

# The Silent City

Welcome everyone to San Liso, the great city that never sleeps. From its subway train that runs through the entire city in just 1 hour, to its shiny skyscrapers where hundreds and hundreds of offices fit. This city of 5 million people welcomes its population every morning with the smell of its modern “Stop n’ Go” coffee shops, located on every block.

The residents of San Liso enjoy getting to work on time 7 days a week thanks to the varied public transportation options. Articulated buses with a capacity of 100 people (or 120 if they are squeezed well), the aforementioned underground train that now has automated doors to prevent people from jumping onto the tracks, and how can we forget about cars.

Since we reduced pedestrian space, main streets have up to 4 lanes for cars only. Some will say that this pollutes and reduces space for green areas, but don't worry, our inhabitants don't care. Our inhabitants don't care about anything. Absolutely nothing.

San Liso, the best city to live in! Isn't it?
