Release note kPlugin v1.7

- Fixing various problem on Dating day, now that works as explained in the manual.
- Fix some issue when you are using the move forward in the week button from At Home menu.

- Adding an option «Buddies can think», when this option is ON, buddies will pick partner by themselves, it depends on the distance with other chicks, they will also try to re-bind to main action after a position change (if they were bound).
- Adding an option to change the Invite UI shortcut to O key (bottom of the common tab), if you have another mod that use the I key, that will solve the compatibility issue.

- Minor changes in the Invite UI tab names
- Implementing last added options text in the translation file (at end of English_ui.txt).

- Fresh and up to date manual!
