[FENBENDAZOLE DOSAGE GUIDE](https://www.fenbendazole.org/) [🏠 \(https://www.fenbendazole.org\)](https://www.fenbendazole.org/) > [Fenbendazole Informa](#)

## Joe Tippens Protocol (the original version) – complimentary cancer treatment

- Fenbendazole 222 mg. Take 1 capsule three days a week, once a day after a fatty meal.\* Then take no fenbendazole for four days. Repeat this cycle every week.
- Vitamin E 800 U/I. Take 1 capsule or other form one time a day after a meal with no pauses.
- Bio-Available Curcumin 600 mg. Take 1 capsule two times a day after breakfast and lunch with no pauses.
- CBD oil 25 mg. Take 1-2 drops (total ~25 mg) under the tongue every day before sleep.

\*- fenbendazole is really hydrophobic and is poorly absorbed from the intestinal tract. Taking it with or after a meal improves absorption.

## Joe Tippens Protocol (the modified, stronger version) – complimentary cancer treatment

- Fenbendazole 222 mg. Take 1 capsule every day once after a fatty meal with no pauses.\*\*

FENBENDAZOLE  
INFORMATION

WHAT IS

- Vitamin E 800 U/I. Take 1 capsule or other form every day after a meal with no pauses.
- Bio-Available Curcumin 600 mg. Take 1 capsule two times a day after breakfast and lunch with no pauses.
- CBD oil 25 mg. Take 1-2 drops (total ~25 mg) under the tongue every day before sleep.

\*\* – fenbendazole is practically non-toxic to individuals with no liver or kidney insufficiency. Joe Tippens confirmed that taking fenben 7 days a week is fine.

### Preventing cancer relapse – prophylactic protocol

- Fenbendazole 222 mg. Take 1 capsule three times a week, once a day after a fatty meal. Then take no fenbendazole for four days. Repeat this cycle every week.
- Vitamin E 800 U/I. Take 1 capsule or other form every day after a meal with no pauses.
- Bio-Available Curcumin 600 mg. Take 1 capsule two times a day after breakfast and lunch with no pauses.
- CBD oil 25 mg. Take 1-2 drops (total ~25 mg) under the tongue every day before sleep.
- Tumor marker regular checks every couple of months, regular yearly cancer imaging tests. If there is no cancer relapse after 5 years, decrease the frequency of tests.

### Preventing cancer for someone who was always cancer-free – prophylactic protocol

- Fenbendazole 222 mg. Take 1 capsule three times a week, once a day after a fatty meal. Then take no fenbendazole for four days. Repeat this for 10 weeks. Stop for 10 weeks. Then repeat the cycle again.
- Vitamin E 800 U/I. Take 1 capsule or other form every day after a meal with no pauses.
- Bio-Available Curcumin 600 mg. Take 1 capsule two times a day after breakfast and lunch with no pauses.
- CBD oil 25 mg. Take 1-2 drops (total ~25 mg) under the tongue every day before sleep.

Thank you so much for this. The cancer community shares so generously.

I have been using Rife frequencies, without success, for a year on a colon tumour. Possibly the addition of Fenbendazole will do the trick. Thank you. KB

So thankful to have found hope. My cancer metastasized. Chemo did that. I am giving this protocol a try. Thank you so much for giving hope where there was none. Positive attitude in the making. God bless these cancer warriors. Each and every one. Thank you Joe Tippens ❤️

## Marsha

19 SEP 2021 [REPLY \(HTTPS://WWW.FENBENDAZOLE.ORG/FENBENDAZOLE-INFORMATION/FENBENDAZOLE-DOSAGE-GUIDE/?REPLYTOCOM=696#RESPOND\)](https://www.fenbendazole.org/fenbendazole-information/fenbendazole-dosage-guide/?replytocom=696#respond)

Today I received my order. Thank you. I have been told that cancer killed my husband, but he told me to tell everyone that chemo killed him. He had metastasized cancer that started as a small spot on the top of his head. He had surgery to remove that and then radiation. He said that is what baked it into the rest of his body. They removed his ear and half his face. Eventually after so much more radiation and chemo it went to his lungs. He basically starved to death. Last week I was told I need chemo for a form of blood cancer.. I am taking your protachol instead.
