hi

I don't think I need to present to you guys who **Soda** (@PolandsDefense) and **Arson** (@Emperoroftheuuk, @Hammer895450302) are, you already know that they have been harassing countryhuman artists for months, and that they even managed to get some banned (**flawsy6**, **canada_hehe** for example), or some others have been forced to render their accounts private (**Kakoyto_chel**), and have been conducting harassing behavior towards others such as **Deffik** or me, on the excuse that they don't like their countries, Iran and Poland (Soda isn't even Polish… he barely speaks the language and resides in the USA), being drawn as subs on drawings, and also supposedly on the fact that the countryhuman community is a nest for pedophilia. I will come to this right after.

Before anything, **I wanted to thank kakoyto_chel and her friends for the information that was given to me, which I wouldn't have obtained otherwise**. Really, kudos to them, they deserve it, give them a follow or love or whatever.

Now, to refer their excuse that the countryhuman community would be a nest for pedophilia, I want, first, to say that there *is* a problem with some minors being present. Yeah, can't deny it that there are artists that aren't above 18, and that is a problem. However, that is not the main goal of this document. More than everything, I felt it was important to counter their argument with the simple fact that: ***Arson is a confirmed pedophile*** according to Kakoyto_chel's findings, I will come back to Soda at the end, since his case is mostly unclear and I don't want to accuse someone else, as much as they might piss me off, without concrete proof.

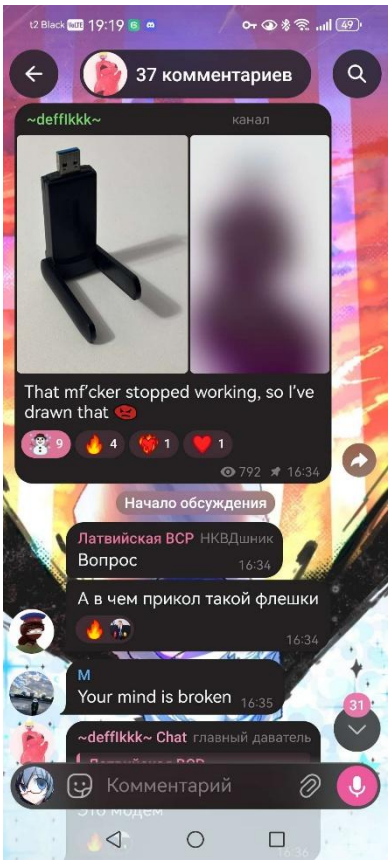

So, first. How did I manage to get this information? Wellllll… Kako managed to get a hold onto the information of Arson's Telegram account through a third-party service (yeah, it's a hack, okay). Here is what they found, both in Russian (original language) and a translation in English.

The elephant in the room that is present here is the "SH*TA CHAT" one. If you don't know what shota means, it is basically and simply sexualized young people.

As of now, we could not get the link to the group. However, the name is obvious on what there might be there: either child porn, either illegally young people having inappropriate discussions, you get it.

Now, you may wonder, how do we know that this is Arson? Well. The Telegram account was used to post hateful messages on Deffik's telegram group (and to be fair… the only Iranian who posts that kind of stuff on the CH community is Arson-). Here are some screenshots that link the message to the pedo account (next page).

To the left, we can see the message from Arson, in his *usual fashion* of raging over countryhuman art, not going to say it another way.

What is more interesting is to the right. As shown by the previous screenshots, the account linked to the shota group chat has the username @Diagodshaf since the 17th of September 2026. And, well, on Telegram, two persons cannot have the same username. Plus, the name is recent, so we can only presume that this is actually the right account, since the third-party tool uses the unique ID account for the hack (this means that the pedo group couldn't be another dude who previously had the same username).

I'm not going to repeat myself over again, but his biography being in Farsi, it is certain that this is indeed Arson.

Now, I just want to clarify some things. Morally, of course, it is wrong, but I will also throw the legal stuff.

The Law on the Protection of Children and Adolescents, which was enacted in the territory of the Islamic Republic of Iran on 12 May 2020, EXPLICITELY addresses sexual abuse, exploitation, child pornography, and the possession and distribution of pornographic materials involving children and adolescents in it's article 10.

9. Establishing contact with a child or adolescent in cyberspace for the purpose of any form of sexual abuse or illicit sexual relations shall be punishable by one of the penalties of degree six under the Islamic Penal Code.

I'll let you read the articles I highlighted, they're pretty explicit. Article 9 seems like the most obvious case of application, although the other I highlighted may also be applied instead.

Now, I did send the proof to Arson, to confront him and actually see if he like either admitted or gave me proper proof that this was not him. At first obviously, he denied. But he did not bring any sorts of arguments into the equation… Instead, well. I'll let you see by yourselves after a bit of talking.

When I brought him the proof that this was *HIS* account, he just… started speaking with the most horrendous grammar ever, but mostly THREATENED us on baseless stuff.

"*I can claim yall chp3dos got way too much contact with bunch of teenager artists*". Arson, 25th of October 2026.

And he claims we are framing him when our evidence is literally… well up here-.

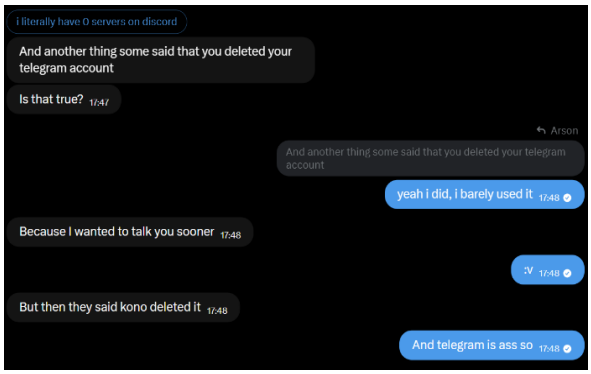

Of course, he kept denying and denying, but couldn't give us a single proof, a single screenshot, a single ANYTHING to deny that was not HIS account.

He even tried to lie his way out saying he didn't have Telegram.

Arson, the same day.

While….

Friday, 23rd.

Telling me he wanted to talk to me on Telegram.

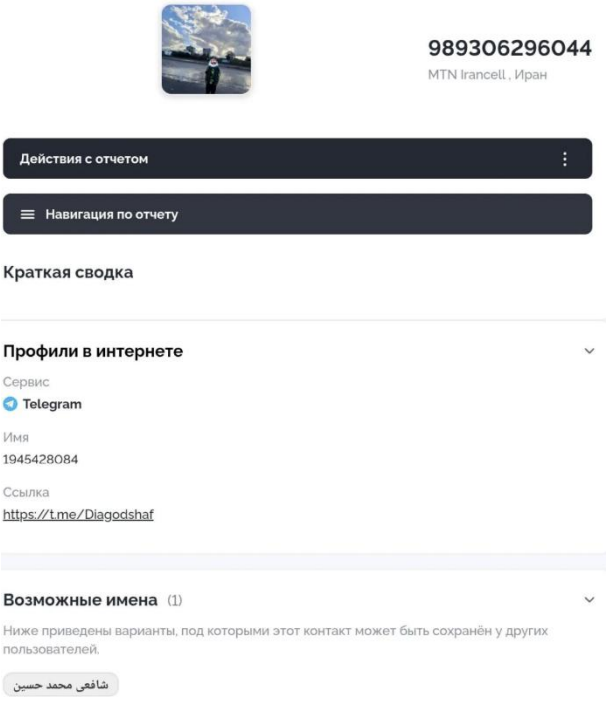

Yeah. Learn to lie please.

Anyways, considering the gravity of what I've been shown by Kako, and then the lack of honesty from Arson from my confrontation with him (and if anyone wants my DMs with him, I made sure to screenshot everything, just ask me!) … I believe the best way to deal with this would be just for someone who might also be from Iran to report his number, telegram, and name to the Iranian police force, because that person is **dangerous**, and shouldn't be free to be close to children. So if any Iranian reads this, please, ***act***.

And if anyone wants to investigate this further, please do. We got the essential, but if you can find more proof, then do, report him… and tell us if I ever must update this. Thanks.

Iranian Cyber Police (FATA) : https://policefata.ir

Cybercrime emergency hotline in the IR of Iran: 096380

Information joint here from the hack or whatever Kako did.

Phone number: 989306296044

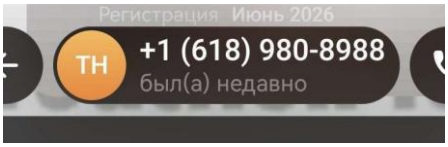

Name, or at least what people called him as on Telegram according to this : Shafi Muhammad Hussein.

However, we are also certain that this is his actual username thanks to the first screenshots of this document. His usernames, both before and past September contain Shaf, for Shafi.

Anyways, for Arson, this is all for now. I'll maybe post updates on the situation if I get more info, but I wanted to get this over with.

Now, about **Soda.**

Well… Really, there's nothing much we could find on him, besides the cyberharassment charges. We do know that he is in the USA, notably thanks to the fact he leaked his own number.

But I will be also throwing one or two things. In US federal law:

47 U.S.C. § 223(a)(1)(C) makes it a federal crime for certain anonymous communications made with intent to annoy, abuse, threaten, or harass.

47 U.S.C. § 223(a)(1)(E) makes it a federal crime to repeatedly initiate communications with a telecommunications device solely to harass the recipient.

18 U.S.C. § 2261A makes Cyberstalking, including certain courses of conduct causing substantial emotional distress or creating reasonable fear of serious harm a federal crime.

18 U.S.C. § 875(c) makes transmitting interstate or foreign communications containing threats to kidnap or injure someone a federal crime.

And that is what both have been doing. If Arson is not in the territory of the United States, Soda is. And that is why if you need to, *please*, report him to federal authorities to your possible scale. Do not let this go unpunished, as the kind of cyberharassment both have been doing can have terrible consequences. We are not the first, and we will probably not be the last unless they're dealt with penally.

Finally, on the pedo charges for soda. Well, this is not something huge, and this might not mean he is a pedo, so don't report him, although more thorough investigations could help. First of all, we have information that Soda told a minor on a group chat that he wanted to… give her a kid.

The man is 20. However, the person prefers to remain anonymous, which is why I won't include the screenshots, and we don't have proof that he might be on pedo chats. However, on one of his alternative accounts, @Poland_hehehaw... Well.

I'm just going to let this here.

Do with it what you want. Take any conclusions you wish, but please agree on the fact that this comment is weird as fuck.

And US federal law punishes also sexual harassment or pedophilia.

Anyway, as of now, this is all we have, but if anyone has more information, please let me know one way or another, or direct yourselves to Kakoyto_chel, or anyone else.

And PLEASE, don't let this go unpunished.

Thanks for reading till here, we really appreciate it.

@kakoyto_chel, her pals for finding out everything. Couldn't have made this document without them, as I personally just took what they found and put it in this form. Thanks to y'all, really <3
