

Gotta
PROTECT 'EM ALL!!

Keeping our water
clean!

Thank you for having me! I am honored to be with such promising trainers. Today, we'll learn how to protect our beloved aquatic friends.

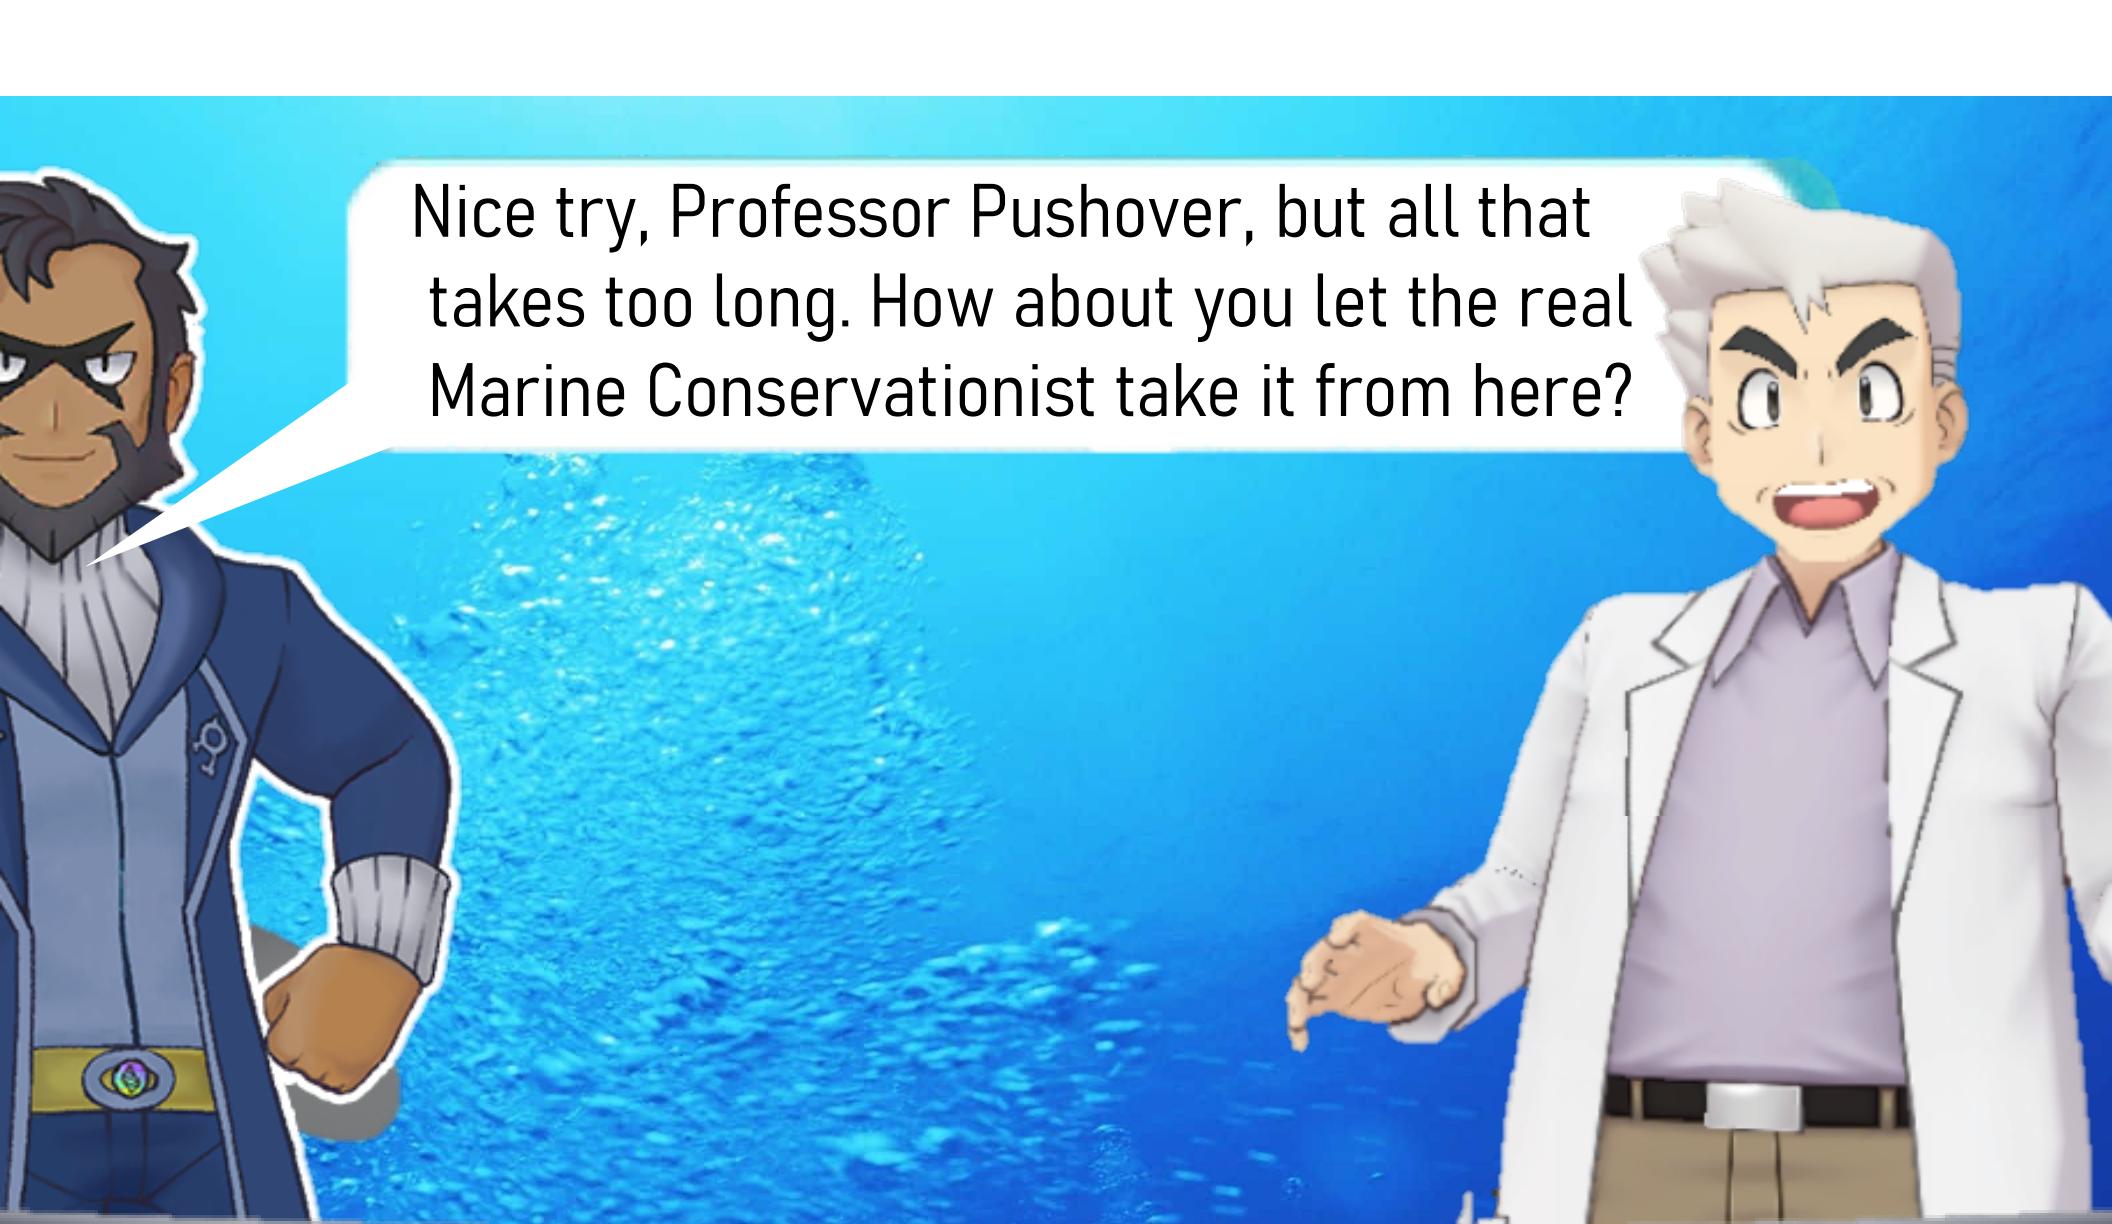

First thing you can do is recycle! Reused plastics stay out of the ocean. They also take way less pollutants and energy to make!

ndly, only buy Pokémons from trustworthy sources.
I over-fishers who see them as a way to make a quick buck.

...ly, you can support the people that help clean and protect our water! You can join them in picking up litter along the coast, or simply spread the word.

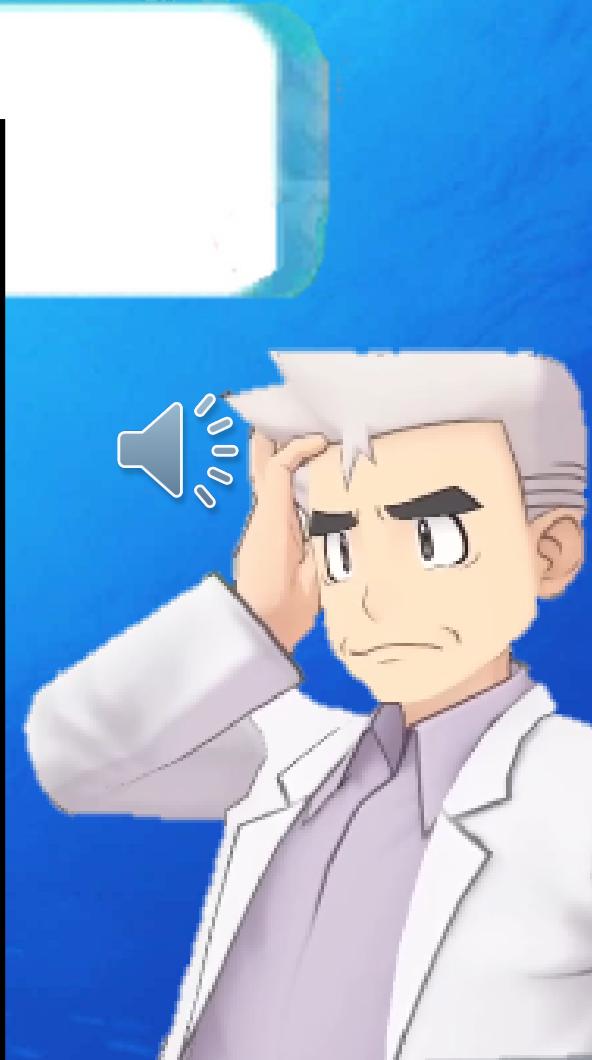

Nice try, Professor Pushover, but all that takes too long. How about you let the real Marine Conservationist take it from here?

Excuse me, young man?!?! I would like to check your credentials before you hijack my presentation!

You mean THESE CREDENTIALS?

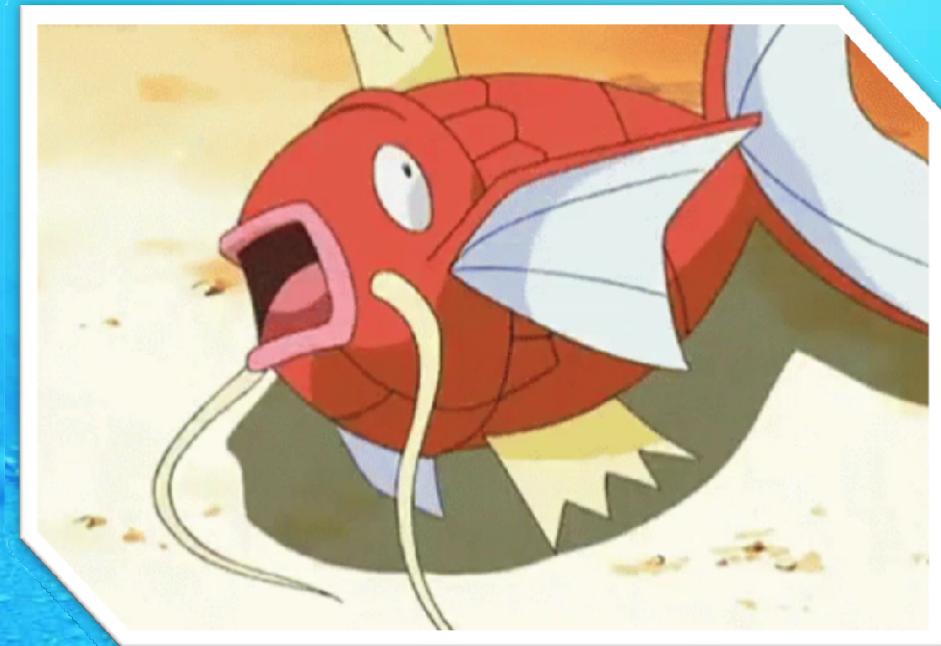

will have to call Steven about this immediately.
a moment.

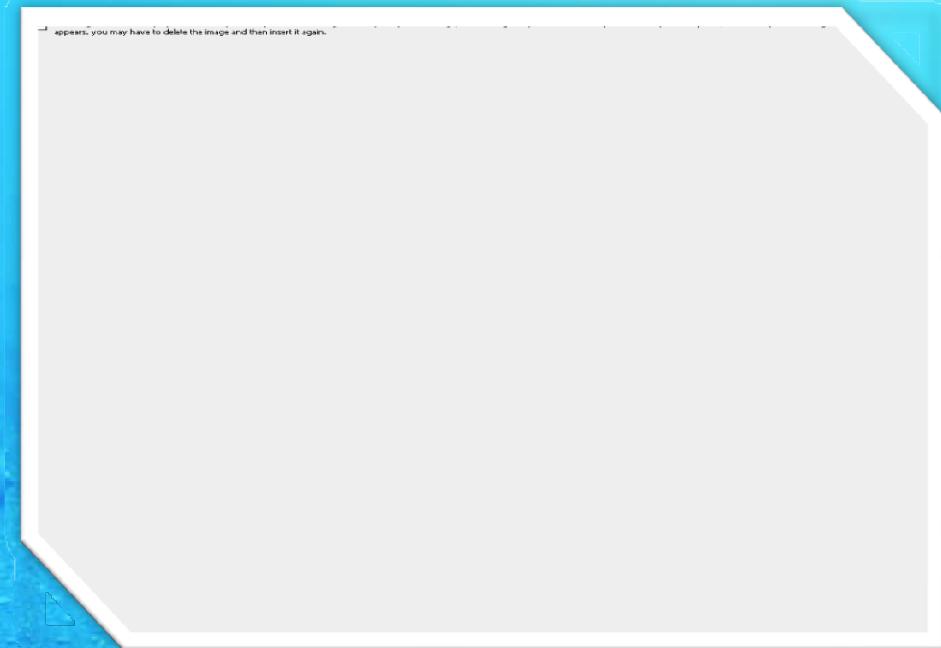

nt! Now the plan- I mean the REAL presentation can begin!

There are more water type Pokémons than any other type in the world!
8 of these beauties call the sea their home.

ome folk don't care one speck o' sand about them.
d let them flop ashore and suffer!

Protect water Pokémon, first you gotta add one to your crew. Boedo is my first mate, but a seadra will do for you scamps.

What about step two, you say?

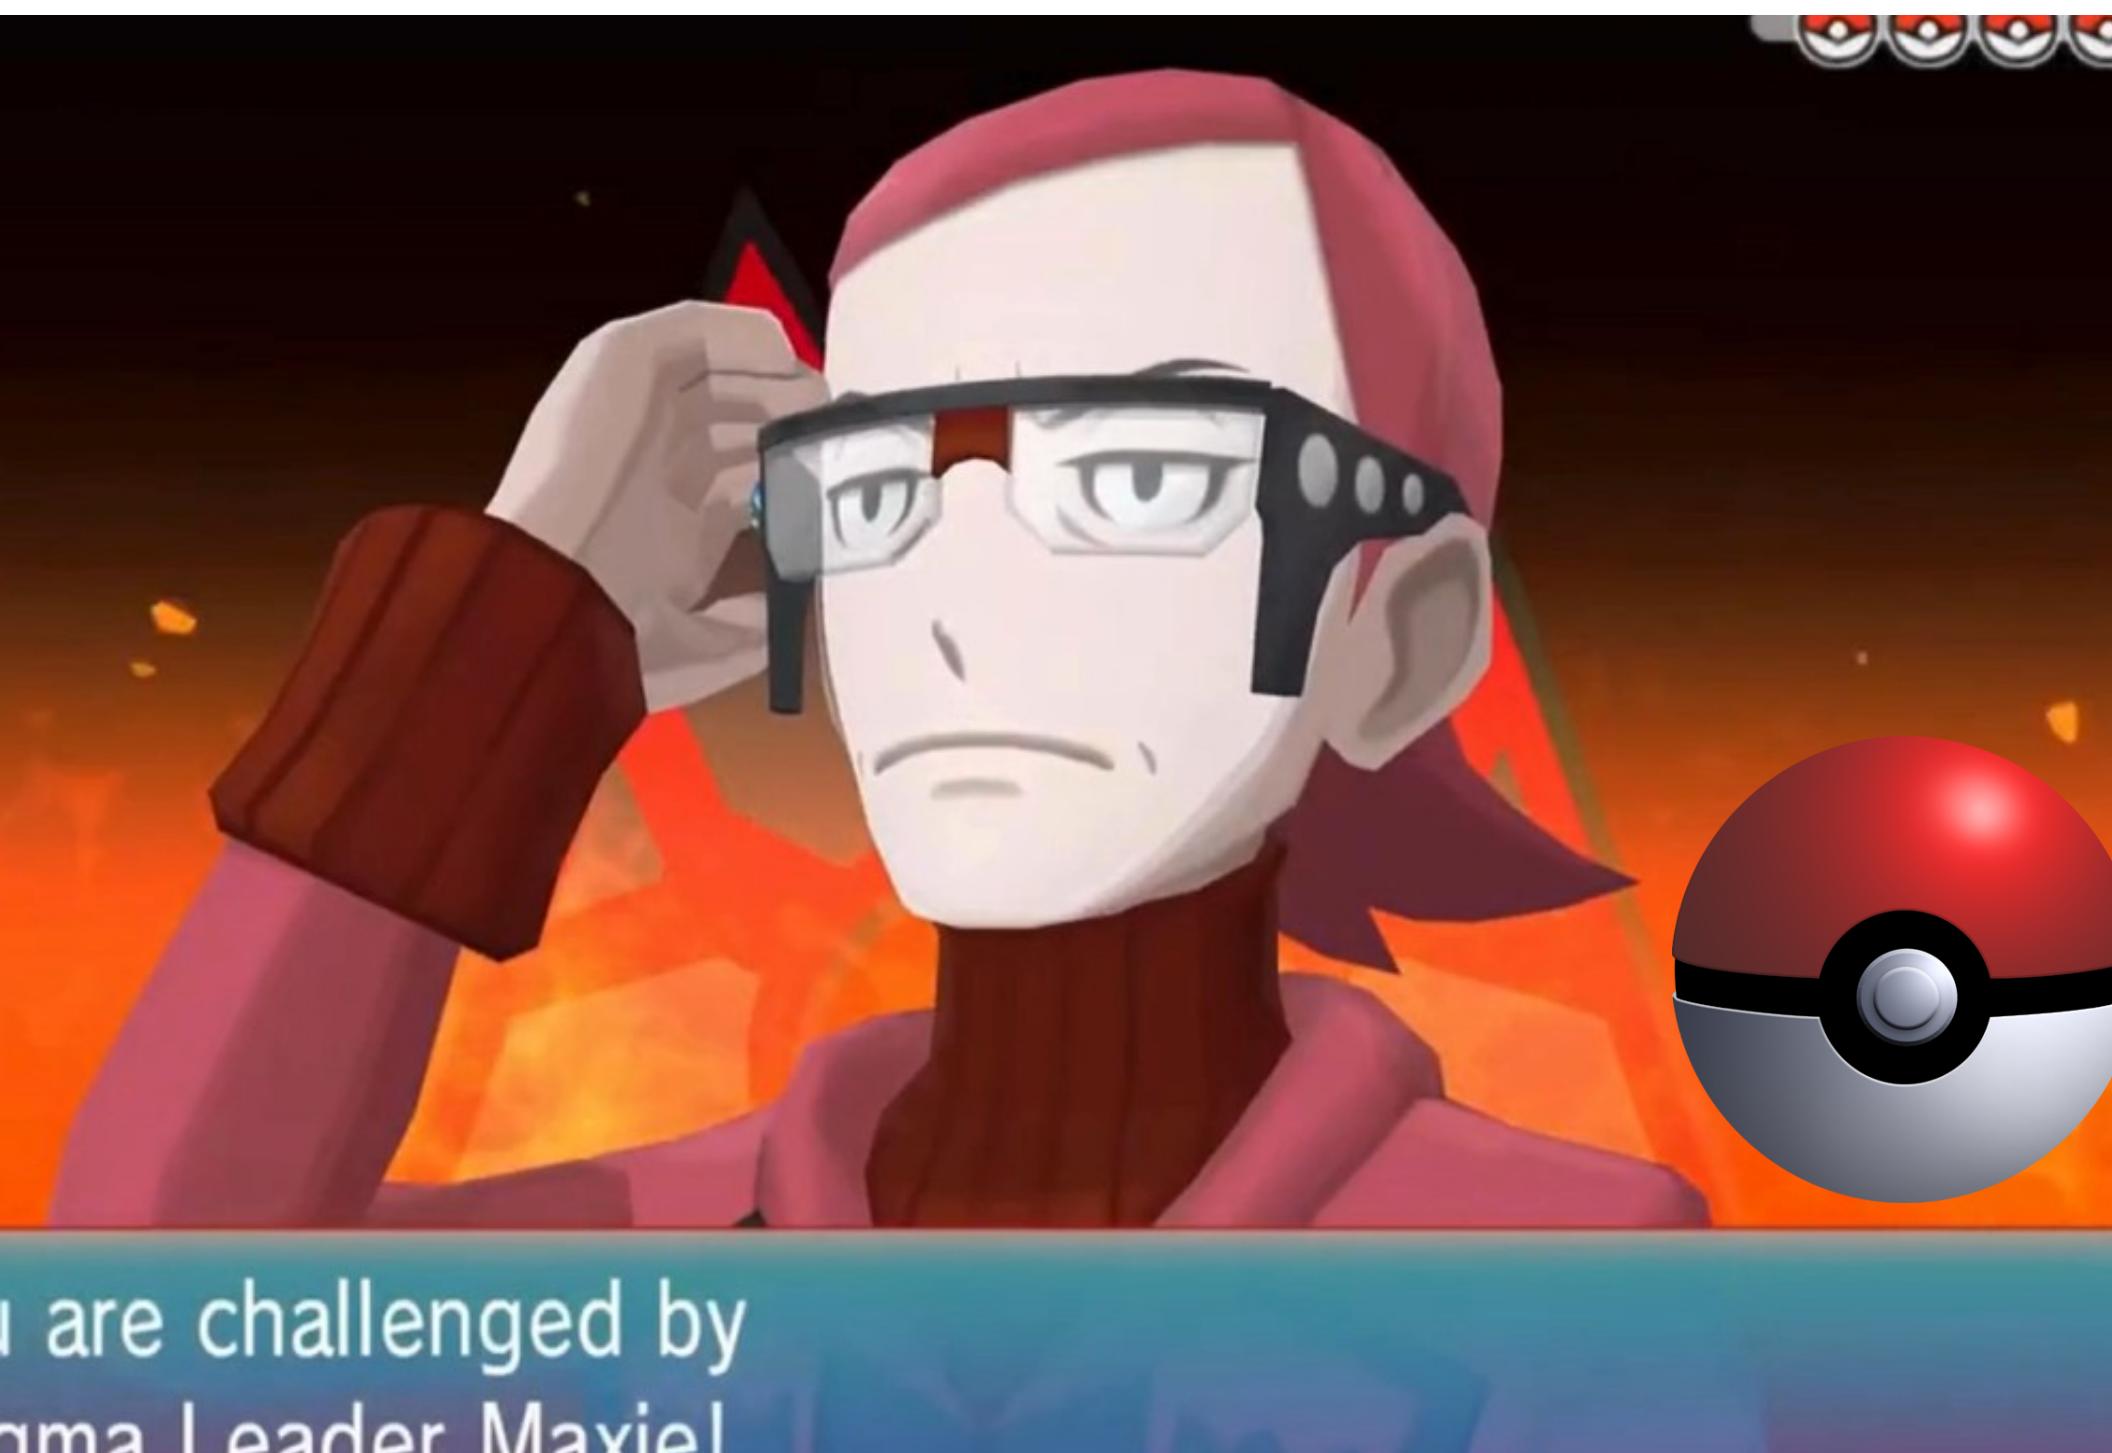

Set up the ultimate scurvy landlubber to give you a hands-on lesson!

ARCHIE! You have befouled our Team Magma posters with your buffoonish eyepatches for the last time!

he comes! Quick, hold your seadras and prepare to fire at his goons!

You are challenged by
Gym Leader Maxie

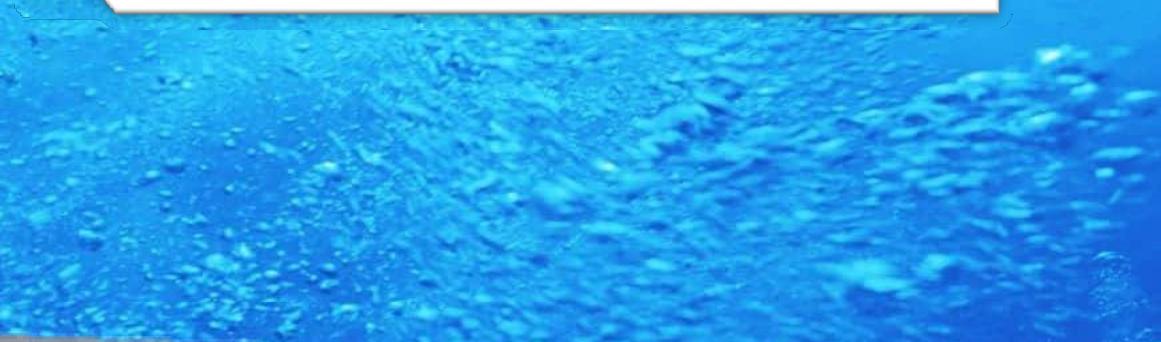

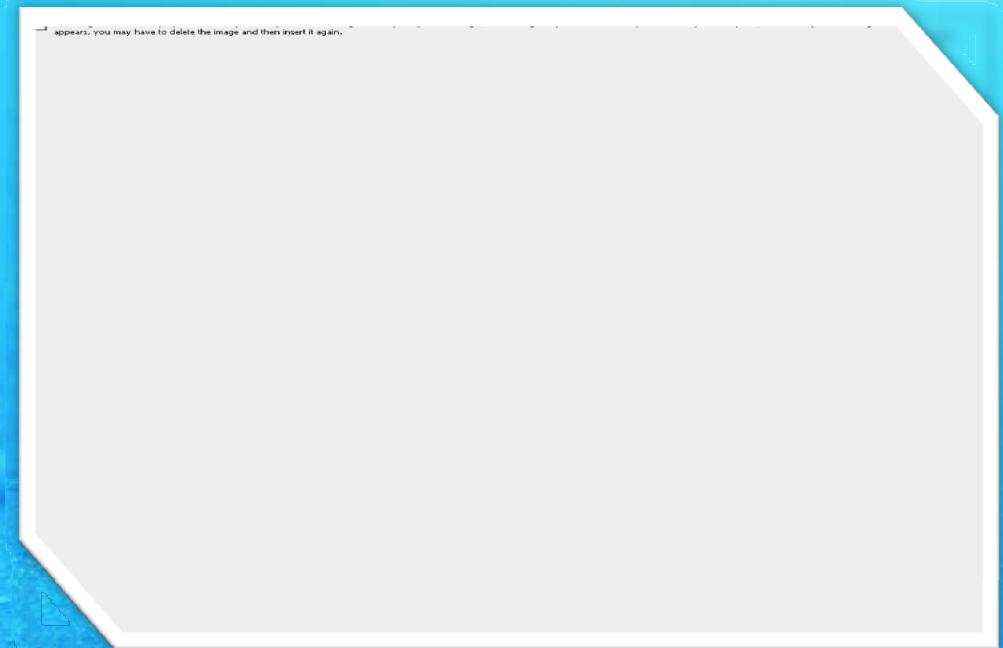

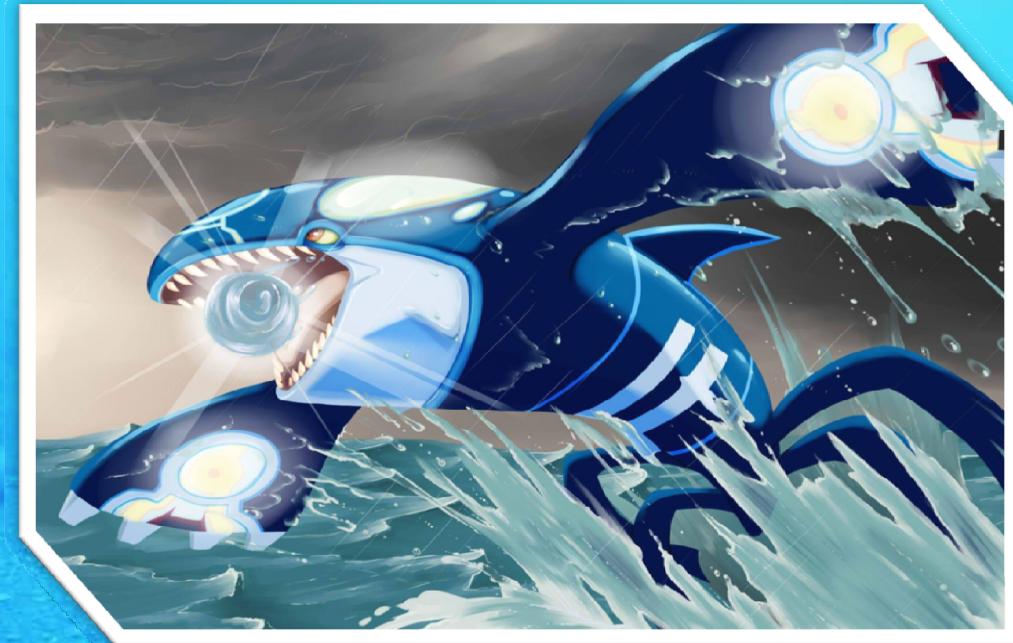

e bit off more than he can chew with you.

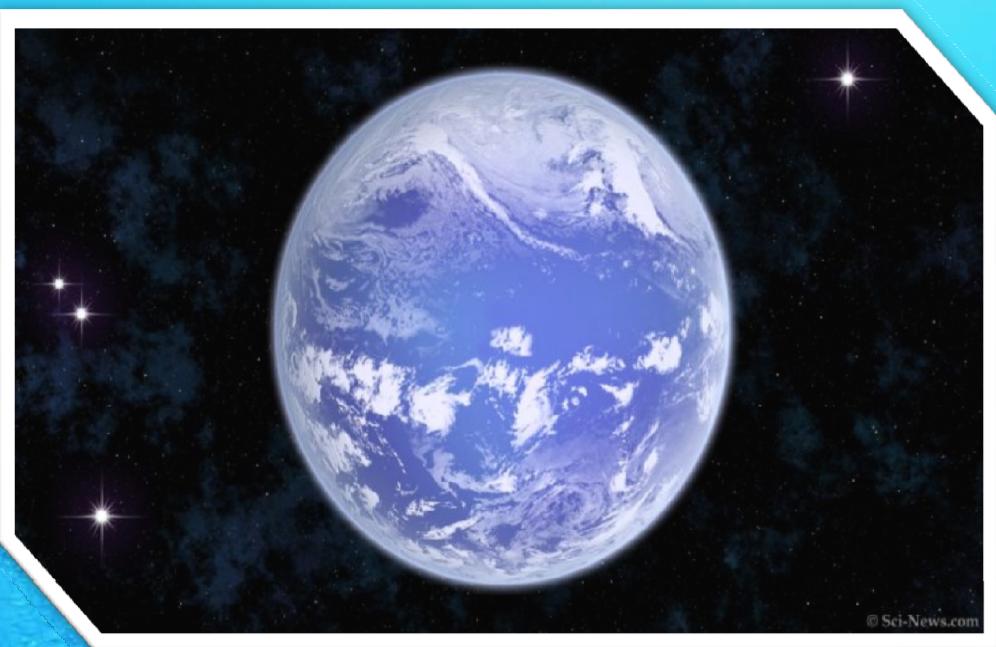

Defeated Magma Leader Maxie!

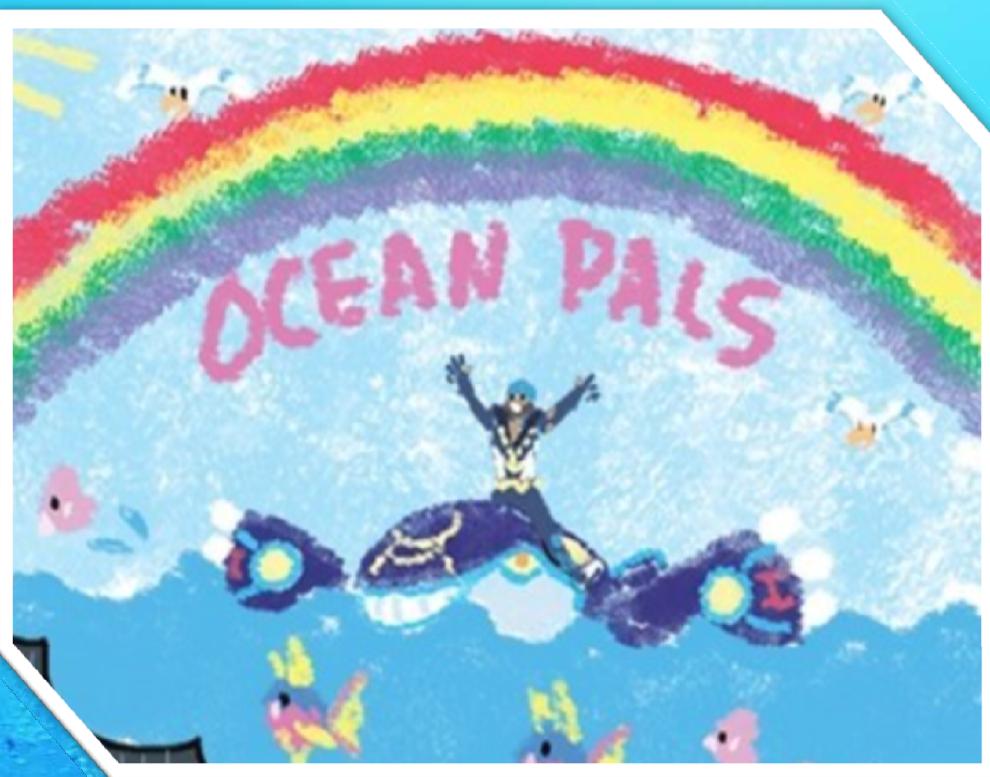

to power-wash his broadside! If those wee seadra of yours did all that...

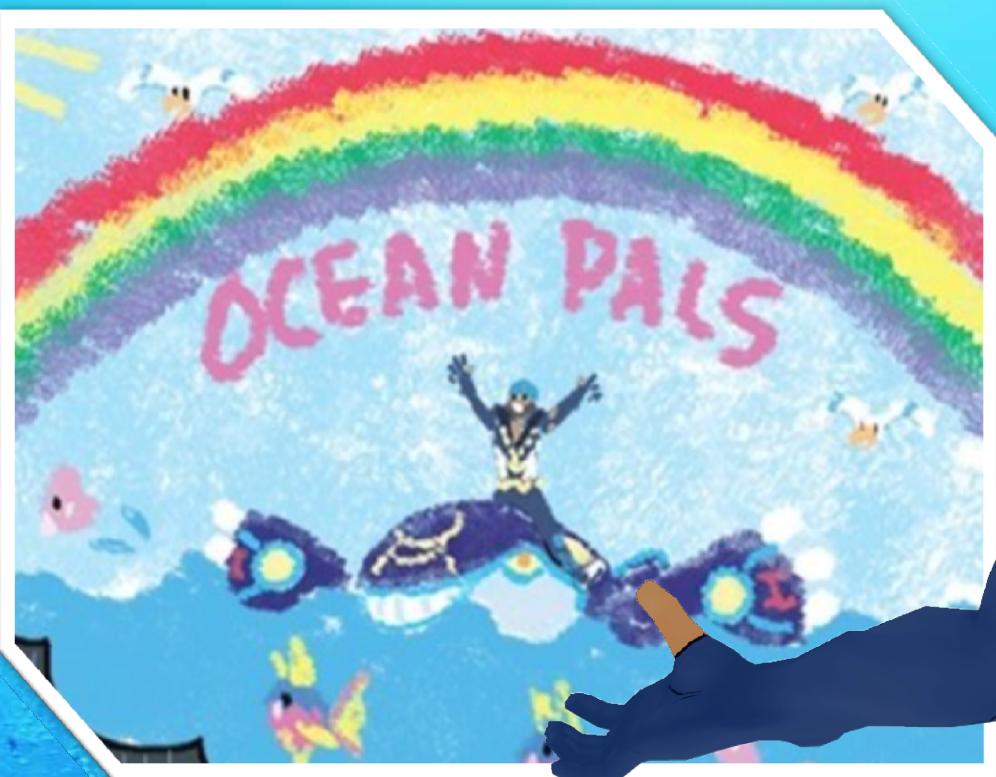

imagine what a Pokémon of *true* power could do.
One, us waking Kyogre, restoring it to its Primal Form...!

whole planet would be a Pokémon Paradise! With purified oceans, and Pokémon used to enjoy before humans turned it to bilge water!

we, the members of Team Aqua, can be the last humans...
ive in eternal pokéharmony!!!

WAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!!

...? You scamps don't want to join?
I had your uniforms all ready to go...

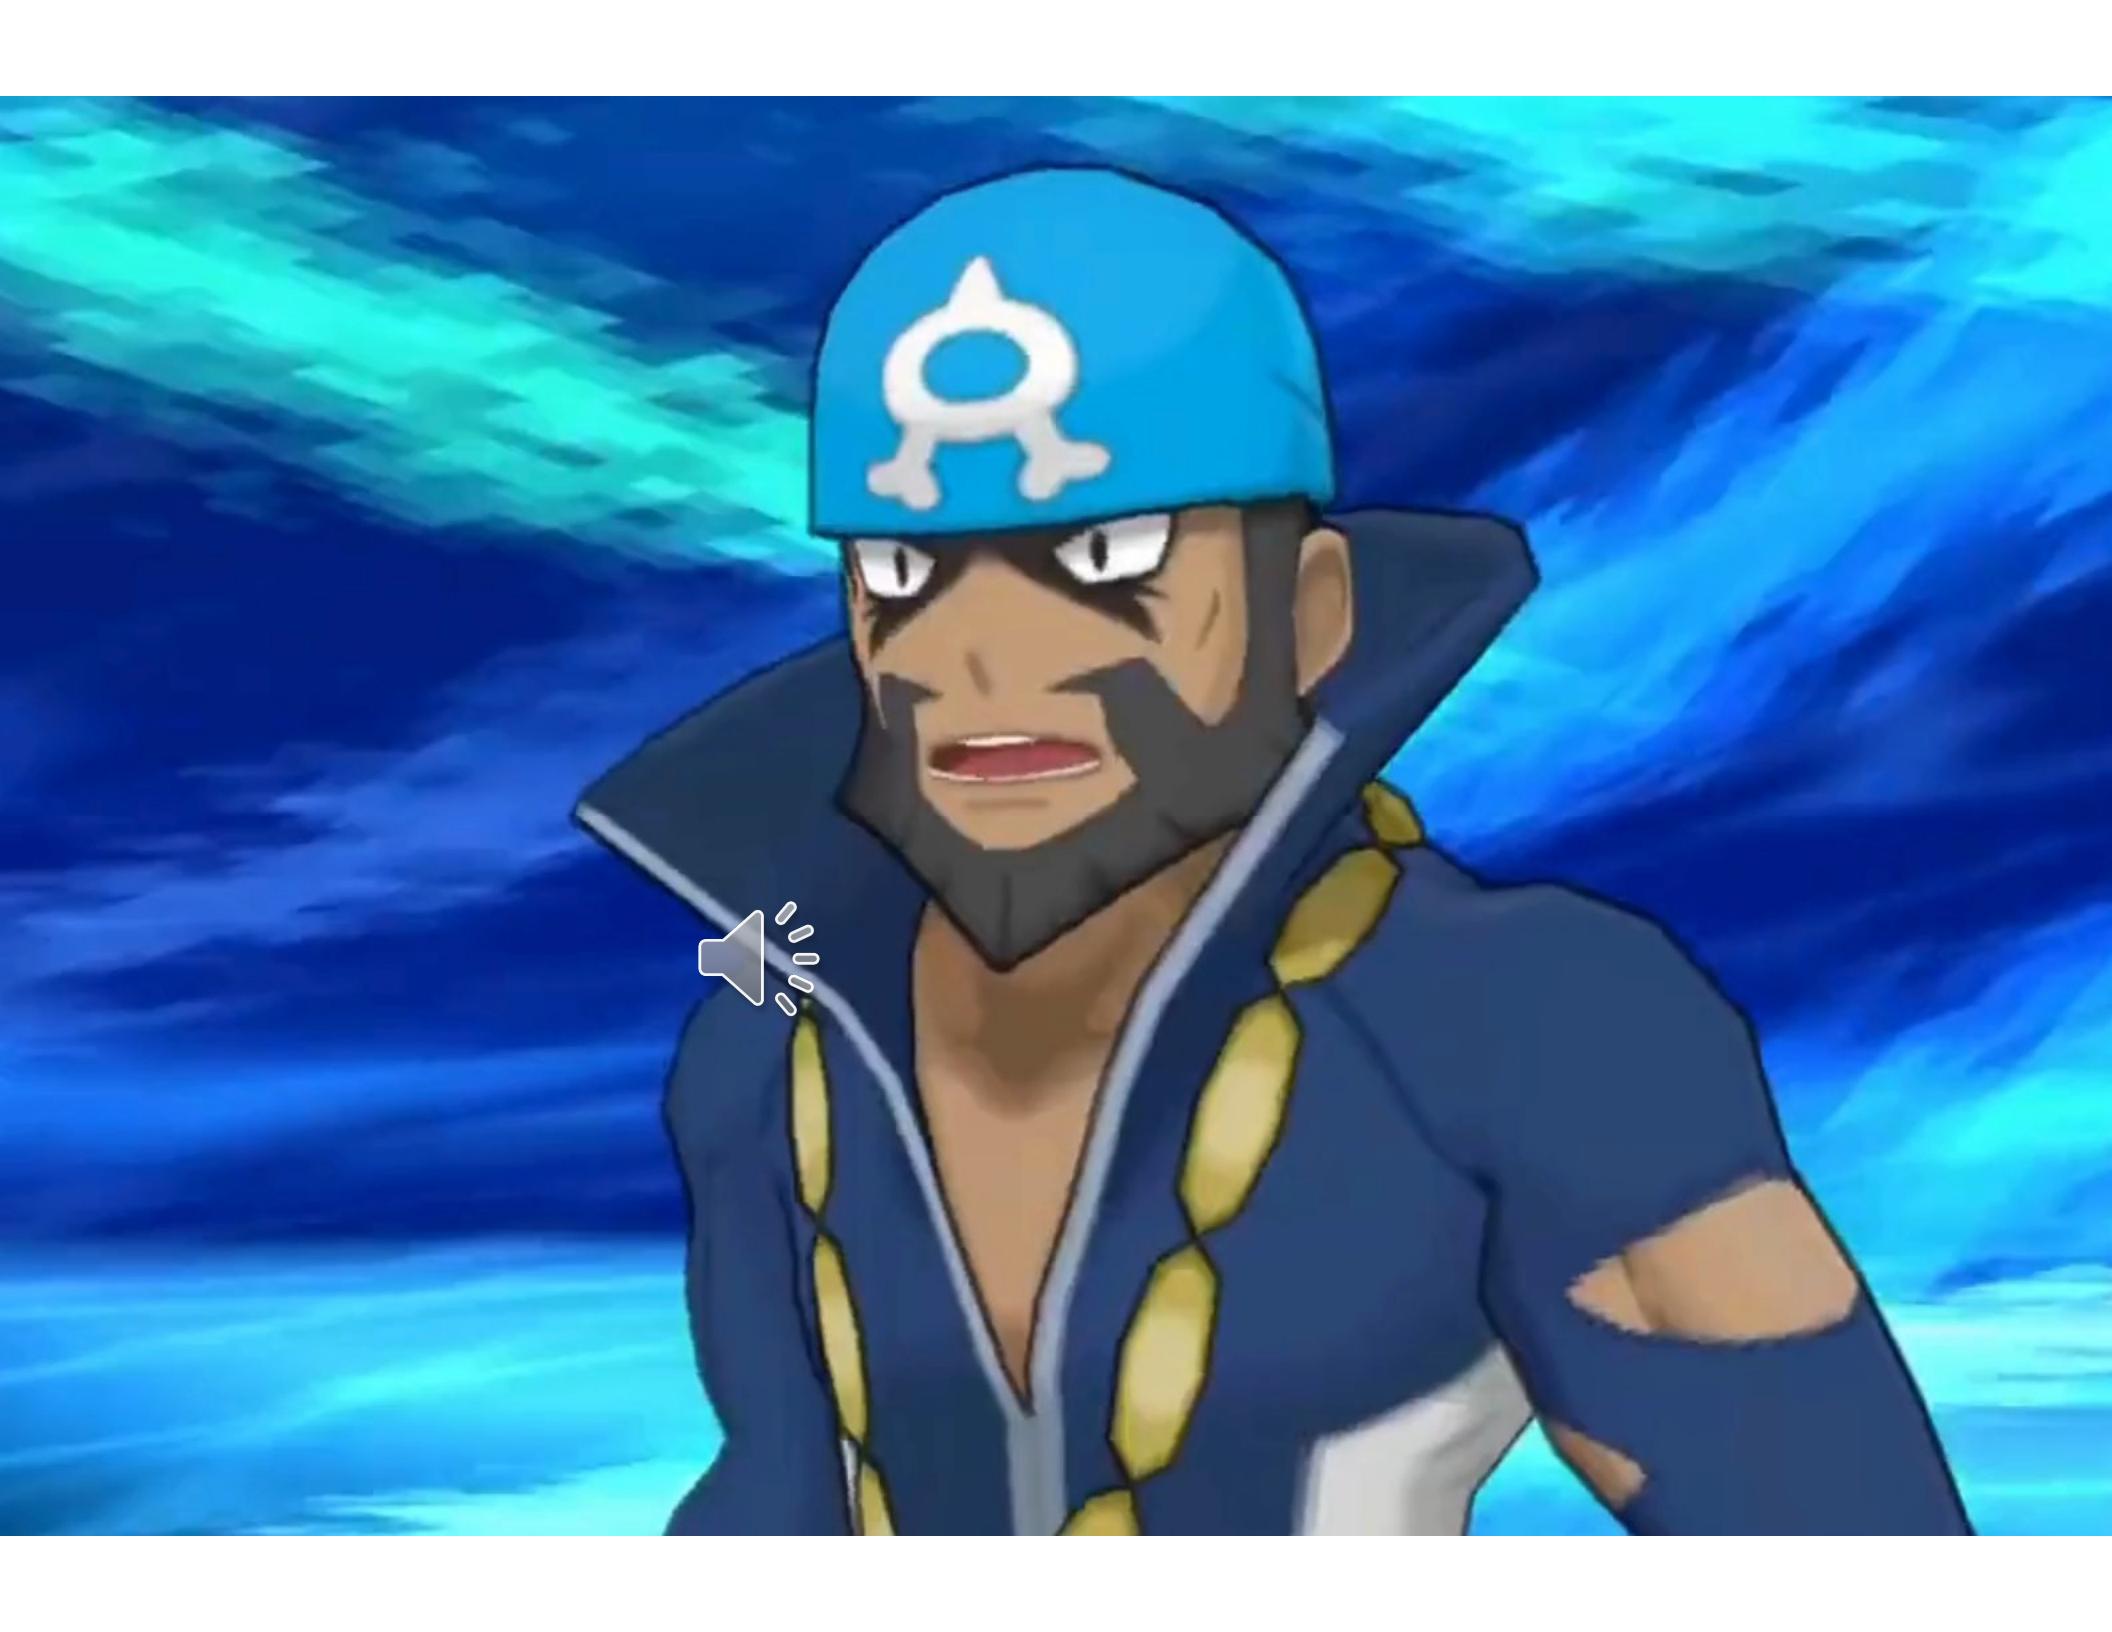

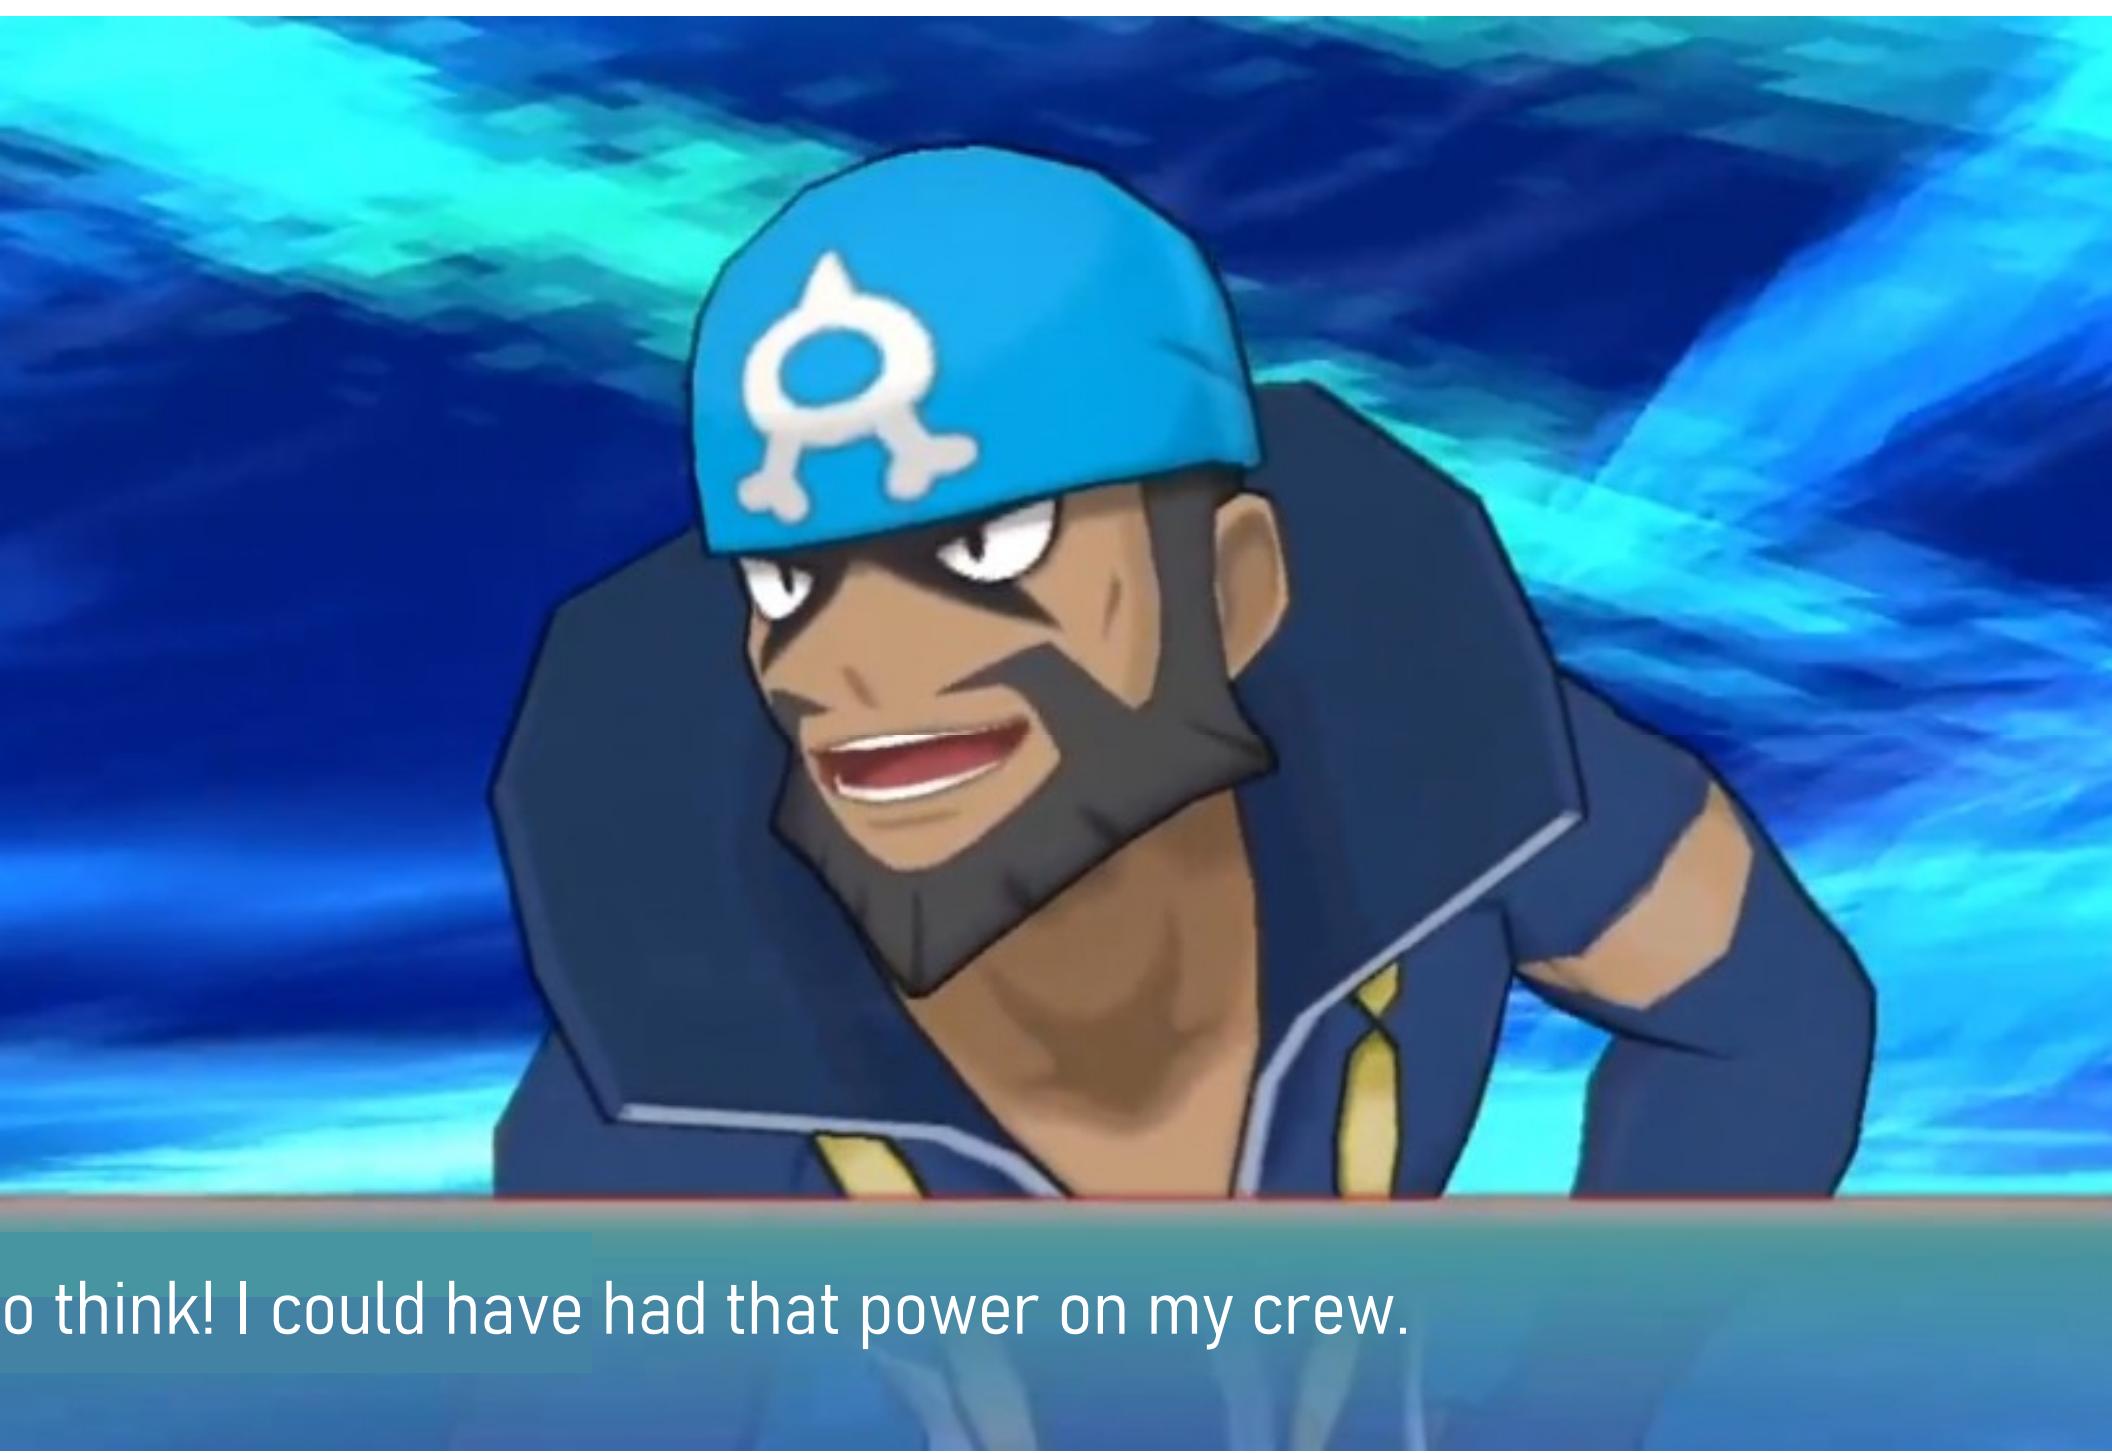

uh!! Fine!!
to swab you away!!

I are challenged by
Gym Leader Archie!

o think! I could have had that power on my crew.

Defeated Aqua Leader Archie!

astic work! I knew I could trust you to handle that hooligan.
re we leave, I want to make one thing very clear.

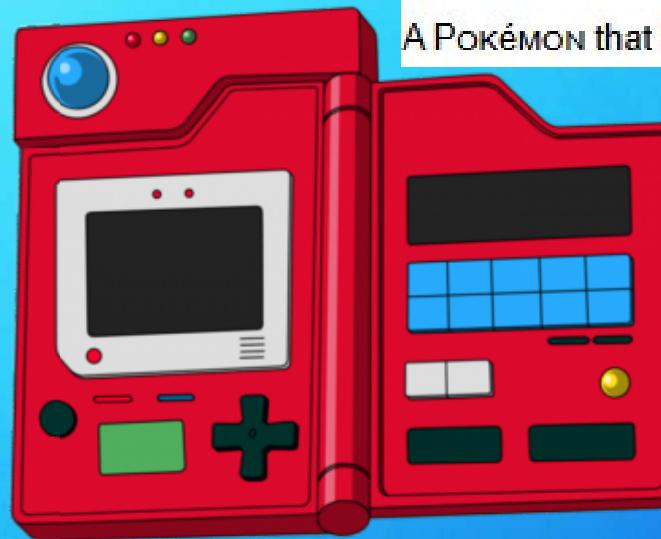

We got one thing right: making change responsibly takes a very long time. That doesn't mean it's pointless.

These PokéMON were once near extinction due to poaching. Following protective regulations, there is now an overabundance of them.

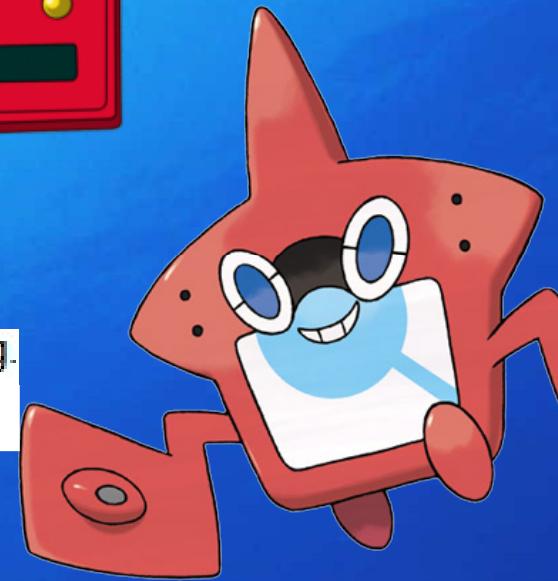

In the twenty years since I released the Pokédex, Lapras went from a dying breed of PokéMON to a thriving So remember...

A PokéMON that has been overhunted almost to extinction.

It can ferry people across the ocean.

TOGETHER
WE CAN
MAKE A
DIFFERENCE

Until next time, trainers

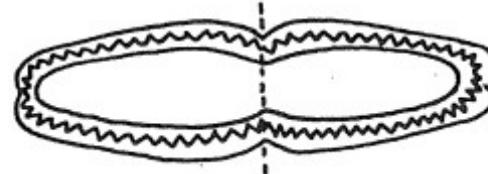

①

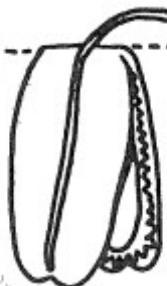

Glue white teeth
on one side of head.

②

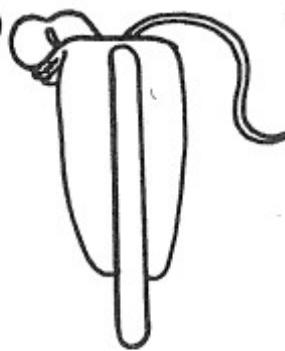

Glue red mouth on
top of teeth.

③

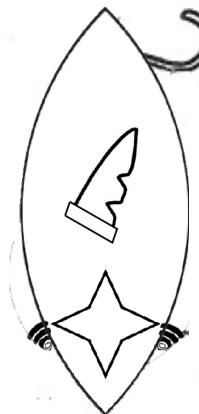

-- Fold head in
half on dotted
line. Glue $\frac{1}{2}$ of
string on one
side of folded
head, leaving the other
half free at the top.

④

Tape tongue
depressor
to the other
side.

⑤

Glue the shark fins to
each other, then glue
the tabs to the face
piece. Glue the face on
the side with the string
on it.
