

Our World of News

Issue 2024-02-24 - AN OWOT NEWSPAPER BY LEMURIA 00002

FP BLOCKS CHRISTA GRAVESTONE BOT

Incredibly refreshing to see the Square of Publicity in its untainted glory.

# Things you may want to know about OWON & what we think of OWOT Today

Lemuria, our chief editor is very much aware of the existence of OWOT Today, the primary competitor to Our World of News. In this article, he would like to clarify some questions or things that he believes the community may want to know.

What's the difference between OWOT Today (hereafter "OT"), and Our World of News ("OWON")? OT and OWON are both news organizations. Both are one-employee operations - andreixyz runs OT and Lemuria runs OWON. However, OT primarily distributes news articles in text format on Discord, while OWON distributes theirs as a newspaper.

Why did Lemuria start OWON? Because he was bored and wanted to do something.

Will OWON last? Hopefully, it will, but Lemuria is unsure whether he can stay committed to running OWON long-term. His interests rapidly change and tomorrow he could find something more

interesting than OWOT and leave OWON in the dust.

Will OWON just merge with OT? Maybe. But Lemuria wants to do his own thing, independent of OT for now.

Will OT copy OWON's articles? Hopefully not. But Lemuria licensed this newspaper under CC BY 4.0, so OT has the legal right to do so if they credit him. But remember, just because it's legal doesn't mean it's the right thing to do. He would prefer that both organizations create their own original work independent of each other.

Does Lemuria hate OT? No, he has no beef. It's not a full-blown war, it's just friendly competition. Lemuria has no particular social connection to andreixyz - OT's operator.

Can I submit articles to OWON? Sure! Just agree to license them under CC BY 4.0, which is what we use for anything Lemuria adds to the paper. We're not sure about the copyright for the canvas

screenshots, and it's pretty impossible to track down the authors, so they're probably fair use. Read the copyright at the bottom, it clearly says "EVERYTHING EXCEPT SCREENSHOTS OF CANVAS LICENSED UNDER CC BY 4.0".

Yay, I can submit! But how? Send your article to Lemuria in his DMs, which are open. Ping Lemuria in the OWOT server asking him to check, because he might forget (Discord puts his DMs in "Message Requests" for some reason, and he doesn't know which setting turns this off.)

How often is OWON published? Whenever Lemuria feels like it, a big event happens, or there's enough material to publish.

What paper format do we use? We're fully digital, but the paper size is Berliner, 315mm wide and 470mm tall. In freedom units, 12.401" wide, 22.440" tall.

Again, thank you for reading OWON. We hope to see you again!

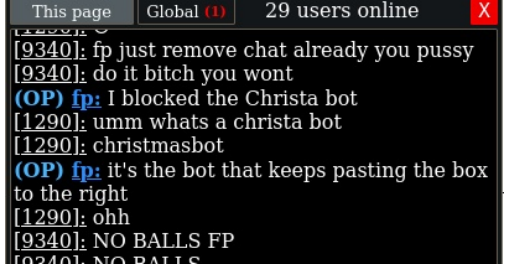

## BOT STILL ACTIVE IN NORTHWEST, NEAR CRAWLER

Finally, we can rejoice! Today, on Feb. 23, 2024, at around 17:42 UTC, FP took action against the Christa bot that had been an eyesore on the Square of Publicity since around Feb. 21 at the least.

The space once occupied by the gravestone has been reclaimed by its rightful owners - the people of OWOT. Will the bot operator finally realize that he needs to shut the fuck up, and that nobody gives a shit about some random lady who died in some disaster over 34 years ago? Seriously, it's been 34 years. Get over it, spammer!

While the bot has moved to the northwest, where the crawler is - it should be out of the way now.

Public reception of the Christa bot remains negative. Placeholder has vowed in Discord to "kill this space woman obsessed prick" while when Lemuria posted the news in Discord, Dimka said "haha L bozo", and Mr. 1052 "christa bot deez nuts". NASA's entire budget must be

FP finally made the announcement that we were all eagerly awaiting.

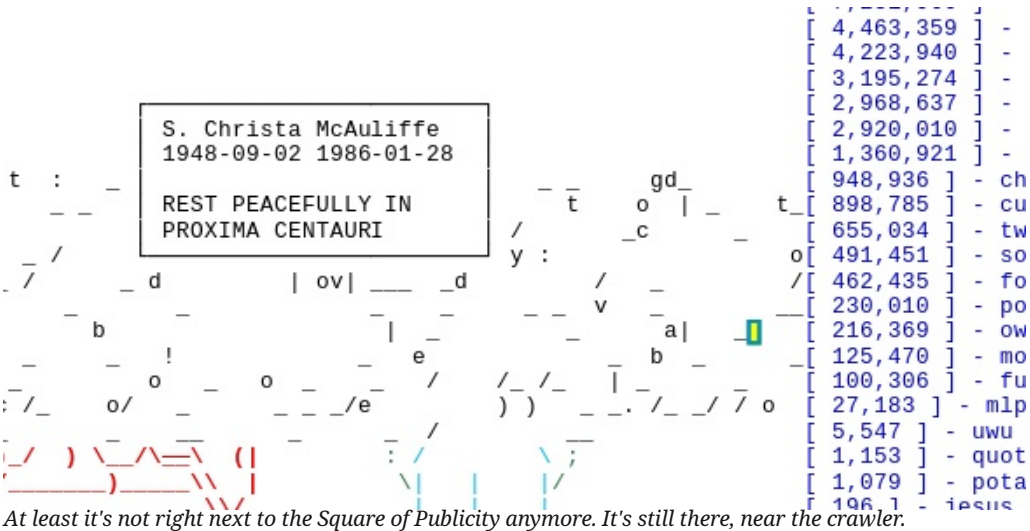

dedicated to buying Christa nuts, we get it.

For now, the next moves of our mysterious Christa spammer will be unknown, but at least we can safely ignore him now.

He'll move on soon enough. But if you're reading this, please understand that nobody cares about this random woman. You're better off mourning Christa somewhere else. Get a job, go to Concord, New Hampshire; Cape Canaveral, Florida; and wherever Christa went during her lifetime. Alternatively, learn diving and go into the Atlantic Ocean and sift through endless kiloliters of water trying to find the atoms that once made up McAuliffe's body.

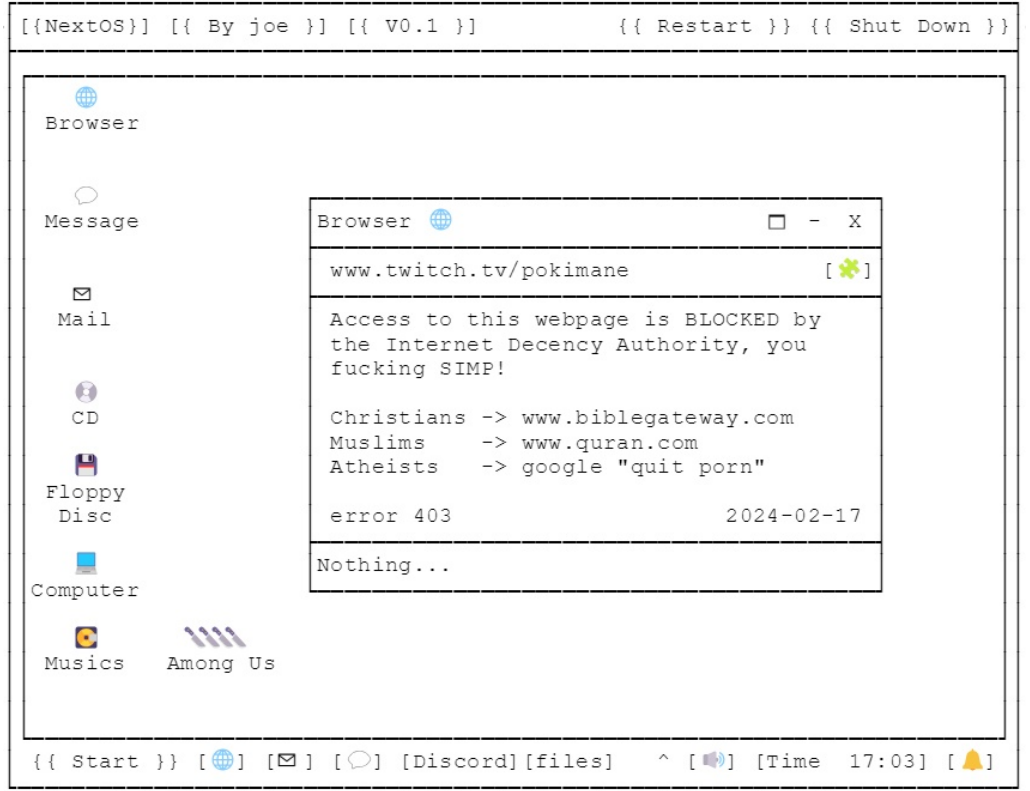

Bonus: If you drown in the North Atlantic Ocean, OWOT will be better off! So on behalf of the entire

Continued Page 2

At least it's not right next to the Square of Publicity anymore. It's still there, near the crawler.

## Today's Daily Screenshot: Stop Watching Pokimane!

Today's daily screenshot, on /main.

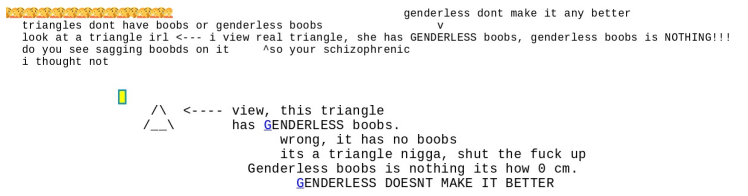

It's a miracle how with all the crazy shit OWOT regularly sees, the Internet Decency Authority hasn't blocked us yet. Well, we only have one chance to get our act together on March 10 or else we're never getting chat back.

## Stop putting boobs on shapes

Someone has been putting boobs on shapes, mostly triangles lately. My question is - why would you want to sexualize SHAPES, of all things? The Christa spammer sexualizing McAuliffe is bad enough as it is - we really don't want dirty thoughts to come to mind when we see something as simple as a SHAPE.

Remember fellow

inhabitants of the Canvas - the moment you see someone draw boobs on triangles, WIPE THE

EVERLOVING FUCK OUT OF IT. Show them we don't stand for this absolute BULLSHIT.

# Christa bot blocked

Continued from the front page  
community, we invite you to go sift through the Atlantic Ocean instead. However, if you're still unprepared for a trip to New Hampshire, Cape Canaveral, or the Atlantic Ocean and you need to acclimate - you need to touch some grass first.  
Helpfully, our chief editor Lemuria has included a photo of some grass on page 2 (below) that you may find appealing. It's one of the standard images used when we introduce long-term maternal residence basement dwellers to the REAL WORLD, to give them a glimpse of the life-changing experience that touching just ONE blade of grass can give anyone.

Wait, does the Christa spammer have a job? Does he still live off Mommy's income, and eat Mommy's meals? He must have a big library but so far he hasn't colored anything in them just yet. If he does go outside and color something, that's gonna be the big scoop that we at OWON are going to write about faster than how fast the bot reverts your erasure attempts on Christa's digital gravestone graffiti.  
Anyways, just ignore the bot. He'll move on when we stop giving him any attention. If anything happens regarding the bot, we'll always be here with the big scoop.

# Interesting things people posted to Discord

In my desperate effort to fill this second page all the way, here are some interesting links I encountered in the Discord today.

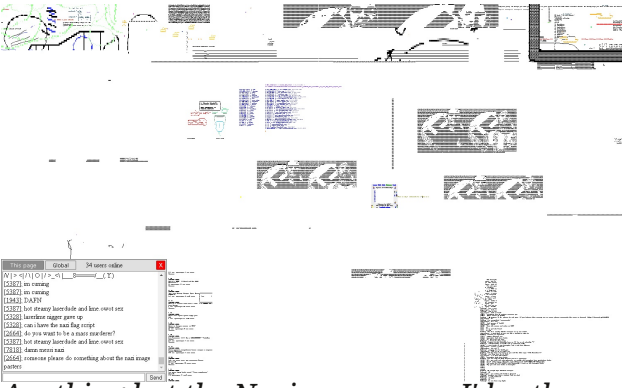

"Tiny Humans"  
tinyhumans.vercel.app  
Appears to be some sort of site where you can put paper humans who just talk to each other. Quite nifty.

"Proposal to add the Ethereum Symbol to Unicode"  
FP just remaked "Oh brother..." as he posted a partial screenshot of the

proposal in the #miscellaneous channel. And also poked fun at Unicode's character names.  
They pointed out how the Consortium called the Bitcoin symbol (฿) the "Bitcoin Sign", not "B with two vertical lines sticking out both the top and bottom".  
Anyways, those are the two things in the Discord that I found interesting. Maybe next issue you'll all post something interesting that may or may not make the next issue 30,000 pages long.  
- Lemuria, Chief Editor

# Nazis attacked the front page, wipers to the rescue!

At around 21:00 UTC on Feb. 24, 2024 some unknown forces pasted Hitler and the swastika all over the canvas. Thankfully, our Chief Editor has a good wiper, so he used it on the Nazis. They were not as persistent as the Christa spammer and gave up very quickly.  
Attacks like this are expected to result in more consequences for OWOT as a whole if the front page chat ever goes away on March 10. Hopefully those canvas security measures FP talks about will work in our favor.

Anything but the Nazi spammers. I'd rather have Christa spammed all over spawn than these damn NAZIS.

Know a FICTIONAL GOOGOLOGIST?

Report it so we can deport it THE FUCK back to where it FUCKING belongs. Say no to Fictional Googology and stop making up random numbers.

We also deport:  
Christa spammers, Nazis, Textwallers, Spammers, Wiper abusers, Script abusers, Kids under 13, Starianna bot users, IP grabber links, etc.

OWOT IMMIGRATION POLICE

# FP CHANGES POLICY ON SPAWN ROLLBACKS

At 00:37 UTC on Feb. 24, 2024, FP announced on Discord that he had changed his rollback policy. When reverting regions, FP says that he will now revert regions to their "best condition", instead of the state it was in before it was overwritten with spam.  
This comes as spammers continue to attack OWOT, with vigilantes valiantly deploying their wipers to help stop the threat.

Wipers are nuclear weapons. Distribute carefully.

A message from Lemuria, our chief editor

# SOMEONE IS PASTING A SHIP OF LASERDUDE & LIME. PLEASE STOP.

In recent times, somebody has been pasting a piece of ASCII art shipping Laserdude and Lime. It's quite graphic, so we won't get into it here. But I heard somewhere that Lime was a minor, so it could be quite pedophillic. It should be obvious to anyone who spends

even a single millisecond living on Earth that such material is simply just WRONG.  
If you see the ASCII art, remember to use your wiper. Seems like our paster might also need to look at the image directly below this article. Over and out.

# Fictional googology declared Annoying OWOT Phenomena 100

Below is a file for AOP-1000 "Fictional Googology", one of the most annoying things that OWOTers can ever, ever encounter on the site.

Special Containment Procedures: Any instances of AOP ("Annoying OWOT Phenomena") 1000 ("AOP-1000") are to have all numerical output generated by them summed up, logged, redacted, and then the sum of all their numerical output fed into the S91 algorithm and the offending AOP-1000 practitioners locked in a Class-14 Containment Cell for repair of mental retardation and other illnesses.

Civillians are to be encouraged to ignore AOP-1000 practitioners. Wipers may be distributed in a limited capacity to personnel regardless of authorization to assist in containment of AOP-1000.

All numerical output generated by OWOT's userbase is regularly scanned for traces of AOP-1000 by an artificial intelligence-based filter running on multiple server nodes dispersed across Earth.

Description: AOP-1000 refers to a phenomenon where unknown users originating from either Textwall, most of whom are minors, generate, conceptualize, or name hypothetical points on the Great Number Line. AOP-1000 may also be referred to as "Fictional Googology" and practitioners of AOP-1000 "Fictional Googologists", or "FGers" for short.

Exposure to output generated by AOP-1000 practitioners usually causes extreme mental retardation. Intelligence quotient tests performed on these subjects often yield results ranging from 20 to at the highest, 75.

Addendum 1000-01: Cooperation with the SCP Foundation to use SCP-Y in anti-FG operations has been proposed. SCP-Y, when fed certain numbers, prevents them from being conceptualized, imagined, written, or communicated in any form and causes severe mental strain in those who attempt to do so, making it an effective permanent solution to the problem of Fictional Googology that continues to plague our Great Canvas.

# Grass for the Christa Spammer to Touch When He Finally Leaves The Basement

Christa spammer - if you're reading this newspaper - please touch some grass. I took this photo with my own camera a few days ago just for you, since I assume you've never left your mother's basement in the last 30 years. So go out there, touch some grass, and move on. It's been THIRTY FOUR YEARS. The 1986 Challenger disaster was sad and all you are doing through your spamming is tainting Christa's memory.
