

The Dorian Experiment and the I.G.B.I Order

INTRODUCTION

1. The Dorian Experiment is an abject failure. It has provided democracy and civil liberties to an otherwise savage and war-mongering culture. Despite this, the International Global Bourgeois Intelligentsia has negated all progresses made by the Dorian Regimes, promoting internal and external conflict. It subjugates and neglects all sentient creatures across borders. The I.G.B.I has been responsible for atrocities and conflicts of great magnitude and if left to its own devices will probably lead to greater suffering and social unrest.
2. The I.G.B.I system and its subsidiaries may survive or they may break down. If it survives, an overarching global regime *may* maximize happiness in an Experience Machine-type state. It *may* allow for minor inconveniences and negatives to decrease. But if it were to do so, it must have passed through a time of extremely long and painful growing phase of death and destruction to create the One World Government, at the cost of affectively removing the sentience and thought from living beings. Furthermore, if the I.G.B.I were to continue on and survive, there would be no effective way of removing the I.G.B.I unless a more powerful and benevolent force were to commit a genocide against the global population.
3. If the I.G.B.I were to fall, the consequences would still be a grave pain. But as the I.G.B.I grows stronger and more abundant, the more violent and disastrous the kickback will become, so if it were to fall, it had best be now rather than later.
4. Therefore I advocate for a revolution against the I.G.B.I. This revolution may or may not make use of violence in order to destroy the I.G.B.I, it may be sudden or a relatively gradual process. I can't predict either of that. But I do outline a general way the measures of those who hate the I.G.B.I should take to prepare the way for a revolution against that form of society. This is not to be a *political* revolution, for many on both sides despise the I.G.B.I. Its object will be the overthrow of the I.G.B.I, and not the establishment of a socialist nor capitalistic form of governance.
5. In this article I will give only some of the negative developments that have writhed out from inside the dark heart of the I.G.B.I. Other such developments I mention only briefly or ignore altogether. This does not mean that I regard those other developments as unimportant. For practical reasons, I have to confine the discussion to areas that have received insufficient public attention. For example, since the

political attention to the February 2026 Presidential election's 50-50 split had heavy media coverage at the time, I have written very little about the topic, though I still find it important.
