamous defeat at Waterloo. They were already pretty wealthy at the time of Napoleon's Wars. Nathan Mayer Rothschild entered the fray in 1813 and helped finance the British side to end the wars. The amount he provided would be the equivalent of \$900 million USD today. Precious metal shipments were made to the armies spread across Europe by the Duke of Wellington. **Rothschild may have even known about Napoleon's defeat before the officials knew with his reliable system of couriers.** He bought up government bonds and sold them for a 40% profit years later."

[Info, more info, and more.](#)

Hearing the news Nathan rushed to the stock market and took up his usual position. Nathan Rothschild looked saddened, standing with eyes downcast. Then suddenly he began selling. Playing on their fears, other nervous investors saw Rothschild selling and inferred that Napoleon must have won the Battle of Waterloo. They began selling too in a desperate attempt to salvage what they could from their investments. The market plummeted. Everyone was selling everything. Prices dropped sharply. Nathan then had his agents secretly buy up everything they could for a fraction of their worth mere hours before. [Many claim that one day after the Battle of Waterloo, Nathan Rothschild came to dominate, not only the bond market, but the Bank of England as well.](#)

So who are the members of the Rothschild family?
