**SAGE POTASH**

AMERICAN POTASH FOR AMERICAN FARMERS

TSXV: SAGE | OTC: SGPTF

## Pioneering Potash, for America's Food Security Future

## Corporate Overview

Sage Potash (TSXV: **SAGE** | OTC: **SGPTF**) is a potash exploration company with a large portfolio of mineral rights in the prolific Paradox Basin in Southeastern Utah, USA, dedicated to providing a local potash supply to American Farmers.

### Strategic asset supporting domestic food security

With 97% of potash currently imported, Sage Potash provides a domestic supply of this vital fertilizer mineral, offering both national security benefits and a cost advantage of around \$100 per ton compared to imports.

### The most sustainable, resource efficient potash mine in the US

As the first U.S. potash company to use sustainable mining and mechanical evaporation, Sage Potash minimizes environmental impact with no open pits or wastewater overflow and 92% less water usage.

### Incremental de-risking strategy: construction ready

Sage Potash is construction-ready with all regulatory approvals secured, advanced permitting for a 150,000 TPY pilot plant, and full design completed for a 300,000 TPY facility backed by a plant purchase agreement.

### Experienced management team with proven track record

Sage Potash is led by an experienced team with a track record in large-scale fertilizer production, focused on rapid, cost-efficient project execution.

## Potash Market Potential

The U.S. potash demand has already reached its previously forecasted growth of importing **12.55 million Mt by 2030, in 2024.**

Potash demand has had an annual growth rate of **2.5–3% since 2000.**

**The US only produces 477,000 tons of potash per year, but imports increased to over 12 million tons in 2024 (\*3)**

## Strategic Leadership

### Tim Muzino

PRESIDENT AND COO

Led global potash operations at Nutrien; expert in production strategy

### Peter Hogendoorn

CEO

30 years financing mining ventures; founded Sage Potash in 2021.

### Rod Reum

CFO

Finance executive with global experience in mining and clean energy.

### Clark Sazwan

DIRECTOR

40+ years in agriculture, transport, and mining infrastructure strategy.

### Shilo Sazwan

STRATEGIC OPERATIONS PARTNER

Expert in solution mining; led large-scale fertilizer plant operations.

## Sage Plain Project

The Sage Plains Project could be the largest potash deposit closest to production within the continental US to improve regional and national supply chain resilience and reduce delivered cost to market. Pricing from Canada to various US market regions include high freight and storage costs between \$150–225/ton.
