

## **FULL TESTIMONY OF JACQUELINE BREGER AT ARIZONA SENATE COMMITTEE**

**2/23/23**

REPORT TITLE: PRELIMINARY FINDINGS OF ACTIVITIES IMPACTING ARIZONA'S ELECTION INTEGRITY  
WITH SPECIFIC FOCUS ON THE 2020 AND 2022 GENERAL ELECTION

Good afternoon Madame Chair, good afternoon to everyone.

My name is JACQUELINE BREGER, just to tell you a little bit about myself...

I do have a Masters degree in Marketing, Honors degrees in Financial Accounting, Business Statistics, Economics and Business Strategy.

I've been a resident of Scottsdale, Arizona since 1997 and I own the Fine Breger Insurance Agency which is a Farmers Insurance Agency, in the valley.

Since 2019, I've been a principle investigator with the Harris Thaler law firm. We have been investigation multiple multi-state racketeering and corruption.

John Harris Thaler is our Senior Attorney and he is in charge of this investigation. Mr. Thaler has been practicing law for 32 years. His firm specializes in investigating racketeering and corruption for both the public and private sector and he has participated in some of the largest investigations both in the U.S. and abroad.

But with respect to the current matter at hand, in 2006, the U.S. Attorney's office in Illinois, Idaho and Indiana investigated the laundering of drug cartel monies through a complex series of single-family home purchases in those particular states. By 2009, numerous real estate agents, escrow companies, and title insurers had been indicted, charged and convicted of racketeering; and in 2014, our office was asked to review the case file. The reason for this was we were asked to determine whether monies from the sale of the properties had filtered to properties purchased in Arizona, specifically in the Maricopa and Pima County.

We concluded that several real estate agents convicted in Iowa had set up laundering systems in Arizona and thereafter had transferred the proceeds of the sales to Panamanian corporations.

In 2018, Mr. Thaler discovered, incidental to a completely independent matter, a series of trust deeds evidencing that cash laundered through single-family residences in Arizona was pervasive and ongoing. With that, a new investigation began with the focus being money laundered and related racketeering activities in Maricopa County as well as in several other Arizona Counties. We are currently representing several parties directly damaged by these racketeering activities.

The investigation originally focused on fake Notarization, fake Deeds of Trust, fraudulent buyers and/or sellers of the real property transactions as well as other companies used in real estate transactions, i.e. real estate brokers, mortgage companies, title and escrow companies, real estate inspection companies, service companies and so on.

Over 120,000 documents have been reviewed to date.

These documents have definitely evidenced multiple racketeering enterprises, which include narcotic sales, money laundering, tax evasion, payroll theft, bankruptcy fraud, life insurance fraud, auto insurance fraud, bribing of elected and appointed officials, creating and modifying public record, falsifying professional licenses and related credentials, swatting individuals who pose a threat to these enterprises, and last but not least election fraud.

I walked in and heard briefly that you spoke about a compromised computer system. Well, that is something I will be addressing in quite some detail.

I'm going to share with you that which we've uncovered, how we uncovered it, and the conclusions drawn therefrom. I'll also share with you how the racketeering enterprises inextricably are intertwined with election fraud. It is important to note, okay, that our office has been limited in resources and in terms of authority such as subpoena power. As a result, the conclusions that I'm bringing here to you that we've reached to date are just the tip of the iceberg. As a result, our office stand ready to work with any of the relevant enforcement agencies. Our primary findings were first reported to Governor Ducey, in 2022.

Furthermore, Thaler has met with Attorney Generals in five States, the FBI, the IRS, the U.S. Bankruptcy Trustee, and with several U.S. Attorney's offices. Currently there are active and ongoing investigations in Federal and State jurisdictions. And both California and New Mexico have already used our report and taken some corrective action. The final report will include the election fraud and will be completed and published as a book entitled "Report to the Governor". This is going to be a book of three hundred pages with approximately three thousand attachments. Excerpts from this book and other necessary documentation will be available on [ReporttotheGovernor.com](http://ReporttotheGovernor.com) after this presentation. Our report contains 47 separate filings.

I have provided you with a packet, and I'm sorry my assistant forgot to number the pages, but pages 11-14 show you those, detail those 47 separate filings that we have in our report. I'm just going to mention a few of those that are pertinent to this committee.

As I mentioned, beginning in Illinois, Idaho and Iowa in the early 80's cash earned or otherwise collected in the sale of illegal narcotics and human trafficking activities conducted by the Sinaloan cartel had been laundered through the purchase of single-family residences. Laundering of this cartel money in Arizona through purchase and sale of the single-family residence began in and about 1994 and focused on new construction, particularly Sandan Valley, Litchfield Park, Goodyear and Avondale. Cartel money mostly came from illicit narcotic sales, which include crystal meth, cocaine, heroine and fentanyl, as well as human trafficking. In addition to purchase and sales of single-family residence cash is laundered through inflated and falsified construction invoices, falsified charitable donations, tuitions paid on fake students allegedly attending private trade schools, and falsified bankruptcies. Wells Fargo bankers in Arizona and in multiple additional States have engaged in opening checking and direct deposit accounts for phantom people. Resources, including city government officials and agencies in Mesa, Arizona have also been integral in laundering activities.

Since 2010, money laundering has exceeded 7.5 Billion dollars. In Arizona laundered cash is used in part to bribe elected and appointed public officials and their support staff. The principle preparers of the documents necessary to affect the racketeering enterprise are Dawna Rae Chavez, a resident of Mesa and her daughter Brittany Rae Chavez. To date, more than 10,000 falsified documents have been recorded with the Maricopa County Records Office. We estimate that more than 35,000 warranty deeds and trust deeds evidencing fraudulent transactions exist in the database.

The number of falsified notarization exceeds over 15,000. Dawna and Brittany participate in racketeering activities which also include facilitating the bribes to the public officials, tax evasions, payroll theft, bankruptcy fraud and insurance fraud and extortion. The City of Mesa is a racketeering organization as that term is defined in 18USC Section 1961. To protect the enterprise, civil rights are systematically and systemically violated to preserve racketeering activities. Fines and outrageous cash bonds are used to collect monies which are then skimmed and redirected into the racketeering enterprises. The City of Mesa Police Department operates within it a Private Police Department that is used to support and protect racketeering enterprises. Officers participating in this force are compensated with monies paid through the phony mortgage schemes and other related schemes. Officers operating within this private force systemically violate our Fourth Amendment rights, by breaking and entering into private properties, wire tapping, computer hacking, cellphone hacking, and by using related surveillance techniques without warrant. Officers would supplant evidence and hide exculpatory evidence. Multiple State agency databases have been infiltrated or hacked thus allowing falsified documents to be uploaded into them and allowing legitimate documents to be removed.

For example, the database for the University of Arizona State and Northern Arizona have been infiltrated and hacked. It permits individuals to be given degrees who never attended or graduated from these schools and allows phantom individuals to be awarded degrees thus lending legitimacy to their existence. Further, State licensing databases have been infiltrated and hacked to provide individuals with fake degrees, to permit phantom individuals to have state licenses issued.

These licenses like Accounting, or Real Estate, Mental Health Care, even law licenses (we have seen phantom Attorneys registered with the State Bar). The Maricopa County database for the Records office and for the Superior Court were designed in 2014. They were set up for outside infiltration, so that falsified documents could be uploaded or legitimate documents removed. Since 2015, hundreds upon hundreds of falsified court documents have been loaded into the database. These documents include falsified default judgments, criminal restitution orders, child support orders - all of these used in swatting activities against individuals posing a threat to the racketeering activities.

Since 2004, elections within Pima County and Maricopa County have been manipulated through the infiltration of the County databases resulting from bribes paid to executives and election service providers, including but not limited to principles at Runbeck Election Services. In addition to impacting local elections bribes and infiltration were used to affect the outcome of the races during the November 3rd 2020 Election including the outcome of the race for Maricopa County Recorder and the outcome of the November 8 2022 election race for Governor, Secretary of State and Attorney General.

Public officials who have received bribes include multi-state office holders, State House and State Senate, local office holders, County Supervisors, Judges in the Maricopa Supreme Court, Judges of some city courts, including some presiding Judges, Judges' assistants, Prosecutors within certain cities within Maricopa County, Prosecutors for Maricopa County, peripheral Legal Specialists including attorneys, approved mental health care providers as in Court appointed advisers and related specialists.

In the Superior Court of Maricopa County, and Pinal County, and Pima County at least 25% of the active Judges have accepted bribes in exchange to protecting the racketeering activities. Bribe payments generally begin before the individual is even appointed to the bench. Bribes are usually paid as an incentive for the attorney to leave their private practice. By way of example, Mesa City Prosecutor's office routinely files charges and convicts innocent individuals who knowingly or unwittingly pose a threat to their racketeering enterprise. With respect to Judges with the Mesa City court, Judge John Tatz, Judge Alicia Lawler preside over these invented cases filed by the city Prosecutor, falsely convicting and sentencing the defendant.

In the Maricopa County Superior Court Family Division child custody evaluators commonly known as court appointed advisers, routinely accept bribes in return for favorable reports. Bribes are often facilitated by attorneys representing one party. But let me explain. As I stated earlier, in 2018, Mr. Thaler found trust deeds recorded with the Maricopa County Recorder office evidencing money laundering and tax evasion. These documents, as I mentioned, were prepared by both Brittany and Dawna Chavez. Both of them are connected to the real estate agents expected of setting up the home purchasing laundering systems in Arizona. Their principle employer was and is the Sinaloa cartel.

Today we know that their participation in the creation of documents necessary for the criminal enterprise runs for more than 25 years and includes facilitating bribes to public officials. Our initial discovery included more than 100 fake trust deeds and warranty deeds in Maricopa County where either Brittany or Dawna executed the document as either buyer or seller or as the notary under an assumed name. At least half these documents reported to be executed by married individuals.

The discovery of the falsified deeds led to the discovery of additional racketeering enterprises including but not limited to, as I mentioned, insurance for payroll fraud and bankruptcy fraud. It also led to the discovery of extortion schemes I've already mentioned.

Maricopa County Records office has at least five appointments made by Adrian Fontes, our County Recorder, from 2017-2021 who are phantoms - non-existent individuals. These phantom individuals hold positions related to election services. Further, during the same period, the office has at least 15 individuals whose appointments were falsified and thereafter kept hidden from the public during the 2020 election cycle. The appointment documents of all of the above 15 individuals have forged signatures, falsified clerical signatures (which means that the tracings from the signature stem and fake dates). These falsified notarization were made by Brittany. Said falsified clerical signatures and date were made by Dawna Chavez. I'll be sharing examples of this in a few minutes.

In addition to election fraud, manipulation of the City and County databases include falsified default judgments, restitution orders, child custody orders, and so on, as I've explained. Brittany and Dawna have also been able to forge signatures of Judges. Well that summarizes the findings, at least those that pertain to you guys of the book. But as I've stated, the parameters of our investigation did not originally include election fraud. It's important to note that we do not represent any political candidate, political party or political action committee or any similar organization or individual. Mr. Thaler himself did not vote in 2020 or 2022. He has not donated to any party.

In November of 2019, Brittany approached Mr Thaler and his colleague, Attorney John J Stanley with a request that they obtain for her witness protection. However, prior to obtaining approval Brittany was threatened in such a manner that she broke off direct communications with our office. She has continued to provide surreptitiously provided evidence concerning these criminal activities.

In October 2020, shortly before the November 3rd election, Thaler was provided certain information. First, was evidence that the Maricopa County computer database had been designed with various back doors, allowing outsiders to infiltrate it and to change the data. Second, was the identities of bribed recipients which included elected officials. Third, on October 26, 2020, Thaler's team discovered approximately 25,000 falsified ballots being held with a significant sum of cash in a private resident in Mesa rented to Dawna Chavez. I do have a declaration in the packet that you've been provided detailing that.

The investigation into election fraud is not limited to the state of Arizona, however, where Arizona is concerned a plethora of individuals are implicated in the fraud including elected and appointed officials, and as I've already mentioned, Runbeck Election Services (the service provider to Maricopa County).

The Maricopa County database has absolutely no integrity whatsoever. Let me explain. I chose to share with you my investigation of Katie Hobbs by way of example. But for purposes of this exercise I could have selected any of those individuals that are listed in your packet on page 70 (I apologize that you don't have a page, but you'll see that it's at the end of the book). When our investigation leads to a name of a particular individual that we suspect to be involved in these racketeering activities, we researched their deeds of trust which are recorded with the Maricopa County Records office and publicly available. If there are unusual amounts of deeds of trust for that individual and if there are deeds of trust for the same or similar named individual, or with multiple varying middle initials, we dig further.

In the case for Katelyn Hobbs, please look at page 17-50 in your packet. I have shared with you eleven deeds of trust in the name of Kathleen M Hobbs and Patrick T Goodman. However, when we looked at the deeds in your packet on pages 51-64, these have similar names, but we discovered that they too were compromised.

In some cases we reviewed deeds of trust filed under a spouse, or child, or parent, or business partner, just depending on the specific circumstances. When the writings matched that of Brittany and Dawna and when we can determine that the notarization is fraudulent, and/or the buyer, and/or the seller signatures are fake, we know the deed is fraudulent.

If you look at the deeds for Kathleen M Hobbs and Patrick T Goodman, I have provided you with the first signed pages of the deeds and on page 65 is the comparison of just the signatures (the pages with some red writing on them) for the buyers of each deed, this page will speak for itself. There's obviously some inconsistencies with the signatures for Kathleen and for Patrick. This is apparent to anyone with any naked eye. But we have verified all our findings with a qualified forensic document expert who represents the State of California.

Now, let's look at the notaries who signed these deeds. Again, I provided you with all the notaries signatures on page 66. Next to this, I provided you references to pages from our reports that we have from our qualified forensic document expert where similar writings have been verified as being either that of Brittany or of Dawna. The only other option is that in some situations there are graphics or traces of other signatures where we can verify that an impostor has attempted to copy an original signature. Linda Mitchell's reports are lengthy, we have over 500 pages of reports so unfortunately, unless I was going to walk in here with stack like this for each of you, I could not bring those and give you each a copy, but they will be available to you if anyone wants to email me a request.

On page 67, I've demonstrated some other writings on the deeds which have also matched with pages from our forensic reports. What I've provided you from pages 68-69 is where we delve even further. When you look at the deeds you will notice that there is a title company and a mortgage company. As is pretty evident, the writings on the document filed with the Corporation Commission for these entities is also that of Brittany or Dawna.

To summarize our findings in regards to Governor Katie Hobbs, taking into account just those documents in her name are as follows: there are nine deeds of trust in the name of Kathleen M Hobbs and Patrick T Goodman, husband and wife, from 1997-2021. Which essentially means that they either purchased or refinanced a home every two to three years, which is statistically not likely, not improbably. But even more so in six of the nine deeds of trust were recorded within the 10 year period between 1997 and 2007, the concentration of which is between 2001-2005, which was during Miss Hobbs tenure at Emerge Arizona.

When researching the documents found with the Corporation Commission for Emerge Arizona we found that there's document evidence and hand signing and hand printing that belongs to either Brittany or Dawna. If one were to guess, and this is just a guess on our part, Emerge Arizona seems to have been formed as a medium to attract women interested in politics and bribe them through the proper scheme to adopt positions of power and to further the goals and objectives of the cartel. Most of these deeds have been fraudulently notarized meaning that one or multiple parties names in the transaction are either not present or do not exist at all.

In some, if not in all cases, it's evident that page 65 in your packet, Miss Hobbs' and Mr. Goodman's signatures are clearly inconsistent, indicating that the majority of the deeds were created by a different individual who are attempting to copy Hobbs' and Goodman's signatures, particularly on the deeds where the notarization have been found to be fake.

We then researched the title companies and the mortgage companies on these deeds of trust. Some of these do not or have never existed, some do not even exist in Arizona.

[Miss Breger is interrupted by Representative ?? (assistant chair) "Miss Berger, can I ask you to please submit one of these packets with the pages so we can get this put in the record and then we are going to have to tighten this up and keep germane to the elections so we don't exceed the scope of our authority."

Miss Breger, "Sure. Would you like me to finish with my conclusions with that".

Wendy Rogers: "How much more do you have?" Miss Breger, "A bit more. Let me finish with my example and then I'll finish with election fraud." Wendy Rogers, "okay"]

Okay, so when I said we researched the title companies and the mortgage companies some do not even exist.

What can we conclude with these discoveries? The purpose of having a fake deed of trust is to move cash without it being traceable. A phony mortgage company provides the phony mortgage is the one primary method of how cash is moved invisibly. There are basically only three reasons to provide a fake deed of trust - if the buyer does not exist then the mortgage serves as a reason to launder the money; if the buyer does exist, then the mortgage is used to provide the owner of the deed money that is untraceable; and when the person resides at the location of the deed, then that's even more further proof that money is being provided that is untraceable.

I can take you through example after example, but in the interest of time, since at least 2004, ballot counts have been tampered with. Our Counties current computer database which was built between 2014-2015, has been and continues to be infiltrated and hacked. It's architect specifically designed the system with multiple back entry points. These permit the uploading of falsified documents and the removal of genuine documents from the County system. We have seen Brittany access the database and have an eyewitness just to testify for that. Over the past 15 years, Brittany has used her access to load falsified judgments and so on.

Beginning in 2017, access points have been used to change vote totals and their own election results. Illegal transfers have been made and provided to Runbeck and Jeff Ellison. The phony deeds used in the scheme to move money to candidates are created by Brittany. For profit and non-profit PAC's are also created by Brittany and used to move money for candidates.

During the '22 Election, ballots, scanners, printers at 70 precincts had the changes to their printer settings despite being tested the night before the election. The changes to those settings were made through computer infiltration. Not manually, or by some never before seen error. The uncontrollable ballots were placed in box 3 and allegedly driven to Runbeck. Witness information provided on October 2020, confirms that more than 100,000 filled in ballots and more than \$13 Million were identified by some of our investigators in two unmarked rental cars. These vans were loaded with the ballots and cash at a private residence in Mesa and driven to Runbeck's office. The Runbeck company, as you know, is run by Robert Runbeck. We have found deeds for Runbeck and Ellison.

So, I was going to drive home the point, but instead I will on.

We have heard, okay, the statistical improbabilities of an improbable icon with respect to the 2020 Election. Let's look at Andre Fontes and Steven Riker for the Maricopa County Recorder. Riker's win was just statistically impossible. To win...

[Wendy Rogers - "Are you referring to Steven Richer?", Breger - Richer, sorry, my apology!]

Fontes is a Democrat and was the incumbent. The Senators were Biden, Cenima and Katie ran up approximately a 2.5% margin in the County against their opponents. Richer won by approximately 6,000 votes. This means that 50,000 individuals voted for the Democratic ticket that across the board had to choose the Republican candidate for Recorder against an incumbent who never suffered a scandal, never happened. This was a planned loss. Hobbs would receive the Democratic nomination for Governor and Fontes would run for Secretary of State to replace Hobbs. The strategy appeared to have been planned, I have shown you that both Hobbs and Fontes have what we call "Brittany deeds", evidencing a strong likelihood that they are bribed recipients.

Now, it may seem obvious, but I do feel that it is necessary to explain nonetheless. Given that Arizona is a border state and that drug smuggling and human trafficking is a billion dollar business, it would appear that having our elected and appointed officials ensure that the cartel enterprise remain open for business would be paramount! The Cartel has substantiated that the right people remain in the key positions so as to further their objectives.

The fix for 2020 and 2022 started in 2017 with appointment to election positions of individuals being bribed through the mortgage scheme and through monies being laundered by the appointment of phantom individuals. The problems with these documents are many!

If you look at your pages 71 and 76, the recorded appointments from Fontes which were notarized by a "Jessica York". First, the handwriting and hand printing of Jessica York has been identified as belonging to Brittany by our forensic document expert. Secondly, the York signatures are the same handwriting but not the same style and their change of style exists even when the documents were allegedly signed on the same day. You can see the June 4th documents.

The December 9th date and the clerk "handwriting" matches Dawna, the signature of the clerk at the bottom is actually a tracing of a signature stamp. The time between the signature and the notarization and alleged execution of the clerk and thereafter the recorded date evidence forgery. Normally, it's a two to three turn around time. These took multiple months and all were allegedly clerk executed and recorded after the election certification. I have example after example where things do not add up.

In addition to state representatives, there are three of the five Maricopa County Supervisors have also recorded documents evidencing the acceptance of bribes.

Further, we've investigated PAC's relating to State office holders and "dark money" transactions relating to said PAC's. From late 2018 to 2022, a significant number of questionable real estate were facilitated by several law firms including partners at Perkins Coie.

Mr. Thaler would be here himself presenting this information, but there'd be multiple attempts on his life. Thaler was driving from Arizona to California when suddenly he lost control of his vehicle upon investigation it was discovered that his tire was purposefully slashed by a straight edge knife about four to six inches. The cut was made in such a location on the outer side of the tire, where the tire would not lose air but instead would degrade to a point causing catastrophic failure most likely at high speed. Again, the declaration is included in your packet. The reason I mention this and the only reason I mention this is because a similar attempt was made on the life of Kari Lake's daughter, during her campaign.

To date six attempts have been made on Thaler's life. In Arizona public officials accepting bribes include members of the Legislature, the Executive Branches of the State Government, more than two dozen Judges on the Maricopa County Superior Court, at least two Judges on the City of Mesa Court, at least one Judge in the town of Gilbert, the Mayor of Mesa, five members of Mesa City Council, several police officers...

[Interrupted again. Senator Ken Bennett, "Madame Chair point of order, this is not the appropriate place to be alleging, um,..."]

Co-chair?? "We do have a rule in this chamber that we cannot impugn the motives of, of other members as explosive as that testimony was, um but that is our rule."

Wendy Rogers: "Okay, so what we're going to do is this, I need you to wrap up in terms of impact to the election, thank you".

Breger: "Okay"]

Even though our investigation covers multiple states, Thaler and our team have interviewed over 30 witnesses in Arizona, several individuals in the public officials list have cooperated with our investigation. The team has collected and reviewed more than 120,000 documents as I've said. The immense data that we have collected will assist enforcement agencies investigating the election fraud. Further, the data we have collected and the connections we have found, and the vast details of this entire investigation will lead enforcement agencies to go to those participating in the frauds and will help you restore election integrity within our beautiful State. Thank you!

Wendy Rogers: Thank you. And my first question is to whom have you given this data other than to us today?

Breger: As I've said the report was given to Governor Doug Ducey in May of 2022, so he has been made aware, as has, as I've mentioned in my presentation, the FBI, some of the other Attorney Generals especially in New Mexico and California.

Wendy Rogers: Thank you, ok.

Bennett: Madame Chair, Miss Breger, How was this given to Mr. Ducey, was it by you personally?

Breger: No, no it was not given by me personally, it was given by one of our team members.

Wendy Rogers: Next question? Representative Jones

Borelli: Madame Chair

Rogers: Yes

Borelli: Miss Breger, did you give this to the Arizona Attorney General?

Breger: Madam Chair, Mr. Borelli, we have not yet presented this to the Arizona Attorney General, we do know that Governor Ducey did share this with the Attorney General at the time.

Wendy: How do you know that?

Breger: Because he shared that information with Mr. Thaler directly, but I personally have not given it to Arizona Attorney General yet.

Bennett: Madame Chair, Miss Breger was Thaler the one that gave this to the Governor?

Breger: No, not directly because Mr. Thaler is not in Arizona.

Bennett: So how would Mr. Thaler know that Governor Ducey shared this with the Attorney General's office?

Breger: Because Governor Ducey and Mr. Thaler were in contact.

Rogers: Next question Representative Jones

Rachel Jones: Madame Chair, Ma'am, thank you so much for coming. You're very brave in my opinion. My question is, and I guess it's a question for clarity. How is this in my opinion related to the election is what you're stating is potentially many people, elected officials here, have potentially been bribed or blackmailed to get certain election results and I think the People have a right to hear that because the People in Arizona right now crave truth. Is that, am I,...

Breger: Absolutely clearly. Yes, you are, absolutely and that is exactly why I'm hear today. I think that we've gone around and around and around with the concept of election integrity, but nobody is willing to actually speak the truth of how did our election get compromised and as in nuts and bolts, how, what happened to actually compromise our elections and compromise the integrity of our State.

Madame Chair, may I?

Rogers: Yes

Liz Harris: Madame Chair, Miss Breger what may I ask what political party are you ?

Breger: Excuse me Madame Chair, I am unaffiliated.

Liz Harris: Madame Chair, follow up?

Liz Harris: Madame Chair, Mrs. Breger, How long has it taken for this information to be compiled and how many people worked on this team?

Breger: Madame Chair, this information was compiled in approximately three and a half to four years. And we have had approximately five to ten people at any given time because it hasn't always been consistent, working on this investigation.

Bennett: to that point Madame Chair

Rogers: go ahead Senator

Bennett: Madame Chair, Mrs Breger, when did you say this was presented to Governor Ducey?

Breger: Madame Chair?

Rogers: Go ahead

Breger: May of 2022.

Bennett: Thank you

Rogers: Any other questions?

Bennett: Yes, Madame Chair, Mrs. Breger, would you provide a copy for the committee that has the pages annotated please?

Breger: Absolutely, I will do that, I apologize.

Bennett: It was very difficult to ...

Breger: I understand...

Bennett: ...you kept referring to page numbers but none of the pages have any page numbers, so...

Breger: As I said, I did apologize at the full front of this presentation, but I shall do so.

Rogers: Any other questions from the dias?

Bennett: I have a question, Madame Chair, Mrs Breger, How was it that you were invited to address the committee today? By whom?

Breger: I was invited by Representative Harris.

Bennett: Thank you.

Rogers: Any further questions?

Thank you Mrs. Breger, you're a brave woman

Breger: Thank you!

Others - Very brave!

Breger: Thank you Madame Chair!

END
