

The DSpico is the open-source flashcart from the LNH Team. Designed for both DS and DSi consoles, it features fully open hardware and firmware built on the RP2040 microcontroller.

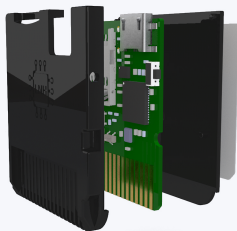

RP2040 microcontroller

16MBit flash memory

Low power consumption

The DSpico firmware is compatible with modified and unmodified DS, DSi and 3DS consoles, allowing you to use DSpico on any console you own.

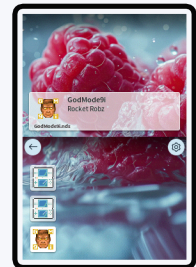

Designed for use with:

Pico Loader

Pico Launcher
