Introduction

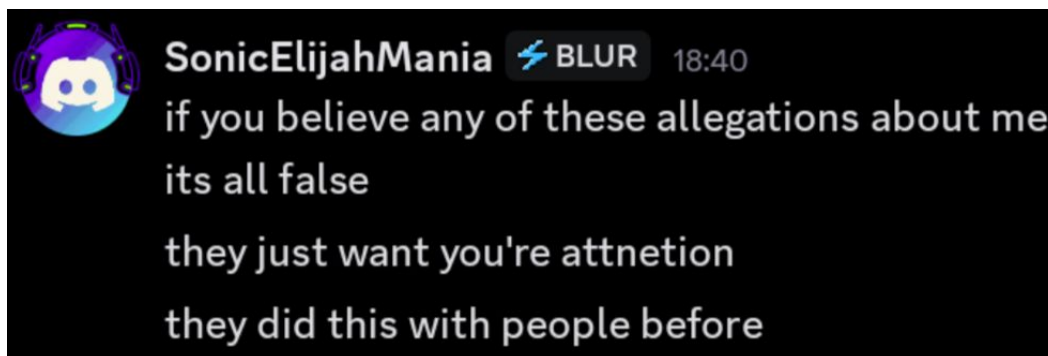

I'll start off this "document" with this: this slideshow assumes you read the [previous document](#) on SonicElijahMania. Also, this whole drama is not about Lego hacking drama or a petty feud: this is a **completely serious and ongoing issue** that is happening right now. Recently, I have found more evidence on SonicElijahMania's degeneracy and possible pedophilia. This is the second part to a exposé on SonicElijahMania's degeneracy.

Section I: Response to Keeping a Pedophile & Silence

In case if you didn't know, 01 was banned indefinitely from Sonic's server a few days ago. However, his only reason for unbanning 01 several times was because **01 begged Sonic to unban him**, meaning that Sonic chose to unban 01 himself. His excuse was because he was "too nice". Also he has manipulated people and said the allegations are false without even addressing them properly.

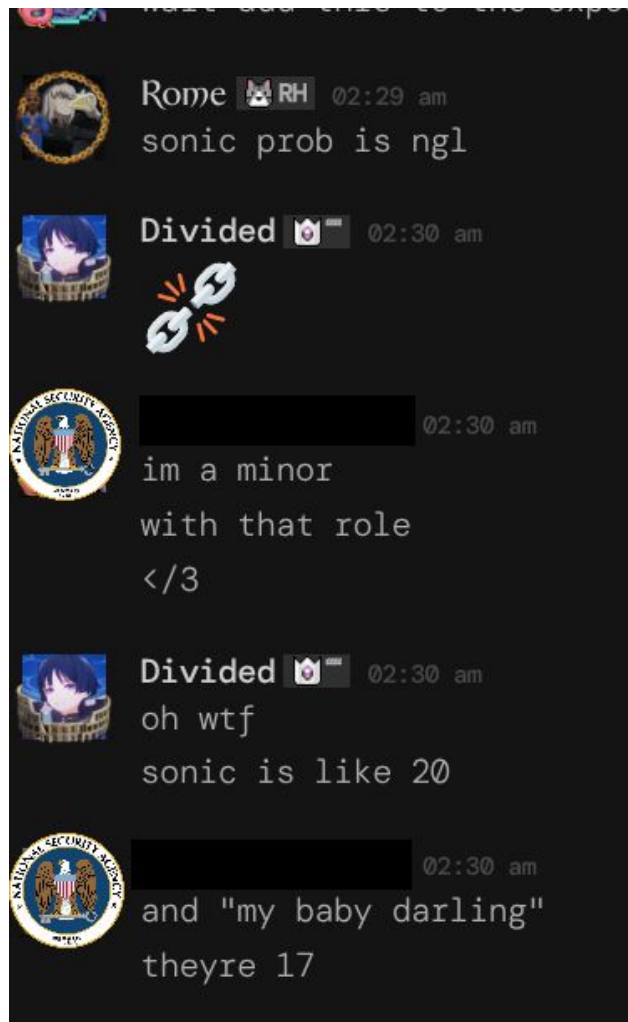

I do apologize for that 01 shit, I only unban him because he kept begging me
Tho I already knew it was gonna cause a problem

Section II: Questionable Roles Given to Minors

This needs no explanation. Several roles with questionable names such as “my baby darling” were given to minors **as young as 15 years old.**

Be warned: beyond this slide, sexual content will now be mentioned.

always.**

Section III: Sexual Degeneracy in Condos

As mentioned in the last document, “RoTector”, a extension that detects if Roblox players are associated with the condo community (a community hosting Roblox sex games that is associated with CSAM (child sexual abuse material)), detected SonicElijahMania. We have used bots such as TASE (The All Seeing Eye), and found out that he **is in several condo servers**.

The screenshot shows a Discord chat window with a bot named 'The All Seeing Eye'. The bot has just scanned a user and provided a report. The report indicates that the user has already been scanned and that the last scan reported no flagged servers. Below this, the bot displays a section for 'sonicelijahmania', noting that the data is not live and that lower record versions may be less accurate. A 'Detail Legend' is provided, listing various metrics and their scores: Booster (+15 score), Staff (+20 score), Messages (+0.75 score), Typing (+0.25 score), Interactions (+0.4 score), and Indirect (+0.05 score). The bot then lists several servers associated with the user, including 'fern.s.club', 'Condo Server', 'Basement Hub', 'AutoCon', and 'gg/trlx bloodhound', each with a score and last seen date. At the bottom, the bot states that the user was found on RoCleaner's database with the following servers: 'trl'.

Section IV: Possible Pedophilia

Allegedly this year (2025), SonicElijahMania was caught trying to get a 13-year old girl to **moan in a anime voice** because it was “cute” to him. If this is true, then this is **sexual solicitation of a minor** in many jurisdictions, meaning SonicElijahMania is a pedophile.

Section V:

Conclusion

In conclusion, SonicElijahMania is a degenerate involved with the condo community **and a pedophile**. If you are considering a alternative to SonicElijahMania's server, you can check out [The ORChard](#). This document was written by java (@serverequiptool).
