The Market Doesn't Owe You Anything.

Most traders lose — not because they lack intelligence, but because they lack a **system**, a **structure**, and the **mental architecture** to execute consistently. AGR Mentorship was built to eliminate that gap.

AGR Mentorship 1V1 is not a course. It is not a collection of videos or a Discord signal group. It is a structured, immersive, one-on-one coaching program engineered over six months to rebuild the way you think about markets, manage risk, and perform under pressure.

SYSTEM-BASED APPROACH

Every decision you make as a trader will be grounded in the AGR methodology — a proprietary framework built on market structure, contextual logic, and precision entries.

MINDSET AS INFRASTRUCTURE

Before strategy comes psychology. AGR treats your mental state as the foundation of your performance. Discipline, patience, and process are trained as skills — not hoped for.

TRANSFORMATION, NOT INFORMATION

The goal is not to give you more data. The goal is to transform how you operate in the market — from reactive and emotional to structured and decisive.

When you join AGR Mentorship, you are not buying information — you are investing in a complete operating system for your trading career.

Six Months. Four Phases. One Outcome.

The AGR program is deliberately sequenced. Each phase builds on the last, ensuring that by month six you are not simply knowledgeable — you are operational.

PHASE	FOCUS	DURATION
01	Learning — AGR System & Methodology	Months 1–3
02	Application — Live Strategy Execution	Month 4
03	Psychology & Discipline	Month 5
04	Profit Transformation & Consistency	Month 6

AGR System & Core Methodology

Phase 1 is the intellectual foundation of your trading career within AGR. Over three intensive months, you will master every concept that forms the backbone of the AGR framework — from the fundamentals of market structure to the advanced logic of high-probability entry construction.

Market Structure

- Zero-to-advanced market structure using the AGR framework
- Identification of structural shifts, liquidity zones, and delivery patterns
- Understanding how institutional order flow drives price

Support & Resistance — AGR Methodology

- AGR-specific S&R; approach beyond classical textbook definitions
- Dynamic vs. static level identification
- Confluence-based decision making

Market Logic

- Where price comes from, where it is going, and why
- Understanding the mechanics of price delivery
- Reading the story the market is telling in real time

Points of Interest (POI)

- Identification and classification of POIs within AGR system
- Valid vs. invalid POI filtering
- POI ranking by strength and confluence

Entry & Exit Logic

- Structured entry methodology based on clear reasoning
- Risk-defined exits with logical invalidation levels
- Building entries with asymmetric risk-to-reward

Time-Based Analysis

- Kill Zones (KZ): London, New York, and overlap sessions
- Macro Time analysis and session-based bias
- Optimal entry timing within the trading day

Bias Identification

- Daily Bias — reading the current day's directional intent
- Weekly Bias — higher-timeframe alignment
- Monthly Bias — positioning within the macro narrative

Advanced Candlestick Reading

- Candlestick logic within the AGR context (not pattern memorisation)
- Reading rejection, displacement, and consolidation candles
- Using wicks, bodies, and volume as signal filters

Fractal Model Concepts

- Multi-timeframe fractal structure alignment
- Nesting lower timeframe entries within higher timeframe context
- Fractal-based trade planning

Full Strategy Construction

- Combining all AGR concepts into a complete, executable strategy
- Context building: assembling the pre-trade narrative
- Pre-trade mapping system and decision tree

Execute. Adapt. Refine.

Month 4 shifts from theory to live execution. Everything learned in Phase 1 is now deployed in real market conditions. This phase bridges the gap between knowing and doing.

■ Live Strategy Implementation

Deploy the complete AGR strategy in live or simulated conditions. Execute with precision, document every decision, and measure outcomes against the plan.

■ Demo or Funded Account Trading

Trade on a demo or funded account environment. The objective is process fidelity — executing the strategy exactly as designed, without emotional deviation.

■ Real-Condition Execution

Experience the full market cycle — news events, volatility spikes, slow sessions — and learn to apply the AGR framework across all conditions.

■ Trade Journaling & Analysis

A rigorous journaling system is implemented. Every trade is recorded, reviewed, and analysed. Patterns of strength and weakness are identified and addressed directly.

Your Mind Is the Edge.

The most technically skilled traders can still fail. The differentiator is always psychology. Month 5 is dedicated entirely to building the mental architecture of a professional trader — methodical, unemotional, and relentlessly consistent.

- Trader psychology development — understanding how the mind behaves under financial pressure
- The AGR Philosophy Mindset System — a structured belief framework for elite performance
- Emotional discipline training — building responses, not reactions
- Handling losses correctly — no catastrophising, no spiralling
- Handling wins correctly — no overconfidence, no position-size escalation
- Deep data analysis from Months 1–4 (wins, losses, drawdowns, patterns)
- Identifying and eliminating revenge trading behaviour at the root cause level
- Building a pre-session mental routine for peak trading performance
- Understanding the relationship between process and outcome

Psychology is not a soft skill. In the AGR system, it is a hard requirement. Without mastery of self, no strategy survives contact with live markets.

PHASE
04

PROFIT TRANSFORMATION

MONTH 6

From Trader to Professional.

The final phase is reserved for transformation. You arrive here having traded, journaled, and refined. Month 6 is where all elements converge into a repeatable, high-confidence execution system that defines you as a professional.

STRATEGY OPTIMISATION

Analyse six months of data. Identify what works, what doesn't, and refine your AGR strategy to remove inefficiencies and maximise edge.

PERFORMANCE IMPROVEMENT

Targeted work on your weakest execution metrics. Whether it is entry timing, position sizing, or patience — we address it with data, not guesswork.

CONSISTENCY ARCHITECTURE

Build the daily and weekly systems that produce consistent results — routine, review, adjustment, and repetition.

PROFESSIONAL TRADER TRANSITION

Adopt the mindset, habits, and execution standards of a funded professional. AGR does not produce hobbyist traders — it produces operators.

The AGR Standard.

Completion is not automatic. AGR Certification is earned — not granted. To receive your AGR Certificate, you must pass two objective evaluations that confirm your readiness to operate in live funded markets.

01 — AGR THEORETICAL EXAM

A comprehensive written assessment of all AGR concepts covered throughout the six-month program. This tests your understanding of market structure, bias, POI logic, entry mechanics, psychology, and risk management.

- Pass mark: 80% or above
- Open-book not permitted
- Two attempts allowed

02 — FUNDED ACCOUNT CHALLENGE

You must successfully pass a \$5,000 trading challenge using the AGR methodology. This is your live proof of concept — real conditions, real execution, real results.

- \$5,000 challenge account
- Pass criteria per challenge provider rules
- Must demonstrate AGR-compliant execution

Traders who successfully pass both evaluations receive the official **AGR Trading Certificate** — formal recognition of your ability to execute the AGR system at a professional standard.

The certificate is not a participation award. It is a performance credential.

AGR TRADING CERTIFICATE

Issued Upon Successful Completion

This certifies that the holder has completed the AGR Mentorship 1V1 program, demonstrated mastery of the AGR trading system, and passed both the theoretical examination and the funded account challenge.

AGR · MENTORSHIP · EXCELLENCE

This Is Not the End. It Is the Beginning of a Different Standard.

Most people enter trading looking for shortcuts. They want signals, they want certainty, they want someone to tell them what to do. AGR teaches you something more durable than any signal — it teaches you *how to think*.

After six months with AGR, you will not need to follow anyone. You will have internalised a system, a process, and a philosophy that operates regardless of market conditions, instruments, or timeframes.

Discipline is not something you find in a moment of motivation. It is something you build through structure, repetition, and honest self-assessment. That is what AGR builds — and it will outlast every market cycle.

AGR Mentorship is not a trading course. It is a transformation programme. The market is the exam. You are the variable. We are the system.
