HELLO, SUMMER LEARNER!

# How to use this book

This book has 12 weeks of summer practice. Each week gives you five days of activities that take about 20 minutes a day. You'll do a bit of math, a short reading, some writing, a vocabulary warm-up, and a fun bonus puzzle. Finish a week, check off the weekly goals, and give yourself a high-five.

## Do a little every day

Twenty minutes beats an hour once a week.  
Make it a summer habit.

## Use a pencil

It's okay to erase and try again — smart learners do that all the time.

## Read the instructions

Each section has a small helper note. Give it a quick look first.

## Celebrate progress

Track finished days on the weekly opener.  
Ten days = one victory lap.

## WEEK 01

# Base Camp

## THIS WEEK YOU'LL PRACTICE

Multi-digit multiplication, citing textual evidence, and organizing an informative paragraph.

## Weekly Goals

- Solve 2-digit  $\times$  1-digit fluently using place value.
- Cite 2 specific details from each reading.
- Write a paragraph with a topic sentence and 3 facts.

Days completed:

D1

D2

D3

D4

D5

## How are you feeling about this week?

Let's go!

DAY 1

## Monday • Warm-Up

 Math Warm-Up

Multiply using place value. Show your thinking.

1.  $23 \times 4 = \underline{\quad}$

2.  $46 \times 3 = \underline{\quad}$

3.  $57 \times 2 = \underline{\quad}$

4.  $38 \times 5 = \underline{\quad}$

5.  $72 \times 6 = \underline{\quad}$

6.  $84 \div 4 = \underline{\quad}$

7.  $96 \div 6 = \underline{\quad}$

8.  $128 \div 8 = \underline{\quad}$

9. List the factors of 24:  $\underline{\quad}$

10. List the first 5 multiples of 7:  $\underline{\quad}$

**Bridge to 5th**

5.OA.A.1: Solve with parentheses.  $(8 + 2) \times 5 = \underline{\quad}$  vs.  $8 + 2 \times 5 = \underline{\quad}$

 Read Together

**The New Trail**

Leila studied the map on the ranger station wall. Three trails branched off the base camp. The red trail was shortest but steepest. The blue trail followed the river for two miles before climbing. The green trail took the long way around, adding half a mile but staying mostly flat. Leila had twisted her ankle a week earlier, and it still hurt when she walked downhill. She tapped the green trail with her finger and smiled. Her little brother Theo frowned — he had wanted the red one.

1. Why did Leila choose the green trail? Cite two details.

---

---

2. What can you infer about Theo's personality?

---

---

3. What is the main idea of this passage?

---

---

Leila's choice shows she is —

- reckless  
 careful  
 lazy

 Your Turn to Write

Write a paragraph explaining a choice you made carefully. Include reasons and evidence.
