

GESTUREDRAWING!

■ New in version 3.2

- **Scan more folders.**

You can now scan as many folders as you like for your drawing sessions.

- **Skip images (Shortcut key: S)**

You can now skip images from your drawing session and they won't be accounted for the total of images specified (class and custom sessions).

Skip Image is only available if your scanned folders contain more images than your drawing session. For example, if your folder has 30 images and your session consists of 20 drawings, you'll be able to skip up to 10 images.

- Fixed a bug where a corrupted preferences file caused the application to misbehave.

■ New in version 3.1.3

- Fixed a bug introduced in version 3.1.2 which caused the image orientation to be ignored.

■ New in version 3.1.2

- Fixed an issue where images with invalid EXIF orientation values caused an internal error.

■ New in version 3.1.1

- Fixed an issue where images rotated via their EXIF orientation data were being cropped.

■ New in version 3.1

- **HiDPI support.**

GestureDrawing! now looks great on 4K/retina displays.

- **Image orientation.**

GestureDrawing! can now read the EXIF orientation metadata embedded in JPG files and rotate them accordingly.

- **Manual image flipping keyboard shortcuts.**

Press H for Horizontal flipping.

Press V for Vertical flipping.

- **Pause with Spacebar keyboard shortcut.**

Press Space to toggle pause while in a drawing session.
