Gambit
General

target overly funded growth-mode companies[series B/C] where they're focused on adding unnecessary headcount to work on poorly defined projects. Maximize automation. LateralWork.

Use CC for groceries, gas whatever. Always pay off at the end of the month.
Build a portfolio.
Nobody will turn you down for funding with platinum credit rating.
Startup any bullshit cloud application or anything to do with medical/heath.
Build it up and shop it for a takeover.

Converting is to apply conversion strategies to convert weaknesses or threats into strengths or opport-uni-ties. An example of conversion strategy is to find new markets. If the threats or weaknesses cannot be converted, a company should try to minimize or avoid them.
- Define the problem.
- Gather information, data and evidence.
- Identify all issues and events that contributed to the problem.
- Determine root causes.
- Identify recommendations for eliminating or mitigating the reoccurrence of problems or events.
- Implement the identified solutions.

Rule 1: Power is not only what you have, but what an opponent thinks you have. If your organization is small, hide your numbers in the dark and raise a din that will make everyone think you have many more people than you do.
Rule 2: Never go outside the experience of your people.
The result is confusion, fear, and retreat.
Rule 3: Whenever possible, go outside the experience of an opponent. Here you want to cause confusion, fear, and retreat.
Rule 4: Make opponents live up to their own book of rules. "You can kill them with this, for they can no more obey their own rules than the Christian church can live up to Christianity."
Rule 5: Ridicule is man's most potent weapon. It's hard to counterattack ridicule, and it infuriates the opposition, which then reacts to your advantage.
Rule 6: A good tactic is one your people enjoy. "If your people aren't having a ball doing it, there is something very wrong with the tactic."
Rule 7: A tactic that drags on for too long becomes a drag. Commitment may become ritualistic as people turn to other issues.
Rule 8: Keep the pressure on. Use different tactics and actions and use all events of the period for your purpose.
Rule 9: The threat is more terrifying than the thing itself.
Rule 10: The price of a successful attack is a constructive alternative. Avoid being trapped by an opponent or an interviewer who says, "Okay, what would you do?"
Rule 11: Pick the target, freeze it, personalize it, polarize it. Don't try to attack abstract corporations or bureaucracies. Identify a responsible individual. Ignore attempts to shift or spread the blame.

Helpful - Strengths and Opportunities
Harmful - Weaknesses and Threats
Internal - Strengths & Weaknesses internal to the organization
External - Opport-unities & Threats external to the organization

Strength	Weakness
Opportunity	Threat

Can rapidly pursue opportunities	Overcome weaknesses with strengths in order to pursue opportunities
Can pursue opportunities once the gaps are bridged	Create a defense

One way of utilizing SWOT is matching and conver-ting. Matching is used to find compet-itive advantage by matching the strengths to opport-uni-ties.

Behaviour	Emotions	Expectations	Sensemaking	Perception	Attention
Simulate or dissimulate the target's action	Create cognitive stress	Causality and repetition creates expectations	Exploit prior beliefs	Hide the real (Mask, Repackage, Dazzle)	Control Attention (Attract, Divert, Redirect, Mislead, Pique Curiosity, Disrupt, Subvert, Expectations)
Simulate or dissimulate the target's outcome	Create physiological stress	Strong counter-indicators revise expectations	Present story fragments	Show the false (Mimic, Invent, Decoy)	The big move covers the little move
Time-shift perceived behaviour	Create emotional stress or arousal	Exploit an expectation of deception	Pique curiosity / Lure	Create uncertainty	The target looks where you look
Divorce behaviour from outcome	Cialdini+2	Anticipate suspicion-driven searching	Haversack Ruse (the piece of bait was)	Make the cue(s) dynamic	Attention drops at the perceived end
Channel behaviour	Exploit shared emotion	Violate existing expectations (break surprise)	Swap the real for the false (just one will)	Stimulate multiple sensors	Familiarity reduces vigilance

Isolation	▪ Deprives victim of all social support of their ability to resist. ▪ Develops an intense concern with self ▪ Makes victim dependent.	▪ Complete solitary confinement ▪ Complete or partial isolation ▪ Group Isolation
Monopolisation of Perception	▪ Fixes attention upon immediate predicament. ▪ Eliminates information not in ▪ compliance with demands. ▪ Punishes independence and /or ▪ resistance.	▪ Physical isolation ▪ Darkness or Bright light ▪ Restricted movement ▪ Monotonous Food
Humiliation and Degradation	▪ Makes resistance more costly than compliance. ▪ Animal Level concerns. ▪ Induce helplessness, fear of freedom	▪ Personal hygiene prevented ▪ Demeaning Punishments ▪ Insults and taunts ▪ Denial of Privacy
Exhaustion	▪ Weakens mental and physical ability to resist.	▪ Semi-Starvation ▪ Sleep deprivation ▪ Prolonged interrogation ▪ Overexertion
Threats	▪ Creates anxiety and despair ▪ Outlines cost of non-compliance	▪ Threats to kill ▪ abandonment ▪ against family ▪ Vague Threats ▪ Mysterious changes of treatment.
Occasional indulgences	▪ Positive motivation for compliance. ▪ Hinders adjustment to deprivation ▪ Create hope for changes	▪ Occasional favours ▪ Rewards for partial compliance ▪ Promises
Demonstrating Omnipotence	▪ Suggests futility of resistance ▪ Show who is in charge	▪ Confrontation ▪ Showing complete control over ▪ victims face
Trivial demands	▪ Develops habit of compliance	▪ Enforcement of 'rules'
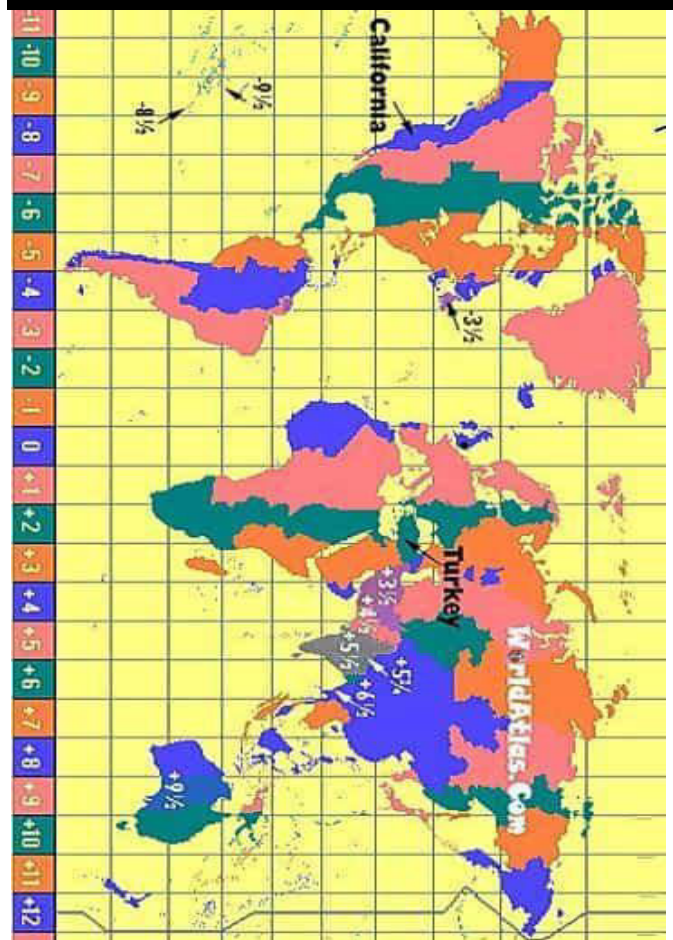

1. **Classification** - The differences between people are not respected. There's a division of 'us' and 'them' which can be carried out using stereotypes, or excluding people who are perceived to be different.

2. **Symbolisation** - This is a visual manifestation of hatred. Jews in Nazi Europe were forced to wear yellow stars to show that they were 'different'.

3. **Discrimination** - The dominant group denies civil rights or even citizenship to identified groups. The 1935 Nuremberg Laws stripped Jews of their German citizenship, made it illegal for them to do many jobs or to marry German non-Jews.

4. **Dehumanisation** - Those perceived as 'different' are treated with no form of human rights or personal dignity. During the Genocide in Rwanda, Tutsis were referred to as 'cockroaches'; the Nazis referred to Jews as 'vermin'.

5. **Organisation** - Genocides are always planned. Regimes of hatred often train those who go on to carry out the destruction of a people.

6. **Polarisation** - Propaganda begins to be spread by hate groups. The Nazis used the newspaper Der Stürmer to spread and incite messages of hate about Jewish people.

7. **Preparation** - Perpetrators plan the genocide. They often use euphemisms such as the Nazis' phrase 'The Final Solution' to cloak their intentions. They create fear of the victim group, building up armies and weapons.

8. **Persecution** - Victims are identified because of their ethnicity or religion and death lists are drawn up. People are sometimes segregated into ghettos, deported or starved and property is often expropriated. Genocidal massacres begin.

9. **Extermination** - The hate group murders their identified victims in a deliberate and systematic campaign of violence. Millions of lives have been destroyed or changed beyond recognition through genocide.

10. **Denial** - The perpetrators or later generations deny the existence of any crime.

1-That didn't happen.
2-And if it did, it wasn't that bad.
3-And if it was, that's not a big deal.
4-And if it is, that's not my fault.
5-And if it was, I didn't mean it.
6-And if I did, you deserved it.

Organisms typically base their success primarily on deception and rely on actual force or mutually advantageous trade (symbiosis) as little as possible. This should be nearly self-evident, but is generally overlooked due to the moral codes we elitists foist on our subjects. Camouflage is universal among predators and victims alike. Blossoms imitate fragrances and colors which are sexually attractive to certain insects in order to effect pollination. Dogs bark ferociously and feign attack on enemies of whom they are, in fact, terrified.

Human mental prowess and communicative powers have merely provided superb elaboration on nature's old theme of fraud, and added its own distinctive feature: self-delusion.

Human hierarchies, in contrast to the animal variety, are best sustained when the members are deluded regarding the oppressive nature, or better, even the very existence of the hierarchy! Not only is fraudulent bluff and bluster used to achieve dominance but fraudulent altruism and collective institutions are used to conceal dominance once achieved.

Visible rulers are highly vulnerable. Thus we see visible rulers claiming to be representatives of God, the common good, the material forces of history, the general will (either through vote or intuition), tradition, or other intellectual "spooks" that serve to lessen the envy of the ruled for the rulers. Encouraging such self-delusions among the masses of the ruled is universal for visible governments.

By embracing deception wholeheartedly at every level, finance capitalism, or rule through money, has fashioned the ultimate system yet devised for the secure exercise of power. Dominance in all aspects of society is surreptitiously accomplished while the great majority of the ruled, and even most of the visible leaders, believe themselves to be fairly autonomous, if harried, members of a pluralistic society. Nearly everyone believes major decisions to be the vector sum of autonomous pressures exerted by business, labor, government, consumers, social classes, and other special interests. In fact, the vectors of societal power are carefully balanced by us so that any net movement is in a direction chosen by us.

Throughout history, secure ruling elites arise through secret, or occult, knowledge which they carefully guard and withhold from outsiders. The power of such elites or cults diminishes as their occult knowledge is transformed into "scientific" knowledge and vanishes as soon as it becomes "common sense."

Secondarily, the power of the lords of money rests on an occult knowledge in the area of politics and history. We have quite successfully corruptedthese sciences. Although many people are familiar with our secrets through such books as "1984" by the disillusioned George Orwell, few take them seriously and usually dismiss such ideas as paranoia. Since real politics is motivated by individual self-interest, history is viewed most accurately as a struggle for power and wealth. We do our best to obscure this self-evident truth by popularizing the theory that history is made by the impersonal struggles between ideas, political systems, ideologies, races, and classes. Through systematic infiltration of all major intellectual, political, and ideological organizations, using the lure of financial support and instant publicity, we have been able to set the limits of public debate within the ideological requirements of our money power.

The so-called Left-Right political spectrum is our creation. In fact, it accurately reflects our careful, artificial polarization of the population on phony issues that prevents the issue of our power from arising in their minds. The Left supports civil liberties and opposes economic or entrepreneurial liberty. The Right supports economic liberty and opposes civil liberty. Of course, neither can exist fully (which is our goal) without the other. We control the Right-Left conflict such that both forms of liberty are suppressed to the degree we require. Our own liberty rests not on legal or moral "rights," but on our control of the government bureaucracy and courts which apply the complex, subjective regulations we dupe the public into supporting for our benefit.

Innumerable meaningless conflicts to divert the attention of the public from our operations find fertile ground in the bitter hatreds of the Right-Left imbroglio. Right and Left are irreconcilable on racial policy, treatment of criminals, law enforcement, pornography, foreign policy, women's liberation, and censorship to name just a few issues. Although censorship in the name of "fairness" has been useful in broadcasting and may yet be required in journalism, we generally do not take sides in these issues. Instead we attempt to prolong the conflicts by supporting both sides as required. War, of course, is the ultimate diversionary conflict and the health of our system. War provides the perfect cover of emergency and crisis behind which we consolidate our power. Since nuclear war presents dangers even to us, more and more we have resorted to economic crisis, energy shortages, ecological hysteria, and managed political drama to fill the gap. Meaningless, brush fire wars, though, remain useful.

We promote phony free-enterprise on the Right and phony democratic socialism on the Left. Thus, we obtain a "free-enterprise" whose "competition" is carefully regulated by the bureaucracy we control and whose nationalized enterprises are controlled directly through our government. In this way, we maintain a society in which the basis of our power, legal titles to property and money, remain secure, but in which the peril of free, unregulated competition is avoided and popular sovereignty is nullified. The democratic process is a sitting duck for our money power. Invariably we determine the candidates of the major parties and then proceed to pick the winners. Any attempts at campaign reforms simply put the rules of the game more firmly under our government's control.

Totalitarianism of the fascist or communist varieties is no danger to us as long as bastions of private property remain to serve as our bases of operation. Totalitarian governments of both Right and Left, because of the vulnerability of their highly visible leaders to party rivals, can be manipulated easily from abroad. Primarily, totalitarian dictatorships efficiently prevent new money lords that could challenge our power from arising in whole continents, civilizations, and races.

Asch Conformity experiment [Anonymity, Dissident]

████████████████████

Also known as: Average Joe, Normie, Sheeple, Vegetable, TV-Watcher, Comic Book Reader

Lemmings have basic desires of security and happiness. The Lemming will be loyal to whomever provides him with these basic wants. The System also holds control over the lemmings through the media and various institutions, including educational.
The Lemming conforms to the Laws and Standards of the System that are reinforced through those institutions and the media. The Lemming then applies peer pressure to other Lemmings to conform with the System, it's Laws and Standards. Should the Lemming fail to conform, he may be punished and lose his comforts and wants that the System provides.

The System needs to provide the lemming with his basic desires to have his mindless loyalty. However, once the Lemming has his basic desires realized, he will grow decadent and develop a desire for more extravagant luxuries and degenerate experiences. If the System has the means it will establish a consumerist society, offering the Lemming those luxuries and experiences. It will further develop and reinforce that desire through the media. The Lemming will become more brainwashed and loyal to the System.

A Lemming who already has his basic wants realized won't understand the purpose of higher ideals as he already has what he wants. A Lemming who is enjoying decadent luxuries is going to reject higher ideals that would demand of him to give up those very luxuries. the Lemmings sees the System as the provider of his comforts and luxuries. The Lemming Will not risk losing those by going up against the System.

An unstable System that does not provide assurances in provision of basic wants loses the loyalty of the Lemming who must seek realization of his desires elsewhere. Which is when they are open to propaganda that associates realization of higher ideals with realization of their basic wants. This is how NSDAP did it, this is how Golden Dawn does it.

- Lemmings make up around 90% of the population. The Lemming Condition is natural and cannot be altered with propaganda. Propaganda works on the Lemmings only if it is deployed by the Dominant force in society
- The goal of propaganda in the Struggle against a System is to recruit from the other 10% of the population that is made up of thinking people and potential radicals

Controlled Opposition

[Well poisoning]
Компромат [planting, fabrication]

The US government has Microwave tech they used to defend nuclear weapon bases in the 70s. If they don't want you protesting, you won't be protesting. Google controlled opposition and then ask yourself why a few questions.
- why do all leaders have some connection to the establishment? Either directly or indirectly.
- why despite easy wins being achievable why do group leaders never stear people towards them?
- why do group leaders seem to know or be friends with each other?
- why do a lot of influential people have ties to the CIA or military intelligence?

When you look to their occult literature that has been in circulation for hundreds of years these aren't the ramblings of madmen they're the works of thinkers and philosophers who knew the human condition and want to rule it.
That's why they're so successful at disinfo they have been doing it for eras.
For example Michael Aquino of the temple of set.
He was integral in creating the idea of >satanic panic
And diminishing the very real claims of satanic ritual abuse. Using his ridiculous looks and power other language and knowledge of the human condition he and his media cronies completely ruined the viability of any claims to satanic abuse.
Despite the fact that John decamps chief investigator and son were killed in an obvious air traffic assasination.
And a number of children who were placed on day care centres under his realm of influence were found to have contracted Chlamydia among other physical signs of abuse.
If I am correct the military police and FBI 'took over' this investigation relating to the massive sexual abuse scandals which were coming to light on military bases which all links into Mkultra and drug smuggling on the west coast

During his Oprah Winfrey interview they have a controlled party in the crowd say outlandish stuff and Aquino tears him apart all bread and circus to establish 'satanic panic' in your mind.

Trauma

████████████████████

Social alchemy is using events, news or media to inflict trauma on a populace to initiate a psychological change on a population level.
For example the anti war movement of the Vietnam era was a finely crafted bit of social alchemy used to create drug culture in America and anti war sentiments and anti patriotic sentiments in the western world.
The same was repeated again in Iraq and Afghanistan, fight illegal wars publicise your people's atrocities and bring in more drugs

So the insidious banker elites used the Jews against Germany in Weimar and then used the conflict as a stage to set up the holocaust the world's finest act of psychological alchemy. The dawning myth of the modern motion picture world. Banking interests have used holocaust depictions to traumatise the world, for the European the guilt of their ancestors or some shit, for Jews the trauma of holocaust and for blacks and Asians they relate from their own historical traumas that weren't their own. They then externalise these traumas into the outside world and the elites perpetuate these traumas into the outside world.
If you ask me the elites have a certain favourite bunch but none the less they will kill their own to serve a purpose have no doubts some Jews did die during world war 2 but I think the facts are distorted to suit Marxist goals of creating anti-Semitism myths and it has always been the way of the Marxist-frankist. They use these language barriers like racism and anti-Semitism to block realms of discussion to create impasses in politics. If we could just speak fucking plainly about the necessity of a stable family good moral teaching and definitely about how Marxist/Frankist with a mixture of traitors of all varieties and coconspirators supremecist interests have subverted the morals of entertainment and the world for their own interests, then we would be better off.

Manufacturing consent

For example in the UK when I was much younger gay marriage issues and homofaguality was being pushed hard by the British media. It was no surprise that coronation Street, Hollyoaks and popidol all pushed this agenda at the same time

Gulf of Tonkin. This suite of cyber security breaches is only interrupting and inconveniencing civilians. No hard targets have been hit and nothing existential. They are manufacturing consent for war on China. The same reason they are now pushing lab leak theory and throwing Fauci under the bus. The last 2 years have been a psyop to prepare the American public to be emotionally frustrated enough to consent to war on China. They will also reveal China hacked the election and they will also fake an attack on Taiwan by China. They might even detonate a nuke in the ocean nearby and blame it on China saying they intercepted or they shot down a Chinese nuclear submarine as a warhead was being launched

Shill

It's not for you it's for people with forming minds who are younger. Look to 9gag too any time there is a female look at the comment section and you see shills trying to drive people into a state of lust, defeatism or anger it's bewildering how pervasive the social engineering is on that app. It essentially functions as JIDFs internet brainwashing app.

Only way to free yourself from the programming is seeing that it is everywhere I suppose.

They hate the natural sexes and seek to invert them, they push for sodomy instead of procreational sex, they want mothers to murder their children instead of birth them, they want to doctors to poison and 'treat' instead of healing and curing, they want food that does not nourish, they want to defile our bodies with tattoos and piercings, fake tans, hair dyes and cosmetics of every kind. It is all right in front of our eyes, yet it is sometimes difficult for us to notice as we have become so accustomed to their evil.

They mutilate and disfigure us to make parodies of the sexes (transgenders), they pump us full of chemicals and hormones to upset the natural balance. They have artificial wombs, cloning technology, the ability to do all manner of things that despite us all having some vague understanding of; we do not understand it or know what is truly going on. They have an abundance of 'hidden knowledge', and they use it to destroy what is natural.

The world is already horrific, but it's going to get much worse.

2 Jews wrote all pop music in the past 20 years.
Max Martin [Karl martin Sandberg]:

Dr. Luke [Luke Gottwald]:

> Bon Jovi, Kelly Osbourne, Mos Def, Kelly Clarkson, Backstreet Boys, Keisha, Paris Hilton, Vanessa Hudgens, Katy Perry, Lady Sovereign, Flo Rida, Pitbull, Three 6 Mafia, Lil Jon, Nicki Minaj, One Direction, will.i.am, Miley Cyrus, Shakira, R. Kelly, Nicki Minaj, Claude Kelly, G.R.L, the list goes on.

also Lyor Cohen controls Hip Hop.
Most American bands were a product of the CIA's Look Out Mountain facility in Los Angeles. It housed one of the largest indoor film studios at the time. Most people have never even heard of the place.
Pop music is mostly crafted to function in a way that imitates the technique known as psychic driving. Repeating asinine phrases like "I want to die young over and over" Blues clues and it's recent trans parade stuff and all that YouTube nutty elsagate shit is going to manufacture a generation of corrupted youths mark my word

██████████████████████████████

Neurochemical

██████████████████████████████

/gif/ functions like 'elsagate' but for adults.
There is a potent mindstate that the elite are aware of and it's the mixture between violence and sex. That hit of the brain chemicals and hormones that it produces is intoxicating and opens you up to more sexually suggestive states, it is no mistake bbc Hypno trainer threads are next to nigger hate threads, which are next to fight threads which are next to bwc.
It is 100% run by bad actor agents who use that board as goad to all those that frequent it.
The montages memes and archive's of gore these people have are too well produced and too uniformly posted to be anything other than a psyop.
So before you go to gif consider what I said. Go jerk off to porn hub or even better something not produced by Jews who are using porn as a weapon to further fuck up the family unit and teenagers

██████████████████████████████

This show was social conditioning to fuck.
Ask any normie what they remember they don't remember shit but the gore. The gore.
Have any of you guys noticed how much normies love gore and sex. I tried specifically discussing scenes such as the cuck cops visit to Buckingham palace. Or how the show was made to annoy every single race. The main antagonist describes his Asian bride as an animal.
The whole show promulgates the satanic ideals of genetic superiority and that the weak should fear and be reaped by the strong. I have no idea where the series goes.
But ask a normie what they remember.
They remember the gore my friends, and do you think that is healthy?

Subliminal

██████████████████████████████

Sliced bread producers invented the saying "The best thing since sliced bread." They knew they couldn't maintain their position as 'best thing' but now every time a new best thing comes along, instead of referencing the most recent last best thing, everyone references sliced bread.

Corporate

- Sign up for a vaccine at Walgreens or CVS
- Check in, verify your identity, check insurance info
- Just before you get the shot, tell them you have to use the bathroom > leave

Two things to remember here: Walgreens is in this for a profit, and when you complain to a large company they always try to make it right. This gives you the upper hand. It's very likely that Walgreens will assume they made a mistake or that you're lying and simply lost the card. They'll have a record showing that you were there and most likely that your insurance company was charged. And again, because this is a large company and a customer service complaint, they're going to do everything they can to correct the situation, i.e. give you whatever you're asking for (within reason) as their default position.

Water

- Conserve body's water level: don't eat, travel at night, rest in shade, stay covered
- Get to high ground: locate vegetation, animal tracks, riverbed and dry stream
- Suplement: morning dew, branches, solar still, ...

- Most mammals require water regularly. Grazing animals are usually never far from water as they need to drink at dawn and dusk. Converging game trails often lead to water; föllow them downhill. Meat eaters are not good indicators — they get moisture from their prey.
- Grain eaters, such as finches and pigeons, are never far from water and drink at dawn and dusk. When they fly straight and low they are heading for water. When returning from water they fly from tree to tree, resting frequently. Water birds and birds of prey do not drink frequently and are therefore not good indicators.
- Bees are especially good indicators. They fly at most 6.5 km (4 miles) II-om their nests or hives. Ants are dependent on water. A column of ants marching up a tree is going to a small reservoir of trapped water. Such reservoirs are found even in arid areas. Most flies keep within 90 m (100 yards) of water.
- Lizard collect what little moisture they need from dew and their prey. Not good indicators.
- Human tracks usually lead to a well, bore hole or soak. It may be covered with scrub or rocks to reduce evaporation. Replace the cover.

Tactics
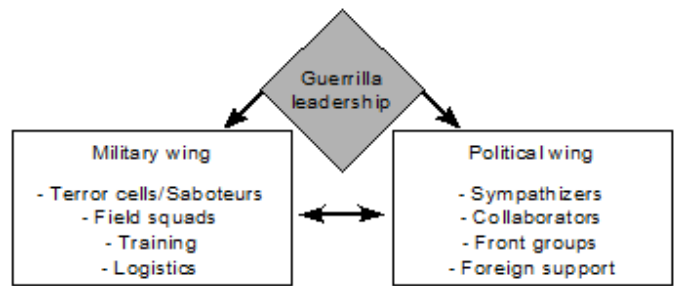

Dau Tranh Strategy: Integrated political and military struggle

Political struggle:

Dan Van- Action among your people
Total mobilization of propaganda, motivational & organizational measures to manipulate internal masses and fighting units.

Binh Van- Action among enemy military
Subversion, proselytizing, propaganda to encourage desertion, defection and lowered morale among enemy troops.

Dich Van- Action among enemy's people
Total propaganda effort to sow discontent, defeatism, dissent and disloyalty among enemy's population.

Military struggle:

Phase 1: ORGANIZATION AND PREPARATION- building cells, recruiting members, infiltrating organizations, creating front-groups, spreading propaganda, stockpiling weapons.

Phase 2: TERRORISM- GUERRILLA WARFARE - kidnappings, terrorist attacks, sabotage, guerrilla raids, ambushes, setting up parallel governments in insurgent areas.

Phase 3: CONVENTIONAL WARFARE- regular formations and maneuver to capture key geographical and political objectives.

The classical Maoist model requires a strong, unified guerrilla group and a clear objective. However, some contemporary guerrilla warfare may not follow this template at all, and might encompass vicious ethnic strife, religious fervor, and numerous small, 'freelance' groups operating independently with little overarching structure.

Main Force regulars	Regional fighters	part-time Guerrillas

Guerrilla operations typically include a variety of strong surprise attacks on transportation routes, individual groups of police or military, installations and structures, economic enterprises, and targeted civilians. Attacking in small groups, using camouflage and often captured weapons of that enemy, the guerrilla force can constantly keep pressure on its foes and diminish its numbers, while still allowing escape with relatively few casualties. The intention of such attacks is not only military but political, aiming to demoralize target populations or governments, or goading an overreaction that forces the population to take sides for or against the guerrillas.

Whatever the particular tactic used, the guerrilla primarily lives to fight another day, and to expand or preserve his forces and political support, not capture or holding specific blocks of territory as a conventional force would.

	Doxx: Social media, Insider, Healthcare worker
	key transportation routes

Psychology

- Keep the System off balance with surprise attacks. Provoke them into PR blunder
- Make one assailant seem like many[Grafiti, Letter, Vandalism, ...]
- Maintain pressure with one-man low-risk activity

- Attract media attention, contact independent reporter
- Gain sympathy from the public, maximize optics
- Inspire copycat: Aesthetic, Sigil, Catchphrase
- Distribute recruit material

Assault

- Cut off water, electricity, highway, sea port, airline, oil, gas
- Disable enemy vehicle, destroy fuel storage, communication
- Incite mutiny/violence between factions
- Seize control of broadcast stations, distribute propaganda
- Assassinate/kidnap leaders, sow distrust
- Contact insider allies
- Gather leftover resources

IED
Tank

Many insurgents died in GWOT to canister shells from tanks racing behind and flanking RPG teams in alleys or orchards.

Fire bottles are basically an automated fire extinguisher system used on Bradleys, Abrams, some HMMWV's, etc.
Iirc, the Bradley has 2 for the engine, 2 for the turret, 1 for the crew. You might be able to find more info by looking up "AFES Fire Bottle", since they're part of the AFES system

[ammo blowout panel] WW2 EOD guys using thermite to burn into bomb casings used regular ceramic gardeners pot-plants (hint, hint) with a thin piece of tin under the drainhole to hold the thermite inplace until it was melting time.

Convoy

I think the moral of this story is to not attack convoys. That is, unless you are in a narrow road which there is no escape.

Withdrawal
Destroy classified radios before capture, wreck the chambers of cannons about to be lost.

Always have multiple cache so your fighter can easily blend back into the general populace
- Method: Concealment, Burial, Submersion
- Material: PVC pipe, water bottle
- Site: Landmark, secure primary and alternate routes
X0005_cache, No 014 Conceal gear using caches

There are only 5 ways to write, in descending order of complexity
- Dragon seal script: chinese, japanese, anything I missed that derives from the ancient oracle dragon bone script found in china
- Abugidas: derived from sanskrit, every letter represents a sound with an expression attached, making a syllable, common in asia, examples include hindi and thai script
- Arabic: Abjad
- Alphabets: each letter represents only one sound (vowel or consonant) with no further expression, little to no connection between writing and speech, examples include latin and cryllic
- Hieroglyphs: the most ancient way to write that has fallen out of use, icons represent a meaning only and each has to be learned individually, language is indecipherable without elaboration, examples include maya script, egyptian script and sumero-akkadian cuneiform

You can try counting the number of angles inside every letter because in some languages that is what determined the sound. You can then compare that to sounds of letters in other Semitic and Indo-European languages

The Unknown

Vinča
The Vinča symbols have been found on many of the artefacts excavated from sites in southeast Europe, in particular from Vinča near Belgrade, but also in Greece, Bulgaria, Romania, eastern Hungary, Moldova, southern Ukraine and the former Yugoslavia. The artefacts date from between the 7th and 4th millennia BC and those decorated with these symbols are between 8,000 and 6,500 years old.

Indus/Harappa script

Since 1875 more than 4,000 objects inscribed with this script have been found. Most inscriptions are short and consist of five symbols on average, with 17 in the longest one. Inscriptions are mostly on flat, rectangular stamp seals, and also on tools, tablets, ornaments and pottery.

417 distinct symbols have been identified, and the direction of writing is thought to be right to left, and sometimes boustrophedon. Many people have tried to decipher the Indus script, but none have succeded so far, or at least none have produced a generally-accepted decipherment. Some believe that the Indus script was used to write a Dravidian language, others that it was used to write an ancestor of Sanskrit.

Judaism is ran from the top down by Sabattean Frankists and Khazarian Satanist Jews, they are in alliance with free masonic Satanists or lord over them who knows.
They use blood rituals and sacrifices as a way to establish compramat and because some of them genuinely believe in blood sacrifice.

It's interesting the 6 million died in the holocaust number lines up with 6 million skeletons found in the OVER 200 MILES of catacombs under Paris. As if that is a possibility that that much dirt was excavated before modern machines underground, I wonder if the 6 million the Jews claim is some kind of projection of an actual genocide that has been erased from our books.

"that's pseudoscience, no we don't need to refute it with actual science!"

There probably is a grand conspiracy as to why they want this kept secret, but I think it's merely because they know they've inherited a shitstorm from their ancestors and each generation is merely trained into the same belief structure so they don't challenge it. That and in a marketplace for employment they'd be worthless if it came out they were wrong. So many academics are stuck in this position where they have to say this isn't real, but know if it gets out their careers are done.

Don't believe it? Do you hear from those scientists who said there was no water on Mars anymore? Nope. They're all gone. No interviews, no invitation to events, nada, because NASA admitted after overwhelming evidence proved otherwise that there was water on Mars.

Human Sacrifice

It is also no coincidence that some planned Parenthood facilities are shaped like old human sacrifice temples of yonder year.

I believe what I believe and im now going to tell you what THEY believe.

Upon death a person releases energy which can be captured or used through a number of means. So this baby killing mill is like a nuclear power plant of evil occult energy.

If you guys only knew the number of wiccans, witches and Satanists that employ these establishments they would turn your stomachs even more then they do.

If you were to read Alister Crowley's works and other works relating to the sacrifice of humans nothing is more potent than an innocent child. So you can see the attraction for these Satanist pricks.

You will never win the people who protest for abortion over they are in the realm of Satan. You can tell them all about personal responsibility and how most abortions aren't related to rape or invest and yet they still will continue on because do what thou wilt is a corner stone of their self, temperance is alien.

Hidden Life in Freemasonry. This book was written for people involved in Luciferian rituals In the higher more occult rites of Freemasonry. In the preface, Leadbeater talks of butterflies (pp viii-ix), which has the double meaning in the occult of souls (spirits). in the last chapter, chapter 10, he gives Masonic rituals to Invoke angels (demons) through Egyptian magic. In these Masonic temples, the checkerboard square is used in a similar fashion as a magic circle for a coven. This picture is given as a paper trail to show the sex-magic rituals that take place within various Masonic groups.

AIN SOPH

THE Qabbalists conceive of the Supreme Deity as an Incompre-hensible Principle to be discovered only through the process of eliminating, in order, all its cognizable attributes. That which remains—when every knowable thing has been removed--is AIN SOPH, the eternal state of Being.

AIN, the vacuum of pure spirit.
AIN SOPH, the Limitless and Boundless.
AIN SOPH AUR, the Limitless Light.

Atziluth	the Boundless World of Divine Names.
Briah	the Archangelic World of Creations.
Yetzirah	the Hierarchal World of Formations.
Assiah	the Elemental World of Substances.

the First Crown - the name of the first power of God was Eheieh - I Am [That I Am].
the first Wisdom - the name of the second power of God was Jehovah - Essence of Being.
the first Understanding - the name of the third power of God was Jehovah Elohim - God of Gods.
the first Mercy - the name of the fourth power of God was El - God the Creator.
the first Severity - the name of the fifth power of God was Elohim Gibor - God the Potent.
the first Beauty - the name of the sixth power of God was Eloah Vadaath - God the Strong.
the first Victory - the name of the seventh power of God was Jehovah Tzaboath - God of Hosts.
the first Glory - the name of the eighth power of God was Elohim Tzaboath - Lord God of Hosts.
the first Foundation - the name of the ninth power of God was Shaddai, El Chai - Omnipotent.
the first Kingdom - the name of the tenth power of God was Adonai Melekh - God.

In the three lower worlds these circles are intelligences, planers, and elements, but in this first divine world they are called the Rings of the Sacred Names.

the Second Crown - Metatron - the Angel of the Presence.
the second Wisdom - Raziel - the Herald of Deity who revealed the mysteries of Qabbalah to Adam.
the second Understanding - Tsaphkiel - the Contemplation of God.
the second Mercy - Tsadkiel - the justice of God.
the second Severity - Samael - the Severity of God.
the second Beauty - Michael - Like Unto God.
the second Victory - Haniel - the Grace of God.
the second Glory - Raphael - the Divine Physician.
the second Foundation - Gabriel - the Man-God.
the second Kingdom - Sandalphon - the Messias.

In the second world, B 1 to B 10, the order of the spheres is the Name as in the Atziluthic World, but the ten circles of light are less brilliant and more tangible, and are here referred to as ten great Spirits—divine creatures who assist in the establishment of order and intelligence in the universe.

the Third Crown; the Hierarchy is the Cherubim	Chaioth Ha Kadosh	the Holy Animals.
the third Wisdom; the Hierarchy is the Cherubim	Orphanim	the Wheels.
the third Understanding; the Hierarchy is the Thrones	Aralim	the Mighty Ones.
the third Mercy; the Hierarchy is the Dominations	Chashmalim	the Brilliant Ones.
the third Severity; the Hierarchy is the Powers	Seraphim	the Flaming Serpents.
the third Beauty; the Hierarchy is the Virtues	Melachim	the Kings.
the third Victory; the Hierarchy is the Principalities	Elohim	the Gods.
the third Glory; the Hierarchy is the Archangels	Ben Elohim	the Sons of God.
the third Foundation; the Hierarchy is the Angels	Cherubim	the Scat of the Sons.
the third Kingdom; the Hierarchy is Humanity	the Ishim	the Souls of Just Men.

In the third world the ten globes of the original Atziluthic World are greatly limited and dimmed, but they are still infinitely powerful in comparison with the state of substance in which man dwells. In the third world, C 1 to C 10, the globes become hierarchies of celestial creatures, called the Choirs of Yetzirah. Here again, all are included within the ring C 1, the power which controls the Yetziratic World and which includes within itself and controls the entire world D

|	
the Fourth Crown; Rashith Ha-Galagalum	the Primum Mobile - the fiery mist which is the beginning of the material universe.
the fourth Wisdom; Masloth	the Zodiac - the Firmament of the Fixed Stars.
the fourth Understanding; Shabbathai	the sphere of Saturn.
the fourth Mercy; Tzedeg	the sphere of Jupiter.
the fourth Severity; Madim	the sphere of Mars.
the fourth Beauty; Shemesh	the sphere of the Sun.
the fourth Victory; Nogah	the sphere of Venus.
the fourth Glory; Kokab	the sphere of Mercury.
the fourth Foundation; Levanah	the sphere of the Moon.
the Fourth Kingdom; Cholom Yosodoth	the sphere of the Four Elements.

The World of Assiah, or the elemental world of substance, is the one into which humanity descended at the time of Adam's fall. In all the ancient Mysteries, matter was regarded as the source of all evil and spirit the source of all good, for matter inhibits and limits, often so clogging the inner perceptions that man is unable to recognize his own divine potentialities. Since matter thus prevents humanity from claiming its birthright, it is called the Adversary, the power of evil. The fourth world, D, is the world of solar systems

The ruler of the fourth world is D 1, called by some the Fiery Heaven; by others the Primum Mobile, or the First Motion. From this whirling fire emanates the material starry zodiac, D 2, in contradistinction to the invisible spiritual zodiac of the Yetziratic World. From the zodiac, D 2, are differentiated the spheres of the planets in concatenate order.
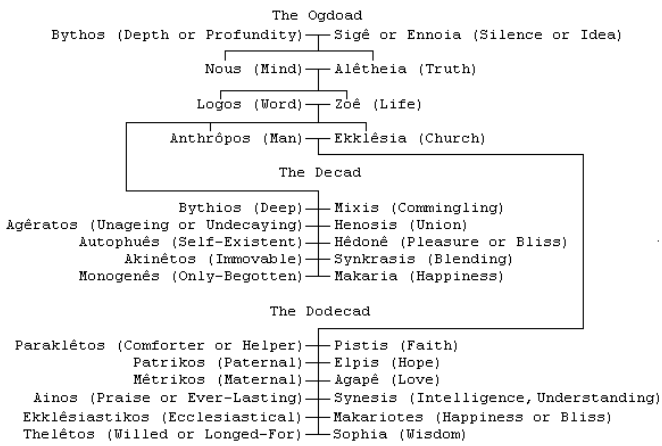

the evil Crown; the hierarchy is called Thaumiel - the doubles of God - the Two-headed; the Archdemons are Satan and Moloch.
the evil Wisdom; the hierarchy is called Chaigidiel - those who obstruct; the Archdemon is Adam Belial.
the evil Understanding; the hierarchy is called Satharial - the concealment of God; the Archdemon is Lucifuge.
the evil Mercy; the hierarchy is called Gamchicoth - the disturber of things; the Archdemon is Astaroth.
the evil Severity; the hierarchy is called Golab - incendiarism and burning; the Archdemon is Asmodeus.
the evil Beauty; the hierarchy is called Togarini - the wranglers; the Archdemon is Belphegor.
the evil Victory; the hierarchy is called Harab Serap - the dispensing Raven; the Archdemon is Baal Chanan.
the evil Glory; the hierarchy is called Samael - the embroiler; the Archdemon is Adramelek.
the evil Foundation; the hierarchy is called Gamaliel - the obscene; the Archdemon is Lilith.
the evil Kingdom; the hierarchy is called Nahemoth - the impure; the Archdemon is Nahema.

The ten Archdemons, corresponding to the ten Archangels of Briah. The black magicians use these inverted spirits in their efforts to attain their nefarious ends, but in time the demon destroys those who bind themselves to it.

The original Hebrew term šāṭān (Hebrew: שָׂטָן) is a generic noun meaning "accuser" or "adversary", which is used throughout the Hebrew Bible to refer to ordinary human adversaries, as well as a specific supernatural entity. The word is derived from a verb meaning primarily "to obstruct, oppose".

Satan - Wikipedia

Anybody that uses a Hebrew word to describe mythological figures is essentially making an admission of ignorance.
The title means simply, "adversary". The OT God was Anu/El and his son, Yahweh, was the leader of what Israel became.
Lucifer told the humans in the Garden (gardens grow food, remember...) what Anu/El was doing and they kicked up out, thereby becoming conflated with "The Devil", because he was know dubbed an enemy or a "Satan".

Chaos

Chaos is not in itself, a system or philosophy. It is rather an attitude that one applies to one*s magic and philosophy. It is the basis for all magic, as it is the primal creative force.

In the western tradition we have what we call "thoughtforms". Alot of people get these confused with tulpas, and on some levels they kind of are one. However, thoughtforms are made around an idea. That idea in chaos magic traditionally was a sigilized version of something you wanted to give them an appointed task like... >go get butter For example. But the idea or goal of the thoughtforms could be vague or not there at all. Essentially the thing is a split off of your own mind put into an empty shell.

Sigil
A hyper sigil is a sigil that's been extended through the fourth dimension. It's in effect one long giant fucking sigil that can take the form of a book, poem, songs or music albums, or comics to name a few.

These are effective but extremely dangerous ways of attempting to alter reality. In effect the hyper sigil is like a miniature version of the occultists universe used like a voodoo doll to shape it as best as he sees fit.

Now propose you're an occultists who wants to change reality in a dangerous, but effective way, you would go towards hyper sigil first. But what if you want to do better? What if you want to make things happen to your designs more? You'd make thoughtforms that are based off your sigil. Entire beings who's sole purpose is to make the sigil more effective and carry out your goals.

Oracle bones (Chinese: 甲骨; pinyin: jiǎgǔ) are pieces of ox scapula and turtle plastron, which were used for pyromancy – a form of divination – in ancient China, mainly during the late Shang dynasty. Scapulimancy is the correct term if ox scapulae were used for the divination, plastromancy if turtle plastrons were used.

These Golems serve as physical binding points for Servitors and Thoughtforms. Since the statues contain personal "parts" of the Thoughtform's creator, among other ingredients, they create the ultimate bond between Servitor and Creator. A Golem, in Hebrew גֹּלֶם, is an anthropomorphic being that is magically created entirely from inanimate matter, specifically clay or mud. The word Golem that means "my light form", "raw" material, connoting the unfinished human being before God's eyes

They want you to ignore that mercury ball antenna and pure copper domes on some buildings still date back to the 1500s 1600s and 1700s (they missed redating those, oops!) Oh, and, of course, don't take notice that pyramids very often, in addition to having had a precious metal capstone, are filled with mercury. Don't notice how conductive this is.

Don't notice that Victorian buildings had copper roofs and mercury ball antenna. Don't ask how they made those or what they were for. You WILL believe the false dating, that says these were all made in 1900 despite plaques saying "comissioned in 1518".

It has been nicknamed the Bermuda Triangle of space. Spacecraft passing through are prone to electronic malfunctions, which have caused at least one spacecraft to break up in flight. Astronauts' laptop computers are disabled, and astronauts themselves report seeing flashing lights that no instruments can detect.

Quantum

Everything is always in superposition because there's no such thing as wave function collapse, but proximity limits what can be seen for a given probability, it is tied to space so gravity _can_ hold it together, but other things can do that too. Every possible combination of things exists, exactly ones. What changes is the probability of going from one frame to the next, and those probabilities have a magnetism+hysteresis to them: e.g. the particles in your body stick with your body, for the most part, or at least where you tend to go, because you have a body moving around - chances are they are very likely to be the nearly same of particles in your local set of worldlines - even though there are virtually infinite exactly identical copies of different sets of particles in the exact same arrangement for every moment of time scattered throughout the multiverse. Similarly, the ones that exist out in the middle of space with nothing around are fantastically unlikely unless you volunteer for spacex or similar - which some number of you most certainly do (then get ejected for violating the terms of Musk's slave labor contract and/or for PR purposes.)

Leylines

Consider the schumman resonance. If you cover a plane in sand..
And you vibrate the plane...
cymatics! patterns appear, as the vibration itself creates geometry.
Now imagine the plane is an sphere.
The sphere vibrates at a certain resonance.
Energy gathers along the geometry...cymatics! What is a leyline, but geometry?
what is geometry, but expressed energy? and so being creatures born of the
earth, we gather where the geometry/energy is condensed. evolution at work,
instinctual...

Becker-Hagens is an acceptable theory, but I believe it lacks something
critically important. It seems too clean in a way. Perhaps the leylines naturally
move and the rulers of this world place special buildings on specific sites to
lock them in place?

Mud flood

Within the last 100-1000 years, civilization was reset and humanity lost much of its knowledge and many advanced technologies. This reset was caused by a huge flood that covered the land in a few feet worth of sediment. A few theorists equate this flood with the great flood of the Bible; if this theory is true, it would throw the Bible's timeline off by more than a thousand years. There are even fewer theorists that believe that church steeples were used to radiate electricity through the air and that giants ruled the Earth, but that is a whole different story that would require diving into the rabbit hole. headfirst.

The proof of this flood comes from many examples of buildings that have seemingly been buried either fully or partially under the ground. There are pictures circling the internet showing Russia's Winter Palace, the US Capitol Building, and the Saint Mary Magdalene church having been dug out to reveal lower levels than previously known. These are three examples that seem to be commonly used by supporters of the mud flood conspiracy as evidence. There are other various examples used though, as countless examples of buildings with windows below ground level exist. These pictures make it seem as though some of these buildings had been intentionally buried and forgotten about. There is seemingly no logical explanation for this. Some have tried to debunk this theory by bringing up what is referred to as the "cultural layer" of dirt. This layer is sediment and dust that builds up around the places that humans live. However, this has only brought up more questions. Why would previous generations let this layer build up so high? This has resulted in another large part of the theory which is that some of history has simply been rewritten or erased.

Pole Shift

The Yellowstone fear mongering is a meme. It's a caldera. During the Younger Dryas Cataclysm (last pole shift) it was a major faunal refuge, especially for large animals like bison. High elevation plateau with surrounding mountain ranges protect against severe winds and tidal waves sweeping across the continent, lots of geothermal warmth to aid plant growth while the sun is blotted out, etc.
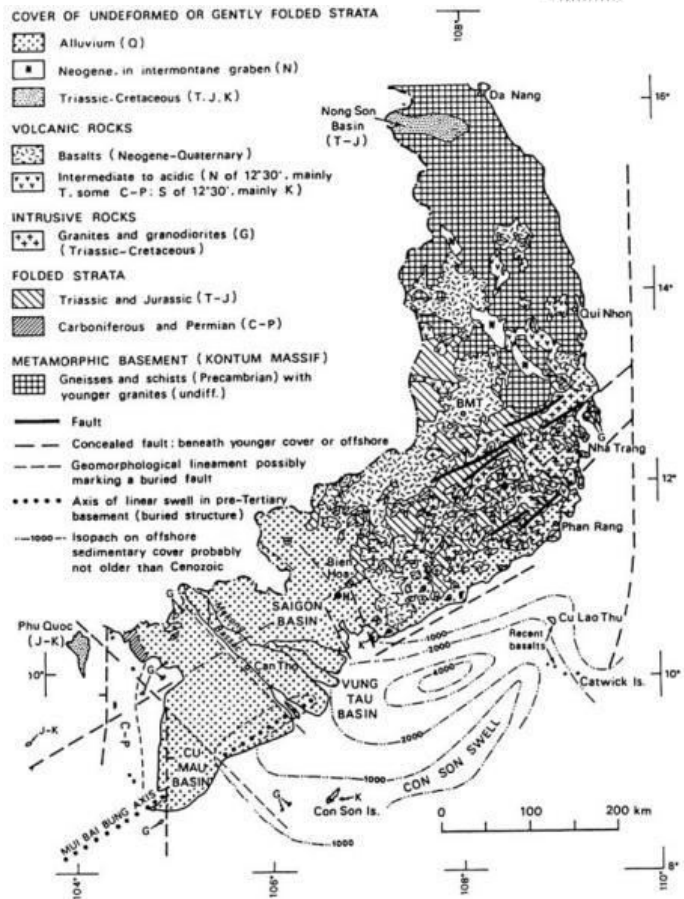

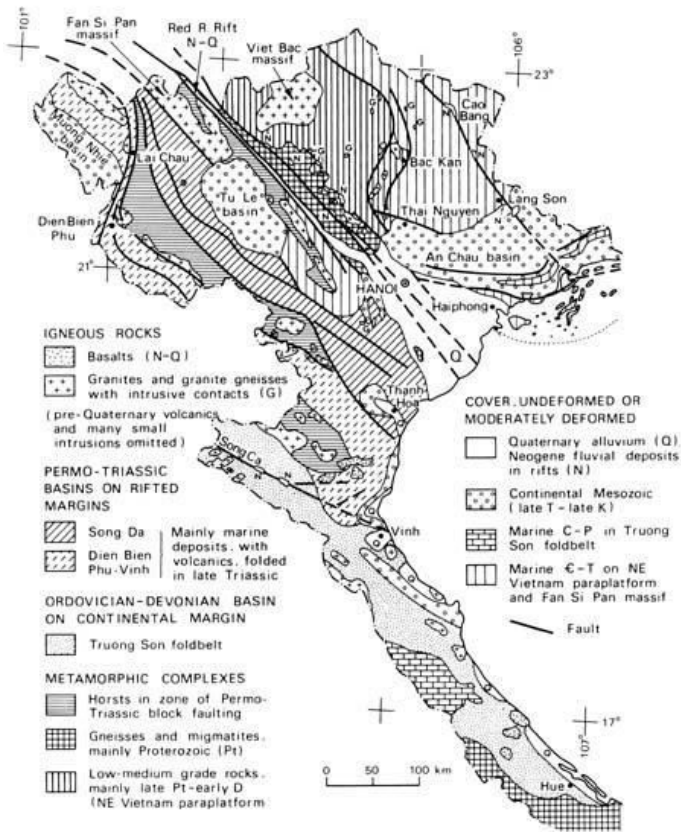

I think elevation and latitude are the key. The tsunami will completely wash over california and the west coast states. I want to be above 6,000 ft and as far south as possible. We are likely to head in to an ice age after this.. not to mention if the sun blows off it's shell there is not going to be a lot of light for a while.

12 000 years cycle

The Sun's output is increasing, but the talking heads are hiding it from the public. There is an impending natural disaster cycle that will cause widespread societal collapse and likely destroy the power grid permanently. It may not happen within our lifetime, but is definitely going to happen within this generation or the next 1 or 2 gens after that. The cycle happens roughly every 12000 years and our comfy time is just about up. Part of me thinks that this is the reason the (((powers that be))) are shilling for disasters so much in the media right now, and also the reason why they're engaging in these mass societal experiments involving totalitarian control hysteria.

Sleep

Sometimes I wake up in the middle of the night and see silhouette of a cloudy being with a top hat. I haven't seen him in about 4 months but it's back and in my dreams now. It doesn't seem threatening, whenever I hallucinate it's just standing there watching me, and in my dreams it's the same. A quick google showed me that it's likely "Hatman", and there's people all around that have seen him.

Retrowave, giant, 24745918. So many people describe this location the exact same way. Endless amount of stores that seem to lead into one another directly, steep escalators where the laws of physics don't apply, difficult or impossible to find exits, seems to exist as a city of some sort unto itself, often connected to or close by a similar University World or Library World, etc.
For me, the mall is often utopian, as if some fully harmonious society exists within this massive mall complex that's implied to be like "post-capitalism" or something.

SCIENTIFIC ADVANCEMENT
Magnetism

Most regions of the brain had five million magnetite crystals per gram of tissue. The tough membrane that covers the brain had 100 million crystals per gram. Each human brain on average contains seven billion particles of magnetite, weighing a total of one-millionth of an ounce

Low-density

They hoped I could help them with reasons for these results, which disturbed them.

The first thing they told me was that the mice turned criminal in their low-density magnetic field environment.

"Criminal!?" I exclaimed. "How in the dickens do you tell when a mouse turns *criminal?*" I asked.

"Very simple," was the answer. "There are basic end-cruelties for almost all mammals; mice and humans are no exception. Cannibalism is the ultimate cruelty, and they turned cannibalistic. Even though they had plenty of the same food as the mice in the normal magnetic field strength cylinders, they indulged in cannibalism as a preference. The mice in the normal cylinders treated each other normally - and ate only their normal food." He paused a moment.

"There's another thing which really confounds us," he continued. "These same mice who turned cannibalistic indulged in *forcible* rape literally around the clock. That and murder are the other end-cruelties."

"Is it possible that you can tell the difference between rape and forcible rape in mice?" I asked. "It seems impossible to differentiate in mice."

"Oh yes," he said, "It happens all the time in the
After some consideration, I gave them my conclusion. I would commit that a lowering or lowered magnetic field environment could give its occupants a sense of impending doom. Certainly there would be a feeling that something out of control was destroying them, so why not get what they want irrespective of consequences? In the case of humans, *those without empathy turn criminal first.* In the case of animals, it is probably proper to assume that there is little or no empathy there to start with.

Faith reduction

Magnetic brain stimulation 'reduces belief in God, prejudice toward immigrants'

Disabling certain areas of the brain with transcranial magnetic stimulation can reduce a person's belief in God and negativity toward immigrants, claims a new study published in the journal *Social Cognitive and Affective Neuroscience*.

The research is the result of a collaboration between researchers from the University of York in the UK and investigators from the University of California-Los Angeles (UCLA).

Transcranial magnetic stimulation (TMS) is a procedure currently used to treat depression. It works by using magnetic energy to stimulate nerve cells in areas of the brain involved in mood control.

Medical

A lot of physics seems to be built on unproven theories. same can be said about biology. germ theory has never been proven and has even been disproven during the Spanish flu. to this day, nobody has been able to prove HIV causes aids either. kary mullis has a great interview talking about the aids epidemic which fauci happened to also be a part of. coincidentally kary mullis also invented the PCR testing method used to fabricate the corvid pandemic which fauci is also a part of. he specifically states that a PCR test should never be used as a diagnostic tool, yet that is what we are currently doing. kary mullis also died a month before the pandemic started out of pure coincidence

Eldritch

Lovecraft himself claimed to not believe any of what he wrote (or thats what I've always heard, I'll admit I've never delved into his personal letters) but he had horrible nightmares all his life and wrote the first paragraph of Nyarlathotep during a hypnagogic state from one of the nightmares, so the man might've been accidentally channeling some weird shit.

Despite many claims, the title of the Old Ones isn't a very concreted thing in his writing. I assume you are reffering to the Great Old Ones, who are the alien deities of his stories. they come in a few variants themselves, most notable is the lesser children of the Outer Gods, such as Cthulhu, and the higher ones are of course the Outer Gods themselves, who have a much larger hand in the universe than a human could comprehend. Azothoth is the highest of the Outers, and basically the god of gods who created the universe.

Next is Yog-Sothoth who is... Well, "Yog-Sothoth knows the gate. Yog-Sothoth is the gate. Yog-Sothoth is the key and the guardian to the gate. Past, present, future, all are one in Yog-Sothoth. He knows where the Old Ones broke through of old, and where they will break through again." essentially the means of getting into and out of the universe. there are a few others, but Ill leave them to you to discover.

Akashic Records

The majority of the world's cultures, faiths and philosophers generally agree that the Akashic Records exist,
The Hindus believe a universal substance call akasha - from which the natural elements of water, fire, earth and air were created
The Akashic Records are perceived to be the collective memories and histories of every thought, physical and emotional vibration, sound, major event, minor incident and all rnovement in eternity.The Akashic Records are the entire history of everything that ever has been, and everything that ever will be. They could be looked upon as a memory bank containing details about everything that has happened in the Universe, and information about every spirit and the many lives they have lived.
If you dont individuate, you fall back into the pleroma. that aether where our base thoughts come from, thats freely available for anyone to read aithout much experience. just introspection. the akashic records, the hive mind, the pleroma, the 64 ways, its all the same, just like you and so many others before you and after you.

Tulpa

Typically, thoughtforms become corrupted over time and try to kill you. Or lead you down into total insanity and delusional thinking. Looking at cancerous places like /r/tulpa and about every tulpa forum online shows these well.
Now what is a tulpa? Tulpas use a similar process in the traditional source materials inside buddhism, where you make up a hallucination of a body with your mind until it's so real you can actually see it.
The difference however is that instead of the tulpa having your own mind (these are called tulku) or some idealized goal, it's got the mind of some other spiritual being you've put into it. These are also dangerous but in the same way summoning goetia demons is dangerous.
