A UK Government agency, known as the Office for National Statistics (ONS), recently published new data on deaths by vaccination status in England.

The latest dataset from the ONS is titled 'Deaths by Vaccination Status, England, 1 January 2021 to 31 May 2022' (<https://www.ons.gov.uk/file?uri=/peoplepopulationandcommunity/birthsdeathsandmarriages/deaths/datasets/deathsbyvaccinationstatusengland/deathsoccurringbetween1january2021and31may2022/referencetable06072022accessible.xlsx>), and it can be accessed on the ONS site [here](https://www.ons.gov.uk/peoplepopulationandcommunity/birthsdeathsandmarriages/deaths/datasets/deathsbyvaccinationstatusengland) (<https://www.ons.gov.uk/peoplepopulationandcommunity/birthsdeathsandmarriages/deaths/datasets/deathsbyvaccinationstatusengland>), and downloaded [here](https://www.ons.gov.uk/file?uri=/peoplepopulationandcommunity/birthsdeathsandmarriages/deaths/datasets/deathsbyvaccinationstatusengland/deathsoccurringbetween1january2021and31may2022/referencetable06072022accessible.xlsx) (<https://www.ons.gov.uk/file?uri=/peoplepopulationandcommunity/birthsdeathsandmarriages/deaths/datasets/deathsbyvaccinationstatusengland/deathsoccurringbetween1january2021and31may2022/referencetable06072022accessible.xlsx>)

## vaccination status, England: deaths occurring between 1 January 2021 and 31 May 2022: 6 July 2022'

### Age-standardised mortality rates for deaths by vaccination status, England: deaths occurring between 1 January 2021 and 31 May 2022

Publication date: 6 July 2022

**Contact e-mail: [Health.Data@ons.gov.uk](mailto:Health.Data@ons.gov.uk)**

Office for National Statistics

**Crown Copyright 2020**

Table 6 of the dataset contains data on deaths involving Covid-19, deaths not involving Covid-19 and all-cause deaths by age group in England between 1st January 2021 and 31st May 2022, and it includes the number of deaths among children aged 10 to 14 by vaccination status, and teenagers aged 15 to 19 by vaccination status.

However, it is quite clear from the data that the ONS are not being as transparent as we would like to believe. This is because they fail to provide the death rate per 100,000 person-years among children or teenagers, whereas they have provided it for all other adult age groups in every other table contained in the dataset.

For example, here's a snapshot of the data from table 1 of the dataset showing the death rate per 100,000 person-years by vaccination status in April 2022 –

9

Cause of Death	Year	Month	Vaccination status	Count of deaths	Person-years	Age-standardised mortality rate / 100,000 person-years
Deaths involving COVID-19	2022	April	Unvaccinated	206	437563	204.7
Deaths involving COVID-19	2022	April	First dose, less than 21 days ago	1	3205	x
Deaths involving COVID-19	2022	April	First dose, at least 21 days ago	45	112311	298.6
Deaths involving COVID-19	2022	April	Second dose, less than 21 days ago	0	11738	x
Deaths involving COVID-19	2022	April	Second dose, between 21 days and 6 months ago	13	165006	168.0

Unfortunately for the ONS, they have failed in their attempts to disguise the horrific mortality rates among Covid-19 vaccinated children because they still provide us with enough information for us to calculate the mortality rates ourselves.

Here's a snapshot of the ONS data on deaths among children aged 10 to 14 between 1st Jan 2021 and 31st May 2022 by vaccination status –

Source: Source: Office for National Statistics, National Immunisation Management Service.

Age group	Vaccination status	Person-years	Count of deaths involving COVID-19	Count of deaths non-COVID-19	Count of all cause deaths
10-14	Unvaccinated	2881265	9	175	184
10-14	First dose, less than 21 days ago	61754	2	2	4
10-14	First dose, at least 21 days ago	280645	0	14	14
10-14	Second dose, less than 21 days ago	36646	0	0	0
10-14	Second dose, between 21 days and 6 months ago	135989	0	13	13
10-14	Second dose, at least 6 months ago	1028	0	1	1
10-14	Third dose or booster, less than 21 days ago	723	0	1	1
10-14	Third dose or booster, at least 21 days ago	2422	1	6	7

Source

9

The data above includes the number of deaths and the number of person-years among each vaccination group.

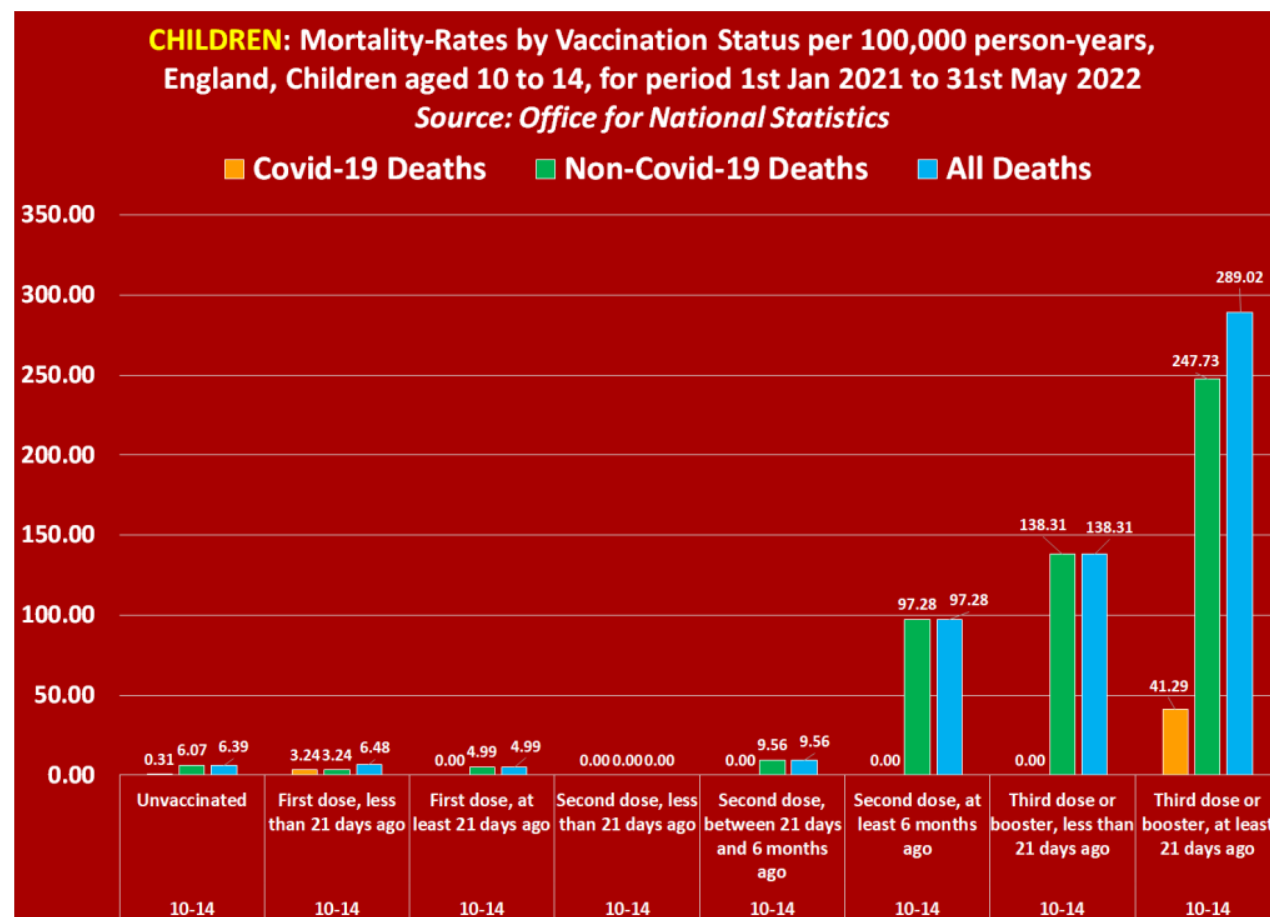

Therefore, all we need to do is divide each vaccination group's 'person-years' by 100,000, and then divide the number of deaths among each vaccination group by the answer to the previous equation, to work out the mortality rates by vaccination status.

e.g. Unvaccinated  $2,881,265 \text{ Person-years} / 100,000 = 28.81$

Unvaccinated Covid-19 Deaths (9) / 28.81 = 0.3 Deaths per 100,000 person-years

In regard to Covid-19 deaths, the ONS reveals that the mortality rate among unvaccinated children aged 10 to 14 equates to 0.31. But in regards to one-dose vaccinated children the mortality rate equates to 3.24 per 100,000 person-years, and in regards to triple vaccinated children the mortality rate equates to a shocking 41.29 per 100,000 person-years.

These figures reveal that unvaccinated children are much less likely to die of Covid-19 than children who have had the Covid-19 injection.

Based on Pfizer's vaccine efficacy formula, this data reveals that the Covid-19 injections are now proving to have negative effectiveness against death among children, with the real-world effectiveness between January 2021 and May 2022 being as follows –

9

**Real-World COVID Vaccine Effectiveness (%) against COVID-19 Death among Children aged 10 to 14 in England**  
**January 2021 to May 2022**

Formula:  

$$\text{Unvaccinated Death Rate} - \text{Vaccinated Death Rate}$$
Source: (UK) Office for National Statistics

Donate

The Covid-19 injections are proving to have real-world negative effectiveness against death of minus-966.67% among partly vaccinated children, and a shocking real-world negative effectiveness against death of minus-13,633.33% among triple vaccinated children.

This isn't anywhere near the claimed 95% effectiveness against death made by Pfizer, is it?

In other words, partly vaccinated children are 11x/966.67% more likely to die of Covid-19 than unvaccinated children, and triple vaccinated children are 137.3x/13,633.33% more likely to die of Covid-19 than unvaccinated children.

And unfortunately, there is little improvement when it comes to non-Covid-19 deaths. Here's the chart again showing the mortality rates by vaccination status among children in England –

9

**CHILDREN: Mortality-Rates by Vaccination Status per 100,000 person-years,**

**URGENT: ONLY 2 DAYS REMAIN TO SAVE THE EXPOSE & KEEP US ONLINE - Less than 0.1% of our readers support us even though we rely solely on your support. Donate

The all-cause death mortality rate equates to 6.39 per 100,000 person-years among unvaccinated children, and is ever so slightly higher at 6.48 among partly vaccinated children.

However, the rate goes from bad to worse following the administration of each injection. The all-cause death mortality rate equates to 97.28 among double-vaccinated children, and a shocking 289.02 per 100,000 person-years among triple-vaccinated children.

This means, according to the UK Governments own official data, double vaccinated children are 1422% / 15.22x more likely to die of any cause than unvaccinated children. Whilst triple vaccinated children are 4423% / 45.23x more likely to die of any cause than unvaccinated children.

Unfortunately, we see much of the same when it comes to vaccinated teenagers.

The following two charts show the mortality rates by vaccination status per 100,000 person-years among teenagers aged 15 to 19 in England for the period 1st January 2021 to 31st May 2022, according to the figures provided by the ONS –

following chart –

9

What we discover from the above is that triple vaccinated teenagers are 136% / 2.35x more likely to die of Covid-19 than unvaccinated teenagers, and 38% more likely to die of any cause than unvaccinated teenagers.

The worst figures in terms of all-cause deaths are however among double-vaccinated teenagers. Official UK Government data reveals that double vaccinated teenagers, with a mortality rate of 36.17 per 100,000 person-years, are 149.3% / 2.5 x more likely to die of any cause than unvaccinated teenagers with a mortality rate of 14.51 per 100,000 person-years.

A Person

🕒 1 day ago

In Australia, in 2020, the mainstream news said that COVID-19 posed minimal threat to children.

In the weeks before they 'approved' the poison for ages 5-11 at the start of this year, the news was showing all these children in that age range whom they either claimed died of COVID-19 or were in a very bad way.

Of course, many parents would have then been eager to get their kids injected.

Once the poisoning campaign was in full swing, those stories faded away from the news.

They are looking to get poisons administered for ages 6 months to 5 years underway soon (already 'approved' by the TGA but waiting for 'approval' by ATAGI).

Because they don't understand because even the so called alternative media is reluctant to speak about the real cause of these vaxxes.

TAGGING. That's why it is so important to them to vaccinate even the children no matter how many dies during / after the process. After it the vaxxed have nano sensors reporting 'everything' about them, medical things or even more. This is the way to the perfect slavery without hope to break free. This tech is very likely (according to its science, published) is also a way for direct BRAIN MANIPULATION. Can you imagine better slaves than those you can manipulate directly via their brains? (They won't even notice, computers are faster than your brain.)

This was always about tagging, this is why there were so pushy about it, everyone must got vaccinated, because if you are you are 'over'. If I can see your MAC they can see it, too, they can kill you with a blink of an eye with the help of the tech because your MAC is the cross on you, would you dare not to obey? Not to mention such lovely things that they claimed they can change your memory giving you memories which are not yours and taking away memories which were yours.

Listen it, the scientific (proofs) part is 5 minutes long at the end of the video, this was the purpose all along, this and nothing else, not even direct culling, that's just 'side effect'. Ricardo Delgado basically says the same, but this one is more detailed about the tech:

<https://www.brighteon.com/470607bc-7d99-4d87-9f97-3dc7a9a564a4> (<https://www.brighteon.com/470607bc-7d99-4d87-9f97-3dc7a9a564a4>)

They say this is how you can FRY their nano router to remove the cross, stop being a target. At the
