Creative Developer and Backend Engineer with 3 years of experience building high-performance digital architectures that combine fluid frontend interactions with robust backend infrastructure. Specializing in complete web applications, interactive messaging modules, automated rental configurations, and secure e-commerce systems that scale.

WORK EXPERIENCE

Creative & Backend Developer | Freelance 2023 - Present

- Architect robust custom web applications, complex e-commerce systems, and real-time texting/messaging applications tailored to global client demands.
- Design and deploy scalable backend engines using Node.js, Python, and Django alongside automation logic and secure database schemes.
- Build sleek management tools, inventory flows, and transaction layers for operations like automated car rental systems and SaaS models.
- Animate fluid interactive interfaces using GSAP, Lenis, and ScrollTrigger to link visual performance to reliable data models.

Frontend Developer | Remote Projects 2022 - 2023

- Structured type-safe modular web apps using React and TypeScript frameworks.
- Connected frontend dashboard applications with relational backends, optimizing asynchronous requests and loading states.
- Maintained source integrity across distributed environments through rigorous Git controls.

EDUCATION & CERTIFICATIONS

Full Stack Development

Modern Web Technologies & Architecture

UI/UX Design

User Experience & System Architecture

Creative Development

Experimental Web & Database Interactions

TECHNICAL SKILLS

LANGUAGES

JavaScript, TypeScript, Python, Java, C++, HTML & CSS

BACKEND SYSTEMS

Node.js, Django, REST APIs, Messaging Services, Database Management

FRONTEND & DESIGN

React, TSX, UI/UX Architecture, Fluid Layouts

CREATIVE FRAMEWORKS

GSAP, Lenis Scroll, ScrollTrigger, Interactive Web Tools

CORE TOOLS

Git, Automated Workflows, Performance Optimization

EXPERTISE AREAS

- Real-time Texting & Chat Apps
- Scalable E-commerce Architecture
- Car Rental & Booking Configurations
- Complex Web Application Systems

INTERESTS

- Experimental web interactions
- Lightweight digital products
- Open source contribution
